ANNUAL ACTION PLAN 2024

KVK Agar Malwa

Year of sanction: 2017

1.1 Name of the Programme Coordinator with phone & mobile No

Name	Telephone / Contact		
	Office	Mobile	Email
Dr. A.K. Dixit	07362-299106	9893424607	kvk.agarmalwa@rvskvv.net

1.2 Staff Position on (31th Dec.2023)

S. No.	Sanctioned post	Name of the incumbent	Designation	Discipline	Pay Scale with present basic (Rs.)	Date of Joining	Date of joining this KVK (Year)	Contact No.	Email ID	Photo
1	Programme Coordinator	Dr. A.K. Dixit	Principal Scientist and head	Soil Science	Pay level 14 basic 188200/-	14.09.2006	2022	9893424607	kvk.agarmalwa@rvskvv.net	
2	Subject Matter Specialist	Dr. R.P.S. Shaktawat	Senior Scientist	Agronomy	Pay level 13A 147900/-	26.03.2007	2018	9424807829	kvk.agarmalwa@rvskvv.net	
3	Subject Matter Specialist									
4	Subject Matter Specialist									
5	Subject Matter Specialist									
6	Subject Matter Specialist									
7	Subject Matter Specialist									
8	Programme Assistant									
9	Computer Programmer/ Programme Assistant									
10	Farm Manager									
11	Assistant									
12	Jr. Stenographer / Comp. Operator	Sh Harsh Rathore	Jr. Stenographer cum computer operator	Computer science	Pay level 7 basic 28700	17.09.2019	2019	9074303172	kvk.agarmalwa@rvskvv.net	
13	Driver	Sh Chandan Singh Lodhi	Driver	-	Pay level 9 basic 54100	01.09.1985	2019	9827593833	kvk.agarmalwa@rvskvv.net	
14	Driver									
15	Supporting staff									
16	Supporting staff									

1.3 Total land with KVK (in ha): 20.00 ha.

S. No.	Item	Area (ha)
1	Under Buildings	1.0
2	Under Demonstration Units	2.0
3	Under Crops	3.0
4	Orchard/Agro-forestry	1.0
5	Others (specify)	13.0
Total		20.0

1.4 Infrastructural Development:

A) Buildings

S. No.	Name of building	Source of funding	Stage					
			Complete			Incomplete		
			Completion Date	Plinth area (Sq.m)	Expenditure (Rs.)	Starting Date	Plinth area (Sq.m)	Status of construction
1	Administrative Building	ICAR	18-10-2020	284.0	133.58 Lakh			
2	Farmers Hostel	ICAR	21-12-2020	323.74	62.45 Lakh			
3	Staff Quarters (6)							
4	Demonstration Units (2)							
5	Fencing							
6	Rain Water harvesting system							
7	Threshing floor							
8	Farm godown							

B) Vehicles

Type of vehicle	Year of purchase	Cost (Rs.)	Total kms. Run	Present status
Tractor (Power Tiller)	2019	691534/-		Working condition
Motor Cycle 2				
Bolero(Jeep)	2019	654897/-		Working condition
Other (Pl. specify)				

C) Equipment & AV aids

Name of the equipment	Year of purchase	Cost (Rs.)	Present status
Projector	2019	39530	Working condition
Computer	2019	37000	Working condition
Inverter 1100 VA (2)	2019	5300	Working condition
Inverter Battery (2)	2019	14600	Working condition
Television (LED) (2)	2021	98900	Working condition

1.5.(A). Details of SAC meeting to be conducted in the year

Sl. No.	Tentative Date
1	25 May
2	10 October

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 1 Agriculture (Soybean- Wheat/Chickea/Mustard)- Horticulture (Mandarin)	Hot moist semi arid ecological situation

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	AES – 1	Malwa plateau zone

SWOT Analysis of each Agro-Ecological Situations of district AES-1 (name)

Strength	Weakness	Opportunities	Threats
•	•	•	•

Land Use Pattern

Particulars	Area “000 ha”
Total Geographical area	272578
Forest	6118
Waste Land	

Other than cultivated area	
Cultivable waste and alkaline land	
Pastures	
Bushes	
Current Fallow	
Other Fallow	
Agricultural Land	196463
Area Sown	178490
Kharif	178056
Rabi	106605
Zaid	
Cropping Intensity	159.48%

Irrigated Area with Different Sources:

S. No.	Description	Area (ha)
1	Canal 8	
2	Well	
3	Tube well	
4	Ponds 19	
5	Others	

Soil types

S. No.	Soil type	Characteristics	Area "000 ha"
1	Black cotton soil	These soils are dark grey to black in color, composed of clay and are plastic & sticky in nature. These soils are fertile in nature and derived from decomposition of trappean rocks having thickness of 15 cm to 2m .	60732
2	Lateritic soil	These soils consist of sandy loam to clayey loam and brick red to red in colour. These soils are derived from weathered ferruginous basalt and are found around Agar and Barod blocks.	139021
3	Alluvium soil	The alluvium is of mixed origin & comprises of silt & clay and admixtures of these in varying properties. The occurrence of alluvium is confined to the bank of stream and rivers and usually 3 to 4 m in thickness.	72825

Note: Figure. In parenthesis denotes the percentage of total area.

Area, Production and Productivity of major crops cultivated in the district

S. No	Crop	Area (ha)	Production (Qt.)	Productivity (Q /ha)
1.	Soybean	129200.00	98830.00	7.65
2.	Til	600.00	303.60	5.06
3.	Groundnut	990.00	1049.00	10.60
4.	Mustard	11000.00	13420.00	12.20
5.	Linseed	400.00	340.00	8.50
6.	Urd	14750.00	7370.00	5.00
7.	Moongbean	7621.00	4070.00	5.34
8.	Tur	1760.00	1980.00	11.25
9.	Gram	58000.00	89900.00	15.50
10.	Pea	700.00	10150.00	145.00
11.	Lentil	10000.00	12500.00	12.50
12.	Maize	13880.00	30800.00	22.19
13.	Jowar	450.00	590.00	13.11
14.	Wheat	65000.00	299000.00	46.00
15.	Barley	30.00	106.20	35.40
16.	Aonla	479.00	3803.26	79.40
17.	Ber	62.00	4463.38	719.90
18.	Custard apple	280.00	3754.24	134.08

19.	Guava	700.00	8988.00	128.40
20.	Jack fruit	40.00	985.52	246.38
21.	Mandarin	37900.00	682200.00	180.00
22.	Lime	665.00	10832.85	162.90
23.	Mango	671.00	4987.22	74.33
24.	Papaya	288.00	3861.50	134.08
25.	Pomegranate	1255.00	8149.97	64.94
26.	Sweet orange	865.00	14990.45	173.30
27.	Beans	95.00	1128.60	118.80
28.	Bitter gourd	108.00	704.80	65.26
29.	Bottle gourd	220.00	4319.92	196.36
30.	Brinjal	355.00	4867.05	137.10
31.	Cabbage	372.50	5740.21	154.10
32.	Carrot	95.00	1035.12	108.96
33.	Cauliflower	141.00	1868.25	132.50
34.	Cucumber	102.00	1205.64	118.20
35.	Green chilly	1580.00	31600.00	200.00
36.	Pumpkin	118.00	1398.18	118.49
37.	Bhindi	538.00	3941.92	73.27
38.	Onion	3700.00	112850.00	305.00
39.	Pea (green)	795.00	7592.25	95.50
40.	Potato	1725.00	36225.00	210.00
41.	Radish	98.00	1165.02	118.88
42.	Ridge gourd	70.00	795.20	113.60
43.	Sweet potato	59.00	576.70	97.75
44.	Leafy vegetables	126.00	1380.07	109.53
45.	Tomato	525.00	13125.00	250.00
46.	Other vegetables	125.00	1125.00	90.00
47.	Ajwain	12.00	12.00	10.00
48.	Coriander	18580.00	14362.33	7.73
49.	Cumin	20.00	24.55	12.28
50.	Fennel	13.00	15.80	12.15
51.	Fenugreek	1375.00	3162.50	23.00
52.	Garlic	6550.00	58950.00	90.00
53.	Ginger	70.00	1383.12	197.59
54.	Red Chilly	485.00	2608.32	53.78
55.	Turmeric	68.00	1373.39	201.97
56.	Other spices	66.50	28.60	4.30
57.	Chrysanthemum	12.00	65.46	54.55
58.	Gladiolus	17.00	84.18	49.52
59.	Jasmine	7.50	15.00	20.00
60.	Marigold	856.00	4686.59	54.75
61.	Rose	64.00	298.00	46.56
62.	Other flowers	52.00	90.54	17.41
63.	Other aromatic plants	665.00	756.96	11.38
64.	Aswagandha	1165.00	1165.80	10.01
65.	Isabgol	40.00	60.00	15.00
66.	Safed musali	110.00	409.75	37.25
67.	Other medicinal plants	1650.00	3036.00	18.40

Weather data (Jan, 2024- Dec., 2024)

Details of Operational area / Villages (2024)

Sl. No.	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Agar	Agar	Jogpura	Soybean, Wheat	Low yield of soybean due to incidence of insect pest and diseases in old variety	Varietal replacement
2	Agar	Agar	Jogpura	Soybean, Wheat	Low yield of wheat due to incidence of root aphid insect	IPM
3	Agar	Agar	Kankar	Soybean, Wheat	Low yield of soybean due to moisture stress at flowering and pod filling stage	ICM
4	Agar	Agar	Hamlakhedi	Soybean, Blackgram, Wheat	Low yield of blackgram due to incidence of insect pest and diseases in old variety	Varietal replacement
5	Agar	Agar	Malikhedi	Soybean, Mustard	Low yield of mustard due to incidence of susceptibility against insect pest and diseases in old variety	Varietal replacement
6	Barod	Barod	Ralayati	Soybean, Wheat/Chickpea	Low yield of soybean due to infestation of girdle beetle and semiloopers	IPM
7	Agar	Agar	Gurukhedi	Soybean, Mustard	Low yield of soybean due to incidence of high weed population	IWM
8	Agar	Agar	Gurukhedi	Soybean, Mustard	Low yield of soybean due to infestation of stem fly	IPM
9	Agar	Agar	Gurukhedi	Soybean,	Low yield of mustard	Varietal

				Mustard	due to incidence of susceptibility against insect pest and diseases in old variety	replacement
10	Barod	Barod	Harnavada	Soybean, Wheat/Chickpea	Low yield of chickpea due to incidence of insect pest and diseases in old variety	Varietal replacement
11	Susner	Susner	Kajlas	Soybean, Lentil	Low yield of lentil due to injudicious use of chemicals in farming	NF

Priority / Thrust areas

S. No.	Particulars
1.	Varietal replacement
2.	IPM
3	ICM
4	IWM
5	Natural Farming

TECHNICAL PROGRAMME

A. Details of targeted mandatory activities by KVK

OFT		FLD and CFLD	
1		2	
Number of OFTs	Number of Farmers	Number of FLDs	Number of Farmers
10	100	110.8	277

Training		Extension Activities	
3		4	
Number of Courses	Number of Participants	Number of activities	Number of participants
44	880	75	11000

Seed Production (Qtl.)	Planting material (Nos.)
120	0

B. Abstract of interventions to be undertaken

S. No.	Thrust area	Crop/ Enterprise	Identified Problem	Interventions					
				Title of OFT if any	Title of FLD if any	Title of Training if any	Title of training for extension personnel if any	Extension activities	Supply of seeds, planting materials etc.
1	IPM	Soybean	Low productivity due to damage by stem fly during crop growth of soybean	--	Demonstration of insecticides for stem fly management in soybean	Insect management in soybean	Improved production technology of soybean	Field day	Insecticide
2	IWM	Soybean	Low productivity due to high weed population in soybean	--	Demonstration of diclosulam herbicide for weed management in soybean	Integrated weed management in soybean	Improved production technology of soybean	Field day	Herbicide
3	Varietal	Soybean	Low yield of	Evaluation	--	Improv	Improved	Field visit	Seed

	evaluation		soybean due to incidence of susceptibility against insect pest and diseases in old variety	of high yielding variety RVSM 1135 for higher productivity of soybean		ed varieties of soybean	production technology of soybean		
4	Natural Farming	Soybean	Low yield of soybean due to injudicious use of chemical in farming	Assessment of natural farming for production of soybean	--	Importance of natural farming	Improved production technology of soybean	Field visit	--
5	ICM	Soybean	Low yield of soybean due to scarcity of moisture during the pod filling stage in soybean	Assessment of sowing technique against scarcity of moisture in soybean	--	Importance of moisture conservation in production of soybean	Improved production technology of soybean	Field visit	--
6	Integrated nutrient management	Soybean	Low yield due to imbalance and injudicious use of fertilizer	Assessment of sulphur nutrition in soybean for productivity	--	Importance of balance fertilization in soybean	Improved production technology of soybean	Field visit	--
7	Integrated pest management	Soybean	Low yield of soybean due to incidence of insect pest and diseases	Assessment of new molecule for seed treatment to control insect, pest and diseases	--	Integrated pest management in soybean	Improved production technology of soybean	Field visit	--
8	Varietal evaluation	Wheat	Low yield of wheat due to incidence of susceptibility against insect pest and diseases in old variety	Evaluation of high yielding variety HI 1634 for higher productivity of wheat	--	Improved varieties of wheat	Improved production technology of wheat	Field visit	Seed
9	Natural Farming	Wheat	Low yield of wheat due to injudicious use of chemicals in farming	Assessment of natural farming for production of wheat	--	Importance of natural farming	Improved production technology of wheat	Field visit	--
10	Integrated nutrient management	Wheat	Low yield due to injudicious and imbalance nutrition	Assessment of zinc nutrition in wheat for higher productivity	--	Importance of balance nutrition in wheat	Improved production technology of wheat	Field visit	--
11	Integrated nutrient management	Mustard	Low yield of mustard due to injudicious use of chemical like	Assessment of sulphur nutrition in mustard for higher	--	Importance of balance nutrition in	Improved production technology of mustard	Field visit	--

			sulphur	productivity		mustard			
12	IPM	Wheat	Low yield due to damage through root aphid in wheat	--	Demonstration of insecticide for management of root aphid in wheat	Integrated pest management in wheat	Improved production technology of wheat	Field day	Insecticide
13	ICM	Mandarin	Low yield and poor quality due to mismanagement in mandarin	Assessment of regeneration techniques for better fruiting and quality production of mandarin	--	regeneration techniques for better fruiting and quality production of mandarin	regeneration techniques for better fruiting and quality production of mandarin	Field visit	--

Technologies to be assessed

A.1 Abstract on the number of technologies to be assessed in respect of crops

Thematic areas	Cereals	Oilseeds	Pulses	Commercial Crops	Vegetables	Fruits	Flower	Plantation crops	Tuber Crops	TOTAL
Varietal evaluation	1	1	0	0	0	0	0	0	0	2

Details of On Farm Trial (OFT)

OFT-1

Crop / Enterprise	Soybean	
Title of on farm trial	Evaluation of high yielding variety RVSM 1135 for higher productivity of soybean	
Problem diagnosed	Low yield of soybean due to incidence of susceptibility against insect pest and diseases in old variety	
Farmers' Practices	Use of old variety JS 9560	
Details of technologies selected for assessment	T ₁	JS 2034 ,Seed treatment with rhizobium culture, PSB culture, Thiomethoxam 30 %FS @10ml/kg seed weed management through Diclosulam; Spray of rynaxypyr 100 ml /ha, Yellow sticky traps 20/ha + Spray Thiamethoxam 25%WG @100ml/ha
	T ₂	RVSM 1135, Seed treatment with rhizobium culture, PSB culture, Thiomethoxam 30 %FS @10ml/kg seed weed management through Diclosulam; Spray of rynaxypyr 100 ml /ha, Yellow sticky traps 20/ha + Spray Thiamethoxam 25%WG @100ml/ha
Source of technology	ICAR- IISR, Indore	
Plot size	0.4 ha	
No. of farmers	10	
Total cost	14200	

Critical input	Seed
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	Number of pods/plant, Seeds/pod, Test weight (g), Seed yield (q/ha), Economics

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Evaluation of high yielding variety RVSM 1135 for higher productivity of soybean
Year/Season:	Kharif 2024
Farming situation:	Rainfed
Problem diagnosis:	Low yield of soybean due to incidence of susceptibility against insect pest and diseases in old variety
Thematic area:	Varietal evaluation
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of old variety JS 9560
T2 –Recommended Practice-	JS 2034 ,Seed treatment with rhizobium culture, PSB culture, Thiomethoxam 30 %FS @10ml/kg seed weed management through Diclosulam; Spray of rynaxypyr 100 ml /ha, Yellow sticky traps 20/ha + Spray Thiamethoxam 25%WG @100ml/ha
T3- Recommended Practice-	RVSM 1135, Seed treatment with rhizobium culture, PSB culture, Thiomethoxam 30 %FS @10ml/kg seed weed management through Diclosulam; Spray of rynaxypyr 100 ml /ha, Yellow sticky traps 20/ha + Spray Thiamethoxam 25%WG @100ml/ha
Date of sowing:	June/July, 2024
Date of harvesting:	
Source of technology:	ICAR- IISR, Indore
Characteristics of technology:	
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-2

Crop / Enterprise	Soybean
Title of on farm trial	Assessment of natural farming for production of soybean
Problem diagnosed	Low yield of soybean due to injudicious use of chemical in farming
Farmers' Practices	Use of chemicals in production of soybean
Details of technologies selectedfor assessment	T ₁ Organic farming system (use of INM, IPM) for production of soybean
	T ₂ Natural farming system (use of Jivamrit, Bijamrit, Brahmastra, Agniastra) for production of soybean
Source of technology	Gurukul, Kurukhshetra
Plot size	0.4 ha
No. of farmers	10
Total cost	8000
Critical input	Jivamrit, Bijamrit,Brahmastra, Agniastra

Performance indicators: (iv) Technical- yield (q/ ha) (v) Economic (vi) Social – Employment generation	Number of pods/plant, Seeds/pod, Test weight (g), Seed yield (q/ha), Economics , soil organic carbon

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of natural farming for production of soybean
Year/Season:	Kharif, 2024
Farming situation:	Rainfed
Problem diagnosis:	Low yield of soybean due to injudicious use of chemical in farming
Thematic area:	Natural Farming
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of chemicals in production of soybean
T2 –Recommended Practice-	Organic farming system (use of INM, IPM) for production of soybean
T3- Recommended Practice-	Natural farming system (use of Jivamrit, Bijamrit, Brahmastra, Agniastra) for production of soybean
Date of sowing:	June/July, 2024
Date of harvesting:	
Source of technology:	Gurukul, Kurukshetra
Characteristics of technology:	
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-3

Crop / Enterprise	Soybean
Title of on farm trial	Assessment of sowing technique against scarcity of moisture in soybean
Problem diagnosed	Low yield of soybean due to scarcity of moisture during the the pod filling stage in soybean
Farmers' Practices	Use of traditional seed drill
Details of technologies selectedfor assessment	T ₁ Raised bed seed drill
	T ₂ Raised bed seed drill with BBF system
Source of technology	ICAR- IISR, Indore
Plot size	0.4 ha
No. of farmers	10
Total cost	2000
Critical input	Sowing
Performance indicators: (vii) Technical- yield (q/ ha) (viii) Economic (ix) Social – Employment generation	Number of pods/plant, Seeds/pod, Test weight (g), Seed yield (q/ha), Economics , soil moisture

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of sowing technique against scarcity of moisture in soybean
Year/Season:	Kharif, 2024
Farming situation:	Rainfed
Problem diagnosis:	Low yield of soybean due to scarcity of moisture during the the pod filling stage in soybean
Thematic area:	Soybean – wheat, ICM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of traditional seed drill
T2 –Recommended Practice-	Raised bed seed drill
T3- Recommended Practice-	Raised bed seed drill with BBF system
Date of sowing:	June/July, 2024
Date of harvesting:	
Source of technology:	ICAR- IISR, Indore
Characteristics of technology:	
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-4

Crop / Enterprise	Soybean
Title of on farm trial	Assessment of sulphur nutrition in soybean for productivity
Problem diagnosed	Low yield due to imbalance and injudicious use of fertilizer
Farmers' Practices	Use of 100 kg/ha DAP or NPK
Details of technologies selectedfor assessment	T ₁ Use of 25:60:40 kg/ha NPK
	T ₂ Use of 25:60:40:20 kg/ha NPKS
Source of technology	ICAR- IISR, Indore
Plot size	0.4 ha
No. of farmers	10
Total cost	8000
Critical input	Sulphur
Performance indicators: (x)Technical- yield (q/ ha) (xi)Economic (xii)Social – Employment generation	Number of pods/plant, Seeds/pod, Test weight (g), Seed yield (q/ha), Economics

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of sulphur nutrition in soybean for productivity
Year/Season:	Kharif, 2024
Farming situation:	Rainfed

Problem diagnosis:	Low yield due to imbalance and injudicious use of fertilizer
Thematic area:	INMS
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of 100 kg/ha DAP or NPK
T2 –Recommended Practice-	Use of 25:60:40 kg/ha NPK
T3- Recommended Practice-	Use of 25:60:40:20 kg/ha NPKS
Date of sowing:	June/July, 2024
Date of harvesting:	
Source of technology:	ICAR- IISR, Indore
Characteristics of technology:	
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-5

Crop / Enterprise	Soybean
Title of on farm trial	Assessment of new molecule for seed treatment to control insect, pest and diseases
Problem diagnosed	Low yield of soybean due to incidence of insect pest and diseases
Farmers' Practices	Use of Carbendazim 12% + Mencozeb 63% @ 3 g/kg seed
Details of technologies selectedfor assessment	T ₁ Thairum + carboxyl @ 3g/kg seed
	T ₂ Azoxystrobin 2.5% + Thiophanate Methyl 11.25% + Thiomethoxam 25 %FS @10ml/kg seed
Source of technology	ICAR- IISR, Indore
Plot size	0.4 ha
No. of farmers	10
Total cost	2000
Critical input	Azoxystrobin 2.5% + Thiophanate Methyl 11.25% + Thiomethoxam 25 %FS
Performance indicators: (xiii) Technical- yield (q/ ha) (xiv) Economic (xv)Social – Employment generation	Number of pods/plant, Seeds/pod, Test weight (g), Seed yield (q/ha), Economics , No of diseased plants

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of new molecule for seed treatment to control insect, pest and diseases
Year/Season:	Kharif, 2024
Farming situation:	Rainfed
Problem diagnosis:	Low yield of soybean due to incidence of insect pest and diseases
Thematic area:	Integrated pest management
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Carbendazim 12% + Mencozeb 63% @ 3 g/kg seed
T2 –Recommended Practice-	Thairum + carboxyl @ 3g/kg seed
T3- Recommended Practice-	Azoxystrobin 2.5% + Thiophanate Methyl 11.25% + Thiomethoxam

	25 %FS @10ml/kg seed
Date of sowing:	June/July, 2024
Date of harvesting:	
Source of technology:	ICAR- IISR, Indore
Characteristics of technology:	
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel

OFT-6

Crop / Enterprise	Wheat	
Title of on farm trial	Evaluation of high yielding variety HI 1634 for higher productivity of wheat	
Problem diagnosed	Low yield of wheat due to incidence of susceptibility against insect pest and diseases in old variety	
Farmers' Practices	Use of old variety GW 322	
Details of technologies selected for assessment	T ₁	HI 1544, Sowing With FIRB, RDF 120:60:30:5 (NPKZn), Seed treatment with azotobactor, PSB culture, weed management through or clodinofof + metsulfuron 64 g/ha
	T ₂	HI 1634, Sowing With FIRB, RDF 120:60:30:5 (NPKZn), Seed treatment with azotobactor, PSB culture, weed management through or clodinofof + metsulfuron 64 g/ha
Source of technology	ICAR- IARI, Indore	
Plot size	0.4 ha	
No. of farmers	10	
Total cost	14100	
Critical input	Seed	
Performance indicators: (xvi) Technical- yield (q/ ha) (xvii) Economic (xviii) Social – Employment generation	Number of effective tillers/plant, Test weight (g), Seed yield (q/ha), Economics	

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Evaluation of high yielding variety HI 1634 for higher productivity of wheat
Year/Season:	Rabi, 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Low yield of wheat due to incidence of susceptibility against insect pest and diseases in old variety
Thematic area:	Varietal evaluation
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of old variety GW 322
T2 –Recommended Practice-	HI 1544, Sowing With FIRB, RDF 120:60:30:5 (NPKZn), Seed treatment with azotobactor, PSB culture, weed management through or clodinofof + metsulfuron 64 g/ha
T3- Recommended Practice-	HI 1634, Sowing With FIRB, RDF 120:60:30:5 (NPKZn), Seed treatment with azotobactor, PSB culture, weed management through

	or clodinofop + metsulfuron 64 g/ha
Date of sowing:	November, 2024
Date of harvesting:	
Source of technology:	ICAR- IARI, Indore
Characteristics of technology:	
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	
Recommendations for Deptt. Personnel

2. DETAILS OF DISTRICT

KVK Name	Agro-climatic zone	No . of Blocks	No. of Panchayats	Population	Literacy	SC and ST Population	No. of farmers	Average land holding
Alirajpur	Jhabua Hills Zone (11 th)	06	288	7,28,677	36.1	92.67%	112000	

Alirajpur was forming the district of Madhya Pradesh on 17 may 2008. It has a total area of 2165.24 square kilometers. The district's boundaries include the neighboring states of Maharashtra and Gujarat; it is situated in the Malwa region of Madhya Pradesh. Many of the inhabitants are aboriginal. At least 55% of the total population of the district is Bhilala, 21% is Patlya, 15% is Bhil with the remaining 9% is made up by diverse groups. The town of Alirajpur serves as the district's administrative headquarters. Alirajpur is a drought prone district categorized under 11th Agro Climatic Zone named **Jhabua Hills Zone**.

Location & Geographical Area:

The district occupies an area of 2165.24 km². Alirajpur lies in the Jhabua hills region of Madhya Pradesh, near the border with Gujarat and Maharashtra

Particulars	Characteristics
Longitude	74°21'9"East

Latitude	22°18'19"North
Elevation	288 m MSL

Major farming systems/enterprises (based on the analysis made by the KVK)

S. No	Farming system/enterprise
1	Agriculture + Labour
2	Agriculture + Goatry+ Poultry + Animal husbandry

Description of Agro-climatic Zone & major agro ecological situations (based on soil and topography)

S. No	Agro-climatic Zone	Characteristics
1	11 th Zone – Jhabua Hills	1. Low, scanty and unevenly distributed rainfall 2. Shallow and poor soil 3. Scattered hilly rocks 4. Agricultural oriented economy

S. No	Agro ecological situation	Characteristics
1	AES-1 : Petlawad	Medium black to red yellow soil, few small irrigation tanks, dug wells and bore wells. Rainfed farming, Major crops including cotton, soybean, wheat, gram, maize and vegetable crops particularly hybrid tomato. Dairying is the tertiary source of income
2	AES-2 : Thandla, Meghanagar, Rama, Jhabua, Ranapur	Red sandy loam to red yellow soils. Poor in soil fertility and soil depth is shallow. Major crops- maize, cotton, soybean, wheat, gram. Dry land agriculture is predominant in this AES. Less emphasis on dairying and horticulture
3	AES-3 : Jobat, Bhabra, Alirajpur, Udaigarh, Katthiwara, Sondwa	Mostly red sandy loam, red yellow, alluvial & mixed soils. Major area is under rainfed situation. Main crops are Urd, Maize, Bajra, wheat and Gram. Dairy is not a vital enterprise.

Soil types-1. Medium Black soil 2. Sandy loam soil (Red Yellow soil) 3. Skeletal soil

Area under different crops:

Mono cropping is predominant in the district. During rabi season, vegetables are grown in some patches with irrigation facility. The cropping intensity is only 121 %. The areas under major crops grown are given below:

S.No.	Crop	Area (ha)	Crop	Area (ha)
Kharif			Rabi	
1	Cotton	8990	Wheat	22500
2	Soybean	18613	Gram	12200
3	Maize	41100	Maize	12200
4	Sorghum	13445	Mustard	200
5	Pearlmillet	13552	Zaid	
6	Green gram	1510	Green gram	150
7	Blackgram	55000	Ground nut	485

8	Pigeon pea	3730	Sesame	50
9	Ground nut	12500		

Cropping pattern-

Soybean – Chickpea, Soybean – Wheat
 Cotton – Wheat, Cotton – Maize,

Maize – Chickpea, Maize – Wheat
 Blackgram – Chickpea, Blackgram – fellow

Irrigation by Different Sources:

S.No.	Source of Irrigation	Area irrigated (ha)	S.No.	Source of Irrigation	Area irrigated (ha)
1	Dug wells	11132	4	Canals	4773
2	Tube wells/Bore wells	721	5	Other Sources	11449
3	Tanks/Ponds	5682			

Specific farming problems of Alirajpur district:

- Mono cropping
- Poor soil health.
- Poor knowledge of tribal farmers to adopt up-to-date technical know-how.
- Poverty of tribal farmers compelling them to work as migrated labourers.
- Low milk yield from farm animals & low return from poultry.
- Under utilized forest, pasture, orchard etc.
- Soil degradation due to undulated topography & frequent use of chemical fertilizers.
- Drought situation due to erratic rainfall, lack of soil moisture conservation & rain-water harvesting practices.
- Low productivity of fruits & vegetable crops.
- Less farm mechanization

Weather data (Jan, 2024- Dec., 2024)

T3- Recommended Practice-	Thiacloprid 21.7 % SC @ 750ml/ha at 35 DAS
Date of sowing:	Last Week of June
Date of harvesting:	-
Source of technology:	NCIPM
Characteristics of technology:	Sustainable, Ecofriendly, economic, neonicotinoid -nerve toxin, Contact and stomach action with some systemic property
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

3

Name of Discipline	Horticulture
Title of on-farm trial:	Assessment of improved varieties of Fenugreek
Year/Season:	2024/Rabi
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to use local seed (Area: 108 ha.)
Thematic area:	Varietal Evaluation

No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Local Strain
T2 –Recommended Practice-	Ajmer Fenugreek -2
T3- Recommended Practice-	Ajmer Fenugreek -5
Date of sowing:	Last week of October
Date of harvesting:	-
Source of technology:	NRCSS, Ajmer
Characteristics of technology:	Variety medium in height, broad leaves with less bitterness, yeild-15-20 q
Name of Crop/Enterprises:	Fenugreek
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

4

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of insecticide- Emamectin Benzoate 5% S.G. in against fruit and Shoot borer in okra
Year/Season:	2024/Rabi
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to use local seed (Area: 1585 ha.)
Thematic area:	IPM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Quinalphos 25 % E.C. @ 1.5 L /ha
T2 –Recommended Practice-	Lamda Cyhalothrin 4.9 % CS @ 300 ml /ha at 30 & 45 DAS
T3- Recommended Practice-	Emamectin Benzoate 5% S.G. @ 150 g/ha at 30 & 45 DAS
Date of sowing:	Last week of October
Date of harvesting:	-
Source of technology:	CIB, 2016
Characteristics of technology:	Translaminar action, Sustainable, Ecofriendly, economic
Name of Crop/Enterprises:	Okra
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

5

Name of Discipline	Horticulture
Title of on-farm trial:	Assessment of high yielding varieties of Coriander
Year/Season:	2024/Rabi
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to use of local seed (Area: 285 ha)
Thematic area:	Varietal Evaluation
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Local seed
T2 –Recommended Practice-	RCR-436
T3- Recommended Practice-	ACR- 02
Date of sowing:	Last Week of October
Date of harvesting:	-
Source of technology:	NRCSS, Ajmer 2017-18
Characteristics of technology:	Resistant to stem gall and high yielding
Name of Crop/Enterprises:	Coriander
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

6

Name of Discipline	Horticulture
Title of on-farm trial:	Assessment of plastic mulch with drip irrigation in water melon
Year/Season:	2024/Summer
Farming situation:	Irrigated
Problem diagnosis:	Heavy weed infestation and more water consumption due to flood irrigation (Area: 310 ha)
Thematic area:	Resource Conservation
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Planting on raised bed only
T2 –Recommended Practice-	Planting on raised bed with drip irrigation
T3- Recommended Practice-	Planting on raised bed with mulching + drip irrigation
Date of sowing:	First Week of March
Date of harvesting:	-
Source of technology:	IIHR
Characteristics of technology:	Mulching with 25 micron, silver-black plastic sheet & drip system with fertigation resulted high yield

Name of Crop/Enterprises:	Water melon
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

7

Name of Discipline	Plant Protection
Title of on-farm trial:	Use of tobacco decoction to control the larvae of Heliothis armigera in soybean crop
Year/Season:	Kharif 2024
Farming situation:	Rainfed
Problem diagnosis:	Helicoverpa causes heavy damage and reduce yield. Total Area-18613 ha
Thematic area:	Pest and disease management
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Quinalphos @ 1.5L/ha
T2 –Recommended Practice-	50-60ml /lit. water
T3- Recommended Practice-	-
Date of sowing:	First week of July
Date of harvesting:	-
Source of technology:	Inventory of Indigenous Technical Knowledge in Agriculture Document 2, Code - 1826, Page - 132
Characteristics of technology:	Economic and ecofriendly
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

8

Name of Discipline	Plant Protection
Title of on-farm trial:	Use of Dhatura for controlling pests in cotton
Year/Season:	Kharif 2024
Farming situation:	Partially Irrigated
Problem diagnosis:	Cotton is the main cash crop and pest causes damage and reduce yield. Total Area-15500 ha
Thematic area:	Pest and disease management
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	

T1 – Farmers Practice-	Monocrotophos @ 1.0L/ha
T2 –Recommended Practice-	20ml stock solution / lit. water
T3- Recommended Practice-	-
Date of sowing:	Last week of June
Date of harvesting:	-
Source of technology:	Inventory of Indigenous Technical Knowledge in Agriculture Document 2 (Supplement 2) Chapter 5 Code No. 2857 Page-41
Characteristics of technology:	Economic and ecofriendly
Name of Crop/Enterprises:	Cotton
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

9

Name of Discipline	Plant Protection
Title of on-farm trial:	Use of extract of neem leaves and parthenium to check infestation of <i>Helicoverpa sp.</i> in Gram
Year/Season:	Rabi 2024
Farming situation:	Partially Irrigated
Problem diagnosis:	Gram is the main pulse crop in rabi and pest causes damage and reduce yield. Total Area-18450 ha
Thematic area:	Pest and disease management
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Quinalphos @ 1.5L/ha
T2 –Recommended Practice-	2 ml stock solution / lit. water
T3- Recommended Practice-	-
Date of sowing:	Last week of October
Date of harvesting:	-
Source of technology:	Inventory of Indigenous Technical Knowledge in Agriculture Document 2 (Supplement 1) Chapter 5 Code No. 2303
Characteristics of technology:	Economic and ecofriendly
Name of Crop/Enterprises:	Gram
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
1	Blackgram	IDM	Seed treatment with Imidacloprid 70 WS @	Seed+ yellow trap +	Kharif 2024	4.0	10	Yield/ha, Disease

			5ml/kg followed by Installation of Yellow sticky traps + spray of Thiamethoxam @ 100ml/ha	Thiamethaxam				incidence %
2	Soybean	ICM	RVS 2001-04 + STV based fertilizers+ IPM	Seed + Need base fertilizer & Pesticide	Kharif 2024	4.0	10	Yield/ha, No. of pods /plant
3	Turmeric	Varietal	Improved variety Selam	Seed(Rhizome)	Kharif 2024	2.0	10	Yield/ha, Rhizome wt/ Plant(g)
4	Tomato	Varietal	High yielding variety Arka Rashak	Seed	Kharif 2024	2.0	10	Yield/ha, No. of fruit /plant
5	Gram	ICM	RVG 202+ STV based fertilizers+ IPM	Seed + Need base fertilizer & Pesticide	Rabi 2024	4.0	10	Yield/ha, No. of pods /plant
6	Onion	Varietal	High yielding variety Bhima Sakti	Seed	Rabi 2024	2.0	10	Yield/ha, Bulb weight
7	Maize	IWM	Atrazine 1.0 kg/ha PE + Dora/ Kulfa at 20-25 DAS	Atrazine	Rabi 2024	4.0	10	Yield/ha, No of weeds/m2
8	Wheat	Varietal	Improved var. HI 8663 (Poshan)	Seed	Rabi 2024	4.0	10	Yield/ha, No of tillers/plant
9	Wheat	Varietal	Improved var- Karan Vandna	Seed	Rabi 2024	4.0	10	Yield/ha, No of tillers/plant

Extension and Training activities under FLDs

S. No.	Activity	No. of activities	Month	Number of participants
1	Field days	4	Oct & Feb	200
2	Farmers Training	8	July & Nov	200
3	Media coverage	12	July, Oct, Nov, Feb	-
4	Training for extension functionaries	02	July & Nov	50

Details of FLD on Enterprises

Farm Implements

Name of the implement	crop	Season and year	No. of farmers	Area (ha)	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
							Demon.	Local check

*Field efficiency, labour saving etc.

Livestock Enterprises

Enterprise	Breed	No. of farmers	No. of animals, poultry birds etc.	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
						Demo.	Local check

*Milk production, meat production, egg production, reduction in disease incidence etc.

Other Enterprises

Enterprise	Variety/ breed/Species /others	No. of farmers	No. of Units/ area	Critical inputs	Performance parameters/ indicators	Data on parameter in relation to technology demonstrated	
						Demo.	Local check

Cluster Demonstration of Oilseed and Pulses under NFSM (2024-25)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified
1	Soybean	ICM	Improved seed + INM+ IPM	Improved variety, pesticide, biofertilizer	Kharif 2024	20.0	50	Yield/ha, No of pod/ No of siliquae, B:C ratio, Feedback of farmer
2	Groundnut	ICM			Kharif 2024	20.0	50	
3	Blackgram	ICM			Kharif 2024	20.0	50	
4	Gram	ICM			Rabi 2024	20.0	50	
5	Mustard	ICM			Rabi 2024	20.0	50	

Extension and Training activities under CFLDs Oilseed and Pulses

S. No.	Activity	No. of activities	Month	Number of participants

LINKAGES

Functional linkage with different organizations

Name of organization	Nature of linkage
Department of Agriculture	1. Joint diagnostic survey of different crops in kharif and rabi season

	2. Conducting trainings for tribal farmers under various programmes 3. Participation in fortnightly and monthly meetings for implementing different programmes
ATMA	Collaborative training programme, demonstration, meeting and Kisan mela, field days, infrastructural development etc
Department of Horticulture	Organizing different training programmes, Joint visit
Department of Veterinary	Organizing different training programmes, animal health and vaccination camp
Department of Fisheries	Organising different training programmes
DSC (NGO)	Organized joint training programmes & Demonstration
Educate Girl	Jointly organized rural youth trainings and other trainings
Jan Sahas Sansthan	Jointly organized rural youth trainings and other vocational trainings
NRLM Project	Organized joint training programmes for farmers
M.P.State Seed corp.	Arrangement of seed, seed production programme
Wheat Research Centre, Indore	Procure seed for OFT, FLD from Indore
IIPR, Kanpur	Procurement of seed
JAU, Junagarh	Procurement of seed
IISR, Indore	Procurement of seed & Knowledge
Directorate of Weed Science	Procure literature and CD etc for knowledge
CIAE, , Bhopal	Procure Implements for Agriculture

Details of linkage with ATMA / NFSM

a) Is ATMA implemented in your district Yes/No

Name of Programme	Nature of linkage
FFS	Technical
Training	Technical
Diagnostic visit	Technical
Field visit	Technical

Give details of programmers implemented under National Horticultural Mission

Name of Programme	Nature of linkage

Action plan for Flagship programmes implemented at KVK

(NICRA, ARYA, Natural farming, CBBO, Seed Hub, Agri Drone etc)

Name of Flagship programmes

Month	Activity details	Targeted Beneficiaries/Area/Coverage
Jan. to Dec 2024	SAP Activities	Farmers of Adopted Village
Jan. to Dec 2024	Natural farming activities	Whole district
Jan. to Dec 2024	Millets promotion activities	Farmers of Adopted Village

Planning for Crop Cafeteria

B) Vehicles

Type of vehicle	Year of purchase	Cost (Rs.)	Total kms. Run	Present status
Tractor (Power Tiller)	13 April 2009	475988/-	3231.8 (30.11.2022)	Serviceable
Motor Cycle 2	7 July 2010	47314/-	10421 (Milometer closed)	Unserviceable like to be condemn
Bolero(Jeep)	18 May 2009 Old Bolero	445970/-	234700	Auction process under consideration
	26 April 2021 New Bolero	777689/-	26709 (31.03.2023)	Working condition

Other (Pl. specify)				

C) Equipment & AV aids

Name of the equipment	Year of purchase	Cost (Rs.)	Present status
Fax machine Colour printer ink fax machine Roll Computer Cable	28.3.2011	14975	Not working
Photocopy Big Machine	28.03.2011	50400	Not working
HP Computer and xerox laser printer scanner and DVD Writer	28.03.2009	47044	Not working
LCD Projector	30.03.2010	70900	Not working
HP laser Printer Print, Fax, scan	19.03.2013	24900	Not working
Dell computer	30.03.2016	26990	Working
Dell computer	30.03.2016	26990	Servicable
Vipro Laptop	14.03.2012	40755/-	Not working
Mini laptop	31.03.2016	22000/-	Not working
Tablet Iball	31.03.2016	9000/-	Not working
Epson Printer L220 Model	31.03.2016	10500/-	Not working
Epson L 380 Printer	22.12.2017	10400/-	Not working
Soil Testing Mini Kit	25.11.2015	75000=00	Good
Soil Testing Mini Kit	25.03.2017	90300=00	Good
Camera (Sony Company)	21.08.2009	11240=00	Not working
Hand camera (Video)	3.03.2018	19990/-	Working
Usha Water Cooler	20.03.2013	25133=00	Working
Printer Brother	27.03.2017	8243=00	Working
B.P. Instrument	07.07.2011	995=00	servicable
HCL Computer (Estt.)	15.03.2013	39349/-	Working
Projector	29.03.2019	30500/-	Working
Computer DAMU Project	21/10/2020	23498/-	Working
HP Computer	27.03.2017	30240/-	Servicable
HP Computer (Accounts)	27.03.2017	30240/-	Working
EPSON Printer DAMU	31.03.2021	13500/-	Servicable
Camera (Nikon)	12.02.2014	8200=00	Not working
Dell Computer (New)	31.03.2023	63500/-	Working
Dell Laptop (New)	31.03.2023	60000/-	Working
Canon Printer (New)	31.03.2023	17500/-	Working

1.5.(A). Details of SAC meeting to be conducted in the year

Sl. No.	Tentative Date
1	May 2024
2	September 2024

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 1	<u>Gird Zone (M P-07)</u> - Soils are generally Dark in colour and medium to heavy in texture. These soils are suitable for almost crops and medium rich in nutrients with very medium to high moisture retaining.Rich in iron content and suitable for production of premium quality of wheat.Capacity which covered under order entisols and vertisols. With slightly steep slope. The topography found mostly plain. PH value varies from 7.5 to 8.2 throughout the sub region
2	AES – 2	<u>Gird Zone (M P-07)</u> -Soils are light gray in color, well drained yellow soil, better suited of all types of crops under irrigated conditions which covered two orders, vertisols and inceptisols, Rainfed condition with undulated soil topography and high evapotranspiration due to higher range of temperature., Rainfed condition with undulated soil topography with steep slope and high evapotranspiration due to higher temperature. Soil made up of igneous bedrocks and found granite minerals. In some area organic carbon found satisfactory. PH value varies from 7 to 7.5

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	AES – 1 and AES - 2	AES – 1 and 2 Block covered : 4 Geographical area :467349 ha. Topography :slightly slope to plain Soils : Light (57.79%) and Medium to heavy (4.92%) Deep (37.29%) Major Farming systems : crop production, crop production + Animal husbandry, crop production +horticulture. Major crops : KHRIF CROPS – soybean ,black gram, green gram, paddy, maize, RABI CROPS - wheat, Lentil, Mustard, Chickpea, coriander and vegetables SWOT Analysis of each Agro-Ecological Situations of district

SWOT Analysis of each Agro-Ecological Situations of district

AES-1 (name)

Strength	Weakness	Opportunities	Threats
☑ nutrient rich soil, water retention capacity,high iron content, plain topography	☑ drainage challenges, high SAR ,high EC	☑ suitable for premium quality of wheat and coriander	☑ Rise of PH and EC , frost prone area

AES-2 (name)

Strength	Weakness	Opportunities	Threats
☑ well drained, well aerated , suitable for custardapple , plums	☑ low water retention , high temperature , steep slope , low organic matter	☑ suitable for crops need well drained soil.suitable for Low cost fruit plants , low risk of frosting	☑ high soil erosion , low water use efficiency , low value

and khirni			crops , flood prone area , high possibility of draught

Land Use Pattern

Particulars	Area “000 ha”
Total Geographical area	467349 ha
Forest	52925 ha
Waste Land	52800
Other than cultivated area	27600
Cultivable waste	25400
Pastures	12500
Bushes	3500ha
Current Fallow	2300 ha
Other Fallow	36200ha
Agricultural Land	307010ha
Area Sown	447760 ha
Kharif	246650 ha
Rabi	265430 ha
Zaid	
Cropping Intensity	167%
Net sown area	307000
Area sown (double sown)	68000
Baren Land	36200
Net Irrigated area	115600
Rainfed	191500

Irrigated Area with Different Sources:

S. No.	Description	Area (ha)
1	Canal	10641
2	Dough Well	18365
3	Tube well	48175
4	Ponds	2670
5	Others	29268

Soil types

S. No.	Soil type	Characteristics	Area “000 ha”
1	Shallow	Shallow soils have less than 50 cm depth of solum. They have thin, horizon over the bed rock or ht e parent material.	63820
2	Medium deep	Soil surface is 20 to 36 inches from a layer that retard root development	5420
3	Deep soil	Soil surface is 36 to 60 inches from a layer that retard root development	411740

Note: Figure. In parenthesis denotes the percentage of total area.

Area, Production and Productivity of major crops cultivated in the district

S. No	Crop	Area (ha)	Production (kg.)	Productivity (Q /ha)
1	Wheat	173.44	4100	
2	Barlay	0.17	2060	
3	Chick pea	31.2	1900	
4	Field pea	1.193	1200	
5	Lentil	19.43	1790	
6	Mustard	68.5	1600	
7	Linseed	0.016	600	
8	Sugarcan	0.35	43500	

9	Paddy	22.50	3800

Fish	2305.940 ha	3712.00 MT	16.09 Q/ ha.

Details of Operational area / Villages (2023)

S.N o	KVK	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Ashoknagar	Ashoknagar	Jamakhedi	Blackgram, Mustard	Low yield and income due to traditional farming situation	VE, ICM,IPM, IDM, INM, NRM, IFS and mechanization
2	Ashoknagar	Ashoknagar	Madkheda	Mustard	Low yield and income due to traditional farming situation	VE, ICM,IPM, IDM, INM, NRM, IFS and mechanization

3	Ashoknagar	Ashoknagar	Kakakhedi	Gram	Low yield and income due to traditional farming situation	VE, ICM,IPM, IDM, INM, NRM, IFS and mechanization
4	Ashoknagar	Ashoknagar	Khiriymau	Mustard	Low yield and income due to traditional farming situation	VE, ICM,IPM, IDM, INM, NRM, IFS and mechanization
5	Ashoknagar	Isagarh	Kadwaya	Vegetable Minikit	Low yield and income due to traditional farming situation	VE, ICM,IPM, IDM, INM, NRM, IFS and mechanization
6	Ashoknagar	Mugaoli	Baxanpur	Straw husk reaper	Low yield and income due to traditional farming situation	VE, ICM,IPM, IDM, INM, NRM, IFS and mechanization
7	Ashoknagar	Ashoknagar	Mathnerchak	Soybean	Low yield and income due to traditional farming situation	VE, ICM,IPM, IDM, INM, NRM, IFS and mechanization
8	Ashoknagar	Ashoknagar	Awari	Groundnut decortidetar, spiral gravety seprator	Low yield and income due to traditional farming situation	VE, ICM,IPM, IDM, INM, NRM, IFS and mechanization
9	Ashoknagar	Ashoknagar	Salmai	Pea	Low yield and income due to traditional farming situation	VE, ICM,IPM, IDM, INM, NRM, IFS and mechanization
10	Ashoknagar	Ashoknagar	Sikandra	IDM in rice	Low yield and income due to traditional farming situation	VE, ICM,IPM, IDM, INM, NRM, IFS and mechanization
11	Ashoknagar	Isagarh	Piproda	Soybean	Low yield and income due to traditional farming situation	VE, ICM,IPM, IDM, INM, NRM, IFS and mechanization
12	Ashoknagar	Mungaoli	Mudrabhadra	Crop residue management	Low yield and income due to traditional farming situation	VE, ICM,IPM, IDM, INM, NRM, IFS and mechanization
13	Ashoknagar	Ashoknagar	Dangora foot	IPM in Soybean	Low yield and income due to traditional farming situation	VE, ICM,IPM, IDM, INM, NRM, IFS and mechanization
14	Ashoknagar	Ashoknagar	Barodia, Palkatori & Chackchiroli	Ginger	Low yield and income due to traditional farming situation	VE, ICM,IPM, IDM, INM, NRM, IFS and mechanization
15	Ashoknagar	Ashoknagar	Shadora, Amoda	ICM in Soybean	Low yield due to old verities	VE, ICM
16	Ashoknagar	Ashoknagar	Kethan, Madkheda	ICM in Chickpea	Low yield due to grown susceptible varieties	ICM, VE
17	Ashoknagar	Ashoknagar	Amahi, Piproda	ICM in Green gram	Low yield due to traditional & YMV susceptible varieties	ICM, VE

Priority / Thrust areas

KVK Name	THRUST AREA
Ashoknagar	1. Use of improved farm implements
Ashoknagar	2. Soil and water management
Ashoknagar	3. Resource conservation technology
Ashoknagar	4. Group Dynamics
Ashoknagar	5. Soil fertility status through soil testing
Ashoknagar	6. Crop diversification
Ashoknagar	7. Drudgery reduction
Ashoknagar	8. Hi-tech horticulture
Ashoknagar	9. Organic Farming
Ashoknagar	10. Integrated nutrient management
Ashoknagar	11. Integrated pest management

Ashoknagar	12. Value addition
Ashoknagar	13. Natural farming

TECHNICAL PROGRAMME

Details of On Farm Trial (OFT)- 1

Name of Discipline	(Plant Protection)
Title of on-farm trial:	Assessment of IDM Module in Soybean for Aerial blight
Year/Season:	Kharif 2024
Farming situation:	Rain fed
Problem diagnosis:	Low yield due to Aerial blight disease in Soybean
Thematic area:	IDM
No of trials:	13
No. of farmers involved	13
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of Carbendazim@2gm/lit
T2 –Recommended Practice-	Use of seed treated with Thiophanate methyl + Pyraclostrobin @2ml/kg seed, One foliar spray of Azoxystrobin+ Tebuconozol@0.5 ml/lit
T3- Recommended Practice-	-
Date of sowing:	First week of July
Date of harvesting:	Last week of Oct..
Source of technology:	IISR, Indore
Characteristics of technology:	Thiophanate methyl + Pyraclostrobin @2ml/kg seed, One foliar spray of Azoxystrobin+ Tebuconozol@0.5 ml/lit
Performance indicators:	No. of Pods/plant

(i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic Social –	Yield(q/ha) BC Ratio, PDI
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

(OFT)- 2

Name of Discipline	(Plant Protection)
Title of on-farm trial:	Assessment of IDM module for blast disease of Rice
Year/Season:	Kharif 2024
Farming situation:	Rain fed
Problem diagnosis:	Low yield due to heavy incidence of blast disease in Paddy
Thematic area:	IDM
No of trials:	07
No. of farmers involved	07
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of Carbendazim + mancozeb @2gm/lit of water
T2 –Recommended Practice-	Spray of Picoxystrobin 6.78 %+ Tricyclazole 20.33% SC @ 750 ml/ha
T3- Recommended Practice-	T3-Spray of Propineb 54% + Tricyclazole 15% WP @ 2 g/lit of water
Date of sowing:	First week of July
Date of harvesting:	Second week of November
Source of technology:	CRRI Cuttak
Characteristics of technology:	Spray Picoxystrobin 6.78 %+ Tricyclazole 20.33% SC @ 750 ml/ha and of Propineb 54% + Tricyclazole 15% WP @ 2 g/lit of water
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic Social –	Yield(q/ha) BC Ratio, PDI
Name of Crop/Enterprises:	Rice
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

(OFT)- 3

Name of Discipline	(Plant Protection)
Title of on-farm trial:	Assessment of IDM module for Powdery mildew in coriander
Year/Season:	Rabi 2024-25
Farming situation:	Partial irrigated
Problem diagnosis:	Low yield due to severity of Powdery mildew in coriander
Thematic area:	IDM
No of trials:	07
No. of farmers involved	07

Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement	
T1 – Farmers Practice-	Sulpher @ 3 g/lit of water
T2 –Recommended Practice-	Use foliar spray of Myclobutanil 10% WP @ 1g/lit of water
T3- Recommended Practice-	Use of Hexaconazole 5 SC @2ml / lit of water
Date of sowing:	Second week of November
Date of harvesting:	March
Source of technology:	NRCSS Ajmer
Characteristics of technology:	foliar spray of Myclobutanil 10% WP @ 1g/lit of water; Use of Hexaconazole 5 SC @2ml / lit of water
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic Social –	Yield(q/ha) BC Ratio, Disease severity
Name of Crop/Enterprises:	Coriander
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

(OFT)- 4

Name of Discipline (Plant Protection)	(Plant Protection)
Title of on-farm trial:	Assessment of IPM Module in Mustard for Sucking pest
Year/Season:	Rabi 2024-25
Farming situation:	Semi Irrigated
Problem diagnosis:	Low yield due to Sucking pest in Mustard
Thematic area:	IPM
No of trials:	07
No. of farmers involved	07
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of Choloropyriphos@3mi/lit
T2 –Recommended Practice-	Use of seed treated with Thiomethoxam30FS@10ml/kg seed + one foliar spray of Imidacloprid@0.5ml/lit
T3- Recommended Practice-	Imidacloprid 60 FS@ 10 ml/ kg seed + One spray of Neem oil @ 5 ml/lit of water + One foliar spray of Thiamethoxam @ 250 g/ha
Date of sowing:	First week of Oct
Date of harvesting:	Last week of March
Source of technology:	NRCRM Bharatpur
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic Social – Employment generation	No. of siliqua /plant, Yield, BC Ratio, PDI No. of man days/ season
Characteristics of technology:	seed treated with Thiomethoxam30FS@10ml/kg seed + one foliar spray of Imidacloprid@0.5ml/lit to control Sucking pest in mustard
Name of Crop/Enterprises:	Mustard
Recommendations for Farmers

OFT-5

Crop / Enterprise	Chilli	
Title of on farm trial	Assessment of HYV variety of Chilli Kashi Abha	
Problem diagnosed	Use of locally available variety of Chilli	
Farmers' Practices	Use of locally available variety of Chilli	
Details of technologies selected for assessment	T ₁	Use of locally available variety of Chilli
	T ₂	Use of variety of Chilli Kashi Abha
	T ₃	-
Source of technology	IIVR Varansi 2019	
Plot size	800 sqm	
No. of farmers	05	
Total cost	5000	
Critical input	Seed	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	No. of fruits/plant, fruit weight (g), Yield (q/ha), NR (Rs./ha), B:C ratio	

OFT-6

Crop / Enterprise	Tomato	
Title of on farm trial	Assessment of natural farming in tomato	
Problem diagnosed	Low economic return (30%) due to poor quality and yield of tomato	
Farmers' Practices	T1: Only use off DAP fertilizers as basal dose	
Details of technologies selected for assessment	T ₂	T2: RDF (25 ton FYM +75:100:50::NPK)
	T ₃	T3: Use of all natural farming component (Bijamrit, Ghan Jivamrit, Panchgavya, Jivamrit, and need base natural pesticide
Source of technology	"Kam lagat Prakratic Kheti" Book, Acharya Devvrat, 2019	
Plot size	800 sqm	
No. of farmers	05	
Total cost	Rs. 400/ trail Total 2000/-	
Critical input	Panchyagavya and Jivaamrit	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Fruit size (cm), Fruit weight (g), Yield (q/ha), Net return (Rs/ha), B:C ratio	

OFT-7

Crop / Enterprise	Guava Crop	
Title of on farm trial	Assessment of crop regulation practice in guava fruit crop	
Problem diagnosed	Low yield and substandard quality of fruits	
Farmers' Practices	T1: Farmers Practice	
Details of technologies selected for assessment	T ₂	Foliar application of urea @ 10% in month of April
	T ₃	Foliar application of urea solution @ 15% in month of April.
Source of technology	RVSKVV, Gwalior, 2018	
Plot size	0.2 ha	
No. of farmers	05	
Total cost	250/- Total 1250/-	
Critical input	Chemical fertilizer urea	

Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	No of fruits/branch, TSS (^o Brix), Yield (q/tree)

OFT-8

Crop / Enterprise	Coriander	
Title of on farm trial	Assessment of HYV of coriander RCR 435	
Problem diagnosed	Use of old and locally variety of coriander	
Farmers' Practices	T1: Use of old and locally available variety of coriander	
Details of technologies selected for assessment	T ₂	Coriander variety RCR 435
	T ₃	-
Source of technology	Sri Karan Narendra Agriculture University, Jobner	
Plot size	0.2 ha	
No. of farmers	05	
Total cost	Rs 4400/-	
Critical input	Seed	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Yield (q/ha), NR (Rs./ha), B:C Ratio	

Details of On Farm Trial (OFT)

OFT-1

Crop / Enterprise	Husk reaper	
Title of on farm trial	Assessment of organic carbon enhancement through stopping of burning via husk reaper in combine harvested field.	
Problem diagnosed	Burning of crop field after harvesting by combine	
Farming Situation	Irrigated	
Farmers' Practices	Farmers are usually burning combine harvested fields	
Details of technologies selected for assessment	T ₁	Burning of field
	T ₂	Tractor drawn Husk reaper in combine harvested field
	T ₃	Tractor drawn Husk reaper in combine harvested field+ Rotavator operation
Source of technology	PAU Ludhiana	
Plot size	One acre	
No. of farmers	5	
Total cost	5000/-	
Critical input	Husk reaper operation	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Plant height, Carbon percentage Yield B:C Ratio No. of Days/year	

OFT-2

Crop / Enterprise	Enterprises(Rotavator)	
Title of on farm trial	Assessment of Rotavator for Mustard field Preparation	
Problem diagnosed	Improper field preparation in mustard	
Farming Situation	Semi Irrigated	
Farmers' Practices	Two ploughing by cultivator	
Details of technologies selected for assessment	T ₁	Two ploughing by cultivator
	T ₂	Use of Rotavator for Ploughing
	T ₃	-
Source of technology	GBPUA&T Pantnagar	
Plot size	One acre	
No. of farmers	05	
Total cost	5000/-	
Critical input	Ploughing by using Rotavator	

Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	No. of siliqua/plant, Yield Cost saving/acre, BC Ratio No. of mandays/year

OFT-3

Crop / Enterprise	Enterprises(Rotavator)	
Title of on farm trial	Assessment of Rotavator for Chickpea field Preparation	
Problem diagnosed	Improper field preparation in Chickpea	
Farming Situation	Semi Irrigated	
Farmers' Practices	Two ploughing by cultivator	
Details of technologies selected for assessment	T ₁	Two ploughing by cultivator
	T ₂	Use of Rotavator for Ploughing
	T ₃	-
Source of technology	CIAE Bhopal	
Plot size	One acre	
No. of farmers	05	
Total cost	5000/-	
Critical input	Ploughing by using Rotavator in chickpea field preparation	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	No. of pods/plant, Yield Cost saving/acre, BC Ratio No. of man days/year	

Detailed Information about OFT: 4

Name of Discipline (Agri Engineering)	BBF seed drill sowing in soybean
Title of on-farm trial:	Assessment of BBF seed drill for soybean sowing to conserve / drainage rain water.
Year/Season:	Soybean –Wheat/ gram (Kharif)
Farming situation:	Rainfed
Problem diagnosis:	Uncertainty of rainfall in monsoon season
Thematic area:	Sowing by ordinary seed drill without making any furrow in field
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Sowing by ordinary seed drill without making any furrow in field
T2 –Recommended Practice-	Sowing by using BBF seed drill in soybean to conserve rainfall moisture
T3- Recommended Practice-	-
Date of sowing:	20- 30 June
Date of harvesting:	Oct
Source of technology:	NRC Indore
Characteristics of technology:	Conserve moisture during long gap in rainfall and also cause field drainage during heavy rainfall
• Name of Crop/Enterprises:	BBF seed drill in soybean to conserve rainfall moisture
• Recommendations for Farmers	-
• Recommendations for Deptt. Personnel	-
Feedback

Sl. No.	Tentative Date
1	21/06/2024
2	18/10/2024

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 1	Nimar Valley Zone (M P-11)- Soils are generally red in color and very light in texture. These soils are highly deficient in nutrients with very low moisture retaining capacity which covered under order entisols and inceptisols, Rainfed condition with undulated soil topography with steep slope and high evapotranspiration due to higher range of temperature.

2	AES – 2	Nimar Valley Zone (M P-11)- Soils are light gray in color, well drained, better suited of all types of crops under irrigated conditions which covered two orders, vertisols and inceptisols, Rainfed condition with undulated soil topography and high evapotranspiration due to higher range of temperature.
3	AES – 3	Nimar Valley Zone (M P-11)- Soils are black in color, dept of soil is medium to high possess high moisture holding capacity and have integrated of amont mont-morrilonite minerls, little in chloride minerals which covered under the order of vertisols dominantly found in agro ecological situation – 3 of Barwani distt.

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	AES – 1	Block covered : 7 Geographical area : 5427 km ² Topography : undulating to sloppy, Soils : light (24.59%) and medium to heavy (75.49%) Major Farming systems : crop production, crop production + Animal husbandry, crop production + horticulture. Major crops : cotton, maize, black gram, green gram, wheat, gram and vegetables
2	AES - 2

Soil types

S. No.	Soil type	Characteristics	Area “000 ha”
1	Light (Sandy Loam)	Soils are generally red in color and very light in texture. These soils are highly deficient in nutrients with very low moisture retaining capacity which covered under order entisols and insepstisols	57.54
2	Medium (Sandy Loam)	Soils are light gray in color, well drained, better suited of all types of crops under irrigated conditions which covered two orders, vertisols and insepstisols	67.88
3	Heavy (Kabar/ Mar,Sandy loam)	Soils are black in color, possess high moisture holding capacity and have integrated of mont morrilonite, little in chloride minerals which covered under the order of vertisols	108.56

Note: Figure. In parenthesis denotes the percentage of total area.

Area, Production and Productivity of major crops cultivated in the district

S. No	Crop	Area (ha)	Production (Qt.)	Productivity (Q /ha)
1	Cotton	79136	188502	2382
2	Maize	72107	251726	3491
3	Jowar	17282	38522	2229
4	Soybean	37199	47838	1286
5	Groundnut	10058	14695	1461
6	Pigeonpea	2006	1817	906
7	Greengram	2376	1012	426
8	Wheat	111479	428414	3843
9	Chickpea	12828	20255	1579

Weather data (Jan, 2024- Dec., 2024)

Month /Year	Rainfall (m.m.)	Temperature (° C)	
		Maximum	Minimum
Jan, 2024	0.0	26.2	10.6
Feb, 2024	0.0	32.8	10.1
Mar, 2024	2.5	35.4	17.1
Apr, 2024	27.5	39.2	20.9
May, 2024	13.5	41.0	25.8
Jun, 2024	48.0	38.1	27.6
July, 2024	276.8	33.0	26.0

Dec. 2024	5.0	29.8	14.0

Production and productivity of livestock, Poultry, Fisheries etc. in the district

Category	Population	Production	Productivity
Cattle			
<i>Crossbred/ Indigenous</i>		 MT.	 kg
Buffalo		 MT.	 kg
Sheep			
<i>Crossbred/ Indigenous</i>		 MT wool	 kg
Goats		 MT	 kg
Pigs <i>Crossbred/ Indigenous</i>		---	---
Rabbits			
Poultry			
Hens		 Lakh eggs	 eggs/ bird/yr
Turkey and others			
Category	Area	Production	Productivity
Fish	 (ha)	Q/ month	 Q/ ha.

Details of Operational area / Villages (2022)

Sl. No.	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Badwani	Badwani	Kalibedi, Pichodi, Kathora, Palya, Balkuwa, Tallon, Pipari, Kundiya, BhilKheda, Rahgun, Sanjwani, Borlai, Dhanora, Kari, Bagud. Piplad, Lonsara, Silawad, Utawad, Badwani.Charankheda, Nani Barwani, Sindhi Khodra,Koydiya, Ambapani,Bhawati, Hirakray, holgaon, Lonsara Khurd, Piplaj, TalwadaBujurg	Soybean, Cotton, Wheat, Chickpea, Pigeon pea, Green gram, Chilli, Onion, Custard apple,	- Lack of knowledge and skill about modern farm technology among farmers of the district, especially tribal farmers. - Area and productivity of cereal and oilseed crops, particularly soybean is towards declining trend. Farmers are in search of other alternate cropping systems. - Undulated, eroded and infertile soil in some parts of the district call for a special management technique so as to make agriculture more remunerative. - Indiscriminate and non-judicious use of pesticides, especially in cotton, chilly and pulses increased the cost of cultivation with less desired pest management. - Inappropriate water management	- To popularize Natural farming /Organic farming in the district. - To Popularize Millet cultivation - Increase production and productivity of crops - Income generation activities for empowerment of rural youth - Drudgery reduction for farm women - To create awareness about value addition & Processing - Integrated Disease & Pest Management - Integrated Crop Management - Hi tech Horticulture & Cultivation of fruits and vegetables
2	Thikari	Thikari	Anjad, Fatyapur, Barla, Surana, Haribad, Mandwada, Bawadia, Kuwa, Dawana, Kerwa, Keshawpura, Mohipura, Datwada,Chakari, Abheli,Panaya,Fayayapur			
3	Rajpur	Rajpur	Chhotikhargone, Singun, Mandil, Semalkhodra, Nandgaon, Pulsud, Rajpur,Mandwadi, Chottikhargone, Narwala, Waswi,Sangaw,Inadarpur(Rehatiya), Limbai, Mundla, Sidadi

6	Niwali	Niwali	Niwali,Rajmalivan, Morgun, Badgaon, Dogaliyapani, GumadyaBuzurg			
7	Pati	Pati	Pati, Bokrata,Ghungshshi,Junazira, Kadwalaya, Osada, Bokrata, Ubadgarh, Sindhi- Khodri, Derwaliya, Sawariyapani, Charpatiya			
8	Anjad	Badwani				
9	Varla	Sendhwa				

					practices for optimum yields. • Imbalance use of nutrients without supplement with organic manure resulted in poor status of soil. • Intensive cropping and poor soil workability resulted in increased weed problem and weeds shift. • The problem associated with disease and insect management particularly rust in soybean, loose smut in wheat, wilt in gram, powdery mildew in pea, Heliothis in gram and pod borer complex in pigeon pea and cotton is alarming. • Area under vegetable and fruit crops is meager. There is enough scope of expansion of these crops in the district for making the farming enterprise more productive and profitable. • Looking to status of farmwomen, there is the need to upgrade the skill and attitude for income and employment generation through value. • The productivity of milk animals is low and hence need technical support.	

Priority / Thrust areas

S. No.	Particulars
1.	To popularize Natural farming /Organic farming in the district.
2.	To Popularize Millet cultivation
3.	Increase production and productivity of crops

4.	Income generation activities for empowerment of rural youth
5.	Drudgery reduction for farm women
6.	To create awareness about value addition & Processing.
7.	Integrated Disease & Pest Management
8.	Integrated Crop Management
9.	Hi tech Horticulture & Cultivation of fruits and vegetables

TECHNICAL PROGRAMME

A. Details of targeted mandatory activities by KVK

OFT		FLD and CFLD	
1		2	
Number of OFTs	Number of Farmers	Number of FLDs	Number of Farmers
11	256	6	58

Training		Extension Activities	
3		4	
Number of Courses	Number of Participants	Number of activities	Number of participants
101	2630	230	1780

Seed Production (Qtl.)	Planting material (Nos.)
250	100000

B. Abstract of interventions to be undertaken

S. N o.	Th rus t are a	Crop/ Enterpri se	Identified Problem	Interventions					Supply of seeds, planting materials etc.
				Title of OFT if any	Ti tl e of F L D if an y	Title of Trai ning if any	Title of train ing for exten sion perso nnel if any	Exte nsi on activ ities	
1		Chilli	Viral disease is causing severe yield loss in chilli	Assessment of eco-friendly practices for vector borne viral disease in hybrid chilli	-	-	1	2	Neem Cake, Neem oil, Yellow & Blue Sticky Trap
2		Ginger	Spices Based Cropping System and IDM	Assessment of IDM module in management of soft rot disease in Ginger crop	-	-	2	5	Metalaxyl-Mancozeb 0.12 5%
3		Bottleg ourd	Low productivity of Bottle-gourd	Assessment of Improved Bottlegourd variety in Vegetable based cropping system	-	-	0	2	Seed material of variety Kashi Ganga & Kashi Kirti
4		Okra	Low productivity of okra	Assessment of effect of Fertigation on growth, yield and quality of hybrid Okra	-	-	1	2	water soluble fertilizer (WSF, 19:19:19)
5		Brinjal	Viral disease is causing severe yield loss in Brinjal	Assessment of water soaked Nicotiana tobaccum to control shoot and fruit borer in brinjal.	-	-	0	2	Tobacco leaf powder
6		Cotton	Use of high cost and low quality of cotton, inorganic nutrient management.	Assessment of organic cotton production in Nimar region.	-	-	0	2	Azetobacter & PSB
7		Soybean	No appropriate data of new sowing techniques in Soybean after replacement of traditional methods	Impact assessment of Sowing technique of ridge and furrow in Soybean in special reference of KVK intervention.	-	-	1	2	
8		Chickpe a	No appropriate data on use Ammonium Molybadate in chickpea.	Assessment on effect of Ammonium Molybadate for enhancing symbiotic traits & yield of chickpea	-	-	1	2	
		Wheat	Poor soil health, high cost of cultivation and poor quality produce	Assessment of effective extension methods for TOT of Natural Farming in Wheat	-	-	0	2

Details of On Farm Trial (OFT)

OFT-1

Crop / Enterprise	Chilli	
Title of on farm trial	Assessment of eco-friendly practices for vector borne viral disease in hybrid chilli	
Problem diagnosed	Viral disease is causing severe yield loss in chilli	
Farmers' Practices	Spray of chemicals like imidacloprid, fipronil etc.	
Details of technologies selectedfor assessment	T ₁	Farmers Practice- Spray of chemicals like imidacloprid, fipronil etc.
	T ₂	Recommended Practice- Spray of chemicals like Imidacloprid 0.5 ml/l, fipronil 1.5 ml/l+ Neem oil @ 5 ml/L.
Source of technology	IIVR - 2017	
Plot size		
No. of farmers	12	
Total cost	12000/- (Total area to be covered 3.00 ha or 30,000 sqMt.)	
Critical input	Neem Cake, Neem oil, Yellow & Blue Sticky Trap	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of infested plant /5sqm, Fruit weight gm, Disease incidence percent, Yield q/ha	

OFT-2

Crop / Enterprise	Ginger	
Title of on farm trial	Assessment of IDM module for management of soft rot disease in Ginger crop	
Problem diagnosed	Quality deterioration and loss in yield due to rotting in Rhizomes	
Farmers' Practices	Spray of fungicides like Mancozeb etc.	
Details of technologies selectedfor assessment	T ₁	Farmers Practice- Spray of fungicide like Mancozeb 75% WP etc. 2g/l of water
	T ₂	Rhizome Treatment with Metalaxyl 8%+Mancozeb 64% @ 3 g/kg for 30 min
	T ₃	Select well drained Soil +soil application of Trichoderma harzianum 5 kg/ha+Neem cake @ 5 qt/ha along with Rhizome Treatment with Metalaxyl 8%+Mancozeb 64% WP@ 3g/kg seed
Source of technology	ICAR-IISR, Calicut (Kerala) 2018	
Plot size		

No. of farmers	12
Total cost	Rs. 9000 - 10000/- (approximate)
Critical input	Metalaxyl 8%-Mancozeb 64%
Performance indicators: (iv) Technical- yield (q/ ha) (v) Economic (vi) Social – Employment generation	No. of infested plants per mt. row length, No. of healthy Plants per mt. row length Fruit weight gm, Yield q/ha

OFT-3

Crop / Enterprise	Guava	
Title of on farm trial	Assessment of natural farming in Guava	
Problem diagnosed	Poor soil health, high cost of cultivation and poor quality produce	
Farmers' Practices	Use of chemical farming (800 g + 300 g + 100 g NPK/ Plant)	
Details of technologies selectedfor assessment	T ₁	Farmers Practice- Use of chemical farming (800 g + 300 g + 100 g NPK/ Plant)
	T ₂	Recommended Practice- Natural Farming- Ghanjeevamrit @ 2 kg/plant, Jeevamrit @ 2 L/plant at 15 days interval, Nimastra and Dashparni Ark @ 100 ml/plant at 20 and 40 DAP
Source of technology	CISH, Lucknow-2020	
Plot size		
No. of farmers		
Total cost	Rs. 7000 to 8000/-	
Critical input	Jaggary, pulse flour	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of fruits/plant, Weight of fruit, Yield, Cost of cultivation, Gross return, Net return, B:C ratio	

OFT-4

Crop / Enterprise	Tomato	
Title of on farm trial	Assessment of bio-stimulant for improving quality and yield of tomato	
Problem diagnosed	Less economic return (30%) due to poor quality and yield of tomato fruit.	
Farmers' Practices	No use of bio-stimulants	
Details of technologies selectedfor assessment	T ₁	Farmers Practice-. No use of bio-stimulants
	T ₂	Foliar spray of organic bio stimulant (Sagarika- 0.5%) at 45 DAT
	T ₃	Foliar spray of organic bio stimulant (Sagarika- 0.5%) at 45 and 60 DAT
Source of technology	CSIR-CSMCRI, Bhavnagar, 2016	
Plot size		
No. of farmers	10	
Total cost	2000.00	
Critical input	Organic bio stimulant (Sagarika- 0.5%)	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	Fruit size (cm), fruit weight (g), yield (q/ha), Net return (Rs./ha), B:C ratio	

OFT-5

Crop / Enterprise	Soybean	
Title of on farm trial	Assessment of Organic farming in Soybean	
Problem diagnosed	Low yield due to poor soil health	
Farmers' Practices	Conventional farming (NPK-20:60:20)	
Details of technologies selectedfor assessment	T ₁	FYM@ 5t /ha+ neem oil @2.5 l/ha at 30,60 DAS
	T ₂	Vermicompost @ 3t /ha+ vermiwash+ gaumutra @ 2l/10L water @ 30, 45 DAS, Beaveria bassiana @1kg/ha at 20, 50 DAS + neem oil @2.5 l/ha at 30, 60

	DAS
Source of technology	IISS/RVSKVV 2011
Plot size	2000 SqMt. each trial
No. of farmers	10
Total cost	3000/-
Critical input	Consortium, ZnSO ₄ , Vermicompost
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	Yield (qt/ha), No. of Pods/plant, Net return (rs/ha), B:C ratio

OFT-6

Crop / Enterprise	Sorghum
Title of on farm trial	Assessment of integrated nutrient management in sorghum
Problem diagnosed	Low yield of Sorghum(20%) due to imbalance dose of fertilizer
Farmers' Practices	100kg Urea (N:P:K 46:0:0 kg/ha) at the time of sowing as a basal dose
Details of technologies selectedfor assessment	T ₁ Farmer practice: 100kg Urea (N:P:K 46:0:0 kg/ha) at the time of sowing as a basal dose
	T ₂ RDF 80:40:40:: NPK kg/ha as basal dose
	T ₃ 50% RDF + 5 ton FYM /ha+ seed treatment with NPK Consortia
Source of technology	RVSKVV-2018
Plot size	0.4
No. of farmers	10
Total cost	Rs. 2375.00
Critical input	NPK Consortia
Performance indicators: (iv) Technical- yield (q/ ha) (v) Economic (vi) Social – Employment generation	Initial and final soil analysis, Pod/plant (No.), 100 grain weight (g), yield (q/ha), Net return (Rs./ha), B:C ratio

OFT-7

Crop / Enterprise	Maize
Title of on farm trial	Assessment of Nano urea in Maize
Problem diagnosed	Low yield due to poor efficiency of NC urea
Farmers' Practices	100 kg/ha DAP+ 100kg/ha Urea (64:46:0)
Details of technologies selectedfor assessment	T ₁ Farmer practice: 100 kg/ha DAP+ 100kg/ha Urea (64:46:0)
	T ₂ RDF 120:60:40 NPK
	T ₃ NC urea @130 kg/ha (60:60:40 NPK)+ Nano urea @ 1300ml/ha at 30 and 50 DAS (50% N)through foliar application
Source of technology	NAINI Agriculture Institute, UP 2024
Plot size	0.4
No. of farmers	10
Total cost	Rs. 2400.00
Critical input	Nano Urea
Performance indicators: (vii) Technical- yield (q/ ha) (viii) Economic (ix) Social – Employment generation	No. of pods, branches/plant, yield (kg/ha), economics (net return and B:C ratio)

OFT-8

Crop / Enterprise	Chickpea	
Title of on farm trial	Assessment of Natural Farming in Chickpea	
Problem diagnosed	Poor soil health, high cost of cultivation and poor quality produce	
Farmers' Practices	Conventional farming	
Details of technologies selected for assessment	T ₁	Farmer practice: Conventional farming
	T ₂	Beejamrit @ 50 g/kg seed, Ghanjeevamrit at sowing @ 250 kg/ha, Jeevamrit @ 500 l/ha at sowing, 15, 30, 45 DAS (FA), Nimastra and Dashparni Ark @ 25 l/ha at 20 and 40 DAS, Mulching with plant waste material @ 10 t/ha at 20 DAS
Source of technology	Acharya Dev vrat (2019): Low Budget Natural Farming:1-166 NCONF, Ghaziabad 2022	
Plot size	0.4	
No. of farmers	10	
Total cost	Rs. 3080.00	
Critical input	Jaggary, Pulse Flour	
Performance indicators: (x) Technical- yield (q/ ha) (xi) Economic (xii) Social – Employment generation	OC %, Available NPK, Yield, Cost of cultivation, Gross return, Net return, B:C ratio	

Detailed Information about OFT:**OFT-1**

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Horticulture
Title of on-farm trial:	Assessment of alpha naphthyl acetic acid for control of flowers dropping in chilli
Year/Season:	Kharif -2024
Farming situation:	Irrigated -
Problem diagnosis:	Low yield (20%) due to flower drop in chilli.
Thematic area:	HOV
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Farmers Practice- No use of plant growth regulator
T2 –Recommended Practice-	Foliar spray of NAA (50 ppm) at 45DAT
T3- Recommended Practice-	Foliar spray of NAA (50 ppm) at 45 and 60 DAT
Date of sowing:	
Date of harvesting:	
Source of technology:	IIVR - 2017
Characteristics of technology:	
Name of Crop/Enterprises:	Chilli
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-2

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Horticulture
Title of on-farm trial:	Assessment of IDM module for management of soft rot disease in Ginger crop
Year/Season:	Kharif -2024
Farming situation:	Irrigated -
Problem diagnosis:	Quality deterioration and loss in yield due to rotting in Rhizomes
Thematic area:	HOV
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Farmers Practice- Spray of fungicide like Mancozeb 75% WP etc. 2g/l of water
T2 –Recommended Practice-	Rhizome Treatment with Metalaxyl 8%+Mancozeb 64% @ 3 g/kg for 30 min
T3- Recommended Practice-	Select well drained Soil +soil application of Trichoderma harzianum 5 kg/ha+ Neem cake @ 5 qt/ha along with Rhizome Treatment with Metalaxyl 8%+Mancozeb 64% WP@ 3g/kg seed

OFT-9

Information about Extension OFT:

Title	Impact assessment of ridge and furrow sowing method in Soybean.
Season & Year	Kharif 2024
Problem identified	Low yield of soybean due to poor moisture stress or water stagnation during heavy down pour
Thematic Area	TOT
Farming situation	Irrigated
Name of Technology Intervention under study	Impact of raised bed furrow system through random survey method
Farmers Practice	Seed drill
No. of replication (Farmers)	60 (Respondent) Village-06 (10 farmers from each village)

Results / findings

Performance indicators/ parameters	Unit/ details
Parameters	- Knowledge - Adoption - Constraints - Yield

OFT-10

Information about Extension OFT:

Title	Assessment on effect of Ammonium Molybadate for enhancing yield of chickpea
Season & Year	Rabi 2024-25
Problem identified	No appropriate data on use Ammonium Molybadate in chickpea.
Thematic Area	TOT
Farming situation	Irrigated
Name of Technology Intervention under study	T2 Seed treatment through fungicide 2-3 g/kg seed + Insecticide (chlorpyrifos) 5ml/kg seed + Ammonium Molybadate 1g/kg seed
Farmers Practice	T1 Seed treatment through fungicide 2-3g/kg seed
No. of replication (Farmers)	50 (Respondents) Village-02 (25 farmers from each village)

Results / findings

Performance indicators/ parameters	Unit/ details
Parameters	- Knowledge level - Adoption level

	• Constraints • Feedback • (No. of Nodules/plant, No. of branches / plant, No. of pods / plant, Yield q/ha, BC ratio)

OFT-11

Information about Extension OFT:

Title	Assessment of effective technique for TOT of Natural Farming in wheat
Season & Year	Rabi 2024-25
Problem identified	Poor soil health, high cost of cultivation and poor quality produce
Thematic Area	TOT
Farming situation	Irrigated
Name of Technology Intervention under study	T1-Technology transfer through training T2-Technology transfer through Demonstration
Farmers Practice	Using informal methods of technology like- Friends, Neighbors, Input dealers etc.
No. of replication (Farmers)	60 (Respondents) Village-10 (6 farmers from each village)

Results / findings

Performance indicators/ parameters	Unit/ details
Parameters	Gain in Knowledge, Retention of Knowledge, Change in Attitude and Adoption of Technology

Information about Home Science OFT: Nil

Title of on-farm trial:	-
Year/Season:	-
Problem diagnosis:	-
Thematic area: (Focus area in DFI and nutri smart initiatives)	-
No of trials:	-
No. of farmers/farm women involved	-
Type of OFT (Assessment/ Refinement):	-
Details of technology selected for assessment:	
T1 – Farmers Practice-	-
T2 –Recommended Practice-	-
Source of technology:	-
Characteristics of technology:	-
Name of Crop/Enterprises:	-
Farming situation:	-
Date of sowing:	-
Date of harvesting:	-
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
1	Kharif Onion	IWM	Application of 0.2% Oxyflurofen 23.5 % EC before planting + one hand weeding at 40-60 days after transplanting is recommended for marketable bulb yield and weed control efficiency (65-80%).	Weedicide - Oxyflurofen 23.5 % EC	Kharif - 2024	5.00 (0.4 ha each demo. Total no. of demo 12, Total area covered under demo- 5.00 ha.)	12	-
2	Hy. Chilli	IPM	Spray neem product @ 5% or spinosad 45 SC @ 75 g a.i. / ha against thrips. Need based application of fipronil or acephate+Application of biopesticide abamectin @ 5% for mites management+ If both thrips & mites are seen together, spray of difenthiuron or fenpropathrin 30 EC @ 0.5 ml/litre +Erect pheromone traps @ 5/ ha for +Spray of dimethoate 30 EC for aphids+Yellow & Blue sticky Traps.	Neem oil and Yellow & Blue sticky Traps	Kharif & 2024-25	5.00 (0.4 ha each demo. Total no. of demo 12, Total area covered under demo- 5.00 ha.)	12	-
3	Hy. Tomato	Weed Management/ Resource Conservation	Transplanting on Raised Bed +Drip Irrigation+UV Stabilized Plastic Mulching with 30 Micron thickness and Double coloured (Silver and Black)	Plastic Mulching	Rabi & 2024-25	5.00 (0.4 ha each demo. Total no. of demo 12, Total area covered under demo- 5.00 ha.)	12	-
4	Hy. Tomato	Nutrient Management/ Precision Farming	Fertilizer application through drip system at monthly intervals. Total fertilizer Urea Phosphate 151 kg+ Urea 185 kg+ SOP 266.kg/ha	NPK 19:19:19	Rabi & 2024-25	5.00 (0.4 ha each demo. Total no. of demo 12, Total area covered under demo- 5.00 ha.)	12	-
5	Maize	SFM (Soil Fertilizer management)	Demonstration of Integrated Nutrient management in Hybrid Maize NPK- 120:60:40	MOP	Kharif 2024-25	2 ha	5	-

6	Wheat	SFM (Soil Fertilizer management)	Target Yield- 50 q/ha FN-4.40T - 0.40 SN, FP2O5- 4.00T – 4.58 SP, FK2O- 2.53T - 0.16 SK NPKZn-120:60:40:5	ZnSo4	Rabi 2024-25	2 ha	5	-

Extension and Training activities under FLDs

S. No.	Activity	No. of activities	Month	Number of participants
1	Field days	4	September &January	100
2	Farmers Training	8	June, July & September, October, November	160
3	Media coverage	5	June, July & September, October, November	Mass
4	Training for extension functionaries	4	June & September	80

Details of FLD on Enterprises

Farm Implements:Nil

Name of the implement	crop	Season and year	No. of farmers	Area (ha)	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
							Demon.	Local check
-	-	-	-	-	-	-	-	-

*Field efficiency, labour saving etc.

Livestock Enterprises:Nil

Enterprise	Breed	No. of farmers	No. of animals, poultry birds etc.	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
						Demo.	Local check
-	-	-	-	-	-	-	-

*Milk production, meat production, egg production, reduction in disease incidence etc.

Other Enterprises:Nil

Enterprise	Variety/ breed/Species /others	No. of farmers	No. of Units/ area	Critical inputs	Performance parameters/ indicators	Data on parameter in relation to technology demonstrated	
						Demo.	Local check

Details of Demonstration Unit at KVK

Demonstration Unit	Particulars /details	Area (Sq m)	Output /Production
Instructional farm	Breeder Seed production and mother orchard of fruit crops	-	-
Rearing & conservation of high value Kadaknath poultry in semi-intensive system with solar hatchery	Capacity building & production of chicks	-	-
Dairy Unit with bio-gas plant	Capacity building, milk production & production of calves, biogas & slurry production	-	-
Goatery breeding & conservation unit	Breed Improvement, capacity building, meat & milk production.	-	-
Vermi-culture and composting Unit	Capacity building and production of Vermi culture and compost.	-	-
Poly house cultivation and Green house for production of planting material	Capacity building for off season vegetable production and production of planting material	-	-
Crop cafeteria with MIS and fertigation system	Exhibition of various climate suitable varieties of crops & technologies	-	-
Azola unit	Capacity building and Azola	-	-

	culture production		
Implements units	Exhibition of various Farm implements & capacity building	-	-
Soil Testing Lab	Preparation of Soil Health Card based on GPS	-	-
Technology Park	Display of various suitable technologies for the district and capacity building	-	-
IFS model (Agro + Horti + Poultry + Goatery + Pastoral system)	Capacity building and demonstration for small and marginal farmers	-	-
Organic Farming demo. unit	Organic seed and vegetable production and capacity building	-	-
Soil and water conservation	Soil and water conservation structures	-	-
Seedling cum vegetable polyculture net house	Preparation of seedling and multilayer vegetable seedling	-	-
Multilayer vegetable farming system model	High value vegetable multilayer farming	-	-

Annual Action Plan 2024

KVK Datia

Year of sanction: 2007

7	Threshing floor	-				-	-	-
8	Farm godown	-				-	-	-

B) Vehicles

Type of vehicle	Year of purchase	Cost (Rs.)	Total kms. Run	Present status
Tractor (Power Tiller)	27.03.2008	333000		Not good
Motor Cycle 2	28.06.2010	47314		Not good
Bolero(Jeep)	30.03.2009	4444844		Not good
Other (Pl. specify)				

C) Equipment & AV aids

Name of the equipment	Year of purchase	Cost (Rs.)	Present status
Projector	2015-16	-	Running
Computer, Laser Printer	2016-22	-	Running
Stabilizer 2 KVA	2020-21		Running
Inverter 600 VA (2)	-	-	Running
Inverter Battery (2)	-	-	Runing

1.5.(A). Details of SAC meeting to be conducted in the year

Sl. No.	Tentative Date
1	June
2	September

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 1	Block covered : Datia Geographical area : 47.00% Major Farming systems : crop production, crop production + Animal husbandry, crop production + horticulture. Major crops : Sesame, black gram, green gram, wheat, gram and vegetables
2	AES – 2	Block covered : Seondha nad Bhandar Geographical area : 53.00% Major Farming systems : crop production, crop production + Animal husbandry, crop production + horticulture. Major crops : Sesame, black gram, green gram, wheat, gram , pea and vegetables

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	AES – 1	Topography : undulating to slopy, Soils : light (18.00%) and heavy (82.00%)
2	AES - 2	Topography : Undulating mild slopy, Soils : Light (28.00%) and heavy (72.00%)

SWOT Analysis of each Agro-Ecological Situations of district

AES-1 (name)

Strength	Weakness	Opportunities	Threats
Good water holding capacity Good fertility level	Undulating and slopy soil	□ Good fertile soil with high holding moisture capacity	This AES is several time not suitable for ground nut, pulses due to excessive moisture. slopyness characters is affecting crop yield

AES-2 (name)

Strength	Weakness	Opportunities	Threats
Good water holding capacity 72 per cent good fertility level	Undulating and mild slopy soil	• Good fertile soil with high holding moisture capacity. Suitable for oil seed pulses and cereal crops	• Need excess water.

Land Use Pattern

Particulars	Area “000 ha”
Total Geographical area	307.17
Forest	29.242
Waste Land	24.50
Other than cultivated area	5
Cultivable waste and alkaline land	5.53
Pastures	10.96
Bushes	
Current Fallow	12.86
Other Fallow	
Agricultural Land	231.20
Area Sown	284.55
Kharif	141.30
Rabi	227.61
Zaid	-
Cropping Intensity	159.44

Irrigated Area with Different Sources:

S. No.	Description	Area (ha)
1	Canal	105969
2	Well	59601
3	Tube well	5469
4	Ponds	1391
5	Others	

Soil types

S. No.	Soil type	Characteristics	Area “000 ha”
1	Light (<i>Ranker</i>)	Soils are generally red in color and very light in texture. These soils are highly deficient in nutrients with very low moisture retaining capacity which covered under order entisols and inceptisols	12.15
2	Medium (<i>Padua</i>)	Soils are light gray in color, well drained, better	49.20

		suited of all types of crops under irrigated conditions which covered two orders, vertisols and inceptisols	
3	Heavy (<i>Kabar/Mar</i>)	Soils are black in color, possess high moisture holding capacity and have integrated of mont morillonite, little in chloride minerals which covered under the order of vertisols	133.92

Note: Figure. In parenthesis denotes the percentage of total area.

Area, Production and Productivity of major crops cultivated in the district

S. No	Crop	Area (ha)	Production (Qt.)	Productivity (q/ha)
1	Rice	52.5	189	3600
2	Black Gram	37.74	27.55	730
3	Groundnut	26.00	36.40	1400
4	Sesame	19.00	9.69	510
5	Soybean	0.48	0.50	1050
6	Wheat	180.40	631.4	3500
7	Chickpea	9.85	20.685	2100
8	Pea	11.50	21.85	1930
9	Mustard	15.84	17.424	1140
10	Sugarcane	7.37	442.2	60000

Weather data (Jan, 2023- Dec., 2023)

Month /Year	Rainfall (mm)	Temperature (°C)	
		Maximum	Minimum
Jan. 2023	10.5	20.39	10.01
Feb. 2023	00	29.25	11.32

May. 2023	73.1	38.59	23.17
Jun. 2023	205.5	38.05	27.03
July. 2023	218.4	33.53	25.88
Aug. 2023	305.00	31.02	25.54
Sept. 2023	170.00	33.84	24.66
Oct. 2023	00	34.06	18.58
Nov. 2023	00	28.86	13.9
Dec. 2023	7	24.4	18.6

Production and productivity of livestock, Poultry, Fisheries etc. in the district

Category	Population (20 th livestock censuses 2019)	Production	Productivity
Cattle			
<i>Crossbred/ Indigenous</i>	12627/101602	334.38thousand MT	7-8 kg / 2-3 kg
Buffalo	290054		4-5 kg
Sheep			
<i>Crossbred/ Indigenous</i>	14309	20.59 thousand kg wool	1.3 kg
Goats	163737	0.71 thousand MT meat	12 kg
Pigs <i>Crossbred/ Indigenous</i>	3470	---	---
Rabbits	-	-	-
Poultry			
Hens	37947	22.93 Lakh eggs	112 eggs/ bird/yr
Turkey and others	-	-	-
Category	Area	Production	Productivity
Fish	 (ha)	Q/ month	 Q/ ha.

Details of Operational area / Villages (2023)

Sl. No.	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Datia, Seondha, Bhandar	Datia, Seondha, Bhandar	Rarua Pura, Kakraua, Dera Gandhari, Sanora	Black gram, Rice, Groundnut, Sugarcane,	Poor fertility status of soil, Heavy runoff of rain water, Less availability of quality	Soil health management, Integrated nutrient management,

			Barodi, Kharg Rajpur, Garera Dheer Pura, Kali Pura, Bhaguapura, Badonkala, Kewlari, Katapur Chitva	Wheat, Chickpea, Mustard, Field pea and vegetables	seeds, Non availability of location specific recommended varieties, Heavy incidence of pest and diseases, Imbalance use of fertilizer, Heavy infestation of weeds, Improper maintenance and care of milch animal.	Integrated Pest management, Feeding management through supplementation of minerals, bypaas fat, by pass protein and balance feeding in live stock, Water harvesting for recycling and ground water recharge

Priority / Thrust areas

S. No.	Particulars
1.	Soil health management
2.	Water harvesting for recycling and ground water recharge
3.	In situ soil and moisture conservation
4.	Varietal diversification.
5.	Integrated nutrient management
6.	Integrated Pest management
7.	Crop diversification
8.	Breed up gradation in buffalo, goat and cattle
9.	Health Management of live stock
10.	Green fodder availability
11.	Composite Fish Farming
12.	Income Generation of Farm Women
13.	Drudgery Reduction and Efficiency Enhancement
14.	Reduction in Malnutrition
15.	Nutritional securities at household level

TECHNICAL PROGRAMME

A. Details of targeted mandatory activities by KVK

OFT		FLD and CFLD	
1		2	
Number of OFTs	Number of Farmers	Number of FLDs	Number of Farmers
20	500	18	155

Training		Extension Activities	
3		4	
Number of Courses	Number of Participants	Number of activities	Number of participants
63	1786	147	12217

Seed Production (Qtl.)	Planting material (Nos.)
500	3000

B. Abstract of interventions to be undertaken

S . N o.	Thru st area	Crop/ Enter prise	Identified Problem	Interventions					
				Title of OFT if any	Title of FLD if any	Title of Training if any	Title of training for extension personnel if any	Exten sion activi ties	Supp ly of seed s, plant ing mate rials etc.
1	Soil health manag ement	Wheat	Yield reducing in wheat (8%) due to higher temperature during milking stage	Assessment of foliar spray of potassium nitrate and cow urine at milking stage to manage drought in wheat			Soil Health Management		
		Chickp ea	High cost due to use of chemical fertilizer and deteoration in soil health	Assessment of natural farming in chickpea crop					
		cabbag e	Low economic return (40%) due to deterioratio n in quality and yield of cabbage	Assessment of foliar spray of mono potassium phosphate (0:52:34) and soil application of Jivaamrit (5%) on quality and yield of cabbage					
2	Varieta l diversi ficatio n.	Aush gourd			Demonstration of improved variety of Ash gourd (Kashi Surbhi)				
		Bottle gourd			Demonstration of improved variety of Bottle gourd (Kashi Ganga)				
		Marigo ld			Demonstration of improved variety of marigold (Pusa Bahar)				
		Radish			Demonstration of improved variety of radish (Pusa Chetki)				
3	Integra ted nutrien t manag ement	Rice	Low yield (15%) of rice due to low Nitrogen use efficiency.	Assessment of nano urea on growth and yield attributes of rice					
		Ground nut	Low yield of groundnut	Assessment of integrated nutrient management in					

			(20%) due to imbalance use of fertilizer	groundnut in rainfed condition					
		Cauliflower	Low market price (30%) due to poor quality of curd in cauliflower	Assessment of effect of sulphatic fertilizer on yield and quality of early cauliflower					
		Tomato	Low economic return (30%) due to poor quality and yield of tomato	Assessment of application of bio-manure on quality and yield of tomato					
		Chick pea			Demonstration the effect of Sagarika (liquid) on chick pea				
		Rice			Demonstration of integration of NPK consortia (liquid bio fertilizer) in rice				
4	Integrated Pest management	Chilli	Low yield (25%) due to flower drop in chilli	Assessment of foliar spray of alpha naphthelic acetic acid for control of flower drop in chilli					
		Rice	Production loss 15%,	Assessment of integrated pest management technology for stem borer in Rice		• Integrated pest management in rice crop	Integrated pest management in Kharif crops		
		Brinjal	Production loss 15 per cent	Assessment of integrated pest management technology for brinjal shoot and fruit borer		Integrated pest management Rabi vegetable			
		Chickpea	High cost of insecticide and Low yield of Chickpea	Assessment of natural insecticide Agniastra for Chickpea pod borer management		Integrated pest management of rabi crops	Integrated pest management in Rabi crops		
		Mustard	High cost of insecticide and Low yield (15%) of mustard	Assessment of natural insecticide Neemastra for mustard aphid management					
		Black gram			Demonstration of Integrated pest management practices for Black gram yellow mosaic virus	Integrated pest management in Black gram			
		Groundnut			Demonstration of integrated collar rot management in ground nut	Integrated pest management in Groundnut			

		Field pea			Demonstration of integrated disease management of powdery mildew in field pea	Integrated pest management of rabi crops			
		Wheat			Demonstration of integrated flag smut disease management in wheat	Integrated pest management of rabi crops			
5	Health Management of live stock & poultry	Dairy cattle	Low milk production (20%) from high lactating Crossbred cattle (more than 8000) due to low dietary energy intake	Assessment of By Pass Fat on milk production in CB dairy cattle		•Management of dairy animals •Importance of feeding By Pass Fat on milk production in dairy CB cattle			
		Broiler poultry	High mortality (30%) of broiler due to CRD in broiler poultry. Affected birds 60%	Assessment of tylosine sulphate for control of Chronic Respiratory Disease (CRD) in broiler poultry		•Backyard poultry farming			
		Cattle	Low fertility (60%) and milk production (20%) from Indigenous cattle due to lack of trace minerals. Animal affected 70%	Assessment of chelated trace minerals supplement on fertility and milk production in Indigenous cattle					
		Chabro			Demonstration of improved breed of colored poultry (Chabro) in deep liter system of poultry farming				
		Dairy buffalo			Dairy Demonstration of Albendazole for deworming in buffalo calf	•Disease management in dairy animals			
		Kadakhnath			Poultry Demonstration of improved breed of poultry Kadakhnath in deep liter system of poultry farming				

6	Green fodder availability	Azolla	Low milk production (18%) and conception rate (40%) in buffaloes due to unavailability of quality green fodder in lean period. Animal affected 60%	Assessment of Azolla as green fodder on milk production and conception rate in dairy buffaloes		Importance of Azolla cultivation and feeding as green fodder in dairy buffaloes	Recent advances in feed and fodder production for dairy animals		
		Napier Bajra			Demonstration of round the year fodder production for dairy buffaloes.	•Feeding management in dairy animals	Breeding management of dairy animals		
7	ICT		Lack of adoption level of farmers towards Soil health card	Assessment of the adoption level of farmers towards Soil health card					
		Field pea	Yield gap between CFLD farmers and practicing farmers of field pea	Impact study of cluster frontline demonstration of Field pea					

Technologies to be assessed

Disease management	-	1	-	-	-	-	-	1
TOTAL	3	1	-	-	-	-	-	4

Details of On Farm Trial (OFT)

OFT-1 (Soil Science)

Crop / Enterprise	Rice	
Title of on farm trial	Assessment of nano urea on growth and yield attributes of rice	
Problem diagnosed	Low yield (15%) of rice due to low Nitrogen use efficiency. (Affected area 40000 ha)	
Farmers' Practices	225 kg urea +100kg DAP/ha after transplanting	
Details of technologies selected for assessment	T ₁	T2- 100% recommended N through Urea
	T ₂	50% recommended N through Urea as basal dose + Two foliar spray of Nano urea @

	2.0 ml/liter water growth and panicle formation
Source of technology	IFFCO-2018
Plot size	0.1ha
No. of farmers	10
Total cost	225
Critical input	2250
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	Grains/Panicle, 1000 test weight (g) yield (q/ha), Net return (Rs/ha), B:C ratio

OFT-2 (Soil Science)

Crop / Enterprise	Groundnut
Title of on farm trial	Assessment of integrated nutrient management in groundnut in rainfed condition
Problem diagnosed	Low yield of groundnut (20%) due to imbalance use of fertilizer, Affected area 9000.00ha
Farmers' Practices	100kg DAP kg/ha at the time of sowing as a basal dose
Details of technologies selectedfor assessment	T ₁ RDF 20:60:20:45:: NPKS kg/ha as basal dose T ₂ 75% RDF + 5 ton FYM
Source of technology	IARI -2017
Plot size	0.1ha
No. of farmers	10
Total cost	Rs. 2375
Critical input	Fertilizers
Performance indicators: (iv) Technical- yield (q/ ha) (v) Economic (vi) Social – Employment generation	Initial and final soil analysis, Pod/plant (No.), 100 grain weight (g), yield (q/ha) Net return (Rs/ha), B:C ratio

OFT-3 (Soil Science)

Crop / Enterprise	Wheat
Title of on farm trial	Assessment of foliar spray of potassium nitrate and cow urine at milking stage to manage drought in wheat
Problem diagnosed	Yield reducing in wheat (8%) due to higher temperature during milking stage . Affected area: 60000.00ha.
Farmers' Practices	225 kg urea +100kg DAP/ha
Details of technologies selectedfor assessment	T ₁ T2- STV base recommended fertilizer application and 2% potassium nitrate as foliar spray at milking stage T ₂ STV based recommended fertilizer application + cow urine as foliar spray at milking stage
Source of technology	IISS & IARI-2018
Plot size	0.1ha
No. of farmers	10
Total cost	200
Critical input	2000
Performance indicators: (vii) Technical- yield (q/ ha) (viii) Economic (ix) Social – Employment generation	No. of tillers/plant, 1000 test weight (g) yield (q/ha), Net return (Rs/ha), B:C ratio

OFT-4 (Soil Science)

Crop / Enterprise	Chick pea
Title of on farm trial	Assessment of natural farming in chickpea crop
Problem diagnosed	High cost due to use of chemical fertilizer and deteoration in soil health
Farmers' Practices	no use of fertilizers
Details of technologies selectedfor assessment	T ₁ STV base recommended fertilizer N:P:K::20:50:20:20 T ₂ Use of natural farming component (Bijamrit, Jivamrit, and need base natural pesticide)
Source of technology	Natural farming (Subhash Palekar)
Plot size	0.1ha

No. of farmers	10
Total cost	100
Critical input	1000
Performance indicators: (x) Technical- yield (q/ ha) (xi) Economic (xii) Social – Employment generation	Initial and after harvest soil testing, pods/plant , yield/ha, Net return (Rs/ha), B:C ratio

OFT-5

Name of Discipline	Horticulture
Title of on-farm trial:	Assessment of effect of sulphatic fertilizer on yield and quality of early cauliflower
Year/Season:	Kharif, 2024
Farming situation:	Sandy loam- irrigated
Problem diagnosis:	Low market price (30%) due to poor quality of curd in cauliflower. Affected area 350 ha
Thematic area:	HOV (Micro-nutrient)
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	No use sulphatic fertilizer
T2 –Recommended Practice-	Application of sulphar (40 kg/ha) through SSP before transplanting
T3- Recommended Practice-	Application of sulphar (40 kg/ha) through bantonite sulpher after transplanting at time of first earthing up
Date of sowing:	
Date of harvesting:	
Source of technology:	SKUAST-K, Srinagar, 2018
Characteristics of technology:	Sulphatic fertilizer
Name of Crop/Enterprises:	Early cauliflower
Performance Indicator	Yield of marketable curd (q/ha), Net return (Rs/ha) B:C ratio
Critical Input	Sulphatic fertilizer (SSP, Gypsum)
Cost of Input	Rs. 200/ trail
Total cost	Rs. 2000/-
Recommendations for Farmers	
Recommendations for Deptt. Personnel

OFT-6

Name of Discipline	Horticulture
Title of on-farm trial:	Assessment of foliar spray of alpha naphthelic acetic acid for control of flower drop in chilli
Year/Season:	Kharif, 2024
Farming situation:	Sandy loam- irrigated
Problem diagnosis:	Low yield (25%) due to flower drop in chilli, Affected area 450 ha
Thematic area:	HOV
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment

Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	No use plant growth regulator
T2 –Recommended Practice-	Foliar spray of NAA (50 ppm) at 45 DAT
T3- Recommended Practice-	Foliar spray of NAA (50 ppm) at 45 and 60 DAT
Date of sowing:	
Date of harvesting:	
Source of technology:	BCKV, Mohanpur, 2017
Characteristics of technology:	Plant growth harmon
Name of Crop/Enterprises:	Chilli
Performance Indicator	Flower drop (%), fruit setting (%), Fruit size (cm), yield (q/ha), Net return (Rs/ha) B:C ratio
Critical Input	Alpha naphthenic acetic acid
Cost of Input	Rs. 200/ trail
Total cost	Rs. 2000/-
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-7

Name of Discipline	Horticulture
Title of on-farm trial:	Assessment of foliar spray of mono potassium phosphate (0:52:34) and soil application of Jivaamrit (5%) on quality and yield of cabbage
Year/Season:	Rabi, 2024-25
Farming situation:	Sandy loam- irrigated
Problem diagnosis:	Low economic return (40%) due to deterioration in quality and yield of cabbage. Affected area 400 ha
Thematic area:	Irrigated-HOV
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Only use off DAP fertilizers as basal dose
T2 –Recommended Practice-	Foliar spray of mono potassium phosphate (1%) at 30 DAT
T3- Recommended Practice-	Soil application of Jivaamrit (5%) at 30 DAT
Date of sowing:	
Date of harvesting:	
Source of technology:	UAS Bangalore 2019 and Palekar, S, 2006
Characteristics of technology:	Fertilizer and Bio manure
Name of Crop/Enterprises:	Cabbage
Performance Indicator	Head size (cm), Head weight (g), Yield (q/ha), Net return (Rs/ha), B:C ratio
Critical Input	Mono potassium phosphate (0:52:34) and Jivaamrit
Cost of Input	Rs. 200/ trail
Total cost	Rs. 2000/-
Recommendations for Farmers	
Recommendations for Deptt. Personnel

OFT-8

Name of Discipline	Horticulture
Title of on-farm trial:	Assessment of application of bio-manure on yield and quality of tomato
Year/Season:	Rabi, 204-25
Farming situation:	Sandy loam- irrigated
Problem diagnosis:	Low economic return (30%) due to poor quality and yield of tomato. Affected area 850 ha
Thematic area:	Irrigated-HOV
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Only use off DAP fertilizers as basal dose
T2 –Recommended Practice-	Foliar spray of Panchyagavya (3%) at 45 DAT
T3- Recommended Practice-	Soil application of Jivaamrit (5%) at 45 DAT
Date of sowing:	
Date of harvesting:	
Source of technology:	Palekar, S, 2006
Characteristics of technology:	Bio manure
Name of Crop/Enterprises:	Tomato
Performance Indicator	Fruit size (cm), Fruit weight (g), Yield (q/ha), Net return (Rs/ha), B:C ratio
Critical Input	Panchyagavya and Jivaamrit
Cost of Input	Rs. 200/ trail
Total cost	Rs. 2000/-

OFT-9

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of integrated pest management technology for stem borer in Rice
Year/Season:	2024/ Kharif
Farming situation:	Clay loam, Irrigated
Problem diagnosis:	Production loss 15%, affected area 50000 ha
Thematic area:	PLP
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Non judicious use of Insecticide
T2 –Recommended Practice-	Handpick and destroy egg masses during seedbed and transplanting, + Cut the leaf-top (5.0 cm) before transplanting, + Apply nitrogen

	fertilizer in split dose at recommended rate and time of application + Raise level of irrigation water periodically to submerge the eggs deposited on the lower parts of the plant + Selecting early maturity variety + Chlorantraniliprole 0.4% G 10 kg/ha spray within 50 days of sowing
T3- Recommended Practice-	T2 + Spray the insecticides Fipronil 5% SC 1000-1500 g/ha in place Chlorantraniliprole
Date of sowing:	--
Date of harvesting:	--
Source of technology:	TNAU, Tamil Nādu , 2020
Characteristics of technology:	Integrated pest management base technology
Name of Crop/Enterprises:	Rice
Recommendations for Farmers	-

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
1	Rice	INM	75% RDF + Green Manuring (Dhaincha)	Seed (Dhaindh)	Kharif 23	2.0	05	Initial and final soil testing, No. of tiller, Yield (q/ha), Net return, B:C ratio
2	Rice	INM	5 % NPK + Seedling treatment with NPK consortia @ 250ml/ha.	NPK consortia	Kharif 23	2.0	05	Initial and final soil testing, No. of tiller, Yield (q/ha), Net return, B:C ratio
3	Chick pea	INM	Foliar spray of liquid bio-fertilizes Sagarika @ 1% at flowering stage	Sagarika (liquid)	Rabi-2023-24	2.0	05	Initial and final soil testing , No. of pods/plant, grain yield / ha Net return, and B:C Ratio
4	Wheat	Precision farming	50% N as basal + Foliar spray of nano urea @ 2ml/l after first and second irrigation	Nano urea	Rabi-2023-24	2.0	05	Test weight, Nitrogen use efficiency, Yield q/ha, Net return, BC Ratio,
5	Black gram	PLP (IDM)	Resistant variety IPU 13-1 + Seed treatment with imidacloprid 600FS@ 5.0ml/kg + Recommended dose of N fertilizer + Installation of yellow sticky traps (20traps/acre)+ Two Spray of Imidachloprid 17.8 SL @ 5.0 ml / 15 L water at 15 days interval	Imidachloprid 17.8 SL	Kharif 2023	2.0	10	Disease incidence (%), Disease intensity (%), Yield q/ha, Cost of cultivation (Rs/ha), Gross return (Rs/ha), Net return (Rs./ha), BC Ratio
6	Groundnut	PLP	Summer deep	Tebucona	Kharif	2.0	10	Disease incidence

		(IDM)	ploughing + Crop rotation + destruction of infested plant debris + seed treatment through tebuconazole 1.5 g/kg seed + spray of tebuconazole 25.9 EC @ 1.0 ml/ L water	zole 25.9 EC	2023			(%), Pods/Plant, Yield q/ha, Cost of cultivation (Rs/ha), Gross return (Rs/ha), Net return (Rs./ha), BC Ratio
7	Field Pea	PLP (IDM)	Sowing is done during the first week of November + two foliar sprays at ten- day intervals, of wettable sulphur 80% @ 0.3 % starting at the onset of the disease	wettable sulphur 80%	Rabi 2023-24	2.0	10	Disease incidence (%), Disease intensity (%), Pod/plant Yield q/ha, Cost of cultivation (Rs/ha), Gross return (Rs/ha), Net return (Rs./ha), BC Ratio
8	Wheat	PLP (IDM)	Use of disease-free seeds that are selected from healthy crop + Seed treatment with carbendazim + mencozeb @ 2.0g/kg of seeds + Split application of nitrogen is recommended + Avoid field activities when the plants are wet + Spraying of Propiconazole 25 EC @ 1.0 ml/Lt. water	Propiconazole 25 EC	Rabi 2023-24	2.0	10	Disease incidence (%), Disease intensity (%), Yield q/ha, Cost of cultivation (Rs/ha), Gross return (Rs/ha), Net return (Rs./ha), BC Ratio
9	Pearl millet	ICM	Demonstration of pearl millet variety HHB-299 (2015)	variety HHB-299	Rabi 2023-24	2.0	10	yield (q/ha), Net return (Rs/ha), B:C ratio
10	Sorghum	ICM	Demonstration of purpose Sorghum (Jowar) variety RVJ-1862	variety RVJ-1862	Rabi 2023-24	2.0	10	yield (q/ha), Net return (Rs/ha), B:C ratio

Planning for Crop Cafeteria

Total Area of Crop cafeteria: 1000 Sq m

Crop	Season	Variety	Particulars /details	Area (Sqm)
Blackgram	Kharif	Shekhar 3, Pratap urad 1, IPU 13-1 , Indra urd 1	High yielding & YMV tolerant	
Green gram	Kharif	Virat, Shika, PDM-139, TJM-3	High yielding & YMV tolerant	
Soybean	Kharif	RVS1004, JS 9305, JS 95-60	High yielding & YMV tolerant	
Sesame	Kharif	RT-351, 345, TKG-8	Drought tolerant	
Groundnut	Kharif	JGN-3, Nitya Harita	Area specific	
Paddy	Kharif	PB 1509, 1121, 1718, 1692	Area specific	
Mustard	Rabi	NRCHB 101, RH 749, RH 725, Girraj	High yielding & Area specific	
Chickpea	Rabi	RVG-204, 202, JG-16, 11	High yielding & Wilt registrant	
Wheat	Rabi	HI-1544, RVW 4106, HI 8759, 8713, Raj 4238, GW-322, 366	High yielding	
Field pea	Rabi	IPFD 12-02, 10-2, IPF 4-9 Prakash,	Area specific	
Tomato	Kharif/Rabi	Pusa Ruby, Pusa Sadabahar	High yielding & OP ver.	

		Jawahar tomato-99, Pusa hy-4, KT-4, Abhilash,	High yielding & Hy.	
Brinjal	Kharif/Rabi	JB-64, Pant Samrat, Pusa purple long	High yielding & Long shape	
		Pusa hy-5, Pant Rituraj, Pusa purple round	High yielding & Round shape	
Chilli	Kharif/Rabi	JM-218, JM-283, Pusa Jwala	High yielding & OP ver.	
		CCH-3, Kranti	High yielding & Hy.	
Cauliflower	Rabi	Early Kunwari, Pusa Early Synthetic	High yielding & Ealry	
		Pusa Snow ball-1, Pusa Snow ball-2, K-1	High yielding & Late sown	
Cabbage	Rabi	Pride of India, Golder Acre, Pusa early drum head	High yielding	

Details of Demonstration Unit at KVK

Demonstration Unit	Particulars /details	Area (Sq m)	Output /Production
Dairy Unit	Gir	231.70	2400 Lt.
Goattery Unit	Barbari & Jamunapari	58.00	20
Poultry Unit	Chabro & Kadaknath	150.00	1000
Fishery Unit	Fish seed	300.00	30000
Vermi compost Unit	Vermi compost	9.5	100.00 q.
Vermi culture Unit	Earth worm	9.5	50.00 kg
Azolla Unit	Azolla	26.60	500.00 kg
Mushroom Unit	Mushroom	11.10	100.00 kg
BGA Unit	BGA	14.60	100.00 kg

[illegible]

1.3 Total land with KVK (in ha):20.489

S. No.	Item	Area (ha)
1	Under Buildings	2.489
2	Under Demonstration Units	0.40
3	Under Crops	17.00
4	Orchard/Agro-forestry	0.60
5	Others (specify)	0.00
Total		20.489

1.4 Infrastructural Development:**A) Buildings**

S. No.	Name of building	Source of funding	Stage					
			Complete			Incomplete		
			Completion Date	Plinth area (Sq.m)	Expenditure (Rs.)	Starting Date	Plinth area (Sq.m)	Status of construction
1	Administrative Building	ICAR	2009	521	5145000	-	-	-
2	Farmers Hostel	ICAR	2009	330	3541000	-	-	-
3	Staff Quarters (6)	ICAR	2010	425	3100000	-	-	-

7	Threshing floor	ICAR	2011-12	340	200000	-	-	-

B) Vehicles

Type of vehicle	Year of purchase	Cost (Rs.)	Total kms. Run	Present status
Tractor (Power Tiller)	2017	700000	4000 hours	Good Condition
Motor Cycle 2	2010	47539	30044	Poor condition
Bolero(Jeep)	2017	598607	117365	Working
Other (Pl. specify)	-	-	-	-

C) Equipment & AV aids

Name of the equipment	Year of purchase	Cost (Rs.)	Present status
Projector	2017	96266	Working
Xerox Machine	2008	60000	Not Working
Video Camera	2008	19270	Not Working
Computer, Laser Printer	2010	38845	Working but very old

1.5.(A). Details of SAC meeting to be conducted in the year

S. No.	Tentative Date
1	June 2024
2	October 2024

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 1(Malwa Plateau)	Soybean-Wheat/Chickpea/Garlic/Onion/potato, Agriculture + Poultry /Dairy /Goatry
2	AES – 2 (Nimar valley)	Soybean-Wheat/Chickpea+Green gram, Cotton-Wheat/Green gram, Agriculture + Poultry /Dairy /Goatry and Vegetable-vegetable

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	AES – 1 (Malwa Plateau)	Tehsil - Dewas, Tonkhhurd, Sonkach & half area of Bagli comes under Malwa plateau. The soils of this region are heavy to medium black soils.
2	AES – 2 (Nimar valley)	Khategaon, Kannod and half area of Bagli comes under Nimar valley. The soils of the region are heavy and medium light. In the district light soils are 30%, medium soils are 40% and heavy soils are in 30%.

SWOT Analysis of each Agro-Ecological Situations of district

AES-1 (Malwa Plateau)

Strength	Weakness	Opportunities	Threats
☐ Good soil type good infrastructure facilities and transport	☐ Lack of irrigation and crop diversification	☐ Possibility of export of good produce	☐ Uncertainty of erratic rainfall and climatic condition

AES-2 (Nimar valley)

Strength	Weakness	Opportunities	Threats
☐ Good land holding	☐ Lack of irrigation and crop diversification	☐ Possibility of export of good produce	☐ Uncertainty of erratic rainfall and climatic condition

Land Use Pattern

Particulars	Area “000 ha”
Total Geographical area	701.304
Forest	206.636
Waste Land	47046
Cultivable waste and alkaline land	49376
Current Fallow	2825
Agricultural Land	447.622
Area Sown	432.000
Kharif	432.000
Rabi	390.000
Zaid	35.000
Cropping Intensity	198

Irrigated Area with Different Sources:

S. No.	Description	Area (ha)
1	Canal	14866
2	Well	106260
3	Tube well	125693
4	Ponds	14030
5	Others	52285

Soil types

S. No.	Soil type	Characteristics	Area “000 ha”
1	Black cotton	Medium to deep derived from deccan trap which is called black cotton and classified as Vertisols. It contents 40 - 60% clay.	248.010
2	Light Soil	Having low water holding capacity. Soil depth upto 50-60 cm. In some pockets it contains murram and gravels	138.020

Note: Figure. In parenthesis denotes the percentage of total area.

Area, Production and Productivity of major crops cultivated in the district

S. No	Crop	Area (ha)	Production (Qt.)	Productivity (Q /ha)
1	Soybean	313500	5486300	17.50
2	Maize	39760	1910900	38.00
3	Black gram	12920	84000	6.50
4	Jowar	9540	181300	19.0
5	Pigeon pea	7680	96000	12.50
6	Green gram	7550	54300	7.20
7	Wheat	310000	12710000	41.00
8	Chickpea	72000	1044000	14.50
9	Mustard	2500	34750	13.90

Weather data (Jan, 2023- Dec., 2023)

Month /Year	Rainfall (mm)	Temperature (°C)	
		Maximum	Minimum
Jan. 2023	0	22.16	13.35
Feb. 2023	0	27.41	7.21
Mar. 2023	0	35.40	12.52
Apr. 2023	0	40.19	17.28
May. 2023	0	40.83	24.46
Jun. 2023	91	37.38	25.27
July. 2023	446.34	28.44	23.23
Aug. 2023	102.01	29.00	22.31
Sept. 2023	380.08	31.05	21.83
Oct. 2023	0	31.06	16.79
Nov. 2023	120.05	28.86	11.02
Dec. 2023		25.91	10.74

Production and productivity of livestock, Poultry, Fisheries etc. in the district

Category	Population	Production	Productivity
Cattle			
Crossbred/	12989	14222955 lit./year	3 lit./day
Indigenous	348948	2791584 lit./year	8 lit/day
Buffalo	147875	6654375	4.5 lit./day
Sheep			
Crossbred/ Indigenous	226/139	 MT wool	 kg
Goats	148947	112800 Metric ton meat	15.25 Kg
Pigs Crossbred/ Indigenous	732/5033		30 kg
Rabbits	33		
Poultry			
Hens	50172	760000 Eggs	80-120 Eggs/year
Turkey and others			
Category	Area	Production	Productivity
Fish	3182.88 (ha)	5548.519 q/ month	102 q/ ha.

Details of Operational area / Villages (2024)

S.No	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Sonkatch	Sonkatch	Jamgod	Soybean, Chickpea wheat and vegetable	High seed rate, Use unidentified & old varieties, Injudicious use of fertilizer,	Need of IPNMs (Zinc & Sulphur) which reduces crop yield., Promotion of crop,
2	Sonkatch	Sonkutch	Gunai	Soybean, Chickpea wheat and vegetable		
3	Dewas	Dewas	Gaddukhedi	Soybean, Chickpea		

S.No	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
				wheat and vegetable	Injudicious use of pesticide and Insecticide, Traditional sowing method, Unavailability of quality seed, Poor adoption of farm Mechanization, Malnutrition of Children and women, No use of Micro Nutrient fertilizer etc	variety & agricultural diversification. Integrated Weed Management. Use of IPM module in high value crops. Nursery management, varietal promotion & appropriate planting methods for horticultural crops. Promotion of new agricultural implements. Nutritional kitchen garden, health and hygiene promotion in rural womens and childrens. Agri-based entrepreneurship development among rural youth. Capacity building and group dynamics like self help group / FPOs. Care & maintenance, disease, feeding & fodder management in fisheries and live stock. Sowing geometry of crops. Promotion and assurance of quality seed/sapling of major field and horticultural crops. Promotion of secondary agriculture/Value added product and market intelligence. Aware about efficient use of available water resources. Promotion of organic farming, recycling of waste & crop residue
4	Sonkatch	Sonkutch	Narana	Soybean, Chickpea wheat and vegetable		
5	Sonkatch	Sonkutch	Dakachya	Soybean, Chickpea wheat and vegetable		
6	Sonkatch	Sonkutch	Polay Jagir	Soybean, Chickpea wheat and vegetable		
7	Sonkatch	Sonkutch	Arniya	Soybean, Chickpea wheat and vegetable		
8	Sonkatch	Sonkutch	Lalakhedi	Soybean, Chickpea wheat and vegetable		
9	Sonkatch	Sonkutch	Agera	Soybean, Chickpea wheat and vegetable		
10	Dewas	Dewas	Khatamba	Soybean, Chickpea wheat and vegetable		
11	Dewas	Dewas	Rajoda	Soybean, Chickpea wheat and vegetable		
12	Dewas	Dewas	Dungariya	Soybean, Chickpea wheat and vegetable		
13	Dewas	Dewas	Kankund	Soybean, Chickpea wheat and vegetable		
14	Tonkkhurd	Tonkkhurd	Bardu	Soybean, Chickpea wheat and vegetable		
15	Tonkkhurd	Tonkkhurd	Merkhedi	Soybean, Chickpea wheat and vegetable		
16	Dewas	Dewas	Agrod	Soybean, Chickpea wheat and vegetable		
17	Tonkkhurd	Tonkkhurd	Chhota Malsa	Soybean, Chickpea wheat and vegetable		
18	Tonkkhurd	Tonkkhurd	Nawda	Soybean, Chickpea wheat and vegetable		
19	Tonkkhurd	Tonkkhurd	Nandel	Soybean, Chickpea wheat and vegetable		
20	Tonkkhurd	Tonkkhurd	Kanheriya	Soybean, Chickpea wheat and vegetable		
21	Tonkkhurd	Tonkkhurd	Kamlapur	Soybean, Chickpea wheat and vegetable		
22	Tonkkhurd	Tonkkhurd	Polay	Soybean, Chickpea wheat and vegetable		
23	Tonkkhurd	Tonkkhurd	Bhorasa	Soybean, Chickpea wheat and vegetable		
24	Dewas	Dewas	Bhatkhedi	Soybean, Chickpea wheat and vegetable		
25	Dewas	Dewas	Dharukhedi	Soybean, Chickpea wheat and vegetable		
26	Dewas	Dewas	Napakhedi	Soybean, Chickpea wheat and vegetable		
27	Dewas	Dewas	Morukhedi	Soybean, Chickpea wheat and vegetable		
28	Dewas	Dewas	Badi Churali	Soybean, Chickpea wheat and vegetable		
29	Dewas	Dewas	Shadasivpura	Soybean, Chickpea		

S.No	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
				wheat and vegetable		management.
30	Dewas	Dewas	Sulpakheda	Soybean, Chickpea wheat and vegetable		

Priority / Thrust areas

S. No.	Particulars
1.	Promotion of crop, variety & agricultural diversification.
2.	Promotion of IFS in different farming systems
3.	Need of IPNMs (Zinc & Sulphur) which reduces crop yield.
4.	Integrated Weed Management.
5.	Use of high yielding wilt resisting variety of chickpea
6.	Use of IPM module in high value crops.
7.	Nursery management, varietal promotion & appropriate planting methods for horticultural crops.
8.	Promotion of new agricultural implements.
9.	Nutritional kitchen garden, health and hygiene promotion in rural women and children.
10.	Agri-based entrepreneurship development among rural youth.
11.	Capacity building and group dynamics like self help group / FPOs.
12.	Care & maintenance, disease, feeding & fodder management in fisheries and live stock.
13.	Promotion and assurance of quality seed/sapling of major field and horticultural crops.
14.	Promotion of secondary agriculture/Value added product and market intelligence.
15.	Aware about efficient use of available water resources
16.	Promotion of organic farming, recycling of waste & crop residue management.

TECHNICAL PROGRAMME

A. Details of targeted mandatory activities by KVK

OFT		FLD and CFLD	
1		2	
Number of OFTs	Number of Farmers	Number of FLDs	Number of Farmers
27	454	23	242

Training		Extension Activities	
3		4	
Number of Courses	Number of Participants	Number of activities	Number of participants
104	2080	632	1851 + Mass

Seed Production (qt.)	Planting material (Nos.)
480	30000

B. Abstract of interventions to be undertaken

S. No.	Thrust area	Crop/Enterprise	Identified Problem	Interventions					
				Title of OFT if any	Title of FLD if any	Title of Training if any	Title of training for extension personnel if any	Extension activities	Supply of seeds, planting materials etc.
1	IWM	Soybean	Heavy Infestation of weeds	Assessment of Propaquizafop 2.5% + Imazethapyr 3.75% herbicide for control of mix weed flora in soybean	Demonstration on Sulfentrazone 28% + Clomazone 30% WP for weed control in soybean			Field Visit	
2	VE	Soybean	Low yield due to old short duration variety suffering from biotic factors	Assessment of climatic resilient medium duration var. RVSM 11-35 of soybean				Field visit & Field day	
3	VE	Wheat	Low yield in non-bio fortified old variety (HI 1544)	Assessment of bio-fortified Wheat variety HI 1636 (Pusa Bakula) for better quality & yield				Field visit & Field day	
4	NF	Chickpea	Deterioration of soil fertility due to continuous use of fertilizers	Assessment of Jiwamrit in Chickpea crop				Field Visit	
5	NF	Soybean	High Cost of Cultivation, atmospheric pollution, human health issue in current	Assessment of Zero budget Natural Farming (ZBNF) in Soybean				Field Visit	

			conventional agriculture system						
6	INM	Maize	Poor grain setting in cobs	Assessment of water soluble fertilizer potassium 0:0:50 in Maize crop				Field Visit	
7	INM	Wheat	Deterioration of biological health of soil	Assessment of NPK consortia for fertilizer use efficiency in wheat crop				Field Visit	
8	NF	Wheat	High Cost of Cultivation, atmospheric pollution, human health issue in current conventional agriculture system	Assessment of Zero budget Natural Farming (ZBNF) in Wheat				Field Visit	
9	IPM	Soybean	Heavy losses due to infestation of stem fly and girdle beetle	Assessment of Thiamethoxam 12.60 % + Lambda-cyhalothrin 09.50 % ZC for stem fly and girdle beetle in soybean				Field Visit	
10	NF	Cauliflower	Low yield due to heavy infestation of insect-pests in cauliflower	Assessment of NEEMASTRA for management of insect-pests in cauliflower				Field Visit	
11	IPM	Wheat	Low yield due to heavy infestation of root aphid	Assessment of Imidacloprid 48 FS @ 1.25ml/kg seed for management of root aphid in wheat				Field Visit	
12	NF	Tomato	Reduction of natural enemies due to indiscriminate use of insecticides	Assessment of AGNEYASTRA for management of insect-pests in tomato				Field Visit	
13	INM	Hybrid Marigold	Lack of balance	Assessment of STV based				Field	

			nutrient management practices leads to low yield	nutrient management and biofertilizer in hybrid Marigold				Vi sit	
14	INM	Hybrid Tomato	Low yield due to low fertilizer use efficiency	Assessment of balanced nutrient management in tomato through fertigation				Fie ld Vi sit	
15	VE	Onion	low productivity due to adoption of old varieties	Assessment of onion varieties for higher productivity				Fie ld Vi sit	
16	INM	Garlic	Low yield and inferior quality of bulb due to no use of zinc	Assessment of zinc in garlic				Fie ld Vi sit	
17	NF	Garlic	Indiscriminate use of fertilizer resulted to health hazard	Assessment of Jiwamrit in Garlic				Fie ld Vi sit	
18	RCT	Wheat	Deterioration of soil fertility by burning of wheat crop residue	Assessment of wheat crop residue management through rotavator				Fie ld Vi sit	
19	RCT	Chickpea	Lack of irrigation water	Assessment of irrigation in alternate furrow in FIRBS technique				Fie ld Vi sit	
20	FM	Wheat	High labour cost	Assessment of reaper cum binder for harvesting				Fie ld Vi sit	
21	Fish eries	Fish	Traditional practice, low fish yield, Disease incidence	Assessment of performance of probiotics in fish culture				Fie ld Vi sit	
22	Fish eries	Fish	Depletion in oxygen, increase in ammonia, reduce growth	Assessment of Zeolite in fish pond to increase production by increasing oxygen in fish pond				Fie ld Vi sit	

23	ICT	--	No authentic data available of effectiveness of virtual trainings	Assessment of effectiveness of virtual training programmes through Google meet.				Field Visit	
24	TOT	--	No appropriate data on use of sulphur in soybean.	Assessment of adoption level of Sulphur in Soybean with special reference to KVK intervention.				Field Visit	
25	TOT	Wheat	No appropriate data on use of Zinc in Wheat	Assessment of adoption level of Zinc in Wheat with special reference to KVK intervention				Field Visit	
26	TOT	Soybean	No appropriate data of new sowing techniques in Soybean after replacement of traditional methods	Impact assessment of Sowing technique of raised bed in Soybean in special reference of KVK intervention				Field Visit	
27	NS	Wheat porridge	Lack of awareness regarding healthy food	Assessment of Porridge (Durum Wheat) for nutritional security of children				Field Visit	
28	ICM	Sorghum	No Crop Diversification		Demonstration of HYV of Sorghum			Field Visit & Field day	
29	ICM	Wheat	Use of Old varieties		Demonstration of HYV of Wheat			Field Visit & Field day	

								y	
30	ICM	Mustard	No Crop Diversification					Field Visit	
31	SFM	Wheat	Burning of wheat residue		Demonstration of decomposer for wheat residue management			Field Visit	
32	INM	Soybean	Imbalance use of fertilizer		Demonstration of Boron and sulphur nutrition on quality of soybean			Field Visit	
33	INM	Hybrid Maize	No use of micro nutrient		Zinc in maize crop			Field Visit	
34	INM	Wheat	No use of micro nutrient		Demonstration of Foliar spray of zinc in wheat crop			Field Visit	
35	IPM	Maize	Infestation of fall army worm		Demonstration of IPM modules for management of fall army worm in Maize			Field Visit	
36	IPM	Cauliflower	Infestation of weedicide		Demonstration of Biopesticides for management of DBM in Cauliflower			Field Visit	
37	IPM	Garlic	Infestation of thrips		Demonstration of Fipronil 5 SC insecticide for management of thrips in Garlic			Field Visit	
38	IPM	Chickpea	Infestation of pod borar		Demonstration of IPM modules for management of gram pod borer in Chickpea			Field Visit	
39	INM	Kharif Onion	Imbalance use of fertilizer		Demonstration of Zinc and sulphur in kharif onion			Field Visit	
40	INM	Chilli	No use of Micro nutrient		Demonstration of Foliar spray of micro			Field Vi	

					nutrient mixture in Chilli			sit	
41	INM	Potato	No use of Micro nutrient		Demonstration of use of zinc in Potato			Field Visit	
42	INM	Water Melon	No use of Micro nutrient		Demonstration of use of Boron to reduce fruit cracking in water melon			Field Visit	
43	RCT	Tomato	Low fertilizer use efficiency		Demonstration of venturi for fertigation in tomato			Field Visit	
44	FM	Mustard	Sowing by broadcasting		Demonstration of seed cum ferti drill for sowing of Mustard			Field Visit	
45	RCT	Wheat	Higher cost of irrigation		Demonstration of renewable energy (solar pump) for low energy cost of irrigation			Field Visit	
46	Fisheries	Fisheries	Low yield		Demonstration of low cost feed periphytic substance on growth and development of major carps			Field Visit	
47	Fisheries	Fisheries	Low yield		Demonstration of growth promoter (Raa Fres AQ) on Indian Major Carps			Field Visit	
48	IWM	Kharif crop	Unawareness about weed management			Integrated weed management in kharif crops		Field Visit	
49	IWM	Rabi Crop	Unawareness about weed management			Integrated weed management in Rabi crops		Field Visit	
50	ICM	Chickpea	Unawareness about the latest			Production technology of chickpea		Field Visit	

			technologies					sit	
51	ICM	Rabi Crops	Unawareness about the latest technologies			Production technology of Rabi crops	Production technology of Rabi crops	Field Visit	
52	ICM	Soybean	Unawareness about the latest technologies			Crop production technology of soybean	Production technology of kharif crops	Field Visit	
53	ICM	Kharif crops	Unawareness about the latest technologies			Agronomic practices for enhancing the productivity of kharif crops		Field Visit	
54	ICM	Soybean	Unawareness about the latest technologies			Seed production technology for soybean		Field Visit	
55	ICM	Rabi Crops	Unawareness about the latest technologies			Production technology of rabi pulses		Field Visit	
56	ICM	Mustard	Unawareness about the latest technologies			Production technology of mustard		Field Visit	
57	ICM	Wheat	Unawareness about the latest technologies			Production technology of Wheat		Field Visit	
58	ICM	Millets	Unawareness about the latest technologies			Scientific cultivation of major millets		Field Visit	
61	NF	Chickpea	Unawareness about the latest technologies			Scope and importance of natural farming		Field Visit	
62	ICM	Vegetables	Unawareness about the latest technologies			Production technology of important Kharif		Field Visit	

						vegetables			
63	ICM	Potato	Unawareness about the latest technologies			Production technology of potato		Field Visit	
64	ICM	Kharif Onion	Unawareness about the latest technologies			Kharif onion for crop diversification		Field Visit	
65		Vegetables	Unawareness about the latest technologies			Nursery Management of vegetables		Field Visit	
66	ICM	Summer vegetables	Unawareness about the latest technologies			Production technology of summer vegetables		Field Visit	
67		Fruits	Unawareness about the latest technologies			Rejuvenation of old and senile orchards for quality fruits		Field Visit	
68		Fruits	Unawareness about the latest technologies			Micro irrigation systems for orchards		Field Visit	
69	ICM	Horticultural crops	Unawareness about the latest technologies			Hi-tech Horticulture	New interventions in horticultural crops	Field Visit	
70	ICM	Fruits	Unawareness about the latest technologies			Establishment of fruit orchards		Field Visit	
71	ICM	Fruits	Unawareness about the latest technologies			High density planting techniques for establishment of new orchards		Field Visit	
72	ICM	Fruit & Vegetables	Unawareness about the latest technologies			Role of plant growth regulators in horticultural crops		Field Visit	

73	ICM	Fruit & Vegetables	Unawareness about the latest technologies			Importance of Mulching in Fruit & Vegetable crops		Field Visit	
74	ICM	Garlic	Unawareness about the latest technologies			Production technology of Garlic		Field Visit	
75	ICM	Spices	Unawareness about the latest technologies			Production technology of spices		Field Visit	
76	NF		Unawareness about the latest technologies			Preparation of natural farming components		Field Visit	
77	INM	Soybean	Unawareness about the latest technologies			Role of secondary nutrient in soybean		Field Visit	
78	INM	Rabi crops	Unawareness about the latest technologies			Integrated Nutrient Management in Rabi crops		Field Visit	
79	INM	Kharif crops	Unawareness about the latest technologies			Integrated and balanced nutrition in kharif crops		Field Visit	
80	INM		Unawareness about the latest technologies			Role and importance of liquid fertilizers in crop production		Field Visit	
81	INM	Vegetables	Unawareness about the latest technologies			Role of liquid fertilizers in vegetables crops		Field Visit	
82	INM		Unawareness about the latest technologies			Method of soil samples collection for testing		Field Visit	
83	INM	Millets	Unawareness about the latest technologies			Balance use of fertilizers in millets		Field Visit	
84	INM		Unawareness			Soil health		Field	

			about the latest technologies			card based fertilizer management in crops		ld Vi sit	
85	Organic Farming		Unawareness about the latest technologies			Vermi-composting for soil health management		Field Visit	
86	Nutritional security		Unawareness about the latest technologies			Importance and score of kitchen gardening		Field Visit	
87	Malnutrition		Unawareness about the latest technologies			Balance diet for children and women to eradicate the malnutrition		Field Visit	
88	Nutritional security		Unawareness about the latest technologies			Nutrition Gardens: A Sustainable Model for Food Security		Field Visit	
89	IPM		Unawareness about the latest technologies			Safe storage of house hold grain		Field Visit	
90	value addition		Unawareness about the latest technologies			Preparation of soybean based value added product		Field Visit	
91	Malnutrition		Unawareness about the latest technologies			Management of malnutrition in women & Child		Field Visit	
92	WOE		Unawareness about the latest technologies			Health and hygiene for children and women		Field Visit	
93	NRM		Unawareness about the latest technologies			Importance of Deep Tillage and Improved Implement for tillage		Field Visit	
94	NRM	Soybean	Unawareness about the			Improved Sowing		Field	

			latest technologies			Method of soybean		Vi sit	
95	NR M	Kharif crop	Unawareness about the latest technologies			In-situ soil moisture conservation in Kharif Crop		Fie ld Vi sit	
96	NR M		Unawareness about the latest technologies			Low Cost Rain water Harvesting Technologies		Fie ld Vi sit	
97	Micr o Irrig ation		Unawareness about the latest technologies			Installation and maintenance of Sprinkler Irrigation system		Fie ld Vi sit	
98	Micr o Irrig ation		Unawareness about the latest technologies			Installation and maintenance of Drip Irrigation system		Fie ld Vi sit	
99	NR M		Unawareness about the latest technologies			Importance and Scope of plastic mulching in Agriculture		Fie ld Vi sit	
100	Far m Mec hani zatio n	Garlic	Unawareness about the latest technologies			Improved implements of sowing in garlic	Impro ved Agricu ltural Imple ments for Moder n Agricu lture	Fie ld Vi sit	
101	NR M		Unawareness about the latest technologies			Design and Maintenance of Farm Pond		Fie ld Vi sit	
102	NR M		Unawareness about the latest technologies			Wheat Crop Residue management		Fie ld Vi sit	
103	IPM		Unawareness about the latest technologies			Techniques of safe storage for food grains		Fie ld Vi sit	

104	IPM		Unawareness about the latest technologies			Method of seed treatment		Field Visit	
105	IPM	Soybean	Unawareness about the latest technologies			Management of insect pests & Diseases in soybean	Insect-pests & disease management in Kharif crops	Field Visit	
106	IPM	Millets	Unawareness about the latest technologies			Integrated pest management in millets		Field Visit	
107	IPM	Pigeon pea	Unawareness about the latest technologies			Management of pod bores in Pigeon pea		Field Visit	
108	IPM	Cole Crops	Unawareness about the latest technologies			Integrated pest management in cole crops		Field Visit	
109	IPM	Chickpea	Unawareness about the latest technologies			Integrated Pest Management in Chickpea	Insect-pests & disease management in Rabi crops	Field Visit	
110	IPM		Unawareness about the latest technologies			Precaution during pre & post spraying of pesticides		Field Visit	
111	IPM	Wheat	Unawareness about the latest technologies			Integrated Pest Management in wheat		Field Visit	
112	IPM	Chilli	Unawareness about the latest technologies			IPM in chilli		Field Visit	
113	IPM	Onion & Garlic	Unawareness about the latest			IPM in Onion and Garlic		Field Vi	

			technologies					sit	
114	IPM		Unawareness about the latest technologies			Role of Eco-friendly pesticides & bio-agents and its conservation		Field Visit	
115	IPM		Unawareness about the latest technologies			Awareness and use of new molecules pesticides		Field Visit	
116	IFF	Fish	Unawareness about the latest technologies			Preparation & Maintenance of pond for fish culture		Field Visit

Details of On Farm Trial (OFT)

OFT-1 (First Year)

Crop / Enterprise	Soybean	
Title of on farm trial	Assessment of Quizalofop ethyl 7.5%+ Imazethapyr 15% EC herbicide for control of mix weed flora in soybean	
Problem diagnosed	Yield reduction due to heavy weed infestation	
Farmers' Practices	Imazethapyr/mixing of herbicides	
Details of technologies selectedfor assessment	T1	Imazethapyr 10 SL @ 1.0 lt/ha
	T2	Quizalofop ethyl 7.5%+ Imazethapyr 15% EC @ 437.5 ml/ha (175 ml/ac)
Source of technology	IISR, Indore	
Plot size	0.20 ha	
No. of farmers	10	
Total cost	10000	
Critical input	Quizalofop ethyl 7.5%+ Imazethapyr 15% EC	
Performance indicators: • Technical- yield (q/ ha) • Economic • Social – Employment generation	Weed count (No./sqm), Yield (q/ha), Net Return (Rs/ha), B:C ratio	

Detailed Information about OFT:

Name of Discipline	Agronomy
Title of on-farm trial:	Assessment of Quizalofop ethyl 7.5%+ Imazethapyr 15% EC herbicide for control of mix weed flora in soybean
Year/Season:	Kharif 2024
Farming situation:	Rainfed
Problem diagnosis:	Yield reduction due to heavy weed infestation
Thematic area:	IWM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment

Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Imazethapyr 10 SL @ 1.0 lt/ha/ mixing of various herbicides without recommendations
T2 –Recommended Practice-	Quizalofop ethyl 7.5%+ Imazethapyr 15% EC @ 437.5 ml/ha (175 ml/ac)
T3- Recommended Practice-	----
Date of sowing / Operation	15.07.2024 to 25.07.2024
Date of harvesting:	October I st fortnight
Source of technology:	IISR, Indore
Characteristics of technology:	Post emergence herbicide effectively control both grassy and broadleaved weeds
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	

OFT-2

(Second Year)

Crop / Enterprise	Soybean	
Title of on farm trial	Assessment of climatic resilient medium duration var. RVSM 11-35 of soybean	
Problem diagnosed	Low yield due to old short duration variety suffering from biotic factors	
Farmers' Practices	Soybean var. JS 95-60/JS 2034	
Details of technologies selectedfor assessment	T1-	Soybean var. JS 95-60/JS 2034
	T2 -	RVSM 11-35
Source of technology	RVSKVV, Gwalior	
Plot size	0.2 ha	
No. of farmers	10	
Total cost	15300	
Critical input	Seed of RVSM 11-35 variety	
Performance indicators: • Technical- yield (q/ ha) • Economic • Social – Employment generation	Yield (q/ha), Net return (Rs/ha), B:C ratio	

Detailed Information about OFT:

Name of Discipline	Agronomy
Title of on-farm trial:	Assessment of climatic resilient medium duration var. RVSM 11-35 of soybean
Year/Season:	2024
Farming situation:	Rainfed
Problem diagnosis:	Low yield due to old short duration variety suffering from biotic factors
Thematic area:	VE
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Soybean var. JS 95-60/ JS 2034
T2 –Recommended Practice-	RVSM 11-35

T3- Recommended Practice-	-
Date of sowing:	25.06.2024 to 07.07.2024
Date of harvesting:	First fortnight of October
Source of technology:	RVSKVV, Gwalior
Characteristics of technology:	Medium duration (98 days), 3-4 grains in a pod, resistant to YMV, No shattering, suitable for mechanical harvesting, High Yielding (25-30 q/ha)
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-3 (Second Year)

Crop/Enterprise	Wheat
Title of on-farm trial	Assessment of bio-fortified Wheat variety HI 1636 (Pusa Bakula) for better quality & yield
Problem diagnosed	Low yield and non-bio fortified old variety (HI 1544)
Farmers' practices	Wheat var. HI 1544
Details of technologies selected for assessment/refinement Treatments	T1- Wheat var. HI 1544 T2 - HYV HI 1636
Source of technology	IARI, Indore
Plot size	0.2 ha
No. of farmers	10
Total cost	8200
Critical input	Seed of wheat var. HI 1636 variety
Performance indicators: • Technical- yield (q/ ha) • Economic • Social – Employment generation	Yield (q/ha), Net return (Rs/ha), B:C ratio

Detailed Information about OFT:

Name of Discipline	Agronomy
Title of on-farm trial:	Assessment of bio-fortified Wheat variety HI 1636 (Pusa Bakula) for better quality & yield
Year/Season:	2024
Farming situation:	Irrigated
Problem diagnosis:	Low yield and non-bio fortified old variety (HI 1544)
Thematic area:	VE
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Wheat var. HI 1544
T2 –Recommended Practice-	T2 - HYV HI 1636
T3- Recommended Practice-	-
Date of sowing:	01.11.24 to 25.11.24
Date of harvesting:	First fortnight of March

Source of technology:	IARI, Indore
Characteristics of technology:	High yielding, biofortified aestivum wheat varieties rich in iron & zinc
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-4

(First Year)

Crop / Enterprise	Wheat	
Title of on farm trial	Assessment of Metribuzin 42% + Clodinafop Propargyl 12% WG herbicide for control of mix weed flora in wheat	
Problem diagnosed	Low yield due to heavy weed infestation & less effectiveness of old molecules	
Farmers' Practices	Use of 2,4-D herbicide	
Details of technologies selected for assessment	T1	2,4-D 58 SL @ 1.0 lt/ha
	T2	Metribuzin 42% + Clodinafop Propargyl 12% WG @ 500 g/ha (200 g/ac)
Source of technology	DWR, Jabalpur	
Plot size	0.20 ha	
No. of farmers	10	
Total cost	10000	
Critical input	Metribuzin 42% + Clodinafop Propargyl 12% WG	
Performance indicators: • Technical- yield (q/ ha) • Economic • Social – Employment generation	Weed count (No./sqm), Yield (q/ha), Net Return (Rs/ha), B:C ratio	

Detailed Information about OFT:

Name of Discipline	Agronomy
Title of on-farm trial:	Assessment of Metribuzin 42% + Clodinafop Propargyl 12% WG herbicide for control of mix weed flora in wheat
Year/Season:	Rabi 2024
Farming situation:	Irrigated
Problem diagnosis:	Yield reduction due to heavy weed infestation & less effectiveness of old molecules
Thematic area:	IWM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	2,4-D 58 SL @ 1.0 lt/ha
T2 –Recommended Practice-	Metribuzin 42% + Clodinafop Propargyl 12% WG @ 500 g/ha (200 g/ac)
T3- Recommended Practice-	----
Date of sowing / Operation	01.11.2024 to 25.11.2024
Date of harvesting:	Ist fortnight of March
Source of technology:	DWR, Jabalpur
Characteristics of technology:	Post emergence herbicide effectively control both grassy and broad leaved

	weeds
Name of Crop/Enterprises:	Wheat

OFT-5 (Second Year)

Crop / Enterprise	Wheat	
Title of on farm trial	Assessment of wheat crop residue management through rotavator in summer moong cropping system	
Problem diagnosed	Deterioration of soil fertility by burning of wheat crop residue	
Farmers' Practices	Burning after harvesting wheat crop	
Details of technologies selected for assessment	T1	Burning of crop residue
	T2	wheat crop residue management through rotavator
Source of technology	CIAE, Bhopal	
Plot size	0.40 ha	
No. of farmers	10	
Total cost	10000	
Critical input	Use rotavator on hire basis	
Performance indicators: • Technical- yield (q/ ha) • Economic • Social – Employment generation	Efficiency, yield, Net return, B:C Ratio	

Detailed Information about OFT:

Name of Discipline	Agricultural Engineering
Title of on-farm trial:	Assessment of wheat crop residue management through rotavator
Year/Season:	2024
Farming situation:	Irrigated
Problem diagnosis:	Deterioration of soil fertility by burning of wheat crop residue
Thematic area:	RCT
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Burning of crop residue
T2 –Recommended Practice-	wheat crop residue management through rotavator
T3- Recommended Practice-	----
Date of sowing / Operation	15.04.24 to 25.04.24
Date of harvesting:	
Source of technology:	CIAE, Bhopal
Characteristics of technology:	Rotavator chopped wheat crop residue in 2 to 4 inches size and mixed with soil in summer moong cropping system
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-6

(Second Year)

Crop / Enterprise	Chickpea
Title of on farm trial	Assessment of irrigation in alternate furrow of chickpea crop in FIRBS technique
Problem diagnosed	Lack of irrigation water
Farmers' Practices	Irrigation in each furrow
Details of technologies selected for assessment	T1 Irrigation in Each furrow
	T2 Irrigation in Alternate furrow
Source of technology	CSWCRTI, Dehradun
Plot size	0.40 ha
No. of farmers	10
Total cost	10000
Critical input	Irrigation
Performance indicators: • Technical- yield (q/ ha) • Economic • Social – Employment generation	Saving of water, Yield, B:C Ratio

Detailed Information about OFT:

Name of Discipline	Agricultural Engineering
Title of on-farm trial:	Assessment of irrigation in alternate furrow of chickpea crop in FIRBS technique
Year/Season:	2024
Farming situation:	Irrigated
Problem diagnosis:	Lack of irrigation water
Thematic area:	RCT
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Irrigation in Each furrow
T2 –Recommended Practice-	Irrigation in alternate furrow
T3- Recommended Practice-	-
Date of sowing:	15.10.24 to 30.10.24
Date of harvesting:	20.02.25 to 28.02.25
Source of technology:	CSWCRTI, Dehradun
Characteristics of technology:	Irrigation in alternate furrow save the water and through seepage moisture cover whole bed
Name of Crop/Enterprises:	Chickpea
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-7

(Second Year)

Crop / Enterprise	Wheat
Title of on farm trial	Assessment of reaper cum binder for harvesting
Problem diagnosed	High labour cost for harvesting of wheat
Farmers' Practices	Manual Harvesting

Details of technologies selected for assessment	T1	Manual Harvesting
	T2	Use of reaper cum binder
Source of technology	CIAE, Bhopal	
Plot size	0.40 ha	
No. of farmers	10	
Total cost	12000	
Critical input	Use machine on hire basis	
Performance indicators: • Technical- yield (q/ ha) • Economic • Social – Employment generation	Efficiency, Cost of harvesting, Net return, B:C ratio	

Detailed Information about OFT:

Name of Discipline	Agricultural Engineering
Title of on-farm trial:	Assessment of reaper cum binder for harvesting
Year/Season:	2024
Farming situation:	Irrigated
Problem diagnosis:	High labour cost
Thematic area:	RCT
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Manual Harvesting
T2 –Recommended Practice-	Use of reaper cum binder
T3- Recommended Practice-	-
Date of sowing / Operation	15.03.24 to 30.03.24
Date of harvesting:	
Source of technology:	CIAE, Bhopal
Characteristics of technology:	Reaper cum binder harvests the crop and also make small bundle. This technology save the harvesting cost and time of farmers.
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT No. 8

(Second Year)

Crop / Enterprise	Hybrid Marigold	
Title of on farm trial	Assessment of STV based nutrient management along with biofertilizer in hybrid Marigold	
Problem diagnosed	Lack of balance nutrient management practices leads to low yield	
Farmers' Practices	Imbalance use of fertilizer	
Details of technologies	T1-	NPK @ 100:75:75 Kg/ha

selectedfor assessment	T2 -	NPK @ 150:100:80 Kg/ha (RDF)
	T3-	NPK @ 150:100:80 Kg/ha + <i>Azotobacter</i> & PSB @ 5 Kg/ha
Source of technology	IARI (2010)	
Plot size	1000 sq. m.	
No. of farmers	05	
Total cost	15000	
Critical input	NPK Fertilizer, <i>Azotobacter</i> & PSB	
Performance indicators: • Technical- yield (q/ ha) • Economic • Social – Employment generation	Plant Height (cm), Flower Diameter (cm), No. of flowers/plant, Yield (q/ha), B:C ratio	

Detailed Information about OFT:

Name of Discipline	Horticulture
Title of on-farm trial:	Assessment of STV based nutrient management and biofertilizer in hybrid Marigold
Year/Season:	Kharif 2024
Farming situation:	Rainfed
Problem diagnosis:	Lack of balance nutrient management practices leads to low yield
Thematic area:	IPNM
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	NPK @ 100:75:75 Kg/ha
T2 –Recommended Practice-	NPK @ 150:100:80 Kg/ha (RDF)
T3- Recommended Practice-	NPK @ 150:100:80 Kg/ha + <i>Azotobacter</i> & PSB @ 5 Kg/ha
Date of Transplanting:	20.07.2024
Date of harvesting:	20.10.2024 to 30.10.2024
Source of technology:	IARI (2010)
Characteristics of technology:	Improvement in yield and flower quality for higher return
Name of Crop/Enterprises:	Hybrid Marigold
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT No. 9

(First Year)

Crop / Enterprise	Hybrid Sponge Gourd	
Title of on farm trial	Assessment of bower trellis system on sponge gourd	
Problem diagnosed	Low yield due to sprawling of vines in ground resulting inferior quality fruits & occurrence of fungal and bacterial diseases	
Farmers' Practices	No use of trellis system (Sprawling of vines on ground)	
Details of technologies	T1-	Sprawling of vines on ground

selectedfor assessment	T2 -	Bower trellis system
Source of technology	IARI (2012)	
Plot size	1500 sq. m.	
No. of farmers	05	
Total cost	10000	
Critical input	Bamboo, Crop Support Net	
Performance indicators: • Technical- yield (q/ ha) • Economic • Social – Employment generation	Vine Length (cm), Average fruit weight (g),Yield (q/ha), B:C ratio	

Detailed Information about OFT:

Name of Discipline	Horticulture
Title of on-farm trial:	Assessment of bower trellis system in sponge gourd
Year/Season:	Kharif 2024
Farming situation:	Rainfed
Problem diagnosis:	Low yield due to sprawling of vines in ground resulting inferior quality fruits & occurrence of fungal and bacterial diseases
Thematic area:	ICM
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	No use of trellis system (Sprawling of vines on ground)
T2 –Recommended Practice-	Bower trellis system
T3- Recommended Practice-	-
Date of Sowing:	04.07.2024 to 15.07.2024
Date of harvesting:	15.11.2024 to 30.11.2024
Source of technology:	IARI (2012)
Characteristics of technology:	Improvement in yield and fruit quality & less infection of fungal and bacterial diseases
Name of Crop/Enterprises:	Hybrid Sponge gourd
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT No.10

(Second Year)

Crop / Enterprise	Onion	
Title of on farm trial	Assessment of onion varieties for higher productivity & better storage	
Problem diagnosed	low productivity due to adoption of old varieties	
Farmers' Practices	Agrifound Light Red	
Details of technologies selected for assessment	T1-	Agrifound Light Red
	T2 -	NHRDF Red-2
	T3-	NHRDF Red-4
Source of technology	NHRDF (2018)	
Plot size	500 sq.m.	

No. of farmers	05
Total cost	12500
Critical input	NHRDF Red-2 and NHRDF Red-4 Seed
Performance indicators: • Technical- yield (q/ ha) • Economic • Social – Employment generation	Bulb diameter (cm), weight of bulb (g) Yield (q/ha), B:C ratio

Detailed Information about OFT:

Name of Discipline	Horticulture
Title of on-farm trial:	Assessment of onion varieties for higher productivity & better storage
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	low productivity due to adoption of old varieties
Thematic area:	VE
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Agrifound Light Red
T2 –Recommended Practice-	NHRDF Red-2
T3- Recommended Practice-	NHRDF Red-4
Date of Transplanting:	15.12.2024
Date of harvesting:	10.04.2025
Source of technology:	NHRDF (2018)
Characteristics of technology:	T2: Bulbs are globular in shape, dark red in colour, matures in 110-125 DAT & moderately tolerant to stemphylium blight and purple blotch T3: Bulb are globular round, light red in colour, matures in 100-120 days after transplanting.
Name of Crop/Enterprises:	Onion
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT No. 11

(Third Year)

Crop / Enterprise	Garlic	
Title of on farm trial	Assessment of zinc in garlic for better quality of bulb	
Problem diagnosed	Low yield and inferior quality of bulb due to no use of zinc	
Farmers' Practices	No use of zinc	
Details of technologies selectedfor assessment	T1-	No use of zinc
	T2-	Basal application of zinc @ 5 Kg/ha
	T-3	Foliar application of zinc through chelated zinc @ 1%
Source of technology	DoGR (2012)	
Plot size	1000 sq.m.	
No. of farmers	05	
Total cost	11000	

Critical input	Zinc Sulphate
Performance indicators: •Technical- yield (q/ ha) •Economic •Social – Employment generation	Bulb weight (g), bulb size (cm), Yield (q/ha), B:C ratio

Detailed Information about OFT:

Name of Discipline	Horticulture
Title of on-farm trial:	Assessment of zinc in garlic for better quality of bulb
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Low yield and inferior quality of bulb due to no use of zinc
Thematic area:	IPNM
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	No use of zinc
T2 –Recommended Practice-	Basal application of zinc @ 5 Kg/ha
T3- Recommended Practice-	Foliar application of zinc through chelated zinc @ 1% (2 sprays at 30 & 45 DAS)
Date of Sowing:	05.10.2024
Date of harvesting:	30.03.2025
Source of technology:	DoGR (2012)
Characteristics of technology:	Improves the quality and yield
Name of Crop/Enterprises:	Garlic
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT No. 12

(Second Year)

Crop / Enterprise	Soybean
Title of on farm trial	Assessment of Natural Farming in Soybean
Problem diagnosed	High Cost of Cultivation, atmospheric pollution, human health issue in current conventional agriculture system
Farmers' Practices	Famers are using chemicals and fertilizers
Details of technologies selected for assessment	T1- Famers are using chemicals and fertilizers
	T2- Bijamrit : Seed treatment @ 25 ml/kg, Ghanjivamrita : Basal dose @ 5.0 q./ha., Jivaamrit : 50L/ha. in 500L water at 30 DAS & 45 DAS, Nimaastra : 50L/ha.
Source of technology	NCOF Ghaziabad
Plot size	0.20 ha
No. of farmers	10

Total cost	10000
Critical input	Preparation of Bijamrit, jivamrit, ghanjivamrit, neemastra etc
Performance indicators: • Technical- yield (q/ ha) • Economic • Social – Employment generation	Plant Height, No. of branch/plant, No. of pods/plant, seed yield. B:C ratio, farmers reaction

Detailed Information about OFT:

Name of Discipline	Soil Science
Title of on-farm trial:	Assessment Natural Farming in Soybean
Year/Season:	2024-25
Farming situation:	Irrigated
Problem diagnosis:	High Cost of Cultivation, atmospheric pollution, human health issue in current conventional agriculture system
Thematic area:	NF
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Famers are using chemicals and fertilizers
T2 –Recommended Practice-	Bijamrit : Seed treatment @ 25 ml/kg, Ghanjivamrita : Basal dose @ 2.5-5.0 q./ha., Jivaamrit : 12.5L/ha. in 250L water at 30 DAS & 45 DAS, Nimaastra : 250L/ha.
T3- Recommended Practice-	-
Date of sowing:	June, 2024
Date of harvesting:	Octo, 2024
Source of technology:	NCOF Ghaziabad
Characteristics of technology:	Low-Cost, home grown inputs and Improved Biological health of soil
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel

(Second Year)

Crop / Enterprise	Maize	
Title of on farm trial	Assessment of water soluble fertilizer potassium 0:0:50 in Maize crop	
Problem diagnosed	Poor grain setting in cobs	
Farmers' Practices	No use foliar spray of Potassium at Silking stage	
Details of technologies selectedfor assessment	T1	N:P:K @ (100:60:00)
	T2	N:P:K @ 120:60:40 & 0:0:50 @ 2.5 kg /ha at silking stage
Source of technology	ICAR-IISS	
Plot size	0.20 ha	
No. of farmers	10	
Total cost	4500	
Critical input	0:0:50	
Performance indicators: • Technical- yield (q/ ha) • Economic	Yield (q/ha), Net return (Rs/ha), B:C ratio	

• Social – Employment generation	

Detailed Information about OFT:

Name of Discipline	Soil Science
Title of on-farm trial:	Assessment of water soluble fertilizer potassium 0:0:50 in Maize crop
Year/Season:	2024-25
Farming situation:	Irrigated
Problem diagnosis:	Poor grain setting in cobs
Thematic area:	INM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	N:P:K @ (120:60:40)
T2 –Recommended Practice-	N:P:K @ 120:60:40 & 0:0:50 @ 2.5 kg /ha at silking stage
T3- Recommended Practice-	-
Date of sowing:	June, 2024
Date of harvesting:	Octo. 2024
Source of technology:	ICAR-IISS
Characteristics of technology:	Water soluble fertilizer, with high potassium and sulphate sulphur content along with optimum amount of sodium, this combination ensure strong flower and grain development
Name of Crop/Enterprises:	Maize

(First Year)

Crop / Enterprise	Soybean	
Title of on farm trial	Assessment of Tetraniliprole 18.18 SC for the management of girdle beetle and defoliators in soybean	
Problem diagnosed	Low yield due to infestation of girdle beetle and defoliators in soybean	
Farmers' Practices	Indiscriminate use of insecticides	
Details of technologies selected for assessment	T ₁	Spraying of profenofos 40%+Cypermethrin 4% EC @ 1 lit/ha insecticides
	T ₂	Spraying of Tetraniliprole 18.18 SC @ 250ml/ha at 30 days after sowing
Source of technology	NRCS Indore 2023	
Plot size	0.20 ha	
No. of farmers	10	
Total cost	5000	
Critical input	Tetraniliprole 18.18 SC	
Performance indicators:	No. of girdle beetle infested plants /MLR	
• Insect damage	No. of Semi lopper / MLR	
• Technical- yield (q/ ha)	No. of tobacco caterpillar/ MLR	
• Economic- Net Income, C:B ratio	No. of beneficial insects Per plant	
• Social – Employment generation	yield (q/ ha)	
	Net Income, C:B ratio	

Detailed Information about OFT:

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of Tetraniliprole 18.18 SC for the management of girdle beetle and defoliators in soybean
Year/Season:	Kharif 2024
Farming situation:	Rainfed condition
Problem diagnosis:	Low yield due to infestation of girdle beetle and defoliators in soybean
Thematic area:	IPM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Spraying of profenofos 40%+Cypermethrin 4% EC @ 1 lit/ha insecticides
T2 –Recommended Practice-	Spraying of Tetraniliprole 200 SC @ 250ml/ha at 30 days after sowing
T3- Recommended Practice-	
Date of sowing:	26-30 /06/2024
Date of harvesting:	25-30/09/2024
Source of technology:	NRCS Indore 2023
Characteristics of technology:	Systemic and safer insecticide for natural enemies
Name of Crop/Enterprises:	Soybean

Crop / Enterprise	Pigeon pea	
Title of on farm trial	Assessment of Novaluron 05.25 % + Indoxacarb 04.50 % SC for the management of pod borer complex in pigeon pea	
Problem diagnosed	Heavy losses due to infestation of pod borer and pod fly	
Farmers' Practices	Indiscriminate use of insecticides	
Details of technologies selected for assessment	T1	Spraying of Lambda-cyhalothrin 05 % EC @ 400 ml/ha insecticides
	T2	Spraying of Novaluron 05.25 % + Indoxacarb 04.50 % SC @ 825 ml /ha
Source of technology	CIBRC and DPPQS 2023 & IIPR Kanpur	
Plot size	0.2 ha	
No. of farmers	10	
Total cost	4400/-	
Critical input	Novaluron 05.25 % + Indoxacarb 04.50 % SC	
Performance indicators:	No. of pod damaged by pod borer and pod fly/ plants	
• Insect damage	No. of beneficial insects Per plant	
• Technical-	yield (q/ ha)	
• Economic-	Net Income, C:B ratio	
• Social -		

Detailed Information about OFT:

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of Novaluron 05.25 % + Indoxacarb 04.50 % SC for management of pod borers complex in pigeon pea

Year/Season:	Rabi 2024-25
Farming situation:	Rainfed condition
Problem diagnosis:	Heavy losses due to severe infestation of pod borer and podfly in pigeon pea
Thematic area:	IPM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Spraying of Lambda-cyhalothrin 05 % EC @ 400 ml/ha insecticides
T2 –Recommended Practice-	Spraying of Novaluron 05.25 % + Indoxacarb 04.50 % SC @ 825 ml /ha after pod formation
T3- Recommended Practice-	
Date of sowing:	25-30/06-2024
Date of harvesting:	January, 2024
Source of technology:	CIBRC and DPPQS 2023 and IIPR Kanpur
Characteristics of technology:	Broad spectrum, chitin inhibitors and safer insecticide for natural enemies
Name of Crop/Enterprises:	Pigeon pea
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-16 (First Year)

Crop / Enterprise	Mustard	
Title of on farm trial	Assessment of Thiamethoxam 25 WG for the management of aphids in mustard	
Problem diagnosed	Low yield due to infestation of mustard aphids	
Farmers' Practices	Very low use of insecticides	
Details of technologies selected for assessment	T ₁	Spraying of Dimethoate 30 % EC @600 ml/ha insecticides
	T ₂	Spraying of Thiamethoxam 25 WG @ 100 /ha when mustard aphid population cross ETL (25 aphids / 10 cm central shoot)
	T ₃	
Source of technology	DMR, Bharatpur	
Plot size	0.2 ha	
No. of farmers	08	
Total cost	1500/-	
Critical input	Thiamethoxam 25 WG @ 100 /ha	
Performance indicators:	No. of aphids /10 cm central shoot	
(i) Insect damage	No. of beneficial insects Per plant	
(ii) Technical- yield (q/ ha)	yield (q/ ha)	
(iii) Economic- Net Income, C:B ratio	Net Income, C:B ratio	
(iv) Social		

Detailed Information about OFT:

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of Thiamethoxam 25 WG for management of aphids in mustard
Year/Season:	Rabi 2024-25
Farming situation:	Rainfed condition

Problem diagnosis:	Low yield due to infestation of aphids in mustard
Thematic area:	IPM
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Spraying of Dimethoate 30 % EC @ 600 ml/ha insecticides
T2 –Recommended Practice-	Spraying of Thiamethoxam 25 WG @ 100 /ha when mustard aphid population cross ETL (25 aphids / 10 cm central shoot
T3- Recommended Practice-	
Date of sowing:	10-15/10/2024
Date of harvesting:	8-10/02/2024
Source of technology:	DMR, Bharatpur
Characteristics of technology:	Systemic and safer insecticide against natural enemies
Name of Crop/Enterprises:	Mustard
Recommendations for Farmers	
Recommendations for Deptt. Personnel

First Year

Crop / Enterprise	Wheat	
Title of on farm trial	Assessment of Fipronil 0.3% GR for management of termites in wheat	
Problem diagnosed	Heavy losses due to severe infestation of termites	
Farmers' Practices	Use of chlorpyrifos insecticides	
Details of technologies selected for assessment	T1	Spraying of Chlorpyrifos 20 % EC @ 3.0lit/ha insecticides
	T2	Fipronil 0.3% GR @ 17.5kg/ha mixed with 125kg. of sand / soil & apply (broadcast) in moist wheat field
	T3	
Source of technology	IARI Wheat, Indore	
Plot size	0.2 ha	
No. of farmers	08	
Total cost	2600/-	
Critical input	Fipronil 0.3% GR	
Performance indicators: (v) Insect damage (vi) Technical- yield (q/ ha) (vii) Economic- Net Income, C:B ratio (viii) Social	No.of damage tillers per m2 yield (q/ ha) Net Income, C:B ratio	

Detailed Information about OFT:

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of Fipronil 0.3% GR for management of termites in wheat
Year/Season:	Rabi 2024-25
Farming situation:	Rainfed condition
Problem diagnosis:	Low productivity due to attack of termites in wheat
Thematic area:	IPM
No of trials:	08

No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Spraying of Chlorpyrifos 20 % EC @ 3.0 lit/ha
T2 –Recommended Practice-	Use of Fipronil 0.3% GR @ 17.5kg/ha Mixed with 125kg. of sand / soil & apply (broadcast) in moist wheat field
T3- Recommended Practice-	
Date of sowing:	25-30/10/2024
Date of harvesting:	March, 2025
Source of technology:	IARI Wheat, Indore
Characteristics of technology:	Systemic action granulator insecticide and safer for soil health
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	
Recommendations for Deptt. Personnel

OFT 18 (Second Year)

Crop / Enterprise	Wheat	
Title of on farm trial	Assessment of NPK consortia to increase fertilizer use efficiency in wheat crop	
Problem diagnosed	Deterioration of biological health of soil due to faulty agricultural practices	
Farmers' Practices	N:P:K @ 100:50:20	
Details of technologies selected for assessment	T1	N:P:K @100:50:20
	T2	N:P:K @ (120:60:40) based on STV
	T-3	N:P:K @ (120:60:40) based on STV + Soil application of NPK Consortia (@2.5 L /ha
Source of technology	ICAR-IISS	
Plot size	0.20 ha	
No. of farmers	10	
Total cost	2500	
Critical input	Bio fertilizer	
Performance indicators: • Technical- yield (q/ ha) • Economic • Social – Employment generation	Yield (q/ha), Net return (Rs/ha), B:C ratio	

Detailed Information about OFT:

Name of Discipline	Soil Science
Title of on-farm trial:	Assessment of NPK consortia to increase fertilizer use efficiency in wheat crop
Year/Season:	2024-25
Farming situation:	Irrigated
Problem diagnosis:	Deterioration of biological health of soil due to faulty agricultural practices
Thematic area:	INM
No of trials:	10
No. of farmers involved	10

Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	N:P:K @ 100:50:20
T2 –Recommended Practice-	N:P:K @ (120:60:40) based on STV
T3- Recommended Practice-	N:P:K @ (120:60:40) based on STV + Soil application of NPK Consortia (@2.5 L /ha
Date of sowing:	November, 24
Date of harvesting:	March, 25
Source of technology:	ICAR-IISS
Characteristics of technology:	Consortia contains azotobactor, PSB & KSB which improves microbial activities
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT 19 (Second Year)

Crop/Enterprise	Wheat
Title of on-farm trial	Assessment of Natural Farming in Wheat
Problem diagnosed	High Cost of Cultivation, atmospheric pollution, human health issue in current conventional agriculture system
Farmers' practices	Famers are using chemicals and fertilizers
Details of technologies selected for assessment/refinement	T1- Famers are using chemicals and fertilizers
Treatments	T2- Bijamrit : Seed treatment @ 25 ml/kg, Ghanjivamrita : Basal dose @ 5.0 q./ha., Jivaamrit : 50L/ha. in 500 L water at 30 DAS & 45 DAS, Nimaastra : 50L/ha.
Source of technology	NCOF Ghaziabad
Plot size	0.20 ha
No. of farmers	5
Total cost	12000
Critical input	Preparation of Bijamrit, jivamrit, ghanjivamrit, neemaastra etc
Performance indicators: • Technical- yield (q/ ha) • Economic Social – Employment generation	Plant Height,, No. of branch/plant, No. of pods/plant, seed yield. B:C ratio, farmers reaction

Detailed Information about OFT:

Name of Discipline	Soil Science
Title of on-farm trial:	Assessment of Natural Farming in Wheat
Year/Season:	2024-25
Farming situation:	Irrigated
Problem diagnosis:	High Cost of Cultivation, atmospheric pollution, human health issue in current conventional agriculture system
Thematic area:	NF
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Famers are using chemicals and fertilizers
T2 –Recommended Practice-	Bijamrit : Seed treatment @ 25 ml/kg, Ghanjivamrita : Basal dose @ 2.5-

	5.0 q./ha., Jivaamrit : 12.5L/ha. in 250L water at 30 DAS & 45 DAS, Nimaastra : 250L/ha.
T3- Recommended Practice-	
Date of sowing:	November. 2024
Date of harvesting:	March 2025
Source of technology:	NCOF Ghaziabad
Characteristics of technology:	Low-Cost, home grown inputs and Improved Biological health of soil
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT 21 (First Year)

Crop/Enterprise	Fisheries
Title of on-farm trial	Assessment of crumbled pelleted feed in nursery rearing of carp seed
Problem diagnosed	Traditional feeding management in Nursery (oilcake and Rice bran etc.) leading to less growth, low yield and survivability
Farmers' practices	Feeding with regular rice bran & oilcake without maintaining feeding schedule and rate
Details of technologies selected for assessment/refinement Treatments	T1- Feeding of rice bran & oilcake by irregular way T-2- Feeding with crumbled pelleted feed @5% body weight in nursery rearing of carp seeds
Source of technology	College of fisheries (OUAT)
Plot size	0.40 ha
No. of farmers	4
Total cost	2000
Critical input	crumbled pelleted feed @5% body weight
Performance indicators: • Technical- yield (q/ ha) • Economic Social – Employment generation	Length (cm), Weight (gm), yield (q/ha), net return (Rs./ha), B:C ratio, pH, Plankton Density

Detailed Information about OFT:

Name of Discipline	Fisheries
Title of on-farm trial:	Assessment of crumbled pelleted feed in Nursery rearing of carp seed
Year/Season:	2024
Farming situation:	Rainfed
Problem diagnosis:	Traditional feeding management in Nursery using oilcake and Rice bran leading to less growth, low yield and survivability
Thematic area:	Fisheries
No of trials:	04
No. of farmers involved	04
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Feeding with regular rice bran & oilcake without maintaining feeding schedule and rate
T2 –Recommended Practice-	Feeding with crumbled pelleted feed @5% body weight in nursery rearing of carp seeds
T3- Recommended Practice-	
Date of sowing/Operation:	July/August

Date of harvesting:	Sept/October
Source of technology:	College of fisheries (OUAT)
Characteristics of technology:	Length (cm), Weight (gm), yield (q/ha), net return (Rs./ha), B:C ratio, pH, Plankton Density
Name of Crop/Enterprises:	Fish

**Information about Home Science OFT:
OFT 22**

(First Year)

Title of on-farm trial:	Assessment of nutritional status of adolescent girls by nutritional intervention through drum stick
Year/Season:	2024/ Kharif
Problem diagnosis:	Use of traditional diet & lack of knowledge about nutritional foods
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional security
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	No use of drumstick
T2 –Recommended Practice-	Addition of drumstick in food as leaf powder (5%) in chapatti and drumstick curry
Source of technology:	MS university baroda (Gujrat)-2015
Critical input	Drumstick leaves powder, Drum stick plant
Characteristics of technology:	Drumstick leaves are rich source of various important nutrients
Performance indicator/parameter	Anthropometric measurement- body weight, height, measure HB level before practices & after three month practices
Name of Crop/Enterprises:	Drumstick leave powder, Drum stick plant
Farming situation:	-
Date of sowing:	February, 2024
Date of harvesting:	-
Recommendations for Dept. Personnel	-
Feedback	-

OFT 23

(First Year)

Title of on-farm trial-2:	Assessment of Bio fortified- durum wheat variety pusa (HI8759) porridge for nutritional security of farm women & their children
Year/Season:	Round of year
Problem diagnosis:	Lack of awareness regarding nutrition food in daily diet
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional security
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Non consumption of porridge
T2 –Recommended Practice-	Porridge (Durum Wheat) of bio fortified Durum Wheat variety Pusa tejus (Hi-8759) high protein, Zinc & iron Contain

Source of technology:	IARI Wheat Research Center, Indore
Characteristics of technology:	High protein contain, prevents overeating, boosts energy, keeps bones and nervous system healthy , improves heart health , prevent anemia
Performance indicator/parameter	Consumption gm/ capita, calorie gm / capita, protein gm/ capita, iron Mg/ capita, calcium mg/capita
Name of Crop/Enterprises:	Porridge (durum Wheat) HI-8759 (Pusa tejus)
Farming situation:	-
Date of sowing/ operation:	- January, 2024
Date of harvesting:	-
Recommendations for Dept. Personnel	-
Feedback	-

Extension OFT

OFT 24 (First Year)

Title	Assessment of Livelihood activities of rural women through SHGs
Season & Year	2024 Year the round
Problem identified	No authentic information on Livelihood activities of rural women through SHGs (Coloured Birds & vegetable growing)
Thematic Area	Micro financing
Farming situation	-
Name of Technology Intervention under study	Survey techniques & personal interview of respondents
Farmers Practice	Unorganized and individual approach for livelihood with very limited source of
No. of replication (Farmers)	0 2 SHGs (30 Women members/ SHG)

Results / findings

Performance indicators/ parameters	Unit/ details
- Participation in livelihood activities (%) - Level of knowledge and skill (%) - Credit availability (%) - Linkage with stake holders (%) - Market access (%)	

OFT 25 (First Year)

Title	Assessment of adoption level of Summer moong (MH-421)
Season & Year	2024
Problem identified	No authentic information of occupied area of Summer moong (MH-421) available
Thematic Area	TOT
Farming situation	Irrigated
Name of Technology Intervention under study	Random survey techniques through respondents
Farmers Practice	Local variety PDM 139
No. of replication (Farmers)	80

Results / findings

Performance indicators/ parameters	Unit/ details
- Knowledge level, - Adoption level - Perception level - Applicability - Change in income	-

Title	Assessment of Impact of trainings organized by KVK on farmer's socio-economic status
Season & Year	Year 2024
Problem identified	No authentic data available about impact of KVK trainings
Thematic Area	TOT
Farming situation	-
Name of Technology Intervention under study	Survey and Interview of beneficiaries of KVK
Farmers Practice	-
No. of replication (Farmers)	80

Results / findings

Performance indicators/ parameters	Unit/ details
• Change in Knowledge level • Change in Adoption level • Perception • Change in farmer's income • Change in cropping pattern • Feedback	

Title	Assessment of Impact of Soybean demonstrations on socio-economic status of farmers
Season & Year	Year 2024
Problem identified	No authentic data available about impact of CFLD programme
Thematic Area	TOT
Farming situation	-
Name of Technology Intervention under study	Survey and Interview of beneficiaries of Soybean demonstrations under CFLD
Farmers Practice	-
No. of replication (Farmers)	75 (Beneficiaries from year 2019 to 2021, 25 beneficiaries from each year)

Results / findings

Performance indicators/ parameters	Unit/ details
• Percentage increase in Knowledge • Percentage increase in Adoption • Percentage increase in yield & income • Impact of Soybean demonstrations on socio-economic status of farmers • Feedback	

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
1	Soybean	IWM	Sulfentrazone 28% + Clomazone 30% WP herbicide for weed control in soybean	Herbicide (Sulfentrazone 28% + Clomazone 30%)	Kharif 2024	4.0	10	Yield, Net return, B:C ratio
2	Maize	VE	Single cross maize hybrid	Seed	Kharif 2024	4.0	10	Yield, Net return, B:C ratio
3	Wheat	VE	Wheat variety HI-1634 (Pusa Ahilya)	Seed (HI 1634)	Rabi 2024	4.0	10	Yield, Net return, B:C ratio
4	Gram	VE	HYV of Gram JG-24	Seed (JG-24)	Rabi 2024	4.0	10	Yield, Net return, B:C ratio
5	Tomato	RCT	Venturi for fertigation in tomato	Soluble fertilizer	Rabi 2024	4.0	10	Yield, B:C Ratio
6	Mustard	FM	Seed cum ferti drill for sowing of Mustard	Use of seed cum ferti drill on higher basis	Rabi 2024	4.0	10	Yield, B:C ration, net return
7	Wheat	RCT	Renewable energy (solar pump) for low energy cost of irrigation	-	Rabi 2024	4.0	10	Cost of irrigation
8	Tomato	IPNM	STV based RDF i.e. 200:150:120 Kg/ha, B + Ca @ 15 Kg/ha, WSF NPK 19:19:19 @ 110 Kg/ha + 12:61:0 @ 62 Kg/ha + 13:0:45 @ 300 Kg/ha + Urea @ 223 Kg/ha +	Boron, Calcium nitrate, WSF NPK (19:19:19), WSF NPK (12:61:0), WSF NPK (13:0:45)	Kharif 2024	1.0	10	Plant Height (cm), Average fruit weight (g), Yield (q/ha), B:C ratio
9	Chilli	IPNM	Foliar spray of micro nutrient mixture (Ca, B, Zn, Fe, Mn, Mg) @ 5g/l of water three times starting from 45 days after transplanting at an interval of 15 days in Chilli	micro nutrient mixture (Ca, B, Zn, Fe, Mn, Mg)	Kharif 2024	1.0	10	Plant Height, Fruit length (cm), Yield (q/ha), B : C ratio
10	Potato	IPNM	Use of zinc @ 5 Kg/ha as soil application in Potato	Zinc Sulphate	Rabi 2024	1.0	10	Plant height (cm), Tuber size (cm), Tuber Yield (q/ha), B:C ratio
11	Musk melon / Water	IPNM	Use of Foliar spray of boron @ 1.5 g/liter water to reduce fruit cracking in musk melon / water	Boron	Zaid 2024	1.0	10	Fruit cracking (%), Yield (q/ha), B : C

	Melon		melon					ratio
12	Maize	IPM	Demonstration of IPM modules for management of FAW in Maize	Spraying of Bacillus thuringiensis var. Kutika @ 1.0 lit/ha at Early instar stage + Chlorantraniliprole 18.5 % SC @ 200 ml/ha during mid to last instar stage spraying in tip and middle portion	Kharif 2024	2.0	05	No. of larvae /plant Yield q/ha Net income Rs/ha CB Ratio
13	Soybean	IPM	Demonstration of Seed treatment of Imidacloprid 48 FS @ 1.25g/kg seed and spraying of Thiamethoxam 12.60 % + Lambda-cyhalothrin 09.50 % SC for management of stem fly and girdle beetle in soybean	Thiamethoxam 12.60 % + Lambda-cyhalothrin 09.50 % ZC @ 125ml/ha	Kharif 2024	4.0	10	No. of stem tunnelling / 10 plants No. of girdle beetle infested plants /10 plants No. of beneficial insects /plant Yield q/ha Net income Rs/ha CB Ratio
14	Chickpea	IPM	Demonstration of IPM modules for control gram pod borer in Chickpea	Spraying of NPV 350 LE/ha+ Chlorantraniliprole 18.5 % SC @ 120 ml/ha	Rabi 2024	4.0	10	No. of larvae MLR Yield q/ha Net income Rs/ha CB Ratio
15	Wheat	IPM	Demonstration of Imidacloprid 48 FS @ 1.25g/kg seed for management of root aphid in wheat	Seed treatment with Imidacloprid 48 FS @ 1.25g/kg seed	Rabi 2024	4.0	10	No. of damaged plant/m2 No. of aphids per plants Germination % Yield q/ha Net income Rs/ha CB Ratio
16	Fisherie	Productio	Growth promoter (Raa Fres AQ)	Raa Fres	2024	2.0	4	Growth rate,

	s	n and Managem ent	on Indian Major Carps	AQ @ 500g/1 ton of feed				Length (cm), Weight (gm), yield (q/ha), net return (Rs./ha), B:C ratio
17	Fisherie s	Productio n and Managem ent	performance of probiotics in fish culture (Application of probiotics @ 420 gm/ha/month after 2 days of manuring @ 5 kg/ha/year)	Fish Probiotic	2024	2.0	4	Growth rate, Length (cm), Weight (gm), yield (q/ha), net return (Rs./ha), B:C ratio
18	Wheat	SFM	Decomposer for wheat residue management	Decomposer	Rabi 2024-25	04	10	Soil health parameter
19	Soybean	INM	Boron and sulphur nutrition for quality and yield of soybean (Recommended dose + Boron and Sulphur (N:P:K:S:B @ 25:60:40:20:1.5 kg/ha)	Bentonite sulphur & Borax	Kharif 2024	04	10	Yield (q/ha), Net return (Rs/ha) and B:C ratio
20	Hybrid Maize	INM	Zinc in maize crop (Recommended dose (N:P:K:Zn @ 150:80:60:05 kg/ha.)	Zinc Sulphate	Kharif 2024	04	10	Yield (q/ha), Net return (Rs/ha) and B:C ratio
21	Wheat	INM	Foliar spray of zinc in wheat crop	Chelated Zinc	Rabi 2024-25	04	10	Yield (q/ha), Net return (Rs/ha) and B:C ratio

Extension and Training activities under FLDs

S. No.	Activity	No. of activities	Month	Number of participants
1	Field days	05	Sept. Oct., Feb. March, May	250
2	Farmers Training	20	Jan to Dec.	400
3	Media coverage	10	Jan to Dec.	Mass
4	Training for extension functionaries	05	Jan to Dec.	100

Details of FLD on Enterprises
Farm Implements

Name of the implement	crop	Season and year	No. of farmers	Area (ha)	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
							Demon.	Local check
Seed Cum Ferti Drill	Mustard	Rabi 2024	10	4.0	-	Yield, Net Return, B:C Ratio, Efficiency	Yield, Net Return, B:C Ratio, Efficiency	Yield, Net Return, B:C Ratio, Efficiency
Venturi	Tomato	Kharif 2024	10	4.0	-	Yield, Net Return, B:C Ratio	Yield, Net Return, B:C Ratio	Yield, Net Return, B:C Ratio
Solar Pump	Wheat	Rabi 2024	10	4.0	-	Saving of irrigation cost	Saving of irrigation cost	Saving of irrigation cost

*Field efficiency, labour saving etc.

Livestock Enterprises

Enterprise	Breed	No. of Farmers	No. of animals, poultry, birds etc.	Critical inputs	Performance parameters/ indicators	*Data on parameter in relation to technology demonstrated

Annexure – I: Experts discipline wise Training Programme

i) Farmers & Farm women

1. On Campus

Month/ Tentative Date	Clientele	Title of the training programme	Duration in days	Number of participants						Grand Total	
				Others			Number of SC/ST				
				Male	Female	Total	Male	Female	Total		
Crop Production											
June	F/FW	Production technology of Kharif crops	01								20
July	F/FW	Integrated weed management in kharif crops	01								20
October	F/FW	Production technology of Rabi crops	01								20
November	F/FW	Integrated weed management in Rabi crops	01								20
Horticulture											
May	F/FW	Hi-tech Horticulture	01								20
August	F/FW	Rejuvenation of old and senile orchards for quality fruits	01								20
October	F/FW	Micro irrigation systems for orchards	01								20
Livestock production											
Home Science											
January	FW	Women Empowerment Through SHGs	01								20
June	FW	Income generation activities through agriculture startup	01								20
November	FW	Health and hvgiene for	01								20

		children and women								
Plant Protection										
July	F&FW	IPM in soybean	01							20
August	F&FW	Awareness and use of new molecules pesticides	01							20
June	F&FW	Precaution during pre & post spraying of pesticides	01							20
June	Others (Dealer)	Integrated Pest Management in major crops	01							20
Agriculture Extension (Capacity Building and Group Dynamics)										
Jan	F&FW	ICT Application in Agriculture & Allied Fields	01							20
March	F&FW	Agribusiness Skills among Farmers for maximizing Farm Income	01							20
May	F&FW	Recent Extension Approaches for Effective Transfer of Technology	01							20
July	F&FW	Agribusiness & Marketing Information System	01							20
August	F&FW	Why & how to doubling the farmers income	01							20
September	F&FW	Role of ICT tools in dissemination of agriculture technology	01							20
Soil Science										
July	F/FW	Role of secondary nutrient in soybean	01							20
June	F/FW	Integrated Nutrient Management in Kharif crops	01							20
November	F/W	Integrated Nutrient Management in Rabi crops	01							20
October	F/FW	Role and importance of liquid fertilizers in crop production	01							20
January	F/FW	Vermi-composting for soil health management	01							20
May	F/FW	Identification of Nutrient deficiency in different crops	01							20
Fisheries										
August	F/FW	Integrated fish farming	01							20
Agricultural Engineering										
April	F/FW	Low cost rain water harvesting technologies	01							20
June	F/FW	Improved sowing methods and implements of kharif crops	01							20
October	F/FW	Improved sowing methods and implements of rabi crops	01							20

Month/ Tentative Date	Clientele	Title of the training programme	Duration in days	Number of participants						Grand Total
				Others			Number of SC/ST			
				Male	Female	Total	Male	Female	Total	
April	F/FW	Crop production technology of summer green gram	01							20
May	F/FW	Scope and importance of natural farming	01							20
June	F/FW	Crop production technology of soybean	01							20
June	F/FW	Importance of millets &Scientific cultivation of sorghum	01							20
July	F/FW	Integrated weed management in kharif crops	01							20
August	F/FW	Seed production technology for soybean	01							20
September	F/FW	Production technology of mustard	01							20
October	F/FW	Production technology of rabi pulses	01							20
November	F/FW	Production technology of Wheat	01							20
November	F/FW	Integrated weed management in wheat	01							20
Horticulture										
June	F/FW	Production technology of important Kharif vegetables	01							20
October	F/FW	Production technology of potato	01							20
July	F/FW	Kharif onion for crop diversification	01							20
August	F/FW	Nursery Management of vegetables	01							20
March	F/FW	Production technology of summer vegetables	01							20
April	F/FW	Establishment of fruit orchards	01							20
September	F/FW	High density planting techniques for establishment of new orchards	01							20
October	F/FW	Role of plant growth regulators in horticultural crops	01							20
November	F/FW	Importance of Mulching in Fruit & Vegetable crops	01							20
November	F/FW	Production technology of Garlic	01							20
December	F/FW	Production technology of spices	01							20
Livestock production										
Home Science										
March	F/FW	Safe storage of house hold grain	01							20
June	F/FW	Importance and techniques of	01							20

Month/ Tentative Date	Clientele	Title of the training programme	Duration in days	Number of participants						Grand Total
				Others			Number of SC/ST			
				Male	Female	Total	Male	Female	Total	
		nutrition garden for nutritional security								
July	F/FW	Importance of nutrition in daily diet and vegetable preservation	01							20
August	F/FW	Income generation activities through vegetable &spices	01							20
October	F/FW	Malnutrition of children and farm women: Effect ,causes and eradication	01							20
Plant Protection										
September	F&FW	Integrated pest management in Maize & Jawar	01							20
October	F&FW	Management of pod bores in Pigeon pea	01							20
December	F&FW	IPM in Onion and Garlic	01							20
November	F&FW	Integrated pest management in mustard	01							20
November	F&FW	Integrated Pest Management in Chickpea	01							20
March	F&FW	Techniques of safe storage for food grains	01							20
May	F&FW	Role of Ecofriendly pesticides & bio-agents and its conservation	01							20
Agriculture Extension (Capacity Building and Group Dynamics)										
Feb	F&FW	Promotion of Organic Farming for Sustainable Agriculture	01							20
April	F&FW	Income generation through various agril. start ups	01							20
June	F&FW	Use of Mass Media for Transfer of Technology	01							20
August	F&FW	Group dynamics for income enhancement through agriculture commodities	01							20
September	F&FW	Promotion of minor millets for nutritional security	01							20
October	F&FW	Group dynamics through SHGs and FPOs	01							20
November	F&FW	Role of E- Marketing in agriculture	01							20
Soil Science										
March	F/FW	Importance of Natural Farming	01							20
October	F/FW	Balance use of fertilizers in Rabi Crops	01							20
June	F/FW	Role of liquid fertilizers in vegetables crops	01							20
April	F/FW	Method of soil samples collection for testing	01							20

Month/ Tentative Date	Clientele	Title of the training programme	Duration in days	Number of participants						Grand Total
				Others			Number of SC/ST			
				Male	Female	Total	Male	Female	Total	
June	F/FW	Balance use of fertilizers in Kharif Crops	01							20
July	F/FW	Importance of Biofertilizers in Current Scenario	01							20
May	F/FW	Importance of Soil Health Card for soil health managment	01							20

Fisheries

January	F/FW	Water parameters & their management for fish culture	01							20
February	F/FW	Fish disease and its management	01							20
March	F/FW	Eradication of aquatic weeds and aquatic insects in fish ponds	01							20
April	F/FW	Liming and manuring use in fisheries	01							20
May	F/FW	Use of supplementary feed in fisheries	01							20
July	F/FW	Fish seed stocking in ponds	01							20
Sept	F/FW	Composite fish culture and their management	01							20
October	F/FW	Multiple stocking and multiple harvesting	01							20

Agricultural Engineering

January	F/FW	Water Management in Rabi crops	01							20
February	F/FW	Care and precautions during the harvesting and threshing	01							20
March	F/FW	Incorporation and management of wheat crop residue	01							20
July	F/FW	Water management in Kharif crops	01							20
August	F/FW	Care and maintenance of farm ponds	01							20
Sept	F/FW	Different sowing techniques of rabi crops	01							20
Nov	F/FW	Care and maintenance of Micro irrigation system	01							20
Dec	F/FW	Scope and installation of micro irrigation system	01							20

Details of Demonstration Unit at KVK

Demonstration Unit	Particulars /details	Area (Sq m)	Output /Production
Dairy Unit	04 Gir Cow and 04 Heifer	200	7000 L
Vegetable Unit	Tomato, Chilli, Cucumber, bottle guard, ridge guard, Cowpea, Drumstick, Corriandar, Radish, Carrot, Potato, Onion, Garden pea, Cabbage	550	Rs. 50000.00
Azolla Unit	Used for dairy purpose	30	Milk increased
Tubewell Recharge Unit	04 Lakh litre water recharged	10	02 months availability of water increased
Micro Irrigation Unit	Used for irrigation in breeder seed production	2000	
Fish Hatchery	Fish Seed Production	150	01 Lakh seed produced
Orchard/Progeny Unit	Guava, Aonla, Apple ber, Pomegranate, Mango, Lemon	8000	Rs. 50000.00
Water Harvesting Unit	1875 Cubic Meter	625	1875 cubic meter water
Vermicompost unit	04 compartment of 03 pit	100	1000 qt.
Crop Cafeteria	Soybean, Maize, Sorghum, Pigeon pea, Black gram, Green gram, Groundnut, Finger millets, Chickpea, Wheat, Mustard, Safflower, Lentil, Fenugreek,	4000	3000 farmers visited

1.5.(A). Details of SAC meeting to be conducted in the year

Sl. No.	Tentative Date
1	June 2024
2	October 2024

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/ enterprise	Description
1	AES – 1 (Malwa Plateau)	Soybean-Chickpea/Wheat/Vegetables
2	AES – 2 (Nimar Valley)	Cotton- Chickpea/Wheat/Vegetables Maize- Chickpea/Wheat/Vegetables
3	AES – 3 (Jhabua Hills)	Maize- Chickpea/Wheat/Vegetables Green Gram/Black Gram - Chickpea/Wheat/Vegetables

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1.	AES – 1 (Malwa Plateau)	The northern half of the district lies on the Malwa plateau. It covers the northern part of Dhar, Sardarpur and Badnawar tahsils. The average elevation of the plateau is 500 metres above the mean sea level. The land is undulating with a few scattered flat-topped hills roughly aligned between the valleys from south to north. The general slope is towards the north. The valleys are covered with black cotton soil of varying thickness, mostly adapted for cultivation. The mounds may bear gravels or the underlying sandstone rocks may have been exposed. The plateau covers an area of about 466,196 hectares in this district. Below the Vindhyaachal scarps lies the narrow valley of the Narmada. It occupies the southern part of the district in Manawar tahsil and southern eastern part of Kukshi tahsil. The width of the valley is 15 to 30 kilometres. The elevation varies from 275 metres in the northern part of Manawar tahsil to 150 metres in the low plain of Nisarpur in the southwest. To the east between Khalghat and Bakaner the valley is wider, more open and fertile with alluvial cover proceeding westwards. The valley is studded with hills alternatively cut up by numerous streams which join the Narmada along the southern boundary of the district. The result is that there are few stretches and pockets of alluvium along the streams. The regional economy is mostly agricultural; cereal grains, pulses (legumes), oilseeds, and cotton are the main crops. Industries produce cotton textiles, ginned cotton, sugar, vegetable oil, lumber, and paper.

S. No.	Agro-climatic Zone	Characteristics
2.	AES – 2 (Nimar Valley)	In the Nimar valley the main crops are cotton and groundnut, but maize, wheat is also grown extensively.
3.	AES – 3 (Jhabua Hills)	RainFall Range mm. - 800 To 1000, Soil Type- Medium gravelley black, light medium, Recommended Crops- Lime, Mosambi, Ber, Guava, Aonla, Custard apple, Pomegranate, seasonal vegetables, Garlic, Methi.

SWOT Analysis of each Agro-Ecological Situations of district

AES-1 (Malwa Plateau)

Strength	Weakness	Opportunities	Threats
- Limited/ Assured irrigation - Black cotton soil - Medium & Large Farmers - Production of cash crops	- Monocropping - Low water table - Imbalance uses of fertilizers - Indiscriminate use of pesticides - Lack of quality seeds	- Increase in production of crops - Organic & Natural Farming - Increasing in cropping intensity - Introduction of New varieties and habits	- Climate change due to uncertain & heavy rains - Mono Cropping - Soil Fertility challenges - Marketing problem

AES-2 (Nimar Valley)

Strength	Weakness	Opportunities	Threats
- Assured irrigation facilities - High farm power availability, cropping intensity and productivity - Limited/ Assured irrigation - Black cotton soil - Medium & Large Farmers - Production of cash crops	- Low water table - Imbalance uses of fertilizers - Indiscriminate use of pesticides - Lack of quality seeds - Monocropping	- Introduction of New varieties and habits - Increase in production of crops - Organic & Natural Farming - Increasing in cropping intensity	- Climate change due to uncertain & heavy rains - Mono Cropping - Soil Fertility challenges - Marketing problem

AES-3 (Jhabua Hills)

Strength	Weakness	Opportunities	Threats
- Limited/ Assured irrigation - Light soil Production of cash crops - Good liaison with farm machinery manufacturers - Eagerness of farmers to adopt new technologies	- Monocropping - Low water table - Imbalance uses of fertilizers - Indiscriminate use of pesticides - Lack of quality seeds - Small & Marginal Farmers - Poor Soil fertility status	- Increase in production of crops - Organic & Natural Farming - Increasing in cropping intensity - Introduction of New varieties and habits	- Climate change due to uncertain & heavy rains - Mono Cropping - Soil Fertility challenges - Marketing problem

Priority / Thrust areas

S. No.	Particulars
1.	To improve the productivity of oilseed soybean by demonstration of HYVs, INM, IPM, IWM
2.	To improve the productivity of Bt cotton by demonstration of INM, IPM, Intercropping, water management
3.	To improve the productivity of pulses (chickpea, black gram and pigeon pea) by introducing disease resistant varieties, promoting INM and IPM
4.	To improve the productivity of cereals by demonstrating HYVs, INM, IPM, IWM
5.	To promote horticultural crops along with post-harvest management technology in chilli, tomato, turmeric, mahua etc. in the district.
6.	To promote of agri-enterprises viz., vegetable cultivation, dairy, goater, fisheries and value addition of agricultural produce to enhance farm family income.
7.	To Develop profitable farming system models based on the resources available with farm families.
8.	To improve the skill & entrepreneurship of rural youth
9.	To upgrade the knowledge of district level extension functionaries.
10.	To generate employment for rural youth and empowerment of farm women through drudgery reduction.
11.	To promote diversified of farming system through flower, medicinal, vegetable and spice cultivation.

TECHNICAL PROGRAMME

A. Details of targeted mandatory activities by KV K

OFT		FLD and CFLD

Abstract on the number of technologies to be assessed in respect of livestock/enterprises

[illegible]

Details of On Farm Trial (OFT)**OFT-1 (Kharif) Agronomy (3rd Year)**

Crop / Enterprise	Soybean
Title of on-farm trial	Assessment of Soybean through newly released varieties for higher production & moisture stress management
Problem diagnosed	Low yield due to old variety (JS 93-05), moisture stress condition & infestation of diseases
Farmers' practices	Old variety -JS 93-05
Details of technologies selected for assessment	T1: Farmers practice (JS 93-05) T2: Raj Soya-24 with FIRBS T3: RVS 2011-35 with FIRBS
Source of technology	RVSKVV, 2021
Plot size	0.2 ha
No. of farmers	10
Total cost	Rs. 21,000
Critical input	15 kg of seed of RVS-24 & RVS 2011-35 to each farmers
Performance indicators Observation to be recorded	No. of pods, branches/plant, yield (kg/ha), economics (net return and B:C ratio)

OFT-2 (Kharif) Agronomy (3rd Year)

Crop / Enterprise	Soybean
Title of on-farm trial	Assessment of Soybean through Lambda cyhalothrin for the management of stem fly
Problem diagnosed	Low yield due to heavy infestation of stem fly affected area 150000 ha
Farmers' practices	Profenophos + Cypermethrin 44 % to control stem fly
Details of technologies selected for assessment	T1: Foliar spray of Profenophos + Cypermethrin 44 % T2: Foliar spray of Lambda cyhalothrin 4.9 SC @ 300 g/ha at 25 DAS T3: Foliar spray of LC 9.6 + Thiomethoxam 12.6 @ 125 ml/ha at 25 DAS
Source of technology	IISR, 2018
Plot size	0.2 ha
No. of farmers	10
Total cost	Rs. 10,000
Critical input	Lambda cyhalothrin 4.9 SC, LC 9.6 + Thiomethoxam 12.6
Performance indicators Observation to be recorded	Affected plants/sqm, Pods/Plant, Yield (kg/ha), Net income (Rs./ha), Farmer Reaction & Farmer feed back

OFT-3 (Kharif) Soil Science (3rd Year)

Crop / Enterprise	Maize
Title of on-farm trial	Assessment of Maize through Nano urea
Problem diagnosed	Low yield of maize due nitrogen deficiency in maize
Farmers' practices	100 kg/ha DAP+ 100kg/ha Urea (64:46:0)
Details of technologies selected for assessment	T1: 100 kg/ha DAP+ 100kg/ha Urea (64:46:0) T2: RDF 120:60:40 NPK T3: RDF 50% (60 N) and 100% 60:40 PK + 50% Nano urea at 30 and 50 DAS through foliar application
Source of technology	IFFCO, 2019
Plot size	0.2 ha
No. of farmers	10
Total cost	Rs. 2,400
Critical input	Nano Urea
Performance indicators Observation to be recorded	No. of pods, branches/plant, yield (kg/ha), economics (net return and B:C ratio)

OFT-4 (Kharif) Soil Science (1st Year)

Crop / Enterprise	Soybean
Title of on-farm trial	Assessment of Soybean through Bentonite Sulphur
Problem diagnosed	Low yield of Soybean due to Sulphur deficiency in Soybean
Farmers' practices	Imbalance use of fertilizer 75 Kg DAP (13.5:34.5:0)
Details of technologies selected for assessment	T1: 75 Kg DAP (13.5:34.5:0) T2: RDF 25:60:40: NPK T3: RDF 25:60:40: 20 NPKS
Source of technology	IISR, Indore 2022
Plot size	0.2 ha
No. of farmers	10
Total cost	Rs. 23,500
Critical input	Bentonite Sulphur @ 25 kg/ha
Performance indicators Observation to be recorded	No. of pods, branches/plant, yield (kg/ha), economics (net return and B:C ratio)

OFT-5 (Kharif) Horticulture (2nd Year)

Crop / Enterprise	Chilli
Title of on farm trial	Assessment of Chilli under Natural Farming
Problem diagnosed	High cost of production due to chemical spray against sucking pest
Farmers' Practices	Chemical Farming
Details of technologies selected for assessment	T1 Chemical Farming
	T2 Bijamrita: water (20 litre), cow dung (5 kg), urine (5 litre), lime (50 gm) and just a handful of soil, Ghanjivamrita: cow-dung (20 kg), urine (5-10 litre), jaggery (2 kg) and dicot flour (2 kg) and applied to the crops with each Irrigation cycle or directly to the crops. Mulching (Acchadana): soil mulch, straw mulch, Moisture (Whapasa): irrigation in alternate furrows.+ Brahmastra+ Angniastra
Source of technology	Gujrat Vibrant Summit, AAU, Anand, 2022 and NCOF, Ghaziabad 2015
Plot size	0.2 ha
No. of farmers	10
No. of animals (if animals are part of OFT)	Desi Cow - 1
Total cost	Rs. 10,000/-
Critical input	Plastic Drum
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	Fruit yield (kg/ha), economics (net return and B:C ratio)

OFT-6 (Kharif) Horticulture (1st Year)

Crop / Enterprise	Tomato
Title of on farm trial	Assessment of tomato under Integrated Pest Management
Problem diagnosed	Low yield due to insect
Farmers' Practices	Use of insecticide
Details of technologies selected for assessment	T1 Use of insecticide
	T2 The use of Neem Khali 250 kg/ha + 2 spray neem extract (1500 ppm) + feromane trap (5 No. /ha) + yellow strip board (20 No. /ha)
	T3 T2 + Spray of Thiomithaxam 18.5 EC + Fungicide Chlorotheloniil 2gm/ltr. + Sulphur 2 gm/ltr. of water
Source of technology	IARI (2011)
Plot size	0.2 ha
No. of farmers	10
Total cost	Rs. 40,000/-
Critical input	Neem Khali, feromane trap, yellow strip, Thiomithaxam 18.5 EC, Fungicide Chlorotheloniil, Sulphur
Performance indicators: Technical- yield (q/ ha) Economic Social – Employment generation	Quality fruit, Economics, number of fruits per plant, yield qt./ha, B:C ratio

OFT-7 (Rabi) Agronomy (2nd Year)

Crop / Enterprise	Wheat
Title of on farm trial	Assessment of wheat varieties in soybean-wheat cropping system for terminal heat tolerance through temporal adjustments
Problem diagnosed	Low income due to biotic/abiotic factor & high cost of cultivation
Farmers' Practices	Lok-1
Details of technologies selected for assessment	T1: Lok-1 T2: HI 1636 (Pusa Vakula) T3: HI-1650 (Pusa Ojaswi)
Source of technology	IARI, 2022
Plot size	0.2 ha
No. of farmers	10
Total cost	Rs. 10,000/-
Critical input	Seed of HI 1636 (Pusa Vakula) and HI-1650 (Pusa Ojaswi)
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of tillers/hill, Yield (kg/ha), Economics (net return and B:C ratio), Farmer's reaction & feed back

OFT-8 (Rabi) Agronomy (3rd Year)

Crop / Enterprise	Chickpea
Title of on farm trial	Assessment of chickpea improved varieties under Malwa plateau conditions
Problem diagnosed	Low income due to old varieties
Farmers' Practices	Use of local variety (Vishal)
Details of technologies selected for assessment	T1: Vishal T2: RVG-202 T3: RVG-204
Source of technology	RVSKVV 2021
Plot size	0.2 ha
No. of farmers	10
Total cost	Rs. 28,000/-
Critical input	Seed of RVG-202 and RVG-204
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of branches, no. of pods/plant, Yield (kg/ha), Economics (net return and B:C ratio), Farmers reaction & feed back

OFT-9 (Rabi) Soil Science (2nd Year)

Crop / Enterprise	Garlic
Title of on farm trial	Assessment of Garlic under Integrated Nutrient Management
Problem diagnosed	Low yield of garlic due to lack of nutrients
Farmers' Practices	1 bag DAP + 2 bag Urea (55:23)
Details of technologies selected for	T1: 1 bag DAP + 2 bag Urea (55:23)

assessment	T2: 100:60:50 NPK T3: 2.5 t/ha vermicompost + STV value
Source of technology	IISS, 2018
Plot size	0.2 ha
No. of farmers	10
Total cost	Rs. 17,500/-
Critical input	Vermicompost
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	Yield (kg/ha), economics (net return and B:C ratio)

OFT-10 (Rabi) Soil Science (1st Year)

Crop / Enterprise	Wheat
Title of on farm trial	Assessment of Wheat through Nano DAP
Problem diagnosed	Low Yield of Wheat due to imbalance use of fertilizer
Farmers' Practices	250 Kg SSP + 2 Bag Urea (40:46:0)
Details of technologies selected for assessment	T1: 250 Kg SSP + 2 Bag Urea (40:46:0) T2: RDF (120:60:40 NPK kg/ha) T3: RDF (50%) + Seed Treatment with Nano DAP 5ml/kg & 35 & 55 days Two spray Nano DAP 5ml/lit
Source of technology	IFFCO, 2022
Plot size	0.2 ha
No. of farmers	10
Total cost	Rs. 12,000/-
Critical input	Nano DAP+RDF
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of Tillers, Yield (q/ha), Net income (Rs./ha), Farmer Reaction & Farmer feed back

OFT-11 (Rabi) Horticulture (2nd Year)

Crop / Enterprise	Onion
Title of on farm trial	Assessment of onion varieties for higher productivity & better storage
Problem diagnosed	Low productivity due to adoption of old varieties
Farmers' Practices	Agrifound Light Red
Details of technologies selected for assessment	T1 Agrifound Light Red
	T2 NHRDF Red-2
	T3 NHRDF Red-4
Source of technology	NHRDF Red-4
Plot size	0.2 ha
No. of farmers	10
Total cost	Rs. 40,000/-
Critical input	Seed of Onion NHRDF Red-2, NHRDF Red-4

Performance indicators: (i) Technical- yield (q/ ha) (ii)Economic (iii) Social – Employment generation	Bulb diameter (cm), weight of bulb (g) Yield (q/ha), B:C ratio Farmers reaction & feed back

OFT-12 (Rabi) Horticulture (1st Year)

Crop / Enterprise	Coriander
Title of on farm trial	Assessment of coriander through improved variety
Problem diagnosed	Low yield due to local variety & stem fall disease resistant
Farmers' Practices	Local variety
Details of technologies selected for assessment	T1 Local variety
	T2 Ajmer Dhaniya 2 + seed treatment (Tricoderma @ 5gm / kg seed + PSB & Azetobactor)
	T3 RCr 436 + seed treatment (Tricoderma @ 5gm / kg seed + PSB & Azetobactor)
Source of technology	ICAR – NRC of seed spices, Ajmer 2012
Plot size	0.2 ha
No. of farmers	10
Total cost	Rs. 30,000/-
Critical input	Seed of Coriander, PSB, Tricoderma, Azetobactor
Performance indicators: (i) Technical- yield (q/ ha) (ii)Economic (iii)Social – Employment generation	No. of branches/plant, No. ambles/plant, yield q/ha, cost of cultivation, economics and B:C ratio

Information about Extension OFT:

Title	Nil
Season & Year	Nil
Problem identified	Nil
Thematic Area	Nil
Farming situation	Nil
Name of Technology Intervention under study	Nil
Farmers Practice	Nil
No. of replication (Farmers)	Nil

Results / findings

Performance indicators/ parameters	Unit/ details
Nil	Nil

Information about Home Science OFT:

Title of on-farm trial:	Nil
Year/Season:	Nil
Problem diagnosis:	Nil

Thematic area: (Focus area in DFI and nutri smart initiatives)	Nil
No of trials:	Nil
No. of farmers/farm women involved	Nil
Type of OFT (Assessment/ Refinement):	Nil
Details of technology selected for assessment:	
T1 – Farmers Practice-	Nil
T2 –Recommended Practice-	Nil
Source of technology:	Nil
Characteristics of technology:	Nil
Name of Crop/Enterprises:	Nil
Farming situation:	Nil
Date of sowing:	Nil
Date of harvesting:	Nil
Recommendations for Farmers	Nil
Recommendations for Deptt. Personnel	Nil
Feedback	Nil

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstr ration	Parameters identified for performance evaluation
Kharif 2024								
1.	Maize	IWM	Demonstration of Maize on weed management (Topramezone (33.6%) 70 ml/ha)	Topramezone (33.6%)	Kharif, 2024	4.0	10	Weed population, WCE %, Yield, Net return, B:C ratio, Farmers reaction, feedback
2.	Soybean	IWM	Demonstration of soybean by weed management through herbicides (Sodium Acifluorfen 16.5% + Clodinafop Propargyl 8% EC 1 lit/ha)	Sodium Acifluorfen 16.5% + Clodinafop Propargyl 8% EC	Kharif, 2024	4.0	10	Weed population/m ² , Yield, Net return, B:C ratio, Farmers reaction
3.	Onion	INM	Demonstration of Kharif onion on Raised bed	SSP & MOP	Kharif, 2024	4.0	10	No. of leaves/plant, Bulb Yield, Net return, B:C ratio, Farmers reaction, feedback
4.	Soybean	Nutrient Management	Demonstration of Soybean through Nutrient Management	MOP & Bentonite sulphur	Kharif, 2024	4.0	10	No. of pods/ Plants,Yield (q/ha), Net income (Rs.), Farmer Reaction & Farmer feed back
5.	Chilli	HOS	Demonstration of chilli crop under plastic mulch with water and nutrient management	Plastic mulch	Kharif, 2024	4.0	10	Moisture (%), No. of Fruits / Plant, Yield (kg/ha), Net

								income (Rs./ha), Farmer Reaction & Farmer feed back
6.	Onion	HOS	Demonstration of Kharif onion through Zinc Sulphate	Onion seedling and zinc sulphate	Kharif, 2024	4.0	10	Size of bulb (cm), Bulb weight (g), Yield (q/ha), B : C ratio
Rabi 2024-25								
7.	Kabuli chickpea	Varietal Evaluation	Demonstration of Kabuli chickpea improved varieties under Malwa plateau conditions	Improved variety JGK-5	Rabi 2024-25	4.0	10	No. of pods, Yield, Net return, B:C ratio, Farmers reaction & feed back
8.	Wheat	Varietal Evaluation	Demonstration of durum wheat improved varieties under Malwa plateau conditions	Improved Variety- Pusa Tejas (HI 8759)	Rabi 2024-25	4.0	10	No. of tillers/hill, Yield (kg/ha), Economics (net return and B:C ratio), Farmers reaction & feed back
9.	Wheat	Natural Farming	Demonstration of Wheat under Natural Farming	Establishment of unit (plastic drum)	Rabi 2024-25	4.8	12	No. of Tillers, yield (kg/ha), economics (net return and B:C ratio)
10.	Potato	INM	Demonstration of Potato through Balance Nutrition Management	Vermi compost & Azotobacter	Rabi 2024-25	4.0	10	No. of Tuber/plants, Tuber Yield (q/ha), Net income (Rs./ha), Farmer Reaction & Farmer feed back
11.	Pea	INM	Demonstration of Pea through Balance Nutrition Management	MOP & Biofertilizer	Rabi 2024-25	4.0	10	No. of Pods/plants, Yield (q/ha), Net income (Rs./ha), Farmer Reaction & Farmer feed back
12.	Tomato	HOS	Demonstration of cucurbits feasibility cultivation on existing tomato bed structure for reducing the cost of cultivation	Seed of cucurbits	Rabi 2024-25	4.0	10	Plant height (cm), Yield (kg/ha), Economics (net return and B:C ratio), Farmers reaction & feed back
13.	Chilli	HOS	Demonstration of Chilli through inter cropping of maize on existing chilli beds for additional production, income and protection against LCV	Seed of Maize and chilli	Rabi 2024-25	4.0	10	Yield (kg/ha), Economics (net return and B:C ratio), Farmers reaction & feed back
Proposed FLDs for 2024-25 under TSP (Pulse)								
1.	Black gram (Kharif 2024)	Pratap Urd-1	20	50				
2.	Chickpea (Rabi 2024-25)	RVG-204	20	50				

Extension and Training activities under FLDs

S. No.	Activity	No. of activities	Month	Number of participants
1	Field days	13	September, March	325
2	Farmers Training	26	June, July, August, September, October, December, January	675
3	Media coverage	06	June, July, August, September, October, December,	Mass
4	Training for extension functionaries	06	June, July, August, September, October, December,	150

Details of FLD on Enterprises: Nil

Farm Implements

Name of the implement	crop	Season and year	No. of farmers	Area (ha)	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
							Demon.	Local check
-	-	-	-	-	-	-	-	-

**Field efficiency, labour saving etc.*

Livestock Enterprises: Nil

Enterprise	Breed	No. of farmers	No. of animals, poultry birds etc.	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
						Demo.	Local check
-	-	-	-	-	-	-	-

**Milk production, meat production, egg production, reduction in disease incidence etc.*

Other Enterprises : Nil

Enterprise	Variety/ breed/Species /others	No. of farmers	No. of Units/ area	Critical inputs	Performance parameters/ indicators	Data on parameter in relation to technology demonstrated

LINKAGES**Functional linkage with different organizations**

S. No.	Name of stake holders	Nature of linkage
1.	College of Veterinary Science & Animal Husbandry, Mhow	Conduction of demo., Organization of training and technical guidance under Tribal Sub plan Project
2.	Department of Farmers welfare & Krishi Vikas, Dhar	Selection of trainees, organization of various extension activities and participation in various trainings and meetings, Food security mission, MAPWA, ISOPAM, In-service training, sponsored trainings, District agriculture planning
3.	Agriculture Technology Management Agency (ATMA), Dhar	Selection of trainees, organization of various extension activities and participation in various trainings and meetings, crop Demonstration, training, sponsored trainings, Navachar yojna, started DAESI programme
4.	Department of Horticulture, Dhar	Planning and execution of activities of horticulture mission, Namami Devi Narmade plantation programme & organization of various trainings and melas
5.	Department of Veterinary and fisheries Services, Dhar	Organization of trainings, Animal Health Camp, Assistance in fish training, selection of fisherman, field visit etc
6.	Indian Agril. Res. Institute, Wheat Breeding Station, Indore	Technical guidance from time to time
7.	National Soybean Research Centre, Indore	Technical guidance, FLDs & trainings
8.	Central Integrated Pest Management, Indore	Technical guidance & trainings
9.	CIAE, Bhopal	Supply of Improved farm implements & Training
10.	IIPR, Kanpur (UP)	Assisting for conduction of FLD's under TSP on Pulses & Farmer trainings
11.	DRM, Bharatpur (Raj)	Assisting for conduction of FLD's under TSP on Mustard & Farmer training
12.	NRC on Weed Science, Jabalpur	Parthenium management by Mexican beetle & trainings
13.	AIR, Indore	Participation in various talks of technologies time to time
14.	National Fertilizer Limited (NFL) and IFFCO, Dhar	Fertilizer demonstration, field days and trainings & soil testing, Krishak Sangosthi and seminars etc.
15.	M.P. state agro-Industries Dev. Corp.	Input supply & trainings
16.	M.P. state Seed Corporation	Arrangement of seed for FLD's seed production & Joint training programme
17.	MPRLP	Jointly organizing training & SHG's formation
18.	Zila panchayat, Dhar	Contribution received for infrastructural development viz. Mushroom spawn production laboratory, Seed grading unit, MIYAWAKI plantation at KVK, Dhar
19.	Hand in Hand India, (NGO), Dhar	Farmers Training & Demonstrations
20.	Development Support Centre, Kukshi (DSC)	Farmers Training, Demonstrations & formed Narmada Valley Seed Producing company

S. No.	Name of stake holders	Nature of linkage
21.	CARD Agency	Farmers Training & Demonstrations
22.	Child fund India (NGO)	Farmers Training & Demonstrations
23.	Development Support Centre, Manawar (DSC)	Farmers Training & Demonstrations
24.	Lupin Foundation, Dhar (NGO)	Farmers Training & Demonstrations
25.	Pragati Sansthan (NGO)	Organized joint Training programme for Poultry & Dairy
26.	SASAKAVA (NGO)	Training & Demonstrations to leprosy affected colony
27.	Nehru Yuva Kendra , Dhar	Farmers Training of skill development to youth
28.	Dhara kadaknath Society	Training & Demonstrations and farmer selection
29.	NABARD, Dhar	Planning for district development , Training on water management, formation of FPOs
30.	Kukkut Nigam, Bhopal	Online marketing of kadaknath, processing of kadaknath for the society of tribal farmers
31.	NHRDF, Indore	Training & Demonstrations on Kharif Onion & Garlic
32.	Centre for entrepreneurship development of Madhya Pradesh (CEDMAP) DHAR	Training and Guidance to the youth for Self employment.
33.	Central Citrus Research Institute (CCRI), Nagpur	Promotion of Citrus crops in district
34.	State Institute of Agriculture Extension & Training (SIAET), Bhopal	DAESI Diploma
35.	State Warehouse & Cooperation, Bhopal	Trainings & exposure visits
36.	District Cooperative Central Bank, Dhar	Trainings & exposure visits
37.	Indian Institute of Soil Science (IISS), Bhopal	Trainings & exposure visits
38.	Transform Rural India Foundation (TRIF), Bhopal	Convergence with Transform Rural India Foundation (TRIF), Bhopal and established demo. units like Mother orchard of fruit crops, high density orchard, poly house and high value vegetable seed production at KVK, Farm, Dhar.

Details of linkage with ATMA / NFSM

a) Is ATMA implemented in your district Yes

Name of Programme	Nature of linkage
Trainings, Interface, Kishan gothies, Farmers fairs, FLDs, Diagnostic visits, Farmer's field visit, Exposure visits etc.	Convergence

Give details of programmers implemented under National Horticultural Mission

Name of Programme	Nature of linkage
Trainings	Convergence and sponsored

Action plan for Flagship programmes implemented at KVK

(NICRA, ARYA, Natural farming, CBBO, Seed Hub, Agri Drone etc)

Name of Flagship programmes

Month	Activity details	Targeted Beneficiaries/Area/Coverage
Jan- Dec. 2024	Training programmes under ARYA	200
Jan- Dec. 2024	Training programmes, FLDs, Farmers Fair, Arareness Programme, Kisan Gosthies and demonstration under	1000

	Natural Farming	
Jan- Dec. 2024	Training programmes, FLDs under Agri-Drone	500

Details of Demonstration Unit at KVK

Demonstration Unit	Particulars /details	Area (Sq m)	Output /Production
Vermiculture & Vermi composting	Production of vermicompost	2000	Vermicopost & Worms
Seed Production Unit	Breeder seed production	24000	Breeder Seed
Horticulture Units 1. Net House (Size 20.5x18.50m) 2. Poly house (Size 5x20m) 3. Poly cum net house (Size 18.40 x 24.0 m)	Production of Vegetables, Seedling, Saplings and demonstration purpose.	10000	Vegetables, Seedling, Saplings etc.
Azola Unit	Production of Azola firm	150	Azola firm
Dairy Unit	Production of Milk and prepration of inputs for Natural farming	1500	Milk
Kadaknath Poultry Unit	Production of Chicks & Eggs	250	Chicks & Eggs
Goatery Unit	Production of kids and buck	250	Goats
Biogas Unit	Production of Biogas and biogas slurry	100	Biogas
Organic farming	Production of Organic Inputs and Organic produce	10000	Organic Inputs and Organic produce
Fodder production unit	Fodder production for dairy unit	4000	Fodder
Natural Farming	Production of Natural Farming Inputs and Natural produce	20000	Natural Farming Inputs and Natural produce

Annual Action Plan 2024

KVK : Manawar (Dhar-2)

Year of sanction: 2018

1.1 Name of the Programme Coordinator with phone & mobile No.

Name	Telephone / Contact		
	Office	Mobile	Email
Dr. Dhurvendra Singh	KVK Manawar	9907402225	kvk.manawar@rvskvv.net

1.2 Staff Position on (31th Dec.2023)

[illegible]

1.3 Total land with KVK (in ha): 20.0

S. No.	Item	Area (ha)
1	Under Buildings	3.5
2	Under Demonstration Units	0.5
3	Under Crops	15
4	Orchard/Agro-forestry	1.0
5	Others (specify)	-
Total		20.0

1.4 Infrastructural Development:

A) Buildings

S. No.	Name of building	Source of funding	Stage					
			Complete			Incomplete		
			Completion Date	Plinth area (Sq.m)	Expenditure (Rs.)	Starting Date	Plinth area (Sq.m)	Status of construction
1	Administrative Building	ICAR	2021	294	15180000	-	-	-
2	Farmers Hostel	ICAR	2021	323	7100000	-	-	-
3	Staff Quarters (6)	NIL	-	-	-	-	-	-
4	Demonstration Units (2)	NIL	-	-	-	-	-	-
5	Fencing	ICAR	-	-	-	-	-	-
6	Rain Water harvesting system	NIL	-	-	-	-	-	-
7	Threshing floor	NIL	-	-	-	-	-	-
8	Farm godown	NIL	-	-	-	-	-	-

B) Vehicles

Type of vehicle	Year of purchase	Cost (Rs.)	Total kms. Run	Present status
Tractor (Power Tiller)	2019	603856	131.40(h)	Serviceable
Motor Cycle 2	NIL	-	-	-
Bolero(Jeep)	2019	647624	53265	Serviceable
Other (Pl. specify)	-			

C) Equipment & AV aids

Name of the equipment	Year of purchase	Cost (Rs.)	Present status
Projector	2022	44400	serviceable
Xerox Machine	Nil	Nil	Nil
Generator	Nil	Nil	Nil

Name of the equipment	Year of purchase	Cost (Rs.)	Present status
Video Camera	Nil	Nil	Nil

Strength	Weakness	Opportunities	Threats

AES-2 (name)

Strength	Weakness	Opportunities	Threats

AES-3 (name)

Strength	Weakness	Opportunities	Threats

AES-4 (name)

Strength	Weakness	Opportunities	Threats

Add AES if needed

Land Use Pattern

Particulars	Area “000 ha”
Total Geographical area	819
Forest	117
Waste Land	
Other than cultivated area	
Cultivable waste and alkaline land	
Pastures	47
Bushes	
Current Fallow	2.0
Other Fallow	3.0
Agricultural Land	743.9
Area Sown	504.5
Kharif	514.630
Rabi	412.300
Zaid	
Cropping Intensity	147%

Irrigated Area with Different Sources:

S. No.	Description	Area (ha)
1	Canal	13.3
2	Well	82.1
3	Tube well	122.7
4	Ponds	12.0
5	Others	51.8

Soil types

S. No.	Soil type	Characteristics	Area “000 ha”
1	Light soils (ha)		287.80
2	Medium soils (ha)		173.60
3	Heavy soils (ha)		352.20
4			

Note: Figure. In parenthesis denotes the percentage of total area.

Area, Production and Productivity of major crops cultivated in the district

S. No	Crop	Area	Production (tons)	Productivity (Q /ha)
1	Maize	79.290	262.450	33.10
2	Black Gram	7.31	6.235	8.53
3	Green Gram	6.94	5.913	8.52
4	Pigeonpea	6.300	9.797	15.55
5	Soybean	285.10	459.011	16.10
6	Cotton	98.13	197.732	20.15
7	Wheat	220.9	945.452	42.80
8	Chickpea	145.0	249.400	17.20
9	Mustard	0.100	0.131	13.10
10	Sugarcane	5.0	351.800	703.60

Weather data (Jan, 2023- Dec., 2023)

Month /Year	Rainfall (m.m.)	Temperature (° C)	
		Maximum	Minimum
Jan, 23	7.0	27.15	14.63
Feb, 23	0.0	30.51	18.1
Mar, 23	11.0	34.9	22.2
Apr, 23	0.0	38.95	26.58
May, 23	0.0	40.44	28.72
Jun, 23	38.5	35.96	26.98
July, 2023	287.5	29.72	24.09
Aug., 2023	100.5	28.12	22.61

Oct. 2023	46.0	30.65	19.44
Nov. 2023	0.0	31.9	21.85
Dec. 2023	0.0	27.82	15.92

Production and productivity of livestock, Poultry, Fisheries etc. in the district

Category	Population	Production	Productivity
Cattle			
Crossbred/ Indigenous		 MT.	 kg
Buffalo		 MT.	 kg
Sheep			
Crossbred/ Indigenous		 MT wool	 kg
Goats		 MT	 kg
Pigs Crossbred/ Indigenous		---	---
Rabbits			
Poultry			
Hens		 Lakh eggs	 eggs/ bird/yr
Turkey and others			
Category	Area	Production	Productivity
Fish	 (ha)	Q/ month	 Q/ ha.

Details of Operational area / Villages (2023)

Sl. No.	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Manawar	Manawar	Bhagyapur	Soybean,cotton,wheat, Chickpea, Maize	Intensive and continuous cotton production resulted increasing use of fertilizer & low productivity.	Integrated Crop Management
2	Manawar	Umarban	Barda	Soybean,cotton,wheat, Chickpea, Maize	Poor yield of local and old variety in pegionpea and Chickpea	Integrated Disease & Pest Management
3	Manawar	Manawar	Wayal	Soybean,cotton,wheat, Chickpea, Maize	Unemployment of rural population	Income generation activities for empowerment of rural youth
4	Manawar	Manawar	Gulati	Soybean,cotton,wheat, Chickpea, Maize	Area and productivity of cereal and oilseed crops, particularly soybean is towards declining trend.	Drudgery reduction for farm women
					Indiscriminate and non judicious use of pesticides specially in chilli for controlling the leaf curl diseases.	To create awareness about value addition & Processing.
					Inadequate control measures of Soil & water conservation	To popularize organic farming in the district.
					Lack of knowledge regarding value addition	To create awareness about judicious use of Irrigation water.
					Imbalance use of Fertilizer	Balance diet supplement for rural children and farm women

Priority / Thrust areas

S. No.	Particulars
1.	Integrated Crop Management
2.	Integrated Disease & Pest Management
3.	Income generation activities for empowerment of rural youth

Detailed Information about OFT:

2.1. Information about OFT: (A)

Name of Crop/Enterprises:	Assessment of herbicides for weed management in soybean
Title of on-farm trial:	Kharif 2024-25
Year/Season:	Semi-irrigated
Farming situation:	Low productivity due to heavy weed infestation in soybean
Problem diagnosis:	IWM
Thematic area:	10 Area - 0.40 ha each
No of trials:	10
No. of farmers involved	Assessment of herbicides for weed management in soybean
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Imazethapyr 10% @ 100 ml ai/ha at 18 DAS

T2 –Recommended Practice-	Sulfentrazone @ 360 g ai/ha PE
T3- Recommended Practice-	Diclosulam 84 WDG@ 22 g ai/ha PE
Date of sowing:	
Date of harvesting:	
Source of technology:	IISR, Indore 2016
Characteristics of technology:	Sulfentrazone 39.6% SC is a soil-applied selective herbicide that controls specific grasses, sedges, and broadleaf weeds. Diclosulam is effective against a range of important broadleaf weeds in soybean crops including morning glories, cocklebur, eclipta
Name of Crop/Enterprises:	
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Result : (Economic Performance of OFT)

Performance indicators/ parameters	Unit/ details	Observation		
		T1 (Farmers Practice)	T2(Recommended Practice)	T3(Recommended Practice)

% Infection of Plant				

2.1 Information about OFT: (B)

Title of on-farm trial:	Assessment of improved Varieties of Onion
Year/Season:	Kharif 2023-24
Farming situation:	Rainfed
Problem diagnosis:	Low yield due to use of old variety or locally available seed of onion
Thematic area:	Varietal Evaluation
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
T1 – Farmers Practice-	AFDR
T2 –Recommended Practice-	N-53

T3- Recommended Practice-	Bhima Super average yield of 20 - 22 t/ha in kharif and 40 - 45 t/ha in late kharif. maturity within 100-105 days after transplanting (DAT)
Date of sowing:	
Date of harvesting:	
Source of technology:	A Red Onion variety from DOGR has been identified for release for kharif season
Characteristics of technology:	
Name of Crop/Enterprises:	
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Result : (Economic Performance of OFT)

Infestation of plants	%			
yield	(q/ha)			

2.1 Information about OFT: (C)

Title of on-farm trial:	Assessment of improved Varieties of Soybean (1st Year)
Year/Season:	Kharif 2024-25
Farming situation:	Rainfed
Problem diagnosis:	Low yield due to use of old variety or locally available seed of Soybean
Thematic area:	Varietal Evaluation
No of trials:	10 Area - 0.2 ha each
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	JS 95-60
T2 –Recommended Practice-	RVSM 1135
T3- Recommended Practice-	JS 20-69
Date of sowing:	

Date of harvesting:	
Source of technology:	RVSKVV, GWALIOR.
Characteristics of technology:	RVSM 1135 Maturity Days: 90-95 days. Yield: 20-25 q/ha JS 20-69 (2016), Maturity Days: 94 days. Yield: 25-28 q/ha. high yielding variety with multiple resistance .
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Result : (Economic Performance of OFT)

Performance indicators/ parameters	Unit/ details	Observation

2.1 Information about OFT: (D)

Title of on-farm trial:	Assessment of insecticides for Stem fly management in soybean
Year/Season:	Kharif 2024-25
Farming situation:	Rainfed
Problem diagnosis:	Low productivity due to infestation of stem fly in soybean
Thematic area:	Insect Pest Management
No of trials:	10 Area - 0.4 ha each
No. of farmers involved	10
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Profenophos 40% @ 1000 ml ai/ha at 18 DAS
T2 –Recommended Practice-	Foliar spray of Lembacyhalothrin 4.9 SC @ 300 g/ha at 25 DAS
T3- Recommended Practice-	Foliar spray of Lembacyhalothrin 9.6+thiomethoxam 12.6@125 ml/ha at25 DAS

Date of sowing:	
Date of harvesting:	
Source of technology:	IISR, Indore 2016
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel

2.1 Information about OFT: (E)

Title of on-farm trial:	Assessment of Natural Farming for productivity enhancemet in Wheat
Year/Season:	Rabi 2023-24
Farming situation:	Irrigated
Problem diagnosis:	Low Yield due to beneficial microorganism
Thematic area:	CP
No of trials:	10
No. of farmers involved	10
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Imbalance use of fertilizer
T2- Recommended Practice-	Use of bijamrit for seed treatment and jivamrit first spray at 21 DAS then 4 Spray at 15 Days interval
Date of sowing:	
Date of harvesting:	
Source of technology:	NCOF, Gaziabad (UP)
Characteristics of technology:	

Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Result : (Economic Performance of OFT)

Performance indicators/ parameters	Unit/ details	Observation

2.1 Information about OFT: (F)

Title of on-farm trial:	Assessment of pod borer management in chickpea
Year/Season:	Rabi 2023-24
Farming situation:	Semi-Irrigated
Problem diagnosis:	Losses about 18-20% due to heavy infestation of Gram Pod Borer in Chickpea Crop.
Thematic area:	IPM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of Chlorpyrifos 20% EC@1500 ml/ha
T2 –Recommended Practice-	Use of HaNPV @ 250 LE/ha At Incidence of insect Pest
T3- Recommended Practice-	Use of 3% Agnitra (at Incidence insect pest and than need based application
Date of sowing:	
Date of harvesting:	
Source of technology:	NCOF, Gaziabad
Characteristics of technology:	Economic & Eco friendly due to material available locally

Name of Crop/Enterprises:	Chickpea
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Result : (Economic Performance of OFT)

Performance indicators/ parameters	Unit/ details	Observation

2.1 Information about OFT: (H)

Title of on-farm trial:	Assessment of herbicide in Chickpea
Year/Season:	Rabi 2023-24
Farming situation:	Semi-Irrigated
Problem diagnosis:	Low yield 25-30% Due to weed infestation
Thematic area:	IWM
No of trials:	10
No. of farmers involved	10
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Dora at 25-30 DAS
T2 –Recommended Practice-	Pendimethalin 38.7% EC@796gm a.i/ha PE 0-3 DAS + Hand Weeding at 30 DAS
T3- Recommended Practice-	Topramazone 33.6%SC@25gma.i/ha POE 20-25 DAS
Date of sowing:	
Date of harvesting:	
Source of technology:	IGKV, Raipur
Characteristics of technology:	Selective Herbicide, Broad Spectrum Weed Control
Name of Crop/Enterprises:	Chickpea
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback

2.1 Information about OFT: (I)

Title of on-farm trial:	Assessment of improved Varieties chickpea (kabuli)
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Low yield of wheat due to old variety Dollar
Thematic area:	VE
No of trials:	10
No. of farmers involved	10
Details of technology selected for assessment/ refinement :	
T1 – Farmers Practice-	Dollar
T2 –Recommended Practice-	RVKG 111
T3- Recommended Practice-	RVKG 151
Date of sowing:	
Date of harvesting:	
Source of technology:	ICAR IARI, Indore
Characteristics of technology:	RVKG 111 tolerant to wilt, RVKG 151 extra large seeded, tolerant to wilt
Name of Crop/Enterprises:	Chickpea
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback

2.1 Information about OFT: (J)

Title of on-farm trial:	Assessment of Storage of wheat by using Lime
Year/Season:	Rabi 2023-24
Farming situation:	Semi Irrigated
Problem diagnosis:	Reduce of Grain Quality due to Poor Storage
Thematic area:	ITK
No of trials:	10
No. of farmers involved	10
Details of technology selected for assessment/ refinement :	
T1 – Farmers Practice-	Use of Chemical
T2 –Recommended Practice-	Storage of wheat by using Lime
Date of sowing:	
Date of harvesting:	
Source of technology:	Volume 2 Page No. 61 Code No. 2970
Characteristics of technology:	To protect wheat from storage pests, 100 g lime is placed in 1 q wheat. By using this practice, wheat can be stored for about 1 year.
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Result : (Economic Performance of OFT)

Performance indicators/ parameters	Unit/ details	Observation

2.1 Information about OFT: (K)

Title of on-farm trial:	Assessment of round the year green fodder production system for DFI.
Year/Season:	Rabi 2023-24
Farming situation:	Irrigated
Problem diagnosis:	Lack of Green fodder
Thematic area:	LPM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement :	
T1 – Farmers Practice-	Conventional (Only grow maize/sorghum and berseem)
T2 –Recommended Practice-	RYGFP (planting of NB Hybrid (3x3) m distance of grown in between fodder crops cowpea- berseem)
T3- Recommended Practice-	RYGFP (Planting of NB Hybrid in paired rows (1x1x1) m distance and grown in between fodder crops cowpea- berseem)
Date of sowing:	
Date of harvesting:	
Source of technology:	-
Characteristics of technology:	-
Name of Crop/Enterprises:	Green Fodder
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Result : (Economic Performance of OFT)

Stabilizer	-	-	-
Inverter 600 VA (2)	-	-	-
Inverter Battery (2)	-	-	-

1.5.(A). Details of SAC meeting to be conducted in the year

Sl. No.	Tentative Date
1	May 2024
2	Oct 2024

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 1 Chachoda, Raghogarh	Soybean, Greengram, Blackgram, Coriander, Wheat, Chickpea, Mustard
2	AES – 2 Guna, Bamori	Soybean, Greengram, Paddy, Wheat, Chickpea, Mustard

3	AES – 3 Aron	Soybean, Greengram, Blackgram, Paddy, Coriander, Wheat, Chickpea, Mustard

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	Gird Zone	Guna is located at 24.65°N 77.32°E. It has an average elevation of 350 to 474 metres (1555 ft) . Average Rainfall : 1090 mm Temperature : Max - 46.0 °C Min- 3.0 °C Physiographic : Rivers (Sindh and Parwati)

SWOT Analysis of each Agro-Ecological Situations of district AES-1 (Chachoda, Raghogarh)

Strength	Weakness	Opportunities	Threats
- Availability of Livestock - Good Soil, well drained flat land - Suitable for different crops	- Indiscriminate use of Pesticide - Non availability of round the year green fodder - Adopt flood irrigation method - No drought tolerant varieties available	- Suitable for Horticultural and spice Crops - Crop production may be enhanced by using of High yielding heat tolerant varieties - Switch from mono culture to diversified farming - Stall feeding of animals - Crop Diversification - Use of water saving irrigation technique	- Heavy Pest infestation - Climatic vulnerability for frost and Heat wave - Low water holding capacity of soil - Weather

AES-2 (Guna, Bamori)

Strength	Weakness	Opportunities	Threats
- Availability of Livestock - Good Soil, well drained flat land - Suitable for different crops	- Non availability of round the year green fodder - Indiscriminate use of Pesticide - Adopt flood irrigation method - No drought tolerant varieties available	- Stall feeding of animals - Crop Diversification - Suitable for Horticultural Crops - Crop production may be enhanced by using of High yielding heat tolerant varieties - Switch from mono culture to diversified farming - Use of water saving irrigation technique	- Heavy Pest infestation - Climatic vulnerability for frost and Heat wave - Low water holding capacity of soil - Weather

AES-3 (Aron)

Strength	Weakness	Opportunities	Threats
- Availability of Livestock - Good Soil, well drained flat land - Suitable for different crops	- Heavy gravely laterite soil - Non availability of round the year green fodder - Indiscriminate use of Pesticide - Adopt flood irrigation method - No drought tolerant varieties available	- Suitable for Horticultural Crops - Crop production may be enhanced by using of High yielding heat tolerant varieties - Switch from mono culture to diversified farming - Stall feeding of animals - Crop Diversification - Use of water saving irrigation technique	- Heavy Pest infestation - Climatic vulnerability for frost and Heat wave - Low water holding capacity of soil - Weather

Land Use Pattern

Particulars	Area “000 ha”
Total Geographical area	630.8
Forest	101.4
Waste Land	65.8
Other than cultivated area	34.4
Cultivable waste and alkaline land	76.5
Pastures	29.8
Bushes	0.0
Current Fallow	4.9

Other Fallow	7.9
Agricultural Land	314.5
Area Sown	314.5
Kharif	212.4
Rabi	189.0
Zaid	-
Cropping Intensity	136%

Types of Farmers :

S. No.	Description	Number	Percentage
1	Small Farmers	40652	40.01
2	Marginal Farmers	39640	39.01
3	Medium Farmers	18346	18.05
4	Large Farmers	2960	2.91

Irrigated Area with Different Sources:

S. No.	Description	Area (ha)
1	Canal	18.945
2	Well	67.744
3	Tube well	85.265
4	Ponds	1.349
5	Others	4.742

Soil types

S. No.	Soil type	Characteristics	Area “000 ha”
1	Shallow Soils	57.79%	638.20
2	Medium deep Soils	4.92 %	54.20
3	Deep Soil	37.29%	411.40

Note: Figure. In parenthesis denotes the percentage of total area.

Area, Production and Productivity of major crops cultivated in the district

S. No	Crop	Area (ha)	Production (Qt.)	Productivity (Q /ha)
1	Wheat	189.95	782.59	4120
2	Barley	0.01	0.03	3600
3	Chickpea	28.87	42.73	1480
4	Greenpea	0.25	0.34	1378
5	Lentil	3.96	4.99	1260
6	Mustard	88.54	119.53	1350
7	Linseed	0.02	0.02	960
8	Sugar cane	311.59	950.23	3050
9	Paddy	4.28	14.96	3495
10	Jwar	1.86	2.27	1220
11	Maize	42.33	44.07	1041
12	Pigeonpea	0.03	0.03	873
13	Greengram	0.54	0.31	568
14	Blackgram	36.18	15.37	480
15	Groundnut	0.03	0.04	1453
16	Soybean	253.40	74.50	294

Weather data (Jan, 2023. Dec., 2023)

Month /Year	Rainfall (m.m.)	Temperature (° C)	
		Maximum	Minimum
Jan, 23	0.0	23	9
Feb, 23	0.0	27	12
Mar, 23	36.5	33	18

Production and productivity of livestock, Poultry, Fisheries etc. in the district

Category	Population	Production	Productivity
Cattle			
<i>Crossbred/ Indigenous</i>		 MT.	 kg
Buffalo	174.1(000nos)	 MT.	 kg
Sheep			
<i>Crossbred/ Indigenous</i>	1.3 (000nos)	 MT wool	 kg
Goats	118.5 (000nos)	 MT	 kg
Pigs <i>Crossbred/ Indigenous</i>		...	...
Rabbits			
Poultry			
Hens		 Lakh eggs	 eggs/ bird/yr
Turkey and others			
Category	Area	Production	Productivity
Fish	 (ha)	Q/ month	 Q/ ha.

Details of Operational area / Villages (2023)

Sl. No.	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Aron	Aron	Arashkhed, Husainpur, Kherkhedi, Tunk paroriyam Khamkheda	Soybean, Blackgram, Gram, Wheat	Unavailability of Quality Seed, Unawareness, Market Link	VE, INM, IPM, IDM, IWM
2	Guna	Guna	Sarkho, Chhipone, Bajrangarh			VE, INM, IPM, IDM, IWM
3	Bamori	Bamori				VE, INM, IPM, IDM, IWM
4	Beenaganj	Chachoda				VE, INM, IPM, IDM, IWM
5	Raghogarh	Raghogarh	Chailpura, Bhulay			VE, INM, IPM, IDM, IWM
6	Kumbhraj	Chachoda				VE, INM, IPM, IDM, IWM

Priority / Thrust areas

S. No.	Particulars
1.	Crop production – Production technology of field crop, NRM, Varietal replacement
2.	Soil Science – INM in field crops, high emphasis on use of biomass, sustainable agriculture
3.	Horticulture – Olericulture, Floriculture, Pomology
4.	Plant protection – IPM , IWM and IDM in field and horticultural crops
5.	Livestock production & management – Breed improvement, Fodder production, Vaccination, AI
6.	Women in Agriculture – Drudgery reduction, health and hygiene, malnutrition.

TECHNICAL PROGRAMME

A. Details of targeted mandatory activities by KVK

OFT		FLD and CFLD	
1		2	
Number of OFTs	Number of Farmers	Number of FLDs	Number of Farmers
12	96	12	100

Training		Extension Activities	
3		4	
Number of Courses	Number of Participants	Number of activities	Number of participants
56	1680	343	69810

Seed Production (Qtl.)	Planting material (Nos.)
210	43000

B. Abstract of interventions to be undertaken

S. N o.	Thrust area	Crop/ Enterprise	Identified Problem	Interventions					
				Title of OFT if any	Title of FLD if any	Title of Training if any	Title of training for extension personnel if any	Extension on activities	Supply of seeds, planting materials etc.
1	VE	Soybean	Low yield due to old variety	Assessment of medium duration Soybean Variety RVS 24	Demonstration of Medium duration variety of Soybean – JS 2098	Crop Production	Crop Production	Field day, Diagnostic Visit	seeds
2	VE	Soybean	Low yield due to old variety	Assessment of New variety of Soybean RVS 18	Demonstration of High Yielding short duration variety of Green gram Sikha	Crop Production	Crop Production	Field day, Diagnostic Visit	seeds
3	VE	Wheat	Unavailability of irrigation water	Assessment of limited irrigation and Heat tolerant variety of Wheat Raj 4238	Demonstration of new chickpea variety RVG 204	Crop Production	Crop Production	Field day, Diagnostic Visit	seeds
4	VE	Wheat	Low yield due to old variety	.	Demonstration of HYV of Wheat DBW 187	Crop Production	Crop Production	Field day, Diagnostic Visit	seeds
5	VE	Linseed	Low yield due to old variety	.	Demonstration of HYV of Linseed JLS 27	Crop Production	Crop Production	Field day, Diagnostic Visit	seeds
6	IPM	Wheat	low yield due to Insect Pest infestation	Assessment of Imidachloprid for management of root aphid of Wheat	Demonstration of Management of Stem fly in Soybean – Novaluron 5.25% + Imamectin benzoate 0.9% SC 625 ml/ha	Crop Production and IPM	Crop Production and IPM	Field day, Diagnostic Visit	Pesticide
7	IWM	Paddy	Heavy infestation of weed in direct seeded rice	Assessment of bispyriback sodium for weed management in direct seeded Paddy	Demonstration of Diclosulam for weed management in Soybean – Diclosulam @ 26g ai/ha	Crop Production and IWM	Crop Production and IWM	Field day, Diagnostic Visit	Herbicide
8	IWM	Chickpea	Heavy weed infestation	Assessment of Topramezone as POE for weed management in Chickpea	.	Crop Production and IWM	Crop Production and IWM	Field day, Diagnostic Visit	Herbicide
9	IWM	nigela	Heavy weed infestation	Assessment of Oxadiargyle for weed management in nigela (Kalonji)	.	Crop Production and IWM	Crop Production and IWM	Field day, Diagnostic Visit	Herbicide
10	Crop Diversification	Paddy	Low yield of Soybean Crop	Assessment of short duration variety of Paddy suitable for direct seeding	.	Crop Production	Crop Production	Field day, Diagnostic	Seed

								Visit	
11	Entrepreneurships	Bio. waste management	Traditional heap method Practices and no information about improved practices	Assessment of Bio. waste management by waste decomposer	.	.	.	Field day, Diagnostic Visit	waste decomposer

Details of On Farm Trial (OFT)

OFT.1

Name of Discipline (Agronomy)	
Title of on.farm trial:	Assessment of Ragi Millet Verity GPU 45/ BM9-1/VL 149
Year/Season:	Kharif 2024
Farming situation:	Rainfed
Problem diagnosis:	Low yield of traditional cropping pattern
Thematic area:	Crop Diversification
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice.	Soybean/Blackgram Crop
T2 –Recommended Practice.	GPU 45/ BM9-1/VL 149
T3. Recommended Practice.	-
Date of sowing:	June 2024
Date of harvesting:	Oct 2024
Source of technology:	JNKVV Jabalpur
Characteristics of technology:	High yielding variety
Name of Crop/Enterprises:	Ragi Millets
Recommendations for Farmers	.
Recommendations for Deptt. Personnel	.
Feedback	.

OFT.2

Name of Discipline (Agronomy)	
Title of on.farm trial:	Assessment of medium duration Soybean Variety NRC 138
Year/Season:	Kharif 2024
Farming situation:	Rainfed
Problem diagnosis:	Low yield due to old variety
Thematic area:	VE
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice.	JS 95-60
T2 –Recommended Practice.	RVS 76
T3. Recommended Practice.	NRC 138
Date of sowing:	June 2024
Date of harvesting:	Oct 2024
Source of technology:	DSR 2021
Characteristics of technology:	Medium duration and HYV
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	.
Recommendations for Deptt. Personnel	.
Feedback	.

OFT.3

Name of Discipline (Agronomy)	
Title of on.farm trial:	Assessment of Tembotrion for weed control in Maize
Year/Season:	Kharif 2024
Farming situation:	Rainfed
Problem diagnosis:	Heavy infestation of weed
Thematic area:	IWM
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice.	Hand Weeding
T2 –Recommended Practice.	Tembotrion @125g /ha as POE
T3. Recommended Practice.	-
Date of sowing:	June 2024
Date of harvesting:	Oct 2024
Source of technology:	DWR 2021
Characteristics of technology:	Eco Friendly
Name of Crop/Enterprises:	Maize
Recommendations for Farmers	.
Recommendations for Deptt. Personnel	.
Feedback	.

OFT.4

Name of Discipline (Agronomy)	
Title of on.farm trial:	Assessment of Sesame Variety TKG 308
Year/Season:	Kharif 2024
Farming situation:	Rainfed
Problem diagnosis:	Low yield of Soybean Crop
Thematic area:	Crop Diversification
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice.	Soybean/Blackgram
T2 –Recommended Practice.	TKG 308
T3. Recommended Practice.	-
Date of sowing:	June 2024
Date of harvesting:	Oct 2024
Source of technology:	JNKVV 2008
Characteristics of technology:	-
Name of Crop/Enterprises:	Sesame
Recommendations for Farmers	.
Recommendations for Deptt. Personnel	.
Feedback	.

OFT.5

Name of Discipline (Agronomy)	
Title of on.farm trial:	Assessment of Linseed Variety JLS 66
Year/Season:	Kharif 2024
Farming situation:	Rainfed
Problem diagnosis:	Low yield due to old variety
Thematic area:	VE
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice.	JT 7
T2 –Recommended Practice.	Jawahar Linseed 66
T3. Recommended Practice.	-
Date of sowing:	June 2024
Date of harvesting:	Oct 2024
Source of technology:	JNKVV 2018
Characteristics of technology:	High Omega.3 content (51.87) moderately resistant to Alternaria blight, powdery mildew and bud fly
Name of Crop/Enterprises:	Sesame
Recommendations for Farmers	.
Recommendations for Deptt. Personnel	.
Feedback	.

OFT.6

Name of Discipline (Agronomy)	
Title of on.farm trial:	Assessment of Lentil Variety RVL 11-6
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to old variety
Thematic area:	VE
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice.	Old Variety
T2 –Recommended Practice.	RVL 11-6
T3. Recommended Practice.	
Date of sowing:	Oct 2024
Date of harvesting:	March 2025
Source of technology:	RVSKVV 2017
Characteristics of technology:	Eco Friendly
Name of Crop/Enterprises:	Lentil
Recommendations for Farmers	.
Recommendations for Deptt. Personnel	.
Feedback	.

OFT.7

Name of Discipline (Agronomy)	
Title of on.farm trial:	Assessment of Topramezone as POE for for weed management in Chickpea
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Heavy weed infestation
Thematic area:	IWM
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice.	No Use of herbicide
T2 –Recommended Practice.	Pendimethyline 1.0 l a.i. as PE
T3. Recommended Practice.	Topramezone @ 26.0 g/ha as POE
Date of sowing:	Oct 2024
Date of harvesting:	March 2025
Source of technology:	IGKV, Raipur
Characteristics of technology:	Eco Friendly
Name of Crop/Enterprises:	Chickpea
Recommendations for Farmers	.
Recommendations for Deptt. Personnel	.
Feedback	.

OFT.8

Name of Discipline (Agronomy)	
Title of on.farm trial:	Assessment of high Yielding variety of Wheat HD 3410
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to old variety Lok 1
Thematic area:	VE
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice.	Lok 1
T2 –Recommended Practice.	HD 3410
T3. Recommended Practice.	-
Date of sowing:	Oct 2024
Date of harvesting:	March 2025
Source of technology:	IARI 2022
Characteristics of technology:	High Yielding variety
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	.
Recommendations for Deptt. Personnel	.
Feedback	.

OFT.8 (Natural Farming)

Name of Discipline (Agronomy)	Natural Farming
Title of on.farm trial:	Assessment of Jivaamrit and Bijaamrit for Nutrient Management in Soybean
Year/Season:	Kharif 2024
Farming situation:	Rainfed
Problem diagnosis:	Higher cost of cultivation due to chemical inputs
Thematic area:	Natural Farming
No of trials:	8
No. of farmers involved	8
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice.	Chemical Fertilizer
T2 –Recommended Practice.	Bijaamrit for Seed Treatment @ 10ml/kg seed
T3. Recommended Practice.	Biiamrit for Seed Treatment @ 10ml/kg seed + Spraying of Jivaamrit 5l/ha at 30 & 45 DAS
Date of sowing:	June 2024
Date of harvesting:	Sep 2024
Source of technology:	NCOF, Gaziabad
Characteristics of technology:	Eco-friendly and Economic way of Nutrient managment
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT.9 (Natural Farming)

Name of Discipline (Agronomy)	Natural Farming
Title of on.farm trial:	Assessment of Kunab Jal For nutrient management in Paddy
Year/Season:	Kharif 2024
Farming situation:	Rainfed
Problem diagnosis:	Higher cost of cultivation due to chemical inputs
Thematic area:	Natural Farming
No of trials:	8
No. of farmers involved	8
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice.	Chemical Fertilizer
T2 –Recommended Practice.	Use of Kunab Jal @ 500 l/ha with irrigation water at 30 DAS
T3. Recommended Practice.	Use of Kunab Jal @ 500 l/ha with irrigation water at 15,30,45 DAS
Date of sowing:	June 2024
Date of harvesting:	Sep 2024
Source of technology:	RVSKVV 2023
Characteristics of technology:	Eco-friendly and Economic way of Nutrient management
Name of Crop/Enterprises:	Paddy
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT.10 (Natural Farming)

Name of Discipline (Agronomy)	Natural Farming
Title of on.farm trial:	Assessment of Bijaamrit and Jivamrit for nutrient management in Wheat
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Higher cost of cultivation due to chemical inputs
Thematic area:	Natural Farming
No of trials:	8
No. of farmers involved	8
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice.	Chemical Fertilizer
T2 –Recommended Practice.	Bijaamrit for Seed Treatment @ 10ml/kg seed
T3. Recommended Practice.	Biiamrit for Seed Treatment @ 10ml/kg seed + Spraying of Jivaamrit 5l/ha at 30 & 45 DAS
Date of sowing:	Oct 2024
Date of harvesting:	March 2024
Source of technology:	NCOF, Gaziabad
Characteristics of technology:	Eco-friendly and Economic way of Nutrient management
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT.11 (Natural Farming)

Name of Discipline (Agronomy)	Natural Farming
Title of on.farm trial:	Assessment of Bijaamrit and Jivamrit for nutrient management in Chickpea
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Higher cost of cultivation due to chemical inputs
Thematic area:	Natural Farming
No of trials:	8
No. of farmers involved	8
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice.	Chemical Fertilizer
T2 –Recommended Practice.	Bijaamrit for Seed Treatment @ 10ml/kg seed
T3. Recommended Practice.	Biaamrit for Seed Treatment @ 10ml/kg seed + Spraying of Jivaamrit 5l/ha at 30 & 45 DAS
Date of sowing:	Oct 2024
Date of harvesting:	March 2024
Source of technology:	NCOF, Gaziabad
Characteristics of technology:	Eco-friendly and Economic way of Nutrient management
Name of Crop/Enterprises:	Chickpea
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Information about Extension OFT:
OFT 1:

Title	Assessment of organic farming in Soybean by the Farmers of Guna District
Season & Year	2024-25
Problem identified	Lower income due to poor quality and high cost cultivation of Soybean
Thematic Area	Organic Farming
Farming situation	Irrigated
Name of Technology Intervention under study	Organic Farming
Farmers Practice	Conventional Farming
No. of replication (Farmers)	08

Results / findings

Performance indicators/ parameters	Unit/ details
Age, Education, Use of Mass media, Cost of Cultivation, Organic input, Knowledge level, recommended practices, Problems	

OFT 2:

Title	Assessment of Natural farming effect in Wheat production
Season & Year	Rabi 2024-25 (RVSKVV 2022)
Problem identified	Due to continuous and imbalance use of chemical fertilizer soil fertility is

	advisory affected. As a result low yield is obtained with poor quality
Thematic Area	Natural Farming
Farming situation	Irrigated
Name of Technology Intervention under study	Production of Wheat via different component of Natural Farming Material for preparation of Jeevamrit and Beejamrit
Farmers Practice	Traditional Wheat production practice
No. of replication (Farmers)	05

.
Results / findings

Performance indicators/ parameters	Unit/ details
Yield	q/ha

Information about Home Science OFT:
OFT 1:

Title of on.farm trial:	Assessment of Sweet Corn Variety Sugar 75
Year/Season:	Kharif 2024
Problem diagnosis:	Low income due to desi maize (Area 14550 ha. Area affected 14500 ha, Productivity 1550 kg/ha)
Thematic area: (Focus area in DFI and nutri smart initiatives)	Income Generation
No of trials:	08
No. of farmers/farm women involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice.	JM 12
T2 –Recommended Practice.	HQPM 1 and Sweet Corn Suger 75
Source of technology:	JNKVV
Characteristics of technology:	Income Generation
Name of Crop/Enterprises:	Sweet Corn
Farming situation:	Rainfed
Date of sowing:	15 June 2024
Date of harvesting:	30 Sep 2024
Recommendations for Farmers	.
Recommendations for Deptt. Personnel	.
Feedback	.

OFT 2:

Title of on.farm trial:	Assessment of performance on efficiency of farm woman during harvesting of okra by Bhindi plucker.
Year/Season:	Kharif 2024
Problem diagnosis:	Bhindi picking is mostly done by woman ,while picking they injure their hand Due to injury they suffer during cooking, washing besides exposure to pesticide and allergy.
Thematic area: (Focus area in DFI and nutri smart initiatives)	Drudgery Reduction
No of trials:	08

No. of farmers/farm women involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice.	No use of improved implement for plucking of root stock of Bhindi after harvest of crop
T2 –Recommended Practice.	Drudgery reduction through improved farm implement Bhindi plucker
Source of technology:	CIAE Bhopal
Characteristics of technology:	Easy to handle
Name of Crop/Enterprises:	Bhindi plucker
Farming situation:	.
Date of sowing:	.
Date of harvesting:	.
Recommendations for Farmers	Easy to handle and Time Saving
Recommendations for Deptt. Personnel	Easy to handle and Time Saving
Feedback	.

OFT 3:

Title of on.farm trial:	Assessment of Improved Nursery Management in Tomato
Year/Season:	Rabi 2024.25
Problem diagnosis:	Low quality seedling due to improper nursery management
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nursery Management/IFS
No of trials:	08
No. of farmers/farm women involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice.	Flatbed Nursery
T2 –Recommended Practice.	Seedling tray with COCO pit
Source of technology:	JNKVV
Characteristics of technology:	Less Mortality %
Name of Crop/Enterprises:	Nursery Management/IFS
Farming situation:	.
Date of sowing:	.
Date of harvesting:	.
Recommendations for Farmers	Less Mortality %
Recommendations for Deptt. Personnel	Less Mortality %
Feedback	.

OFT 4:

Title of on.farm trial:	Assessment of Serrated sickle for harvesting
Year/Season:	RABi 2024.25
Problem diagnosis:	Lack of awareness
Thematic area: (Focus area in DFI and nutri smart initiatives)	drudgery reduction
No of trials:	08
No. of farmers/farm women involved	08
Type of OFT (Assessment/ Refinement):	Assessment

Details of technology selected for assessment:	
T1 – Farmers Practice.	Use of local sickle
T2 –Recommended Practice.	Serrated sickle
Source of technology:	CIAE Bhopal
Characteristics of technology:	Ergonomic, drudgery reducer] enhanced work efficiency
Name of Crop/Enterprises:	Drudgery reduction
Farming situation:	.
Date of sowing:	.
Date of harvesting:	.
Recommendations for Farmers	.
Recommendations for Deptt. Personnel	.
Feedback	.

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
1	Soybean	VE	Demonstration of medium duration Soybean Variety RVS 24	Seed	Kharif 2024	3.2	08	No. of Branches/plant, No. of pods/plant, yield q/ha
2	Paddy	IWM	Demonstration of bispyribac sodium for weed management in Paddy	Weedicide	Kharif 2024	3.2	08	No. of weeds/sqm, yield q/ha
3	Soybean	VE	Demonstration of new high yielding variety of Soybean RVS 18	Seed	Kharif 2024	3.2	08	No. of Branches/plant, No. of pods/plant, yield q/ha,
4	Millet	Crop diversification	Demonstration of small millet crop Kodo variety JK 155 in Guna district	Seed	Kharif 2024	3.2	08	No. of Branches/plant, yield q/ha
5	African Marigold	Income Generation	Demonstration of High yielding Marigold Variety African Marigold FP : Local Genda RP : African Marigold	Seed	Kharif 2024	1.0	10	Yield q/ha
6	Pea	Income Generation and Crop diversification	Demonstration on vegetable pea (Hybrid) FP : Use of local seed RP : Hybrid vegetable pea seed	Seed	Kharif 2024	1.0	10	Yield q/ha
7	Whats App	ICT	Study on different extension methods (Whats app & Telegram) for dissemination of Agricultural Technology	Information	Kharif and Rabi 2024	.	125	Adoption level Percentage

8	Soybean	CFLD	Demonstration of Soybean variety JS 20-69	Seed	Kharif 2024	10	25	No. of Branches/plant, No. of pods/plant, yield q/ha
9	Blackgram	CFLD	Demonstration of Blackgram Variety variety PU 1	Seed	Kharif 2024	10	25	No. of Branches/plant, No. of pods/plant, yield q/ha
10	Mustard	CFLD	Demonstration of Mustard variety RH 725/RVM 1	Seed	Rabi 2024-25	10	25	No. of Branches/plant, No. of pods/plant, yield q/ha
11	Chickpea	CFLD	Demonstration of Chickpea Variety variety RVG 204	Seed	Rabi 2024-25	10	25	No. of Branches/plant, No. of pods/plant, yield q/ha
12	Maize.Wheat Cropping System	ICT	Dissemination of agricultural information through mobile messaging for enhancing the farmer income in existing situation through Whatsapp	Advisory	Kharif .Rabi 2024-2025	.	120	Need and Time based information , Understanding of the messages, applicability of the messages, Feedback .
13	Wheat	VE	Demonstration of limited irrigation and Heat tolerant variety of Wheat Raj 4238	Seed	Rabi 2024-25	3.2	08	No. of Tillers/plant, No. of pods/plant, yield q/ha
14	Chickpea	VE	Demonstration of chickpea variety RVG 204	Seed	Rabi 2024-25	3.2	08	No. of Branches/plant, No. of pods/plant, yield q/ha
15	Wheat	IDM	Demonstration of Clodinofox + Metsulfuron Methy for Weed Management in Wheat	Pesticide	Rabi 2024-25	3.2	08	No. of Tillers/plant, No. of pods/plant, yield q/ha
16	Mustard	CFLD (VE)	Demonstration of Mustard variety RS 725 under CFLD	Seed	Rabi 2024-25	20	50	No. of pods/plant, yield q/ha
17	Chickpea	CFLD (VE)	Demonstration of Chickpea RVG 205 under CFLD	Seed	Rabi 2024-25	20	50	No. of pods/plant, yield q/ha
18	Vermicompost production	Organic farming & Income Generation	Demonstration of Vermicompost production FP : Low compost production (10.15 q/pit/year) RP : Vermicompost production (20-25 q/pit/year)	Vermi Beg	Rabi 2024-25	10 unit	10	Production per unit (Q/No
19	Nutritional Garden	Nutritional Security	Demonstration of Nutritional Garden for Nutritional security of farm women FP : Backyard garden RP : Nutritional garden on seasonal	Vegetable Seed Kit	Rabi 2024-25	1.0	10	Per capita Consumption gm/ day, Increase in Weight (Kg)

			vegetables & fruits

Details of Electronic Media to be Produced

S. No.	Type of media (CD / VCD / DVD / Audio.Cassette)	Title of the programme	Number
1	DVD	Method Demonstration . Vermicompost	01
2	DVD	Success Story . Crop Production	01
3	DVD	Success Story . Natural Farming	01
4	DVD	Success Story . Millets Production	01

Success stories/Case studies identified for development as a case: 04 no.)

Indicate the specific training need analysis tools/methodology followed for(Viz PRA, AES, line dept, ex trainees, interface,)

S. No.	Training	Need analysis tools/methodology followed
1	Identification of courses for farmers/farm women	ex trainees Meet
2	Rural Youth	ex trainees Meet
3	In.service personnel	line dept
4	methodology for identifying OFTs/FLDs	ex trainees Meet
5	Matrix ranking	.

Field activities

Name of villages identified for adoption with block name:

S.No.	Name of Village	Name of Block	Distance of village from KVK (Km)
1	Husainpur	Aron	25
2	Tunk Paroruya	Aron	28
3	Kherkhedi	Aron	20

4	Chainpura	Radhogarh	45
5	Bhulay	Radhogarh	60
6	Khamkheda	Aron	8
7	Sarkho	Guna	24
8	Kushwan	Aron	12

1. No. of farm families selected per village :
2. No. of survey/PRA to be conducted:

3.11. Activities of Soil and Water Testing Laboratory

Year of establishment: 2005

List of equipments purchased:

Sl. No.	Name of the Equipment	Qty.	Condition
1	.	.	.
2	.	.	.
3	.	.	.

Details of samples analyzed so far:

Details	No. of Samples	No. of Farmers (SHC)	No. of Villages	Amount realized
Soil Samples	250	250	10	Convergence with NFL
Water Samples	.	.	.	.
Total	250	250	10	Convergence with NFL

LINKAGES

Functional linkage with different organizations

Planning for Crop Cafeteria

Total Area of Crop cafeteria: 576 Sq m (Kharif 2024) and 1710 sqm (Rabi 2024-25)

Crop	Season	Variety	Particulars /details	Area (Sq m)
Soybean	Kharif 2024	JS 20.34, JS 20.69, RVS 24, RVS 18, JS 20.29, JS 95.60, JS 20.94, JS 20.116, RVS 76, RVS 2001.4	Plot Size (4X3 m) each, No. variety.10	120
Blackgram	Kharif 2024	T9, JS 4, NUM 7, RBU 38, RBU 108, JU 86, PU 35, PU 3, LBG 202, Shekhar 2, BU 3, Azad 3	Plot Size (4X3 m) each, No. variety.12	144
Greengram	Kharif 2024	TM 37, K 851, JTM 3, PDM 139, Pusa 16, Hum 1, MI 751, JML 668	Plot Size (4X3 m) each, No. variety.8	96
Papaya	Kharif 2024	Kodo, Kutki, Ragi, China, Sawa, Fox tail	Plot Size (4X3 m) each, No. variety.3 variety each small millet	216
Wheat	Rabi 2024-25	HI 1605, 1418, 8777, 8713, 8756, 1544, 1531,4472 HD 2932, RVG 4106, MP 120	Plot Size (6X5 m) each, No. variety.12	360
Gram	Rabi 2024-25	JAKI 9118, , JG 16, 130, JGK 23 RVG 202, 203,204,205	Plot Size (6X5 m) each, No. variety. 9	270
Mustard	Rabi 2024-25	RVM 2, Pusa Jagannath PM 25,26, 28, RH 749	Plot Size (6X5 m) each, No. variety.6	180
Coriander	Rabi 2024-25	GCR 9,8,4,2,13, RCR 446, 436,20 JGR 7, JD, DH 5, 246 Pant Haritima	Plot Size (6X5 m) each, No. variety.12	360
Methi	Rabi 2024-25	AFG 2, RMT 36,357	Plot Size (6X5 m) each, No. variety. 03	90
Massor	Rabi 2024-25	JL 639, JL 3, RVL 137, 135,11.6,31, PL 406, 5. JLS1,	Plot Size (6X5 m) each, No. variety.9	270
Alsi	Rabi 2024-25	JL17, SLS 73, 76, Kiran, JTL 23,62	Plot Size (6X5 m) each, No. variety. 06	180

Details of Demonstration Unit at KVK

Demonstration Unit	Particulars /details	Area (Sq m)	Output /Production
Vermicompost Pit	04 units	50m x 13.5m (675 sqm)	500 q
Vermcompost Beg	06 beg		500 q
NADEP unit	03 units	14ft x 4ft x 2.5ft (140 sqft)	15 q
Fodder Technology Park	19.65m x 20.00 m	393 sqm	.
Shadenet House	Vegetable/Seedling Production		.
Dairy Unit	01 Cow (Freezwal Breed)	.	No Production
Goatary	13	.	.
Azola	01 Unit	.	.

Annual Action Plan 2024

KVK: Gwalior

Year of Sanction: 1999

1.1 Name of the Programme Coordinator with phone & mobile No

Name	Telephone / Contact		
	Office	Mobile	Email
Dr. Shailendra Singh kushwah	Krishi Vigyan Kendra	9425442793	shailendrakushwah91@rediffmail.com

1.3 Total land with KVK (in ha): 6.5

S. No.	Item	Area (ha)
1	Under Buildings	1.0
2	Under Demonstration Units	0.5
3	Under Crops	1.0
4	Orchard/Agro-forestry	4.0
5	Others (specify)	-
Total		6.5

1.4 Infrastructural Development:

A) Buildings

S. No.	Name of building	Source of funding	Stage					
			Complete			Incomplete		
			Completion Date	Plinth area (Sq.m)	Expenditure (Rs.)	Starting Date	Plinth area (Sq.m)	Status of construction
1	Administrative Building	ICAR	2002	737.25	15.55 Lakh	-	-	-
2	Farmers Hostel	ICAR	2006	330.00	26.41 lakh	-	-	-
3	Staff Quarters (6)	ICAR	2006	308.94	26.33 lakh	-	-	-
4	Demonstration Units (2)							
5	Fencing							
6	Rain Water harvesting system							
7	Threshing floor							
8	Farm godown							

B) Vehicles

Type of vehicle	Year of purchase	Cost (Rs.)	Total kms. Run	Present status
Tractor (Power Tiller)	2019	274215.00	1440	Serviceable
Motor Cycle 2	2010	47314	94753	serviceable
Bolero(Jeep)	2017	604170	102080	Serviceable
Other (Cycle)	2024	4650.00	-	Serviceable

C) Equipment & AV aids

Name of the equipment	Year of purchase	Cost (Rs.)	Present status
Power Sprayer	2020	78960.00	Serviceable
Knap sack Sprayer	2010	2875.00	Serviceable
LCD Projector, Sound System, LCD Screen,	2017	90950.00	Serviceable

1.5.(A). Details of SAC meeting to be conducted in the year

Sl. No.	Tentative Date
1	15.06.2024
2	30.09.2024

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 1	Crop +Animal Husbandry, Vegetables + Floriculture / Dairying
2	AES – 2	Crop +Animal Husbandry, Vegetables + Floriculture / Dairying, Goatry

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	ACZ – VII (Gird) (AES – 1)	- Soil type – Sandy loam - Major cropping pattern in irrigated area: Pearlmillet-Mustard, pearl millet-Wheat, sorghum-Wheat - Major cropping pattern in rainfed area: Pigeon pea + green gram/ black gram/ Sesamum-Mustard
2	ACZ – VII (Gird) (AES – 2)	- Soil Type – Sandy clay loam, fine soil - Major cropping pattern in irrigated area Rice-Wheat, Rice—Chickpea, Mustard, pearl millet, sorghum, sugarcane - Major cropping pattern in rainfed area: Fallow-Mustard, Pearlmillet-Mustard / Pearlmillet-Chickpea

**SWOT Analysis of each Agro-Ecological Situations of district
AES-1 (Madhya Bharat Plateau)**

Strength	Weakness	Opportunities	Threats
- Well-connected district to Capital of the country and other important cities via railways, airways and roadways and also Road Connectivity is excellent to develop the entrepreneurship within the district - The variation in the physiography, soil, agro-climatic situation is favorable for growing variety of crops like cereals, fruits, vegetables, oilseeds, flowers, tubers etc. in the district.	- Erratic rain pattern is bottle neck for the production of most of the rainfed crops of the district - Low ground water level	- opportunity to harvest rain water and to use for irrigation process - Improve credit system through well establishes banking network	- Erratic rain and alternate drought like prevent to increase the cropping intensity. - Production glut affect the farmers economy

AES-2 (Bundelkhand uplands)

Strength	Weakness	Opportunities	Threats
- The well set up of extension network in agriculture and allied sectors may help in disseminating improved production technologies - Sufficient feed preparation in the district to utilize the locally available feed material	- High pest and disease incidence in most of the crops due to high humidity - Absence of quality breeds of animals, all the animals are nondescript types resulting in poor animal productivity	- Yield gap can be reduced by adequate extension support - Development of entrepreneurship in the field of animal product	- The highly productive breeds are vulnerable to many diseases due to high humid environment - To change the cropping patterns farmers may think loss the productivity by adopting new cropping pattern

Land Use Pattern

Particulars	Area “000 ha”
Total Geographical area	456.5
Forest	111.1
Waste Land	33.3
Other than cultivated area	50.6
Cultivable waste and alkaline land	23.2
Pastures	13.9
Bushes	-
Current Fallow	19.0

Other Fallow	9.5
Agricultural Land	195700
Area Sown	195700
Kharif	67680
Rabi	158528
Zaid	8000
Cropping Intensity	142%

Irrigated Area with Different Sources:

S. No.	Description	Area ('000ha)
1	Canal	77.0
2	Well	43.1
3	Tube well	11.6
4	Ponds	0.2
5	Others	

Soil types

S. No.	Soil type	Characteristics	Area "000 ha"
1	Deep Soil	Medium WHC, Medium Porosity, Soil PH ranges neutral to alkaline which may exceed. colour varies from yellowish brown to greyish/ dark brown	277.6 (60.94 %)
2	Medium Deep Soils	High porosity, Low WHC, Loose and friable, poor in N and OM, medium in P ₂ O ₅ and fairly rich in K ₂ O	66.40 (14.61 %)
3	Shallow Soils	Low porosity, Medium to high WHC, soil pH ranges from 7.86 to 10.5	111.20 (24.45%)

Note: Figure. In parenthesis denotes the percentage of total area.

Area, Production and Productivity of major crops cultivated in the district

S. No	Crop	Area (ha)	Production (Qt.)	Productivity (q/ha)
1	Paddy	24200	629000	27.39
2	Sesame	18400	91000	4.93
3	Pearl Millet	8600	187000	21.88
4	Soybean	8200	160000	19.43
5	Black Gram	5100	20000	3.99
6	Wheat	101400	2657000	27.29
7	Mustard	42700	425000	9.96
8	Gram	19300	233000	12.10

Weather data (Jan, 2023- Dec., 2023)

Month /Year	Rainfall (mm)	Temperature (°C)	
		Maximum	Minimum
Jan. 2023		20.00	07.80
Feb. 2023		25.50	10.77
Mar. 2023		33.06	17.50
Apr. 2023		41.50	24.00
May. 2023		42.50	25.00
Jun. 2023		42.00	24.00
July. 2023		34.00	23.00
Aug. 2023		31.50	22.00
Sept. 2023		31.00	21.50
Oct. 2023		30.00	21.00
Nov. 2023		29.50	21.00
Dec. 2023		23.20	15.50

Production and productivity of livestock, Poultry, Fisheries etc. in the district

Category	Population	Production	Productivity
Cattle			
<i>Crossbred/ Indigenous</i>	80393	43626.93 tons	7.50 lit.
Buffalo	103838	161987.28 tons	6.50 lit.
Sheep			
<i>Crossbred/ Indigenous</i>	19280	 MT wool	 kg
Goats	115698	 MT	 kg
Pigs <i>Crossbred/ Indigenous</i>		---	---
Rabbits			
Poultry			
Hens		 Lakh eggs	 eggs/ bird/yr
Turkey and others			
Category	Area	Production	Productivity
Fish	 (ha)	q/ month	 q/ha.

Details of Operational area / Villages (2023)

Sl. No.	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Bhitarwar	Bhitarwar	Amrol	Paddy & Wheat	Insect/ pest attack	To create awareness regarding IPM and INM To make seed available of major crops
2	Bhitarwar	Bhitarwar	Kachhaua	Paddy & Wheat	Insect/ pest attack	To create awareness regarding IPM and INM To make seed available of major crops
3	Gwalior	Ghatigaon	Kheria Kachhai	Pearl millet, mustard, wheat, sesame, green gram/ black gram	Very low ground water level	To make awareness on water harvesting To make seed & technology available for drought area
4	Gwalior	Ghatigaon	Kushrajpur	Pearl millet, mustard, wheat, sesame, green gram/ black gram	Very low ground water level	To make awareness on water harvesting To make seed & technology available for drought area

5	Dabra	Dabra	Ladwaia	Paddy & Wheat	Insect/ pest attack	To create awareness regarding IPM and INM To make seed available of major crops
6	Bhitarwar	Bhitarwar	Banwar	Paddy & Wheat	Insect/ pest attack	To create awareness regarding IPM and INM 1) To make seed available of major crops
7	Bhitarwar	Bhitarwar	Himmatgarh	Paddy & Wheat	Insect/ pest attack	- To create awareness regarding IPM and INM - To make seed available of major crops
8	Bhitarwar	Bhitarwar	Nikodi	Paddy & Wheat	Insect/ pest attack	- To create awareness regarding IPM and INM - To make seed available of major crops
9	Bhitarwar	Bhitarwar	Mauchh	Paddy & Wheat	Insect/ pest attack	To create awareness regarding IPM and INM 1) To make seed available of major crops
10	Bhitarwar	Bhitarwar	Rarua	Paddy & Wheat	Insect/ pest attack	- To create awareness regarding IPM and INM - To make

						seed available of major crops

Priority / Thrust areas

S. No.	Particulars
1.	Increase cropping intensity
2.	Awareness regarding IPM and INM
3.	Awareness about post-harvest losses and storage
4.	Quality Seed Availability to growers
5.	Balance diet and health management of milch animals
6.	Need to develop orchard and cultivation of vegetable, spices and medicinal plants
7.	Trained rural youth for honey production, dairying, poultry, horticulture crops and repair of farm machinery etc.
8.	Soil and Water conservation through water harvesting and other control measures
9.	Vocational trainings for rural youths
10.	Farm mechanization

Details of On Farm Trial (OFT)

OFT-1

Crop / Enterprise	Rice	
Title of on farm trial	Assessment of Chlorantraniliprole 0.4% GR @ 10 kg/ha for the management of stem borer in paddy	
Problem diagnosed	Low yield due to attack of stem borer in paddy	
Farmers' Practices	Injudicious use of insecticide	
Details of technologies selected for assessment	T ₁	Injudicious use of insecticide
	T ₂	Chlorantraniliprole 0.4% GR @ 10 kg/ha
	T ₃	Cartap Hydrochloride 4% G @ 20 kg/ha
Source of technology	ICAR – Expert committee recommendation 2019- 20	
Plot size	0.2 ha. each trial	
No. of farmers	10	
Total cost	8500/-	
Critical input	Chlorantraniliprole @ 0.4% GR 20 kg Cartap Hydrochloride @ 4% G 40 kg	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Stem borer infestation (%), Yield (q/ha), Net return (Rs./ha.), B:C Ratio	

OFT-2

Crop / Enterprise	Sorghum	
Title of on farm trial	Assessment of insecticide with Nimastra for Stem borer management in sorghum	
Problem diagnosed	Low yield due to attack of insect pest	
Farmers' Practices	Injudicious use of insecticide	
Details of technologies selected for assessment	T ₁	Carbofuran 3 G @ 10 kg/ha.
	T ₂	Nimastra @ 500 litre/ha
Source of technology	Natural Farming recommendation 2019	
Plot size	0.2 ha each trial	
No. of farmers	10	
Total cost	7400/-	
Critical input	Carbofuran 3 G 20 kg Nimastra 1000 litre	

Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Stem borer infestation (%), Yield (q/ha), Net return (Rs./ha.), B:C Ratio

OFT-3

Crop / Enterprise	Mustard	
Title of on farm trial	Assessment of Insecticide (Ethofenprox 10 % EC @ 500 ml/ha) for the management sawfly in mustard	
Problem diagnosed	Low yield due to attack of sawfly in mustard	
Farmers' Practices	Use of Dimethoate 30 EC@1.5 L/ha	
Details of technologies selected for assessment	T ₁	Foliar application of Clothianidin 50 % WDG @ 100 gm/ ha.
	T ₂	Foliar spray of Ethofenprox 10 % EC @ 500 ml/ha.
Source of technology	OUAT, ICAR – Expert committee recommendation 2019- 20	
Plot size	0.2 ha. each trial	
No. of farmers	10	
Total cost	7800/-	
Critical input	Foliar application of Clothianidin 50 % WDG 200 gm Foliar spray of Ethofenprox 10 % EC 1000 ml	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Sawfly infestation (%) Yield (q/ha), Net return (Rs./ha.), B:C Ratio	

OFT-4

Crop / Enterprise	Potato	
Title of on farm trial	Assessment of Insecticide spiromesifen 240 SC @ 500 ml/ha for the management of sucking pest in potato	
Problem diagnosed	Low yield due to insect attack	
Farmers' Practices	Injudicious use of insecticides	
Details of technologies selected for assessment	T ₁	Spiromesifen 240 SC @ 500 ml/ha
	T ₂	Nimastra @ 500 litre/ha
Source of technology	CIBRC/OUAT, 2019-20	
Plot size	0.2 each trial	
No. of farmers	10	
Total cost	8100/-	
Critical input	Spiromesifen 240 SC :1000 ml Nimastra : 1000 litre	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Infestation (%) Yield (q/ha), Net return (Rs./ha.), B:C Ratio	

OFT-5

Crop / Enterprise	Okra	
Title of on farm trial	Assessment of improved varieties of Okra	
Problem diagnosed	Low yield due to local and poor variety	
Farmers' Practices	farmers using their own seed	
Details of technologies selected for assessment	T ₁	farmers using their own seed
	T ₂	Use of Kashi Chaman
	T ₃	Use of Kashi Kranti
Source of technology	IIVR Varanasi	
Plot size	0.1 ha. each trial	
No. of farmers	10	
Total cost	4700/-	
Critical input	Okra Seed	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic	No. of Pods/ plant Yield (q/ha) Net Return (Rs./ha.), B:C Ratio	

(iv) Social – Employment generation	

OFT-6

Crop / Enterprise	Pumpkin	
Title of on farm trial	Assessment of improved varieties of Pumpkin	
Problem diagnosed	Poor yield due to lack of improved variety	
Farmers' Practices	farmers using their own seed	
Details of technologies selected for assessment	T ₁	farmers using their own seed
	T ₂	Improved variety kashi Harit
	T ₃	Improved variety Kashi Shishir
Source of technology	IIVR Varanasi	
Plot size	0.1 ha. each trial	
No. of farmers	10	
Total cost	4700/-	
Critical input	kashi Harit and Kashi Shishir	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	No. of fruits/ plant, Yield (q/ha) Net Return (Rs./ha.), B:C Ratio	

OFT-7

Crop / Enterprise	Onion	
Title of on farm trial	Assessment of balance nutrition in Rabi Onion	
Problem diagnosed	Poor yield due to imbalance dose of Nutrition	
Farmers' Practices	Use of imbalance dose of Nutrition	
Details of technologies selected for assessment	T ₁	Use of imbalance dose of Nutrition (Urea & DAP)
	T ₂	Use of Recommended dose of Fertilizer -NPKS)
	T ₃	Use of RDF + Biostimulent(Sagarika-IFFCO)
Source of technology	IFFCO 2019	
Plot size	0.1 ha. each trial	
No. of farmers	10	
Total cost	4400/-	
Critical input	Recommended dose of Fertilizer and Biostimulent	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Leaf length (cm) Bulb Yield (q/ha) Net Return (Rs./ha.), B:C Ratio	

OFT-8

Crop / Enterprise	Annual Chrysanthemum	
Title of on farm trial	Assessment of GA3 as foliar application for higher growth and flowers stimulation in Chrysanthemum	
Problem diagnosed	Small Size and poor yield of the flower due to loose petals	
Farmers' Practices	No Use of Plant Growth Regulator	
Details of technologies selected for assessment	T ₁	No Use of Plant Growth Regulator
	T ₂	Use of GA3 @ 100 PPM GA3 application @ 15 & 30 DAT (OP/Hybrid variety)
	T ₃	Use of GA3 @ 150 PPM GA3 application @ 15& 30 DAT (OP/Hybrid variety)
Source of technology	IARI 2020	
Plot size	1.0 ha. each trial	
No. of farmers	10	
Total cost	5800	
Critical input	Gibberellic Acid	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic	No. of flowers/ plant Flowers Yield (q/ha) Net Return (Rs./ha.), B:C Ratio	

(iv) Social – Employment generation	

OFT-9

Crop / Enterprise	Sattu laddu	
Title of on farm trial	Assessment of sattu laddu a Iron rich supplement for adolescent girls	
Problem diagnosed	low intake of iron causing Anemia problem in adolescent girls.	
Farmers' Practices	Imbalance diet	
Details of technologies selected for assessment	T ₁	Imbalance diet
	T ₂	Sattu laddu(roasted chana +aonla powder+coconut oil+ Jaggery)
	T ₃	-
Source of technology	CIAE, Bhopal (2013)	
Plot size	-	
No. of farmers	10	
Total cost	Rs. 12000/-	
Critical input	Sattu laddu	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Haemoglobin ,Height (cm) and weight (kg)	

OFT-10

Crop / Enterprise	Multigrain flour	
Title of on farm trial	Assessment of impact of supplementation of multi grain flour on mall nutrition status of children below 5 years age	
Problem diagnosed	Children are generally weak due to intake of low nutrient food	
Farmers' Practices	Use of wheat flour for making of chapati	
Details of technologies selected for assessment	T ₁	Use of wheat flour for making of chapati
	T ₂	Use of multigrain flour for making of chapati
	T ₃	-
Source of technology	NIN Hyderabad	
Plot Size	-	
No. of farmers	10	
Total cost	Rs. 5000/-	
Critical input	Multigrain flour	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Height (cm) and weight (kg)	

OFT-11

Crop / Enterprise	Aonla	
Title of on farm trial	Assessment of role of value addition of aonla income generation	
Problem diagnosed	Low income of farm women due to excess production of aonla	
Farmers' Practices	No value addition of Aonla	
Details of technologies selected for assessment	T ₁	No value addition of Aonla
	T ₂	Aonla barfi (Aonla + Cardamom + Sugar)
	T ₃	-
Source of technology	JNKVV, Jabalpur	
Plot Size	-	
No. of farmers	10	
Total cost	Rs. 10000/-	
Critical input	Aonla + Cardamom + Sugar	
Performance indicators:	Gross return(Rs.) ,net return (Rs.) and B:C ratio	

OFT-12

Crop / Enterprise	Millets	
Title of on farm trial	Assessment of value addition of pearl millet by making bajra laddu	
Problem diagnosed	Low income of farm women due to no value addition of millet	

Farmers' Practices	No value addition	
Details of technologies selected for assessment	T ₁	No value addition
	T ₂	Bajra Laddu (Bajra + Sesame + Groundnut + jaggery)
	T ₃	-
Source of technology	ICAR Project on minor millets	
Plot size		
No. of farmers	10	
Total cost	Rs. 6000/-	
Critical input	Bajra Laddu	
Performance indicators: (v) Growth and Yield attributes (vi) Technical- yield (q/ ha) (vii) Economic (viii) Social – Employment generation	Gross return(Rs.) ,net return (Rs.)and B:C ratio	

OFT-13

Crop / Enterprise	Rice	
Title of on farm trial	Assessment of fungicide for the management of false smut of Rice	
Problem diagnosed	Low yield due to damage of grain due to false smut disease	
Farmers' Practices	No use of Plant protection chemicals	
Details of technologies selected for assessment	T ₁	No use of fungicide
	T ₂	Copper hydroxide 77% WP @ 2.5gm/li(2kg/750li)
	T ₃	Picoxystrobin 7.05% + Propiconazole 11.7% SC@2ml/li (1li/500ml)
Source of technology	CIAB 2023	
Plot size	0.2 ha. per trial	
No. of farmers	10	
Total cost	Rs. 7000/-	
Critical input	Copper hydroxide 77% WP, Picoxystrobin 7.05% + Propiconazole 11.7% SC	
Performance indicators: (ix)Growth and Yield attributes (x) Technical- yield (q/ ha) (xi)Economic (xii)Social – Employment generation	Disease incidence(%), Net return(Rs/ha), B:C ratio	

OFT-14

Crop / Enterprise	Pearl Millet	
Title of on farm trial	Assessment of organic fungicide for management of leaf spot of pearl millet	
Problem diagnosed	Occurrence of leaf spot affecting both forage and grain production	
Farmers' Practices	No use of Plant Protection chemical	
Details of technologies selected for assessment	T ₁	No use of Plant Protection chemical
	T ₂	Butter Milk @ 3 li./100 li.
	T ₃	Propiconazole 25 EC @ 100ml/100 li
Source of technology	CIB (2020) Kurukshetra	
Plot size	0.2 ha. per trial	
No. of farmers	10	
Total cost	Rs. 4000/-	
Critical input	Propiconazole 25 EC	
Performance indicators: (xiii) Growth and Yield attributes (xiv) Technical- yield (q/ ha) (xv) Economic (xvi) Social – Employment generation	Disease severity(%), Net return(Rs/ha), B:C ratio	

OFT-15

Crop / Enterprise	Mustard	
Title of on farm trial	Assessment of Stem Rot management in mustard	
Problem diagnosed	Low yield due to Stem damage which leads to early maturity or drying of plants	
Farmers' Practices	No use of plant protection	
Details of technologies selected for assessment	T ₁	No use of plant protection chemicals
	T ₂	Seed treatment with <i>T.hariz anum</i> @ 10g/kg seed and application of

		Propiconazole 25 EC@ 500ml/ha at 55-60DAS
	T ₃	Foliar application of Propiconazole 25 EC@ 500ml/ha at 55-60DAS
Source of technology	NRCRM, Bhartpur	
Plot size	0.2 ha. per trial	
No. of farmers	10	
Total cost	Rs 5000/-	
Critical input	<i>T.harzianum</i> , Propiconazole 25EC	
Performance indicators: (xvii) Growth and Yield attributes (xviii) Technical- yield (q/ ha) (xix) Economic (xx) Social – Employment generation	Disease incidence(%), Net return(Rs/ha), B:C ratio	

OFT-16

Crop / Enterprise	Chilli
Title of on farm trial	Assessment of management of anthracnose of chilli
Problem diagnosed	Low yield and poor quality chilli due to infection on plant parts and die back of branches
Farmers' Practices	No use of plant protection
Details of technologies selected for assessment	T1: No use of plant protection chemicals T2: Application of Buttermilk@ 1ml/li (15li/ha/500li)and Jeewamrit @100ml/li(50 li/ha) T3: Application of Azoxystrobin 18.2% + Difenoconazole 11.4% w/w SC@1ml/li
Source of technology	CIBRC 2023
Plot size	1000m ²
No. of farmers	10
Total cost	5000
Critical input	Azoxystrobin 18.2% + Difenoconazole 11.4% w/w SC
Performance indicators: (xxi) Growth and Yield attributes (xxii) Technical- yield (q/ ha) (xxiii) Economic (xxiv) Social – Employment generation	Disease severity(%), Net return(Rs/ha), B:C ratio

OFT-17

Crop / Enterprise	Tree + Crop (Kharif)
Title of on farm trial	Analysis of agroforestry system having <i>Guava</i> on bunds at a spacing of 5x 5 m with crop.
Problem diagnosed	There is no agroforestry system
Farmers' Practices	
Details of technologies selected for assessment	T1: No use of Agroforestry components- Only crops T2: Only Trees on bunds. T3: Tree + Crop
Source of technology	IGFRI, Jhasi 2014
Plot size	0.1 ha. per trial
No. of farmers	05
Total cost	Rs. 5000/-
Critical input	-
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Tree growth parameter (Height, Diameter, No of branches), Fruit Size, Fruit Weight crop growth parameters, crop yield, Net return(Rs/ha), B:C ratio

OFT-18

Crop / Enterprise	Tree + Crop (Kharif)
Title of on farm trial	Comparative studies of natural farming components, organic farming components

	and Chemical fertilizers on Guava trees.
Problem diagnosed	There is no agroforestry system
Farmers' Practices	No use of crop with trees
Details of technologies selected for assessment	T1: No use of fertilizers. T2: Application of Natural farming components on tree + crop. T3: Use of Chemical fertilizers on tree + Crop
Source of technology	Kurushektra, 2015
Plot size	0.1 ha. per trial
No. of farmers	05
Total cost	Rs. 5000/-
Critical input	-
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Tree growth parameter (Height, Diameter, No of branches), Fruit Size, Fruit Weight, crop growth parameters, crop yield, Net return(Rs/ha), B:C ratio

OFT-19

Crop / Enterprise	Tree + Crop (Rabi)
Title of on farm trial	Comparative studies of natural farming components, organic farming components and Chemical fertilizers on Guava trees.
Problem diagnosed	There is no agroforestry system
Farmers' Practices	No use of crop with trees
Details of technologies selected for assessment	T1: No use of fertilizers. T2: Application of Natural farming components on tree + crop. T3: Use of Chemical fertilizers on tree + Crop
Source of technology	Kurushektra, 2015
Plot size	0.1 ha. per trial
No. of farmers	05
Total cost	Rs. 5000/-
Critical input	-
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Tree growth parameter (Height, Diameter, No of branches), Fruit Size, Fruit Weight, crop growth parameters, crop yield, Net return(Rs/ha), B:C ratio

OFT-20

Crop / Enterprise	Tree + Crop (Rabi)
Title of on farm trial	Analysis of agroforestry system having Guava on bunds at a spacing of 5x 5 m with crop.
Problem diagnosed	There is no agroforestry system
Farmers' Practices	
Details of technologies selected for assessment	T1: No use of Agroforestry components- Only crops T2: Only Trees on bunds. T3: Tree + Crop
Source of technology	IGFRI, Jhasi 2014
Plot size	0.1 ha. per trial
No. of farmers	05
Total cost	Rs. 5000/-
Critical input	-
Performance indicators: (i) Growth and Yield attributes (v) Technical- yield (q/ ha) (vi) Economic (vii) Social – Employment generation	Tree growth parameter (Height, Diameter, No of branches), Fruit Size, Fruit Weight , crop growth parameters, crop yield, Net return(Rs/ha), B:C ratio

Animal Science

OFT -1

1	Enterprise	LPM (Buffalo)

2	Title of on-farm trial	Assessment of Calcium with Vitamin AD3 for milk production in dairy Buffalo.
3	Problem diagnosed	Low milk yields due to Calcium and Vitamin deficiency After Parturition
4	Farming situation	Organized
5	Production system and thematic area	LPM
6	Farmers' practices	No use of Calcium Suspension with Vitamins
7	Details of technologies selected for assessment/refinement Treatments	T ₁ : No use of Calcium Suspension with Vitamins T ₂ : Regular intake of Calcium and Vitamins with feed @ 100 ml per animal per day
8	Source of technology	NDRI 2017
9	No. of animals	10
10	No. of farmers	10
11	Critical input	Liquid Calcium with Vitamin AD3
12	Cost of input	Rs. 12500/-
13	Total cost	Rs. 25000/-
14	Performance indicators Observation to be recorded Daily Milk yield (L) Economics : B: C ratio Social: Farmers reaction & Feedback	Milk yield/ animal/day (litre), Gross return (Rs./ha), net return (Rs./ha) , BC ratio

OFT -2

1	Enterprise	Poultry
2	Title of on-farm trial	Assessment of Supplementary Azolla Feeding in backyard poultry.
3	Problem diagnosed	High feeding cost
4	Farming situation	Backyard Poultry Farming
5	Production system and thematic area	Poultry Management
6	Farmers' practices	No supplementation of Azolla
7	Details of technologies selected for assessment/refinement Treatments	T ₁ : No supplementation of Azolla T ₂ : Supplementary 100 gm Azolla per birds Feeding in backyard poultry.
8	Source of technology	CGKV, Durg
9	No. of animals	10
10	No. of farmers	10
11	Critical input	1.5 kg Azolla
12	Cost of input	Rs. 1500/-
13	Total cost	Rs. 15000/-
14	Performance indicators Observation to be recorded Body Weight Gain Economics : B: C ratio Social: Farmers reaction & Feedback	Body weight gain (kg) Gross return (Rs./ha), net return (Rs./ha), B:C ratio

OFT -3

1	Enterprise	Poultry
2	Title of on-farm trial	Assessment of vitamins supplements in Backyard poultry.
3	Problem diagnosed	Higher mortality rate in poultry during summer due to heat stress
4	Farming situation	Backyard Poultry Farming
5	Production system and thematic area	Poultry Management
6	Farmers' practices	No supplementation of vitamins
7	Details of technologies selected for assessment/refinement Treatments	T ₁ : No supplementation of vitamins T ₂ : Daily supplementation of Multivitamins (Vit.A 12000 IU,Vit.D- 6000IU, Vit.E-

		48mg and Vit.B12-20mcg) in drinking water to birds (1ml per day for 20 birds up to three months
8	Source of technology	CARI, 2016
9	No. of animals	10
10	No. of farmers	10
11	Critical input	Liquid Vitamin supplement
12	Cost of input	Rs. 2000/-
13	Total cost	Rs. 17000/-
14	Performance indicators Observation to be recorded Body Weight Gain Economics : B: C ratio Social: Farmers reaction & Feedback	Body weight gain (kg) Gross return (Rs.), net return(Rs.), B:C ratio

OFT -4

1	Enterprise	Buffalo
2	Title of on-farm trial	Assessment of ITK for the Treatment of FMD wound in animals.
3	Problem diagnosed	High incidence of FMD in animals
4	Farming situation	Unorganized
5	Production system and thematic area	LPM
6	Farmers' practices	Wound of FMD not properly Treated
7	Details of technologies selected for assessment/refinement Treatments	T1: Wound of FMD not properly Treated T2: Hooves are washed with hot water then 2 pieces of camphor and 10 ml coconut oil mixed together are applied to the wounds, which act as an antiseptic than Paste of roasted brinjal and pure ghee is scrubbed on the tongue to clean as well as treat the lesion
8	Source of technology	Veterinary College, BAU 2018
9	No. of animals	10
10	No. of farmers	10
11	Critical input	Camphor and coconut oil
12	Cost of input	Rs.1000/-
13	Total cost	Rs. 16000/-
14	Performance indicators Observation to be recorded FMD Wound Healing Daily Milk yield (L) Economics : B: C ratio Social: Farmers reaction & Feedback	FMD Wound Healing ,Wound healing recovery ,Milk yield/ animal/day, Gross return (Rs.), net return(Rs.), B:C ratio

Detailed Information about OFT:

OFT-1

Name of Discipline	Entomology -1
Title of on-farm trial:	Assessment of Chlorantraniliprole 0.4% GR @ 10 kg/ha for the management of stem borer in paddy
Year/Season:	Kharif-2024
Farming situation:	Irrigated, Sandy loam soil.
Problem diagnosis:	Low yield due to attack of stem borer in paddy
Thematic area:	IPM
No of trials:	10
No. of farmers involved	10

Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Injudicious use of insecticide
T2 –Recommended Practice-	Chlorantraniliprole 0.4% GR @ 10 kg/ha
T3- Recommended Practice-	Cartap Hydrochloride 4% G @ 20 kg/ha
Date of sowing:	-
Date of harvesting:	-
Source of technology:	ICAR – Expert committee recommendation 2019- 20
Characteristics of technology:	It is a broad spectrum insecticide
Name of Crop/Enterprises:	Rice
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-2

Name of Discipline	Entomology-2
Title of on-farm trial:	Assessment of insect pest management in sorghum
Year/Season:	Kharif-2024
Farming situation:	Irrigated, Sandy loam soil.
Problem diagnosis:	Low yield due to attack of insect pest
Thematic area:	IPM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Injudicious use of insecticide
T2 –Recommended Practice-	Carbofuran 3 G @ 10 kg/ha.
T3- Recommended Practice-	Nimastra @ 500 litre/ha
Date of sowing:	-
Date of harvesting:	-
Source of technology:	Natural Farming recommendation 2019
Characteristics of technology:	1. It is a systemic, stomach and contact having broad spectrum which gives longer duration of control. 2. It is a Environment friendly and natural practice
Name of Crop/Enterprises:	Rice
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-3

Name of Discipline	Entomology-3
Title of on-farm trial:	Assessment of Insecticide (Ethofenprox 10 % EC @ 500 ml/ha) for the management sawfly in mustard
Year/Season:	Rabi-2024-25
Farming situation:	-
Problem diagnosis:	Low yield due to attack of sawfly in mustard
Thematic area:	IPM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment

Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of Dimethoate 30 <u>EC@1.5</u> L/ha
T2 –Recommended Practice-	Foliar application of Clothianidin 50 % WDG @ 100 gm/ ha.
T3- Recommended Practice-	Foliar spray of Ethofenprox 10 % EC @ 500 ml/ha.
Date of sowing:	-
Date of harvesting:	-
Source of technology:	OUAT, ICAR – Expert committee recommendation 2019- 20
Characteristics of technology:	Reduction and control of insect pest population
Name of Crop/Enterprises:	Mustard
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

OFT-4

Name of Discipline	Entomology-4
Title of on-farm trial:	Assessment of Insecticide spiromesifen 240 SC @ 500 ml/ha for the management of sucking pest in potato
Year/Season:	Rabi 2024-25
Farming situation:	-
Problem diagnosis:	Low yield due to insect attack
Thematic area:	IPM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Injudicious use of insecticides
T2 –Recommended Practice-	Spiromesifen 240 SC @ 500 ml/ha
T3- Recommended Practice-	Nimastra @ 500 litre/ha
Date of sowing:	-
Date of harvesting:	-
Source of technology:	CIBRC/OUAT, 2019-20
Characteristics of technology:	Reduction and control of insect pest population
Name of Crop/Enterprises:	Potato
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

OFT-5

Name of Discipline	Horticulture -1
Title of on-farm trial:	Assessment of improved varieties of Okra
Year/Season:	2024/kharif
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to local and poor variety
Thematic area:	HOV
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	farmers using their own seed

T2 –Recommended Practice-	Use of Kashi Chaman
T3- Recommended Practice-	Use of Kashi Kranti
Date of sowing:	-
Date of harvesting:	-
Source of technology:	IIVR, Varanasi
Characteristics of technology:	Improved variety, resistance to disease, maximum pods per plant
Name of Crop/Enterprises:	Okra
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

OFT-6

Name of Discipline	Horticulture-2
Title of on-farm trial:	Assessment of improved varieties of Pumpkin
Year/Season:	2024/kharif
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to poor and local variety
Thematic area:	HOV
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1: farmers using their own seed
T2 –Recommended Practice-	T2: Use of kashi Harit
T3- Recommended Practice-	T3: Use of Kashi Shishir
Date of sowing:	-
Date of harvesting:	-
Source of technology:	IIVR Varanasi
Characteristics of technology:	Improved variety, resistance to disease
Name of Crop/Enterprises:	Pumpkin
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

OFT-7

Name of Discipline	Horticulture-3
Title of on-farm trial:	Assessment of balance nutrition in Rabi Onion
Year/Season:	2024/Rabi
Farming situation:	Irrigated
Problem diagnosis:	Poor yield due to imbalance dose of Nutrition
Thematic area:	HOS
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1: Use of imbalance dose of Nutrition (Urea & DAP)
T2 –Recommended Practice-	T2: Use of Recommended dose of Fertilizer -NPKS)
T3- Recommended Practice-	T3: Use of RDF + Biostimulent(Sagarika-IFFCO)

Date of sowing:	-
Date of harvesting:	-
Source of technology:	IFFCO
Characteristics of technology:	
Name of Crop/Enterprises:	Onion
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

OFT -8

Name of Discipline	Horticulture-4
Title of on-farm trial:	Assessment of GA ₃ as foliar application for higher growth and stimulate the flowers in Chrysanthemum
Year/Season:	2024/Rabi
Farming situation:	Irrigated
Problem diagnosis:	Small Size and poor yield of the flower due to loose petals
Thematic area:	HOF
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1: No Use of Plant Growth Regulator
T2 –Recommended Practice-	T2: Use of GA ₃ @ 100 PPM GA ₃ application @ 15 & 30 DAT (OP/Hybrid variety)
T3- Recommended Practice-	T3: Use of GA ₃ @ 150 PPM GA ₃ application @ 15& 30 DAT (OP/Hybrid variety)
Date of sowing:	-
Date of harvesting:	-
Source of technology:	IARI 2020
Characteristics of technology:	Foliar Application of PGR
Name of Crop/Enterprises:	Annual Chrysanthemum
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

OFT-9

Name of Discipline	Plant Protection-1
Title of on-farm trial:	Assessment of fungicide for the management of false smut of Rice
Year/Season:	2024/Kharif
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to damage of grain due to false smut disease
Thematic area:	IDM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1: No use of fungicide
T2 –Recommended Practice-	T2: Copper hydroxide 77% WP @ 2.5gm/li(2kg/750li)
T3- Recommended Practice-	T3: Picoxystrobin 7.05% + Propiconazole 11.7% SC@2ml/li

	(1li/500ml)
Date of sowing:	-
Date of harvesting:	-
Source of technology:	CIAB 2023
Characteristics of technology:	-
Name of Crop/Enterprises:	Rice
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

OFT-10

Name of Discipline	Plant Protection-2
Title of on-farm trial:	Assessment of organic fungicide for management of leaf spot of pearl millet
Year/Season:	2024/Kharif
Farming situation:	Irrigated
Problem diagnosis:	Occurrence of leaf spot affecting both forage and grain production
Thematic area:	IDM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	No use of Plant Protection chemical
T2 –Recommended Practice-	Butter Milk @ 3 li./100 li.
T3- Recommended Practice-	Propiconazole 25 EC @ 100ml/100 li
Date of sowing:	-
Date of harvesting:	-
Source of technology:	CIB (2020) Kurukshetra
Characteristics of technology:	-
Name of Crop/Enterprises:	Pearl millet
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

OFT-11

Name of Discipline	Plant Protection-3
Title of on-farm trial:	Assessment of Stem Rot management in mustard
Year/Season:	2024/Rabi
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to Stem damage which leads to early maturity or drying of plants
Thematic area:	IDM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	No use of plant protection chemicals
T2 –Recommended Practice-	Seed treatment with <i>T.hariz anum</i> @ 10g/kg seed and application of Propiconazole 25 EC@ 500ml/ha at 55-60DAS
T3- Recommended Practice-	Propiconazole 25 EC@ 500ml/ha at 55-60DAS

Date of sowing:	-
Date of harvesting:	-
Source of technology:	NRCRM, Bhartpur
Characteristics of technology:	-
Name of Crop/Enterprises:	Mustard
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

OFT-12

Name of Discipline	Plant Protection-4
Title of on-farm trial:	Assessment of management of anthracnose of chilli
Year/Season:	2024/Rabi
Farming situation:	Irrigated
Problem diagnosis:	Low yield and poor quality chilli due to infection on plant parts and die back of branches
Thematic area:	IDM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	No use of plant protection chemicals
T2 –Recommended Practice-	Application of Buttermilk@ 1ml/li (15li/ha/500li)and Jeewamrit @100ml/li(50 li/ha)
T3- Recommended Practice-	Application of Azoxystrobin 18.2% + Difenconazole 11.4% w/w SC@1ml/li
Date of sowing:	-
Date of harvesting:	-
Source of technology:	CIBRC 2023
Characteristics of technology:	-
Name of Crop/Enterprises:	Chilli
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

OFT-13

Name of Discipline	Agroforestry-1
Title of on-farm trial:	Analysis of agroforestry system having <i>Guava</i> on bunds at a spacing of 5x 5 m with crop.
Year/Season:	2024/kharif
Farming situation:	Irrigated
Problem diagnosis:	No Agroforestry system
Thematic area:	AGF
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	No use of Agroforestry components- Only crops
T2 –Recommended Practice-	Only Trees on bunds.
T3- Recommended Practice-	Tree + Crop

Date of sowing:	-
Date of harvesting:	-
Source of technology:	IGFRI 2014
Characteristics of technology:	-
Name of Crop/Enterprises:	Guava and crop
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

OFT-14

Name of Discipline	Agroforestry-2
Title of on-farm trial:	Comparative studies of natural farming components, organic farming components and chemical fertilizers on Guava trees and crop.
Year/Season:	2024/Kharif
Farming situation:	Irrigated
Problem diagnosis:	No Agroforestry system
Thematic area:	AGF
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	No use of fertilizers
T2 –Recommended Practice-	Application of Natural Farming components on Tree + Crops.
T3- Recommended Practice-	Use of Chemical fertilizers on tree + crop
Date of sowing:	-
Date of harvesting:	-
Source of technology:	Kurushetra, 2015
Characteristics of technology:	-
Name of Crop/Enterprises:	Guava and crop
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

OFT-15

Name of Discipline	Agroforestry-3
Title of on-farm trial:	Analysis of agroforestry system having <i>Guava</i> on bunds at a spacing of 5x 5 m with crop.
Year/Season:	2024/Rabi
Farming situation:	Irrigated
Problem diagnosis:	No Agroforestry system
Thematic area:	AGF
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	No use of Agroforestry components- Only crops
T2 –Recommended Practice-	Only Trees on bunds.
T3- Recommended Practice-	Tree + Crop
Date of sowing:	-

Date of harvesting:	-
Source of technology:	IGFRI 2014
Characteristics of technology:	-
Name of Crop/Enterprises:	Guava and crop
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

OFT-16

Name of Discipline	Agroforestry-4
Title of on-farm trial:	Comparative studies of natural farming components, organic farming components and chemical fertilizers on Guava trees and crop
Year/Season:	2024/Rabi
Farming situation:	Irrigated
Problem diagnosis:	No Agroforestry system
Thematic area:	AGF
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	No use of fertilizers
T2 –Recommended Practice-	Application of Natural Farming components on Tree + Crops.
T3- Recommended Practice-	Use of Chemical fertilizers on tree + crop
Date of sowing:	-
Date of harvesting:	-
Source of technology:	Kurushetra, 2015
Characteristics of technology:	-
Name of Crop/Enterprises:	Guava and crop
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-

Information about Home Science OFT:

OFT-17

Title of on-farm trial:	Assessment of sattu laddu and Iron rich supplement for adolescent girls
Year/Season:	2024/kharif
Problem diagnosis:	Low intake of iron causing Anemia problem in adolescent girls
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional Security
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Imbalance diet
T2 –Recommended Practice-	Sattu laddu(roasted chana +aonla powder+coconut oil+ Jaggery)
Source of technology:	CIAE, Bhopal (2013)
Characteristics of technology:	-
Name of Crop/Enterprises:	Sattu laddu
Farming situation:	-

Date of sowing:	-
Date of harvesting:	-
Recommendations for Farmers	-
Recommendations for Dept. Personnel	-
Feedback	-

OFT-18

Title of on-farm trial:	Assessment of impact of supplementation of multi grain flour on malnutrition status of children below 5 years age
Year/Season:	2024/kharif
Problem diagnosis:	Children are generally weak due to intake of low nutrient food
Thematic area: (Focus area in DFI and nutri smart initiatives)	
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Use of wheat flour for making of chapati
T2 –Recommended Practice-	Use of multigrain flour for making of chapati
Source of technology:	NIN Hyderabad
Characteristics of technology:	-
Name of Crop/Enterprises:	Multigrain flour
Farming situation:	-
Date of sowing:	-
Date of harvesting:	-
Recommendations for Farmers	-
Recommendations for Dept. Personnel	-
Feedback	-

OFT-19

Title of on-farm trial:	Assessment of role of value addition of aonla income generation
Year/Season:	2024/Rabi
Problem diagnosis:	Low income of farm women due to excess production of aonla
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional Security
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	T1: No value addition of Aonla
T2 –Recommended Practice-	T2: Aonla barfi (Aonla + Cardamom + Sugar)
Source of technology:	JNKVV, Jabalpur
Characteristics of technology:	-
Name of Crop/Enterprises:	Aonla
Farming situation:	-
Date of sowing:	-
Date of harvesting:	-
Recommendations for Farmers	-
Recommendations for Dept. Personnel	-
Feedback	

OFT-20

Title of on-farm trial:	Assessment of value addition of pearl millet by making bajra laddu
Year/Season:	2024/Rabi
Problem diagnosis:	Low income of farm women due to no value addition of millet
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional Security
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	T1: No value addition
T2 –Recommended Practice-	T2: Bajra Laddu (Bajra + Sesame + Groundnut + jaggery)
Source of technology:	ICAR Project on minor millets
Characteristics of technology:	-
Name of Crop/Enterprises:	Millets
Farming situation:	-
Date of sowing:	-
Date of harvesting:	-
Recommendations for Farmers	-
Recommendations for Dept. Personnel	-
Feedback	-

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
1	Paddy	IPM	Demonstration of Pymetrozine 50 WG @ 300 gram/ha for management of brown plant hopper in paddy	Pymetrozine 50 WG @ 600 gm	Kharif 2024	2.0	05	Infestation (%), Yield (q/ha.), Net Return (Rs./ha.), B:C Ratio
2	Paddy	IPM	Demonstration of Fipronil 0.3G @ 20 kg/ha for the management of stem borer in paddy under Paddy-Wheat cropping system	Fipronil 0.3 G @ 40 kg	Kharif 2024	2.0	05	Infestation (%), Yield (q/ha.), Net Return (Rs./ha.), B:C Ratio
3	Mustard	IPM	Demonstration of Clothianidin 50 % WDG @ 100 gm/ ha. Insecticide for Aphid management in mustard	Clothianidin 50 % WDG @ 200 gm	Rabi 2024	2.0	05	Infestation (%), Yield (q/ha.), Net Return (Rs./ha.), B:C

								Ratio
4	Gram	IPM	Demonstration of Chlorantraniliprole 18.5 % SC @ 125 gm/ ha. Insecticide for pod borer management in Gram	Chlorantraniliprole 18.5 % SC @ 250 gm	Rabi 2024	2.0	05	Infestation (%), Yield (q/ha.), Net Return (Rs./ha.), B:C Ratio
5	Bottle Gourd	HOV	Demonstration of PGRs (Plant growth regulator) in Bottle gourd crop for increasing pistillate flowers.	2 Chloro Ethyle Phosphonic Acid	Kharif 2024	1.0	05	No of Pistillate Flowers / plant and Yield(q/ha)
6	Guava	HOF	Demonstration of crop regulation practice in guava fruit crop	Urea@ 15% as foliar spray during April month	Kharif 2024	1.0	05	Fruit yield(kg/tree) and size of fruit
7	Green Pea	HOV	Demonstration of HYV of Pea	Seed	Rabi 2024	1.0	05	Yield(q/ha), No. of seeds/pod
8	Tomato	HOV	Demonstration of Balanced customized solution on Yield & Quality of Tomato	Balanced customized solution Mahadhan Croptek(100% nutrient will go through Soil application)	Rabi 2024	1.0	05	No. of fruits/plant Yield(q/ha)
9	Paddy	IDM	Carbendazim 12%+Mancozeb63%WP @2g/kg seed Seed treatment and soil drenching against Bakane disease	Carbendazim 12%+ Mancozeb63%WP	Kharif 2024	2.0	05	Disease Incidence (%), Yield(q/ha), Net Return(Rs/ha), B:C
10	Ground nut	IDM	Seed Treatment with Carboxin 37.5% +Thiram 37.5% @2g/kg seed, spray of Hexaconazole 5%EC or Propiconazole 25EC @ 1.5ml/li	Carboxin 37.5% +Thiram 37.5% Hexaconazole 5%EC or Propiconazole 25EC @ 1.5ml/li	Kharif 2024	1.0	05	% reduction over control, Yield(q/ha), Net Return(Rs/ha), B:C
11	Gram	IDM (Wilt)	Carboxin 37.5% +Thiram 37.5% @ 3g/kg seed, spray of carbendazim 12%+ mancozeb 63% @2.5 g/lit.	Carboxin 37.5% +Thiram 37.5%WP, Carbendazim 12% + Mancozeb 63%	Rabi 2024-25	2.0	05	Disease Incidence (%), Yield(q/ha), Net Return(Rs/ha), B:C
12	Moringa	AGF	Demonstration of <i>Moringa oliefera</i> on bunds with field crop (Existing AGF system)	-	Kharif 2024	0.2	05	Yield attributes, Yield(q/ha), Net Return(Rs/ha), B:C
15	Aonla	AGF	Demonstration of tree crop existing agroforestry system with aonla	-	Rabi 2024-25	0.2	05	Yield attributes, Yield(q/ha), Net Return(Rs/ha), B:C ratio

Extension and Training activities under FLDs

S. No.	Activity	No. of activities	Month	Number of participants
1	Field days	24	Jan to Dec.	300
2	Farmers Training	24	Jan to Dec	480
3	Media coverage	10	Jan To Dec.	Mass
4	Training for extension functionaries	12	Jan To Dec.	180

Details of FLD on Enterprises

Farm Implements

Name of the implement	crop	Season and year	No. of farmers	Area (ha)	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
							Demon.	Local check

*Field efficiency, labour saving etc.

Livestock Enterprises

Enterprise	Breed	No. of farmers	No. of animals, poultry birds etc.	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
						Demo.	Local check
Goat	Sirohi	10	10	Mineral bricks	Body weight gain in kg, , B:C Ratio , Gross return and Net Return	use of Mineralized Salt Lick in kids at the age of 3 – 5 months	No use of salt bricks
Cow	Undescriptive	10	10	Neem and Karanj oil	Incidence of parasite, Milk yield in liter, B:C Ratio , Gross return and Net Return	Use of Neem and Karanj oil ratio of 1:1	Not proper active parasite management
Buffalo	Murrah	10	10	bypass fat powder	Milk yield in liter, B:C Ratio , Gross return and Net Return	Use of bypass fat powder in high yielding buffalo @ 100 gm / day	No use of bypass fat powder
Poultry	Desi	10	200	Curcuma longa powder	Body weight gain in gram, B:C Ratio , Gross return and Net Return	use of turmeric powder @ 1 % in poultry feed.	No use of turmeric powder

*Milk production, meat production, egg production, reduction in disease incidence etc.

Other Enterprises

Enterprise	Variety/ breed/Species /others	No. of farmers	No. of Units/ area	Critical inputs	Performance parameters/ indicators	Data on parameter in relation to technology demonstrated	
						Demo.	Local check
Kitchen garden	Hybrid	10	0.1 ha.	Bottle gourd, chilli ,brinjal, okra ,Tomato	Height , weight ,BMI	Nutrition kitchen garden	No kitchen Garden
Multigrain dalia	Dalia	05	05	Multigrain dalia	Height , weight	Multigrain dalia	imbalance diet
Vegetables	Hybrid	10	0.1 ha.	seedling/sapling	Height , weight ,BMI	Nutrition kitchen garden	Nutrition kitchen garden
Mushroom	Button	10	10	Mushroom spawn, chemicals &	Mushroom production (kg),	-	-

				polythene	Net income (Rs.), B:C ratio		

Cluster Demonstration of Oilseed and Pulses under NFSM (2024-25)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 1	Soybean-wheat, maize-wheat, soybean-maize, maize + groundnut-wheat/chickpea, Maize+ blackgram- wheat/chickpea, Cotton + maize, Cotton, Cotton+ soybean, vegetables
2	AES – 2	
3	AES – 3	

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	AES – 1 - 11th Zone – Jhabua Hills	Undulating land, red and black with skeleton type soil
2	AES - 2	
3	AES – 3	

4	AES – 4	
5	AES – 5	
6	AES – 6	

**SWOT Analysis of each Agro-Ecological Situations of district
AES-1 (name)**

Strength	Weakness	Opportunities	Threats
☐ Convergence with agriculture and allied departments.	☐ Lack of knowledge of improved technology of crop cultivation. Use of traditional cultivation practices and local varieties. Imbalance use of fertilizer, higher seed rate,	☐ crop diversification, balance use of fertilizer with soil health based fertilizer recommendation, Scope for natural and organic farming, Needed DRIP based irrigation in rabi due to water scarcity	☐ Higher crop yield with good soil health with less input cast.

Detailed Information about OFT: 1

Name of Discipline	Soil Science
Title of on-farm trial:	Assessment of organic and natural farming in Soybean (JS-20-98)
Year/Season:	2024/Kharif
Farming situation:	Irrigated
Problem diagnosis:	Low yield of soybean due to less organic carbon
Thematic area:	Natural farming
No of trials:	5
No. of farmers involved	5 (0.2 ha)
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Farmers practice -20:40:0:N:P:K+ 5 ton FYM
T2 –Recommended Practice-	Organic farming- 100% Vermi-compost + bio-fertilizer
T3- Recommended Practice-	Use of Beejamrat, Jivamrit, Ghanamrat, Dasparni urk, Neemastra and Bhrahmastra
Date of sowing:	
Date of harvesting:	
Source of technology:	IISS & Natural Farming Book
Characteristics of technology:	
Name of Crop/Enterprises:	Soybean (JS-2098)
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback

Name of Discipline	Soil Science
Title of on-farm trial:	Assessment of natural farming on the yield and economics of Gram
Year/Season:	2024/Rabi
Farming situation:	Irrigated
Problem diagnosis:	High cost of input, less availability of irrigation water and low organic carbon in soil
Thematic area:	Natural farming
No of trials:	5
No. of farmers involved	5 (0.2 ha)
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Farmers practice (10:30:0::N:P:K)
T2 –Recommended Practice-	100% NPK @ 20:50:20 kg/ha
T3- Recommended Practice-	Use of Beejamrat, Jivamrit, Ghanamrat, Dasparni urk, Neemastra and Bhrahmastra
Date of sowing:	
Date of harvesting:	
Source of technology:	Natural Farming book-Aachary Devvrat
Characteristics of technology:	
Name of Crop/Enterprises:	RVG-204
Recommendations for Farmers	
Recommendations for Deptt. Personnel	

Feedback	

Detailed Information about OFT: 6

Name of Discipline	Soil Science
Title of on-farm trial:	Assessment and effect of Nano urea liquid fertilizer on Wheat (Based on STV)
Year/Season:	2024 Rabi
Farming situation:	Irrigated
Problem diagnosis:	High losses of nitrogen fertilizer in crop filed
Thematic area:	Supplementation of nitrogen through Nano Urea
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Farmers practice (100:60:0::N:P:K)
T2 –Recommended Practice-	Recommended Practice: (120:60:40::N:P:K)
T3- Recommended Practice-	75% RDF + 1250 ml/ha nano urea
Date of sowing:	
Date of harvesting:	
Source of technology:	IISS Bhopal
Characteristics of technology:	
Name of Crop/Enterprises:	Maize Rashi
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Information about Extension OFT:1

Title	Assessment of What’s App Tech. for dissemination of Agri- Tech. in Due time in Maize crop.
Season & Year	Kharif-2024-235
Problem identified	Lack of audio-visual mode of transfer of technology in due time.
Thematic Area	ICT
Farming situation	Semi-irrigated
Name of Technology under study	Messaging to Contact Farmers through What’s app with the help of Smart mobile (T2)
Farmers Practice	No use of What’s App for Agriculture information. (T1)
No. of replication/Farmers	90

Results / findings

Performance indicators/ parameters	Unit/ details

Information about Extension OFT:2

Title	Effectiveness of social media, Whats App message for dissemination of use of insecticides farm management of gram pod borer in chickpea.
Season & Year	Rabi - 2024-25
Problem identified	Lack of technical knowledge among farmers about use of insecticides farm management of gram pod borer in chickpea.
Thematic Area	ICT

Farming situation	Semi-irrigated
Name of Technology under study	Whats App
Farmers Practice	Dissemination of agricultural technologies without using Whats-app message
No. of replication/Farmers	90

Results / findings

Performance indicators/ parameters	Unit/ details

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
1	Soybean	Agriculture waste (Residue) management	Crop Residue management in soybean – wheat cropping system	Waste decomposer	Kharif-2024	4	10	No of pod, Pod length, No of Nodual
2	Green Gram	INM	Use of fertilizer 20:60:20:20 kg NPKS/ha + Ammo. Molybdate @ 1gm + Rhizobium + PSB @ 5 gm/kg seed	Ammonium Molybdate with culture	Kharif-2024	4	10	No of pod, Pod length, No of Nodual
3	Potato	INM	Use of Vermicompost 2.5 t /ha + 75% RDF (NPK @ 150:80:80 kg/ha) in potato	Potato	Rabi-2024	4	10	Growth and yield
4	Mastard	INM	Use of Vermicompost 2.5 t /ha + 75% RDF (NPKS @ 80:40:40:20 kg/ha) in mustard	Vermicompost	Rabi-2024	4	10	Growth and yield
	Soybean	INM -TSP	Full package of practice of soybean	Seed of Soybean, Weedicide, fungicide, biofertilizer, insecticide	Kharif-2024	10	25	Growth and yield
	Maize	INM -TSP	Full package of practice of soybean	F1 Hybrid Seed, weedicide, insecticide	Kharif-2024	10	25	Growth and yield
	Cotton	INM -TSP	Full package of practice of soybean	F1 Hybrid Seed, weedicide, insecticide	Kharif-2024	10	25	Growth and yield
	Black	INM -TSP	Full package of	Seed- Indra Urd-1,	Kharif-	10	25	Growth and

	Gram		practice of soybean	Weedicide, fungicide, biofertilizer, insecticide	2024			yield
	Vegetable	INM -TSP	Full package of practice of soybean	Vegetable seed, Soluble NPK fertilizer, insecticide, pesticide	Kharif-2024	10	50	Growth and yield
	Mustard	INM -TSP	Seed and fertilizer management	Seed, Soluble NPK fertilizer, insecticide, pesticide	Rabi-2024	8	20	Growth and yield
	Wheat	INM -TSP	Seed and fertilizer management	Seed, Soluble NPK fertilizer, insecticide, pesticide	Rabi-2024	8	20	Growth and yield
	Gram	INM -TSP	Seed and fertilizer management	Seed, Soluble NPK fertilizer, insecticide, pesticide	Rabi-2024	8	20	Growth and yield
	Maize	INM -TSP	Seed and fertilizer management	Seed, Soluble NPK fertilizer, insecticide, pesticide	Rabi-2024	8	20	Growth and yield
	Vegetable	INM -TSP	Seed and fertilizer management	Seed, Soluble NPK fertilizer, insecticide, pesticide	Rabi-2024	10	50	Growth and yield

2	15.9.2024

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 1	Comprise block Khandwa, Pandhana, Punasa, Chhegaonmakhan Geographical area 3,92,963 ha (68%)
2	AES – 2	Comprise block Khalwa, Baldi, Harsud Geographical area 1,86,711 ha (32%)

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	AES – 1	Soils- Medium Black, Major crops- Cotton, soybean, Wheat, Gram, Chilli, Onion, Tomato
2	AES - 2	Soils- Medium to light Black, Major crops- Cotton, soybean, Wheat, Gram, minor millets, vegetables

SWOT Analysis of each Agro-Ecological Situations of district AES-1 (name)

Strength	Weakness	Opportunities	Threats
Medium black, heavy black soil conducive for vegetables and spices.	Imbalanced use of chemical fertilizer.	Scope for medicinal plantation for conservation of forest and development of industries.	Heavy soil erosion and deforestation.
Favorable climate for Mango, Litchi, Jack fruit, custard apple, Guava, Citrus, Anola, Pomegranate and floriculture.	Lack of awareness in identification of crop pests and diseases.	Cultivation of off-season vegetable due to favorable climatic condition.	Degradation of natural resources.
Large scale cultivation of Onion, Chilli and colocassia	Non adoption of seed treatment, green manure.	Scope for extension of NGO network	Emigration of labour for better livelihood.
Skilled farmers in vegetable cultivation	Lack of crop diversification in upland	Constitution of SHG federation at district level	Loss of Bio-diversity.
Easy availability of workforce	Lack of field channels and irrigation water	Expansion of area under lime, mango, jackfruit, custard apple, Anola and pomegranate.	Decreasing trend in use of organic manure.
Existence of woman SHGs	Poor soil and water management.	Scope for Agro. Based/Food processing industry for value addition.	

AES-2 (name)

Strength	Weakness	Opportunities	Threats
Shallow black and light black soil conducive for plantation crops.	Lack of awareness of management of crop pests and diseases.	Scope for medicinal plantation for conservation of forest and development of industries.	Menace by elephants.
Favorable climate for custard apple, Guava, Citrus, Anola, Pomegranate and floriculture.	Imbalanced use of chemical fertilizer.	Scope for Agro. Based/Food processing industry for value addition.	Degradation of natural resources.
Enthusiastic farmers in vegetable cultivation	Poor adoption of seed treatment, green manure.	Scope for extension of NGO network	Indiscriminate use of pesticide causing ecological imbalance.
Existence of woman SHGs	Lack of field channels and irrigation water	Constitution of SHG federation at district level	Emigration of labour for better livelihood.
Large scale cultivation of Cotton, Maize and summer moong	Poor post harvest technology	Cultivation of off-season vegetable due to favorable climatic condition.	Decreasing trend in use of organic manure.

Land Use Pattern

Crop / Enterprise	Kutki Millet	
Title of on farm trial	Assessment of Improved variety Jawahar Kutki 4 of little millet (Kutki)	
Problem diagnosed	Low yield of small millet due to old variety seed	
Farmers' Practices	Growing of old and unidentified variety of little millet	
Details of technologies selected for assessment	T ₁	Growing of old and unidentified variety of little millet
	T ₂	Growing of Improved variety Jawahar Kutki 4 of little millet
	T ₃	-
Source of technology	JNKVV (2016)	
Plot size	0.2 ha	
No. of farmers	07	
Total cost	3000	
Critical input	1500	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Length of panicle, Grain Yield q/ha	

OFT-4

Crop / Enterprise	Wheat	
Title of on farm trial	Assessment of post emergence herbicide for control of weeds in wheat crop	
Problem diagnosed	Low yield due to infestation of weeds in wheat	
Farmers' Practices	Use of Post emergence herbicide 2,4-D-E @ 862 ml./ha. at 25-30 DAS	
Details of technologies selected for assessment	T ₁	Use of Post emergence herbicide 2,4-D-E @ 862 ml./ha. at 25-30 DAS
	T ₂	Use of Post emergence herbicide (Sulfosulfuron 75%+ Metsulfuron Methyl 5% WG) @ 40 ml/ha at 25-30 DAS
	T ₃	Use of Post emergence herbicide (Mesosulfosulfuron methyl 3 %+ Iodosulfuronmethyl sodium 0.6 %WG) @ 400 ml./ha at 25-30 DAS
Source of technology	ICAR-DWR, Jabalpur	
Plot size	0.2 ha	
No. of farmers	07	
Total cost	3000	
Critical input	2000	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Weeds / M ² , Weed Control Efficiency, Yield q/ha	

OFT-5

Crop / Enterprise	Chickpea	
Title of on farm trial	Assessment of post emergence herbicide for control of weeds in chick pea crop	
Problem diagnosed	Low yield due to infestation of weeds in chick pea	
Farmers' Practices	Use of Pre emergence herbicide Pendimethalin 30% EC@ 3250 ml./ha at 0-3 DAS	
Details of technologies selected for assessment	T ₁	Use of Pre emergence herbicide Pendimethalin 30% EC@ 3250 ml./ha at 0-3 DAS
	T ₂	Use of Post emergence herbicide Quizalofopethyl @ 500 ml/ha at 15-20 DAS
	T ₃	Use of Post emergence herbicide Topramezone 33.6%SC @75 ml/ha at 20 DAS
Source of technology	ICAR-DWR, Jabalpur	
Plot size	0.2 ha	
No. of farmers	07	
Total cost	4000	
Critical input	3000	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Weeds / M ² , Weed Control Efficiency, Yield q/ha	

OFT-1 (Soil Science)

Crop / Enterprise	Soybean	
Title of on farm trial	Assessment of Nano DAP in Soybean	
Problem diagnosed	Low yield due to poor nutrient management	
Farmers' Practices	Use of chemical fertilizers	
Details of technologies selected for assessment	T ₁	Use of chemical fertilizers
	T ₂	100% NPK 20:60:20
	T ₃	100 % N (through urea) + 50% P (through DAP or SSP + seed treatment of Nano DAP @ 5 ml/Kg seed at time of sowing + First spray with Nano DAP @ 4 ml/litre of water at 30 days after germination and second spray before one week of flowering stage or 45 days after seed germination
Source of technology	IFFCO	
Plot size	0.2 ha	
No. of farmers	07	
Total cost	4200	
Critical input	600	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	No of pods/plant, Plant height,Yield,B:C ratio, farmers reaction	

OFT-2

Crop / Enterprise	Soybean	
Title of on farm trial	Assessment of INM through organic inputs in Soybean	
Problem diagnosed	Low yield due to poor nutrient management	
Farmers' Practices	Use of chemical fertilizers (Use of 125 Kg DAP/ha only)	
Details of technologies selected for assessment	T ₁	Use of chemical fertilizers (Use of 125 Kg DAP/ha only)
	T ₂	Use of FYM10 tonnes/ha + use of Jeevamrit @ 600 litre /ha
	T ₃	Nutrient management through organic inputs 10 tonnes FYM + Rhizobium 5 ml/Kg seed + PSB @ 5ml /Kg seed + use of jeevamrit @ 600 litre /ha
Source of technology	IISS	
Plot size	0.2 ha	
No. of farmers	07	
Total cost	2520	
Critical input	360	
Performance indicators: (v)Growth and Yield attributes (vi) Technical- yield (q/ ha) (vii) Economic (viii) Social – Employment generation	No of pods/plant, Plant height,Yield,B:C ratio, farmers reaction	

OFT-3

Crop / Enterprise	Chickpea	
Title of on farm trial	Assessment of Nano DAP in Chickpea	
Problem diagnosed	Low yield due to poor nutrient management	
Farmers' Practices	Use of chemical fertilizers (Use of 125 Kg DAP/ha only)	
Details of technologies selected for assessment	T ₁	Use of chemical fertilizers (Use of 125 Kg DAP/ha only)
	T ₂	100% NPK 20:60:20
	T ₃	100 % N (through urea) + 50% P (through DAP or SSP + seed treatment of Nano DAP @ 5 ml/Kg seed at time of sowing + First spray with Nano DAP @ 2 ml/litre of water at 25-30 days after germination
Source of technology	IFFCO	
Plot size	0.2 ha	
No. of farmers	07	

Total cost	4200
Critical input	600
Performance indicators: (ix) Growth and Yield attributes (x) Technical- yield (q/ ha) (xi) Economic (xii) Social – Employment generation	No of pods/plant, Plant height, Yield, B:C ratio, farmers reaction

OFT-4

Crop / Enterprise	Onion	
Title of on farm trial	Assessment of Sulphur source in Onion	
Problem diagnosed	Low yield due to poor sulphur management	
Farmers' Practices	Use of chemical fertilizers (use of SSP)	
Details of technologies selected for assessment	T ₁	Use of chemical fertilizers (use of SSP)
	T ₂	100% NPK 100:60:80 Kg/ha + use of 45 Kg/ha S bentonite sulphur
	T ₃	100% NPK 100:60:80 Kg/ha + use of 45 Kg/ha S through W.D.G
Source of technology	IISS	
Plot size	0.2 ha	
No. of farmers	07	
Total cost	7000	
Critical input	1000	
Performance indicators: (xiii) Growth and Yield attributes (xiv) Technical- yield (q/ ha) (xv) Economic (xvi) Social – Employment generation	Average weight of bulb, Plant height, Yield, B:C ratio, farmers reaction	

OFT-1 (Plant Protection)

Crop / Enterprise	Soybean (Kharif- 2024)	
Title of on farm trial	Assessment of defoliator management in soybean	
Problem diagnosed	Low yield due to attack of defoliator in soybean	
Farmers' Practices	Spray of Quinalphos/Profenofos @ 1.5 lit/ha for defoliator control	
Details of technologies selected for assessment	T ₁	Spray of Quinalphos/Profenofos @ 1.5 lit/ha for defoliator control
	T ₂	Spray of <i>Beauveria bassiana</i> @ 5 ml/lit + Use of Bird Percher @ 50 /ha
	T ₃	Spray of Rynaxypyr 20 SC @ 100 ml/ha 7 days before flowering
Source of technology	DSR, Indore	
Plot size	0.20 ha	
No. of farmers	07	
Total cost	4900	
Critical input	<i>Beauveria bassiana</i>, Rynaxypyr	
Performance indicators: (xvii) Growth and Yield attributes (xviii) Technical- yield (q/ ha) (xix) Economic (xx) Social – Employment generation	Insect/ M row length (Nos.) Yield (q/ ha), Net return, B:C ratio	

OFT-2

Crop / Enterprise	Chilli (Kharif- 2024)	
Title of on farm trial	Assessment of anthracnose management in chilli	
Problem diagnosed	Low yield due to attack of anthracnose in chilli	
Farmers' Practices	Spray of Carbendazim @ 1 gm/lit	
Details of technologies selected for assessment	T ₁	Spray of Carbendazim @ 1 gm/lit
	T ₂	Spray of <i>Pseudomonas fluorescens</i> and <i>Trichoderma viride</i> @ 5 ml/lit
	T ₃	Spray of Copperoxychloride 50 WP @ 2.5 g/lit at appearance of Die Back disease and repeated spray after 10-15 days of first spray
Source of technology	TNAU, Coimbatore	
Plot size	0.20 ha	

No. of farmers	07
Total cost	7350
Critical input	<i>Pseudomonas fluorescens</i> , <i>Trichoderma viride</i> , Copperoxychloride
Performance indicators: (xxi) Growth and Yield attributes (xxii) Technical- yield (q/ ha) (xxiii) Economic (xxiv) Social – Employment generation	Disease incidence (%) Yield (q/ ha), Net return, B:C ratio

OFT-3

Crop / Enterprise	Wheat (Rabi- 2024)	
Title of on farm trial	Assessment of root aphid management in wheat	
Problem diagnosed	Low yield due to attack of root aphid in wheat	
Farmers' Practices	Drenching of Chlorpyriphos @ 1250 ml/ha	
Details of technologies selected for assessment	T ₁	Drenching of Chlorpyriphos @ 1250 ml/ha
	T ₂	Spray of Thiamethoxam 25 WG @ 100 gm/ha at 25 DAS
	T ₃	Spray of Imidacloprid 17.8 SL @ 100 ml/ha at 25 DAS
Source of technology	IIWBR, Karnal	
Plot size	0.20 ha	
No. of farmers	07	
Total cost	2100	
Critical input	Thiamethoxam, Imidacloprid	
Performance indicators: (xxv) Growth and Yield attributes (xxvi) Technical- yield (q/ ha) (xxvii) Economic (xxviii) Social – Employment generation	Affected plant/ sq M Yield (q/ ha), Net return, B:C ratio	

OFT-4

Crop / Enterprise	Chickpea (Rabi- 2024)	
Title of on farm trial	Assessment of wilt management in chickpea	
Problem diagnosed	Low yield due to attack of wilt in chickpea	
Farmers' Practices	Spray of Carbendazim @ 1 g/lit	
Details of technologies selected for assessment	T ₁	Spray of Carbendazim @ 1 g/lit
	T ₂	Use of <i>Trichoderma viride</i> @ 2.5 kg/ha with 50 kg FYM
	T ₃	Use of <i>Pseudomonas fluorescens</i> @ 2.5 kg/ha with 50 kg FYM
Source of technology	TNAU, Coimbatore	
Plot size	0.20 ha	
No. of farmers	07	
Total cost	4550	
Critical input	<i>Trichoderma viride</i> , <i>Pseudomonas fluorescens</i>	
Performance indicators: (xxix) Growth and Yield attributes (xxx) Technical- yield (q/ ha) (xxxi) Economic (xxxii) Social – Employment generation	Disease incidence (%) Yield (q/ ha), Net return, B:C ratio	

OFT-1 (Woen in Agriculture)

Crop / Enterprise	Value added products of oyster mushroom	
Title of on farm trial	Assessment of acceptability of value added products of oyster mushroom	
Problem diagnosed	No value addition in mushrooms	
Farmers' Practices	No value addition in mushroom	
Details of technologies selected for assessment	T ₁	No value addition in mushroom
	T ₂	Value added products (dry powder)
	T ₃	Value added products badi, papad and pickle
Source of technology	National Research Center for Mushroom (ICAR) Solan 2008	
Plot size	-	
No. of farmers	20	

Total cost	5000
Critical input	250
Performance indicators: (xxxiii) Growth and Yield attributes (xxxiv) Technical- yield (q/ ha) (xxxv) Economic (xxxvi) Social – Employment generation	BMI and availability of nutrients

OFT-2

Crop / Enterprise	Value added products from millet biscuits
Title of on farm trial	Assessment of Acceptability of value added products from millet biscuits
Problem diagnosed	Lack of awareness about nutritious food and no value addition in millets
Farmers' Practices	No value addition in millets
Details of technologies selected for assessment	T₁ No value addition in millets
	T₂ Wheat +Ragi + Jowar (20+40+40)
	T₃ Wheat + Rag i+ Jowar (20+60+20)
Source of technology	TNAU 2012
Plot size	-
No. of farmers	10
Total cost	3000
Critical input	300
Performance indicators: (xxxvii)Growth and Yield attributes (xxxviii) Technical- yield (q/ ha) (xxxix) Economic (xl) Social – Employment generation	Sensory evaluation(9 Hedonic scale),Shelf life, nutrients analysis and BC ratio

OFT-3

Crop / Enterprise	Amylase rich food
Title of on farm trial	Assessment for inclusion of Amylase rich food (ARF,s) in porridge among weaning infants (0-5year).
Problem diagnosed	Lack of awareness regarding healthy food
Farmers' Practices	Wheat+ARF powder prepared from moong
Details of technologies selected for assessment	T₁ Wheat+ARF powder prepared from moong
	T₂ Consumption of porridge prepared from durum wheat variety
	T₃ Consumption of porridge prepared from durum wheat variety+Inclusion of ARF powder prepared from moong
Source of technology	TNAU 2016
Plot size	-
No. of farmers	10
Total cost	6000
Critical input	600
Performance indicators: (xli) Growth and Yield attributes (xlii) Technical- yield (q/ ha) (xliii) Economic (xliv) Social – Employment generation	Sensory evaluation(9 Hedonic scale),Shelf life, nutrients analysis and BC ratio

OFT-4

Crop / Enterprise	Malted sattu
Title of on farm trial	Assessment of malted sattu (sprouted chick pea+sprouted wheat) for malnourished children (1-5year)
Problem diagnosed	Lack of awareness regarding healthy food and low protein diet in children
Farmers' Practices	Rice+veg.in diet
Details of technologies selected for assessment	T₁ Rice+veg.in diet
	T₂ Sattu (Chick pea+wheat)
	T₃ Malted Sattu (Chick pea+wheat)

Source of technology	CFTRI, Mysore 2012
Plot size	-
No. of farmers	10
Total cost	5000
Critical input	500
Performance indicators: (xlv) Growth and Yield attributes (xlv) Technical- yield (q/ ha) (xlvii) Economic (xlviii) Social – Employment generation	Shelf life, Quality analysis, handling cost (Rs/kg), BC ratio

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of post emergence herbicide for control of weeds in soybean crop
Year/Season:	Kharif-2024
Farming situation:	Rain fed
Problem diagnosis:	Low yield of soybean due to heavy infestation of weeds.
Thematic area:	Weed Management
No of trials:	07
No. of farmers involved	07
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Application of Pendimethalin @3250 ml/ha as pre-emergence at 0-3 DAS
T2 –Recommended Practice-	Application of Imazethapyr @1000 ml/ha as Post emergence at 20-25 DAS
T3- Recommended Practice-	Application of Imazethapyr + Imazamox @100gram /ha as Post emergence at 20-25 DAS
Date of sowing:	June-July 2024
Date of harvesting:	Sep-Oct 2024
Source of technology:	ICAR-DWR,Jabalpur
Characteristics of technology:	Efficient control of Grassy and broad-leaved weeds
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of Improved variety Jawahar Kodo 137
Year/Season:	Kharif-2024
Farming situation:	Rain-fed
Problem diagnosis:	Low yield of Kodo millet due to old variety seed
Thematic area:	Varietal evaluation
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Growing of old and unidentified variety of Kodo millet
T2 –Recommended Practice-	Growing of Improved variety Jawahar Kodo 137
T3- Recommended Practice-	-
Date of sowing:	August,2024

Date of harvesting:	November,2024
Source of technology:	JNKVV (2016)
Characteristics of technology:	Jawahar Kodo 137- Duration 100-105 days, Yield-26-29 quintal /ha. Suitable for solo as well as inter-cropping/mixed cropping system, moderately resistant to drought, lodging, shoot fly and Head smut.
Name of Crop/Enterprises:	Kodo millet
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of Improved variety Jawahar Kutki 4 of little millet (Kutki)
Year/Season:	Kharif-2024
Farming situation:	Rain-fed
Problem diagnosis:	Low yield of small millet due to old variety seed
Thematic area:	Varietal evaluation
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Growing of old and unidentified variety of little millet
T2 –Recommended Practice-	Growing of Improved variety Jawahar Kutki 4 of little millet
T3- Recommended Practice-	-
Date of sowing:	August,2024
Date of harvesting:	October,2024
Source of technology:	JNKVV (2016)
Characteristics of technology:	Jawahar Kutki 4- Duration 75-80 days, Yield-13-15 quintal /ha. Suitable for rain fed areas of Madhya Pradesh Resistant to drought, lodging, shoot fly and moderately resistant to head smut.
Name of Crop/Enterprises:	Little millet (Kutki)
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of post emergence herbicide for control of weeds in wheat crop
Year/Season:	Rabi,2024-25

Farming situation:	Irrigated
Problem diagnosis:	Low yield due to infestation of weeds in wheat
Thematic area:	Weed Management
No of trials:	07
No. of farmers involved	07
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of Post emergence herbicide 2,4-D-E @ 862 ml./ha. at 25-30 DAS
T2 –Recommended Practice-	Use of Post emergence herbicide (Sulfosulfuron 75%+ Metsulfuron Methyl 5% WG) @ 40 ml/ha at 25-30 DAS
T3- Recommended Practice-	Use of Post emergence herbicide (Mesosulfosulfuron methyl 3 %+ Iodosulfuronmethyl sodium 0.6 %WG) @ 400 ml./ha at 25-30 DAS
Date of sowing:	November,2024
Date of harvesting:	March,2025
Source of technology:	ICAR-DWR, Jabalpur
Characteristics of technology:	Efficient control of Grassy and broad-leaved weeds
Name of Crop/Enterprises:	Wheat

T3- Recommended Practice-	Spray of Imidacloprid 17.8 SL @ 100 ml/ha at 25 DAS.
Date of sowing:	Oct-Nov 2024
Date of harvesting:	Feb-Mar 2025
Source of technology:	IIWBR, Karnal
Characteristics of technology:	Integrated pest management practices
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	-

Recommendations for Deptt. Personnel	-
Feedback	-

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Plant Protection
Title of on-farm trial:	Assessment of wilt management in chickpea
Year/Season:	Rabi- 2024
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to attack of wilt in chickpea
Thematic area:	Integrated Disease Management
No of trials:	07
No. of farmers involved	07
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Spray of Carbendazim @ 1 g/lit.
T2 –Recommended Practice-	Use of <i>Trichoderma viride</i> @ 2.5 kg/ha with 50 kg FYM.
T3- Recommended Practice-	Use of <i>Pseudomonas fluorescens</i> @ 2.5 kg/ha with 50 kg FYM.
Date of sowing:	Oct-Nov 2024
Date of harvesting:	Feb-Mar 2025
Source of technology:	TNAU, Coimbatore
Characteristics of technology:	Integrated Disease Management through bio-control agent and chemicals
Name of Crop/Enterprises:	Chickpea
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Information about Home Science OFT: -1

Title of on-farm trial:	Assessment of acceptability of value added products of oyster mushroom
Year/Season:	Kharif, 2024
Problem diagnosis:	No value addition in mushrooms
Thematic area: (Focus area in DFI and nutri smart initiatives)	Value addition and nutritional security
No of trials:	20
No. of farmers/farm women involved	20
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	No value addition in mushroom
T2 –Recommended Practice-	Value added products (dry powder)
T3 –Recommended Practice-	Value added products badi ,papad,and pickle
Performance indicators Observation to be recorded	Sensory evaluation(9 Hedonic scale),Shelf life, nutrients analysis and BC ratio
Source of technology:	National Research Center for Mushroom (ICAR) Solan 2008
Characteristics of technology:	Nutritional security and nutrients availability
Name of Crop/Enterprises:	Mushroom

Farming situation:	
Date of sowing:	
Date of harvesting:	
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Information about Home Science OFT: -2

Title of on-farm trial:	Assessment of Acceptability of value added products from millet biscuits
Year/Season:	Kharif, 2024
Problem diagnosis:	Lack of awareness about nutritious food and no value addition in millets
Thematic area: (Focus area in DFI and nutri smart initiatives)	Value addition and nutritional security
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	No value addition in millets
T2 –Recommended Practice-	Wheat +Ragi + Jowar (20+40+40)
T3 –Recommended Practice-	Wheat + Rag i+ Jowar (20+60+20)
Performance indicators Observation to be recorded	Sensory evaluation(9 Hedonic scale),Shelf life, nutrients analysis and BC ratio
Source of technology:	TNAU 2012
Characteristics of technology:	
Name of Crop/Enterprises:	Ragi and jowar
Farming situation:	
Date of sowing:	
Date of harvesting:	
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Information about Home Science OFT: -3

Title of on-farm trial:	Assessment for inclusion of Amylase rich food (ARF,s) in porridge among weaning infants (0-5year).
Year/Season:	Rabi, 2024
Problem diagnosis:	Lack of awareness regarding healthy food
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional security
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Wheat+ARFpowder prepared from moong
T2 –Recommended Practice-	Consumption of porridge prepared from durum wheat variety
T3 –Recommended Practice-	Consumption of porridge prepared from durum wheat variety+Inclusion of ARFpowder prepared from moong
Performance indicators Observation to be	Sensory evaluation(9 Hedonic scale),Shelf life, nutrients analysis and BC ratio

recorded	
Source of technology:	TNAU 2016
Characteristics of technology:	Nutritional security and nutrients availability
Name of Crop/Enterprises:	Enterprises
Farming situation:	
Date of sowing:	
Date of harvesting:	
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Information about Home Science OFT: -4

Title of on-farm trial:	Assessment of malted sattu(sprouted chick pea+sprouted wheat) for malnourished children(1-5year).
Year/Season:	Rabi, 2024
Problem diagnosis:	Lack of awareness regarding healthy food and low protein diet in children.
Thematic area:	Nutritional security
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment
T1 – Farmers Practice-	Rice+veg.in diet
T2 –Recommended Practice-	Sattu (Chick pea+wheat)
T3 –Recommended Practice-	Malted Sattu (Chick pea+wheat)
Performance indicators Observation to be recorded	Shelf life,Quality analysis, handling cost (Rs/kg),BC ratio
Source of technology:	CFTRI,Mysore 2012
Characteristics of technology:	Rich protein diet .
Name of Crop/Enterprises:	Chick pea and wheat
Farming situation:	irrigated
Date of sowing:	
Date of harvesting:	
Recommendations for Farmers	
Recommendations for Deptt. Personnel

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
1	Cotton	INM	Use of 120:60:40 Kg NPK /ha + 5 t /ha FYM + use of Azatobacter and PSB @ 5 Kg /ha + Use of MgSo4 @ 5 Kg/ha+ use of 5 Kg Zn /ha	Biofertilizers and MgSo4	Kharif, 2024	0.40	07	Yield (q/ha).Bolls/Plant,B :C ratio,farmers reaction and feed back
2	Soybean	SFM	Use of plant growth regulator Sagarika (natural seaweed extract) in Soybean @ 625 ml /ha	Seaweed extract SAGARIKA	Kharif, 2024	0.40	07	Yield, Plant Height, B:C ratio, Farmers feed back
3	Chickpea	SFM	Use of Ammonium molybdate @ 1 g /Kg seed + 5 g Rhizobium and PSB each seed treatment	Biofertilizers and Ammonium Molybdate	Rabi,2024	0.40	07	Yield q /ha, No of Pods/plant, Farmers feed back
4	Wheat	SFM	Use of Nano urea @ 4 ml /litre twice as foliar application	Nano Urea	Rabi, 2024	0.40	07	Yield q /ha, No of Tillers/plant, Farmers feed back

1	Cotton	Integrated Pest Management	Management of Pink Ball Worm in Bt-Cotton (Spray of Profenophos 50 EC ai @ 1000 ml/ha, Emamectin Benzoate 5 SG @ 200 gm/ha at 15 days interval)	Profenophos, Emamectin Benzoate	Kharif-2024	0.40	07	No. of balls infested/ plant, Yield q/ha, Net return, B:C ratio
2	Cotton	Integrated Pest Management through ITK	Management of pests in Cotton by use of Dhatura (About 300 g leaves and unripe fruits of dhatura are crushed and heated with 1 litre water. The filtrate is used as a stock solution. About 300 ml of the stock solution is mixed in 15 litres water (one pump) and sprinkled over the crop. About 7-8 pumps of the dilute solution is required to sprinkle 1 acre field of 3-4 months old cotton crop.)	Dhatura stock solution	Kharif-2024	0.40	07	No. of insect/ leaf, Yield q/ha, Net return, B:C ratio
3	Onion	Integrated Pest Management	Management of Thrips in Onion (Spray of Lambdacyhalothrin @ 1.0 ml/lit + Use of yellow sticky trap @ 25/ha)	Lambdacyhalothrin	Rabi-2024	0.40	07	No. of thrips/plant, Yield q/ha, Net return, B:C ratio
4	Chickpea	Integrated Pest Management through ITK	Management of Helicoverpa in Chickpea by Neem and Parthenium leaves extract (Neem and Parthenium leaves are taken in equal quantity and dipped in water for 24 hours, after crushing them. The extracted solution @ 20 ml is sprayed in dilution with water in 10 litres water)	Neem and parthenium leaves extract	Rabi-2024	0.40	07	Nos. of Insect/M row length, Yield q/ha, Net return, B:C ratio
1	Postic laddu	Nutritional Security	Use of Drumstick leaves powder for making phostic laddu as supplements of nutrients	Postic laddu	Rabi/ 2024		10	BMI and availability of nutrients
2	Fruits and vegetables	Nutritional Security	Nutritional security through Nutritional kitchen garden	Vegetable kit and fruit plants	Round the year/ 2024		30	Per-capita consumption and availability of nutrients
3	Wheat	Value addition	Value addition of wheat dalia making	Dalia of Biofortified variety of Wheat HI 86-63Poshan	Round the year/ 2024		20	BMI and availability of nutrients
4	Wheat	Nutritional security	Bio-fortified variety for nutritional security. (Fe42.1ppm)and Zn(42.8ppm) variety with 12%protein)	(Pusa tejas) HI-8759	Rabi/ 2024		10	Per-capita consumption and availability of nutrients

Extension and Training activities under FLDs

S. No.	Activity	No. of activities	Month	Number of participants
1	Field days	08	Nov, Mar	200

2	Farmers Training	12	Jul, Nov	360
3	Media coverage	12	Jul, Nov	Mass
4	Training for extension functionaries	04	Jul, Nov	120

Details of FLD on Enterprises

Farm Implements

Name of the implement	crop	Season and year	No. of farmers	Area (ha)	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
							Demon.	Local check

*Field efficiency, labour saving etc.

Livestock Enterprises

Enterprise	Breed	No. of farmers	No. of animals, poultry birds etc.	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
						Demo.	Local check

*Milk production, meat production, egg production, reduction in disease incidence etc.

Other Enterprises

Enterprise	Variety/ breed/Species /others	No. of farmers	No. of Units/ area	Critical inputs	Performance parameters/ indicators	Data on parameter in relation to technology demonstrated	
						Demo.	Local check

Cluster Demonstration of Oilseed and Pulses under NFSM (2024-25)

Sl. No.	Crop	Them atic area	Technology for demonstration	Critical inputs	Seaso n and year	Area (ha)	No. of farmers/ demonst ration	Parameters identified
1	Soybean	ICM	Improved variety with improved cultivation practice	Seed, Seed treatment material like fungicides, biofertilizer, weedicide, pesticide etc.	Kharif - 2024	10	25	Yield q/ha, Net return, B:C ratio
2	Chickpea	ICM	Improved variety with improved cultivation practice	Seed, Seed treatment material like fungicides, biofertilizer, weedicide, pesticide etc.	Rabi- 2024- 25	10	25	Yield q/ha, Net return, B:C ratio

Extension and Training activities under CFLDs Oilseed and Pulses

3	Bhuiphal	Chhegaonmakhan	22

1. No. of farm families selected per village :

2. No. of survey/PRA to be conducted:

3.11. Activities of Soil and Water Testing Laboratory

Year of establishment: 2005

List of equipments purchased:

Sl. No.	Name of the Equipment	Qty.	Condition
1	Spectronic-20 spectrophotometer	01	Serviceable
2	Systronic microprocessor Flame photometer	01	Unserviceable
3	Digital pH meter	02	Serviceable
4	Hot air oven	01	Serviceable
5	Hot plate	01	Serviceable
6	Fisher type Agar pestle mortor	01	Serviceable
7	Demineraliser	01	Unserviceable
8	Kelplus automatic nitrogen estimation system (nitrogen analyser)	01	Serviceable
9	Grinder, rotatory shaker, laboratory Stirrer	01	Unserviceable
10	LPG gas cylinder + regulator	2+1	Serviceable
11	Gas stove	01	Serviceable
12	LG 310 litre refrigerator	01	Unserviceable
13	Voltage Stabilizer (5/3 KV)	04(2+2)	Serviceable
14	Shimadzu electronic portable balance and Shimadzu electrical analytical	2(1+1)	Serviceable
15	Digital Conductivity meter	02	Serviceable
16	Steel executive office table	06	Serviceable
17	Steel Elmirah	08	Serviceable
18	Steel executive table	01	Serviceable
19	Laboratory teak wood stool	15	10 Serviceable
20	Wooden rack	14	Serviceable
21	Laboratory table made out of best quality	03	Serviceable
22	Exhaust fan	03	2 Serviceable
23	Steel chair (Chrome)	15	Serviceable
24	Steel rack (large + small)	6 (4+2)	Serviceable
25	Chair (revolving)	07	Serviceable
26	Racks	05	Serviceable
27	Wooden bench	04	Serviceable
28	Wooden table	04	Serviceable
29	Garmin GPS-72	01	Serviceable
30	Mridaparikshak mini lab	01	Serviceable

31	Mridaparikshak mini lab	01	Serviceable
32	Iron racks	06	Serviceable
33	Acetylene gas cylinder with regulator	2 (1+1)	Serviceable

Details of samples analyzed so far:

Details	No. of Samples	No. of Farmers (SHC)	No. of Villages	Amount realized
Soil Samples	1000	1000	50	150000
Water Samples	-	-	-	-
Total	1000	1000	50	150000

LINKAGES

Functional linkage with different organizations

Name of organization	Nature of linkage
Department of Agriculture	Organization of Extension activities, trainings, sangosthi, diagnostic visits
Department of Horticulture	Organization of Extension activities, trainings, sangosthi, diagnostic visits
Department of veterinary	Organization of Extension activities
IGSSS	Conduction of CFLDs, FLDs, Gathering of farmers, extension activities
Agakhann Rural Supprot Prog.	Organization of Extension activities
ITC SIPA	Organization of Extension activities, trainings, sangosthi,
Arpan	Organization of Extension activities, sangosthi
Spandan	Organization of Extension activities, trainings

Details of linkage with ATMA / NFSM

a) Is ATMA implemented in your district Yes/No

Name of Programme	Nature of linkage
Krishak Sangosthi, Farmer Field School Scientist- Farmer Interaction workshop Kisan Mela	Collaborate Organization , Lecture delivering, Interaction with farmers Consultation to farmers Exhibition of technologies

Give details of programmers implemented under National Horticultural Mission

Name of Programme	Nature of linkage
Farmers training programmes	Lectures in trainings

Action plan for Flagship programmes implemented at KVK

(NICRA, ARYA, Natural farming, CBBO, Seed Hub, Agri Drone etc)

Name of Flagship programmes

Month	Activity details	Targeted Beneficiaries/Area/Coverage
Apr, May, Jun, Aug, Sep, Dec	Awareness Programme (24)	650
Jan Mar Jun, Jul, Oct, Nov.	Trainings to prepare different solutions in Natural farming (12)	350
Jul, Oct	FLDs	20

Planning for Crop Cafeteria

Total Area of Crop cafeteria: _____ Sq m

Crop	Season	Variety	Particulars /details	Area (Sq m)
Soybean	Kharif	RVS 76, JS 2034, JS 2069, JS 2098, JS 20116, RVS 2001-4, RVS 18, RVS 24, JS 2029, JS 9305, JS 9560, JS 335		1000
Minor millet	Kharif	JK 41, JK 8, Sanwa Local, Kakun Local		
Wheat	Rabi	Black wheat, HD 2932, HI 8713, HI 1544, HI 8663, HI 1605, HI 8759, HI 1531, HI 8627, HI 8737, HI 8777		1000
Gram	Rabi	Black chickpea, RVKG 101, JG 12, JGK 1,		

		RVG 201, RVG 202, RVG 203, JAKI 9218, JG 16		

Details of Demonstration Unit at KVK

Demonstration Unit	Particulars /details	Area (Sq m)	Output /Production
Poultry	Kadaknath	200	1000 chicks & 200 nos. adult birds
Azola	Azola production	100	35 q
IFS	Plantation with maize	20000	60 q maize, 2 q lemon, 2 q guava
Natural Farming	Demonstration of different inputs of Natural Farming	4000	2000 litres

1.5.(A). Details of SAC meeting to be conducted in the year

Sl. No.	Tentative Date
1	June, 2024
2	September, 2024

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 1	Crop production + Animal husbandry
2	AES – 2	Crop production + Animal husbandry + Horticulture
3	AES – 3	Crop production + Animal husbandry + Spices + Medicinal crops
4	AES - 4	Crop production + Animal husbandry + flowering plants
5	AES - 5	Crop production + Vermicompost + Nadep
6	AES - 6	Crop production + Backyard poultry

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	XI Nimar Valley	Krishi Vigyan Kendra, Khargone belongs to XI number zone i.e. Nimar Vally Zone. The zone comprises of Khargone, Khandwa, Barwani, Harda and Dhar (Manawar, Dharampuri and Gandhwani tehsils). The Nimar Valley zone is predominantly tribal area. The Nimar Zone is situated between 200 40' and 220 50' North latitude and 740 42' and 770 20' East longitude. The zone is characterised by hills as well as plain areas. The height ranges between 200-500 m from MSL and major part lies on uplands between the valley of Narmada and Tapti. The zone is surrounded by Malwa Plateau and Jhabua hills in North-West and Central Narmada Valley in East-North. The total area of Nimar Valley zone is 2535000 ha which is about 8.23% of the total geographical area of M.P. The total population of the zone is 4123780 out of which 10.61% belongs to SC and 43.22% to ST category. The male-female ratio is 952.4. The literacy percentage of the zone is 36.53%. The Nimar Zone is the hottest belt of the country. The maximum temperature ranges upto 430 to 460 C during summer season and minimum temperature fluctuates between 100C to 120C during winter season. The average annual rainfall is 835 mm. Generally monsoon commences from June and maximum rainfall is received during July-August. The total rainy days in Khargone

		district ranged 24 to 54 days. The Nimar Zone has dry climate except during the South-West monsoon season.
		The Nimar Zone has 8.23% area of total geographical area of M.P. It has 63% total cultivable land, 32% forest area and 2% fallow waste land. Major source of irrigation in Nimar Zone is wells (59%), canals (36%), tube wells (8%) and ponds (1%). Major holding sizes in Nimar Zone are large (6 %), medium (24%), semi medium (27%), small (26%) and marginal (17%). The major soil types are shallow black, medium black , heavy black and light soil.
		The major crops of the zone are jowar, maize, groundnut, soybean, moong, urad, cotton, arhar, wheat and gram. Among horticulture crops chilly, ginger, garlic, turmeric, onion, banana, guava, mango, potato, tomato, bhindi, brinjal and cauliflower are the major crops. Vegetables (16%), fruits, flowers and medicinal crops (48%) and condiments (36%) are high valued crops in the zone. The Nimar Zone has 55% cows, 28% goats and 17% buffaloes. The variation in soils, rainfall and physiography are very large, hence agro-ecological situations are variable in the district.

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	AES – 1	Medium black cotton soil, medium rainfall
2	AES – 2	Shallow black cotton soil, low rainfall
3	AES – 3	Alluvial soils, medium to low rainfall
4	AES – 4	Hilly area and marginal land, high to low rainfall
5	AES – 5	Saline alkaline soils
6	AES – 6	Black cotton soil, medium to low rainfall

S. No.	Agro-ecological situations	Characteristics
1	AES – 1	Medium black cotton soil, medium rainfall (643 to 1018 mm) Clay to sandy clay loam Cotton, jowar, groundnut, pigeonpea, soybean, wheat, gram and vegetables Cotton based inter and mixed cropping orchards, ground water moderate Bhikangaon, Khargone, Segaon, Zirniya, Barwaha, part of Bhagwanpura and Kasrawad
2	AES – 2	Shallow black cotton soil, low rainfall (770 to 800 mm) Clay to sandy clay loam Cotton, jowar, ground nut, arhar, moong, urad, soybean, sugar cane, wheat, gram, vegetables and fruits Cotton and jowar based intercropping partially mechanized Kasrawad, Segaon, part of Barwaha and Khargone
3	AES – 3	Alluvial soils, medium to low rainfall (980 to 1000 mm) Clay to sandy clay loam Cotton, maize, sugarcane, soybean, wheat gram, vegetables and banana 30% mechanized irrigation, summer groundnut Maheshwar, Barwaha and Part of Kasrawad
4	AES - 4	Hilly area and marginal land, high to low rainfall Sandy loam to sandy clay loam 700 to 900 Deshj cotton, jowar, maize, arhar, moong, urad, soybean, wheat, gram, vegetables and fruits Contour irrigation, mixed cropping Bhagwanpura, Zirniya and part of Maheshwar

5	AES - 5	Saline alkaline soils Clay and sandy clay loam to sandy loam 1050 to 1100 Cotton, Jowar, Pulses, Soybean, Sugarcane, Wheat, Gram, Vegetables and Orchards Native salt, sodium rich, ground water blackish Barwaha, Maheshwar
6	AES - 6	Black cotton soil, medium to low rainfall Clay to clay loam 634 to 1000 Cotton, jowar, sugarcane, soybean, wheat, gram and vegetables Rich ground water, foot hill soils, double cropped, well irrigation Bhagwanpura and part of Khargone

SWOT Analysis of each Agro-Ecological Situations of district

AES-1 (name)

Strength	Weakness	Opportunities	Threats
Very good diversity of crops can be grown	This zone is dominated with tribals. They are not highly tend to change.	No. of crops can be introduced among the farmers	Land holdings of the farmers are very low.

AES-2 (name)

Strength	Weakness	Opportunities	Threats
•	•	•	•

AES-3 (name)

Strength	Weakness	Opportunities	Threats
This zone has good quality of Soil. Irrigation facility is very good. Farmers have large holding of land	Farmers are not supporting to govt. extension agencies They are not actively participated in trainings, Goshthis and other agricultural programmes	They can grow high income return horticultural crops.	•

AES-4 (name)

Strength	Weakness	Opportunities	Threats
•	•	•	•

Add AES if needed

Details of Operational area / Villages (2024)

Sl. No.	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Goganwa	Goganwa	Baijapur	Cotton, Chilli, Maize, Wheat, Chickpea	Low yield due to use of local	Variety replacement

					varieties Lack of entrepreneurship Infestation of insect and pests	Development of entrepreneurship Integrated pest management
2	Jhirniya	Jhirniya	Saikheda	Soybean, Pigeonpea, Maize, Wheat, Chickpea	Low yield due to use of local varieties Imbalance use of fertilizers Infestation of insect and pests	Variety replacement Integrated nutrient management Integrated pest management
3	Bhikangaon	Bhikangaon	Chikalwas	Cotton, Chilli, Maize, Wheat, Chickpea	Low yield due to use of local varieties Imbalance use of fertilizers Infestation of insect and pests	Variety replacement Integrated nutrient management Integrated pest management
4	Segaon	Segaon	Dasanawal	Cotton, Soybean, Chilli, Maize, Wheat, Chickpea	Low yield due to use of local varieties Lack of entrepreneurship Infestation of insect and pests	Variety replacement Development of entrepreneurship Integrated pest management
5	Khargone	Khargone	Idaratpura	Cotton, Soybean, Chilli, Wheat, Chickpea, Guava	Low yield due to use of local varieties Lack of entrepreneurship Infestation of insect and pests	Variety replacement Development of entrepreneurship Integrated pest management

Priority / Thrust areas

S. No.	Particulars
1.	Integrated crop management
2.	Integrated nutrient management/Nutrient management
3.	Integrated pest management
4.	Integrated disease management
5.	Integrated weed management/Weed management
6.	Use of high yielding varieties
7.	Seed treatment and seed inoculation
8.	Soil and water management
9.	Natural Farming
10.	Balance nutrition
11.	Feed and feeding management
12.	Farm mechanization
13.	Value addition
14.	Fruit preservation
15.	Nutritional gardening
16.	Use of improved farm implements
17.	Development of entrepreneurship

18.	Deworming in animals
19.	Group dynamic and group discussion
20.	Improve communication through Audio visual aids, meeting, gosthi, seminar etc.

TECHNICAL PROGRAMME

B. Abstract of interventions to be undertaken

S. N o.	Thrust area	Crop/ Enterp rise	Identified Problem	Interventions					
				Title of OFT if any	Title of FLD if any	Title of Traini ng if any	Title of trainin g for extens ion person nel if any	Extens ion activiti es	Supply of seeds, planting materials etc.
1	Poor Soil Fertility Managem ent	Cotton	Low yield due to poor use efficiency of plain urea	Assessment of nano urea for Cotton production maximization under Cotton-Wheat cropping system	-				Nano urea
2	High use of chemicals	Greeng ram	Poor soil health, high cost of cultivation and poor quality produce	Assessment of Natural Farming in Greengram	-				Jivamrit
3	Poor Soil Fertility Manage ment	Wheat	Low yield due to poor use efficiency of plain urea	Assessment of nano urea for maximization of wheat production under cotton-wheat cropping system	-				Nano urea
4	Poor Soil Fertility Manage ment	Soybea n	Poor soil health, high production cost and poor quality produce	Assessment of INM, organic farming and natural farming in Soybean	-				Fertilizer
5	Poor Soil Fertility Manage ment	Guava	Poor soil health, high cost of cultivation and poor-quality produce	Assessment of organic and natural farming in Guava	-				Jivamrit, Ghan Jivamrit
6	Lack of new productio n technolo gy	Onion	Low yield due to the use of old variety N-53 and traditional practices of onion production	Assessment of onion varieties with improved production technology for kharif onion	-				Seed
7	Poor disease manage ment	Tomato	Low yield due to heavy incidence of fungal diseases in tomato	Assessment of IDM module for management of early blight in tomato	-				Pesticide
8	Poor pest manage ment	Cauliflo wer	Low yield due to heavy incidence of fungal diseases in cabbage	Assessment of IPM module for control of DBM in cauliflower	-				Pesticide
9	Poor farming system	Cotton and Wheat	Low income due to poor adoption of Agri-enterprises	Crop production + Livestock + Vermicompost	-				-
10	Poor weed manage ment	Soybea n	Low yield due to heavy infestation of weeds	Assessment of weed management in soybean	-				Weedicide
11	Poor weed	Chickp ea	Low yield due to heavy infestation of	Assessment of Topramazone 33.6	-				Weedicide

	manage ment		weeds	SC in Chickpea					
12	High use of chemical s	Chickp ea	Poor soil health, high cost of cultivation and poor quality produce	Assessment of Natural Farming in Chickpea	-				Jivamrit
13	High use of chemical s	Pigeon pea	Poor soil health, high cost of cultivation, Poor quality of produce	Assessment of Natural Farming in Pigeonpea	-				Jivamrit
14	Low plant populatio n	Cotton	Low yield due to low plant population	Assessment of HDPS Planting in Cotton	-				-
15	High use of chemical s	Wheat	Poor soil health, high cost of cultivation, poor quality of produce	Assessment of Natural Farming in Wheat	-				Jivamrit
16	Lack of new variety	Chickp ea	Low yield due to old variety and incomplete use of technology in chickpea	Assessment of production technology of Chickpea under soybean – chickpea cropping system	-				Seed
17	Poor technolo gy knowled ge	Soybea n	Poor soil health, high cost of cultivation and poor quality produce	Assessment of effective extension methods for TOT of Natural Farming in Soybean	-				-
18	Poor technolo gy knowled ge	Cotton	Lack of knowledge and poor adoption level for use of drip and fertigation in Cotton	Assessment of knowledge and adoption level of farmers for use of drip and fertigation in Cotton	-				-
19	Poor technolo gy knowled ge	Chickp ea	Poor soil health, high cost of cultivation and poor quality produce	Assessment of effective extension methods for TOT of Natural Farming in Chickpea	-				-
20	Wrong method of urea applicati on	Wheat	Farmers applied urea before irrigation in wheat which causing severe loss of nitrogen	Assessment of application method of urea in wheat	-				-
21		Castor		-	Demonstrati on of RDF 60:40:40:40 NPKS kg/ha + FYM 5 t/ha in Castor				Fertilizer
22		Sorghu m		-	Demonstrati on of 100:50:30:0 5 NPKZn kg/ha + FYM 5 t/ha in Sorghum				Zinc
23		Maize		-	Demonstrati				Fertilizer

					on of 120:60:40:0 5 NPKZn kg/ha + FYM 10 t/ha + Azotobactor @5 g/kg seed in Maize				
24		Okra		-	Demonstrati on of Neem oil 3000 ppm @ 1500 ml/ha at 15 DAS + need based spray of Cyantranilipr ole 10% OD @ 900 ml/ha in Okra.				Neem oil, Cyantranilipr ole 10% OD
25		Chilli		-	Demonstrati on of Seed treatment with Imidacloprid 70 WS @ 10g/kg seed, covering nursery beds with nylon net of 40 mesh, dipping seedling roots in Imidacloprid 17.8 SL @ 0.3 ml/l of water for 20 minutes, growing 3 rows of maize as barrier crops, installation of yellow sticky trap @ 50/ha, Initial rouging of infected plants soon after infection and burn it. spray of Neem oil @ 1lit/ha/ 2- 3 times at 10 days interval + need based spray of				Pyriproxyfe n 10% EC and Fenpropathri n 30% EC

					insecticides viz., Pyriproxyfen 10% EC @ 500 ml /ha and Fenpropathrin 30% EC @ 250 ml/ha in Chilli				
26		Onion		-	Demonstration of Blue sticky trap @ 50/ha at 10 DAP + Neem oil 3000 ppm @ 600 ml/ ha at 20 DAP + Need based spray of Fipronil 5% SC @ 1 lit/ha in Onion				Fipronil 5% SC
27		Onion			Demonstration of Quizalofop ethyl 4% EC + Oxyfluorfen 6 % EC @ 1 lit/ha. at 20 DAT + 1 HW at 40 DAT in Onion				Quizalofop ethyl 4% EC + Oxyfluorfen 6 % EC
28		Soybean			Demonstration of new improved variety of Soybean JS-20-69				Seed
29		Soybean			Demonstration of Imazethapyr 35%+Imazox 35% WG @ 70 g/ha PoE at 20 DAS in Soybean				Herbicide
30		Wheat			Demonstration of new improved variety of Wheat HI-8737				Seed
31		Chickpea			Demonstration of new improved				Seed

					variety of Chickpea RVG- 203 Variety				
32		Soybean			Demonstration of new improved variety of Soybean JS 20-34				Seed
33		Soybean			Demonstration of Propaquizalop 2.5 % + Imazathapyr 3.75% ME @ 2 l/ ha at 15 DAS + 1 Kolpa at 30 DAS in Soybean				Weedicide
34		Wheat			Demonstration of new improved variety of HI-8759				Seed
35		Maize			Demonstration of IPM (Use of early maturing variety + seed treatment with Cyantraniliprole 19.8 % + Thiamethoxam 19.8 % FS @ 6 ml/kg seed + Chlorantraniliprole 18.5% SC @ 150 ml /ha at 20, 40 DAS) in Maize				Chlorantraniliprole 18.5% SC

3			

Success stories/Case studies identified for development as a case:(no.)

Indicate the specific training need analysis tools/methodology followed for(Viz PRA, AES, line dept, ex trainees, interface,)

S. No.	Training	Need analysis tools/methodology followed
1	Identification of courses for farmers/farm women	Field Visit & PRA Survey
2	Rural Youth	Field Visit & Survey
3	In-service personnel	Interface
4	methodology for identifying OFTs/FLDs	PRA
5	Matrix ranking	PRA

Field activities

Name of villages identified for adoption with block name:

S.No.	Name of Village	Name of Block	Distance of village from KVK (Km)
1	Rasgaon	Segaon	35
2	Borgaon	Goganwa	18
3	Pipliyabavadi	Bhagwanpura	30 km

1. No. of farm families selected per village :

2. No. of survey/PRA to be conducted:

3.11. Activities of Soil and Water Testing Laboratory

Year of establishment:2005

List of equipments purchased:

Sl. No.	Name of the Equipment	Qty.	Condition
1	Flame Photometer	1	Working
2	Hot Air Oven	1	Working
3	Hot plate (chulha), Lighter, Tube	1	Working
4	Pressure Regulator + Gas Cylinder	1	Working
5	Sterling Servo Stabilizer 5 KVA	1	Working

6	Caption Automatic Voltage Stabilizer 3 KVK	1	Working
7	Digital pH meter	1	Working
8	Grider	1	Working
9	Rotary Shaker & Lab Stirrer	1	Working
10	Wooden Rack	1	Working
11	Fisher type Agate Pestle Mortar	1	Working
12	Demineralizer	1	Working
13	Spectrophotometer	1	Working
14	Micro Kjeldhal Distillation Apparatus	1	Working
15	Electronin Automatic Macro Block Digestion System	1	Working
16	Shimadzu Electronic Analytical Balance AUC 120	1	Working
17	Hot Plate	1	Working
18	Digital Conductivity Meter	1	Working
19	Kelpluse Scruber System	1	Working
20	Electronic Kelpluse	1	Working
21	Mridaprikshak soil testing mini lab	1	Working

Details of samples analyzed so far:

Details	No. of Samples	No. of Farmers (SHC)	No. of Villages	Amount realized
Soil Samples	1000	1000	25	
Water Samples				
Total	1000	1000	25	

LINKAGES

Functional linkage with different organizations

Name of organization	Nature of linkage
Department of Agriculture	Scientific and Diagnostic advisory
Department of Horticulture	Scientific and Diagnostic advisory
Department of Animal Husbandry	Animal Health Camps and advisories
Department of Agriculture Engineering	Scientific Advisory and Trainings
Govt. Degree Colleges of the district	Internships to students on different aspects of Agriculture as per New Education Policy
NGOs	Training and advisories
Ring Partner KVKs	Sharing technical Informations

Details of linkage with ATMA / NFSM

a) Is ATMA implemented in your district Yes/No

Name of Programme	Nature of linkage
Kisan Mela, Kisan Goshthis and Special Programmes	Farmers mobilization
Trainings	KVK Scientist act as expert trainer
FFS	KVK Scientist act as subject expert facilitator
Planning and designing of FLDs	KVK help in implementation of Cluster FLDs conducted by ATMA

Give details of programmers implemented under National Horticultural Mission

Name of Programme	Nature of linkage

Action plan for Flagship programmes implemented at KVK
(NICRA, ARYA, Natural farming, CBBO, Seed Hub, Agri Drone etc)

6	Rain Water harvesting system	State Govt.	2018	-	1000000	-	-	60% Completed
7	Threshing floor	State Govt.	2016	-	49000	-	-	Completed
8	Farm godown	-	-	-	-	-	-	No

B) Vehicles

Type of vehicle	Year of purchase	Cost (Rs.)	Total kms. Run	Present status
Tractor (Power Tiller)	2005	3,06,918	3576	Condemned
Motor Cycle 2	2004	47,799	48,869	Condemned
Bolero(Jeep)	2004	4,08,558	3,05,092	Condemned
Bolero(Jeep)	2023			Running

C) Equipment & AV aids

Name of the equipment	Year of purchase	Cost (Rs.)	Present status
Projector	2004	17411	Working
Xerox Machine	-	-	-
Generator	2022	38330	Working
Video Camera	-	-	-
Computer, Laser Printer	2021	50000	Working
UPS 600 VA	-	-	-
Stabilizer 2 KVA	-	-	-
Stabilizer	-	-	-
Inverter 600 VA (2)	2020	9000	Working
Inverter Luminous	2022	5500	Working
Inverter Battery (2)	2020	15930	Working
Inverter Battery	2022	16500	Working

1.5.(A). Details of SAC meeting to be conducted in the year

Sl. No.	Tentative Date
1	June 2024
2	December 2024

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	Agriculture + Animal Husbandry	Kharif- Pearl millets, Sorghum, Paddy, Sesame Rabi- Mustard, Wheat, Chickpea Zaid- Fallow, Summer moong AH- Buffalo, Goat, Cattle, Poultry
2	Agriculture + Horticulture	Kharif- Pearl millets, Sorghum, Paddy, Sesame Rabi- Mustard, Wheat, Chickpea Zaid- Fallow, Summer moong Horti- Vegetable pea, Tomato, Chilli, Brinjal, Guava and Papaya

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	Zone VII, Gird	22 0 43 ' N latitude and 76 0 54 E longitude mean

2	Sub tropical	annual rainfall 746.1 mm. The mean maximum and minimum temperature range is between 30-45 ⁰ C for the month of March to June and Minimum temperature ranging Oct to Mar 2 to 25 ⁰ C
3	Intermediate	

SWOT Analysis of each Agro-Ecological Situations of district AES-1 (Zone VII, Gird)

Strength	Weakness	Opportunities	Threats
- Multiple option for farmaers agriculture production - Farmer can decrease the cost of cultivation through natural farming - Zaid fallow land used for cultivation - Diversification for horticulture crops - Sufficient Availability of productive livestock population	- Farming is labour intensive and requires expertise - Low yield due to weed infestation and disease pest attack in crops. - Low yield due to poor quality seed and inadequate fertilizer - Unawareness about nursery management techniques in vegetables and spices crops. - Limited knowledge about food preservation and agri based entrepreneurship. - Lack of awareness about other Horticulture enterprise - Low milk yield due to Improper management & poor feeding of animals. - Low milk production due to endo & ecto parasite infestation. - High Buffalo calf mortality due to warm infestation. - Liver fluke of goats	- Time for increase millets (Pearl millet and Sorghum) existing area in the district. - Global market for need/farm size based. machinery/technology - Decrease inflow of migrant labour - Liberal policy of government regarding subsidy and employment generation. - Capacity building of scientist/ engineers/manufactures/farmers. - Eco-friendly environment. - Waste scope of natural farming. - Waste option of livestock production with introduction of kadaknath poultry - More scope of increase area in fruit, vegetables and spices crops in the district - Development of dairy and millet products and bio products as entrepreneurship for rural youth	- Climate change and sustainability of agriculture. - Farmers are not getting appropriate rates of their farms and animal husbandry produce. - Small agriculture industry are not available for economic upliftment of farmers - Poor quality and exposure of farm machinery. - Scarcity of farm labour due to migration. - Poor infrastructure and connectivity. - Area covered with Chambal ravines.

Land Use Pattern

Particulars	Area “000 ha”
Total Geographical area	4459 km ²
Forest	3320
Waste Land	37691
Cultivable waste and alkaline land	22420
Pastures	18856
Bushes	522
Current Fallow	1962
Other Fallow	4723
Agricultural Land	341382
Area Sown	403400
Kharif	102970
Rabi	318000
Zaid	1360
Cropping Intensity	126.5%

Irrigated Area with Different Sources:

S. No.	Description	Area (ha)
1	Canal	182000
2	Well	669000
3	Tube well	181000
4	Ponds	4000
5	Others	18000

Soil types

S. No.	Soil type	Characteristics	Area “000 ha”
1	Deep soil	-	350.40
2	Medium deep soil	-	77.0
3	Shallow soil	-	17.20

Note: Figure. In parenthesis denotes the percentage of total area.

Area, Production and Productivity of major crops cultivated in the district

S. No	Crop	Area (ha)	Production (Qt.)	Productivity (q/ha)
1	Paddy	14000	59500000	4250
2	Sorghum	10380	25119600	2420
3	Pearl millet	60560	152611200	2520
4	Piegon pea	4000	5140000	1285
5	Green gram	3080	4296600	1395
6	Blackgram	1410	1452300	1030
7	Sesame	13500	5535000	410
8	Wheat	128600	588988000	4580
9	Mustard	156600	297540000	1900
10	Chickpea	17500	36050000	2060
11	Field Pea	7400	15984000	2160
12	Lentil	4300	5848000	1360
13	Barley	3500	11690000	3340
14	Linseed	100	58000	580

Weather data (Jan, 2023- Dec., 2023)

Month /Year	Rainfall (mm)	Temperature (°C)	
		Maximum	Minimum
Jan. 2023		The mean maximum and minimum temperature range is between 30-45°C for the month of March to June and Minimum temperature ranging Oct to Mar 2 to 25°C	
Feb. 2023			
Mar. 2023			
Apr. 2023			
May. 2023			
Jun. 2023			
July. 2023			
Aug. 2023			
Sept. 2023			
Oct. 2023			
Nov. 2023			
Dec. 2023			

Production and productivity of livestock, Poultry, Fisheries etc. in the district

Category	Population	Production	Productivity
Cattle			
Crossbred/ Indigenous	156579	610Ton	1.5-8 kg/day
Buffalo	202460	921 Ton	3.5-7.5 kg/day
Sheep			
Crossbred/ Indigenous	12306	 MT wool	300-400 g/Sheep
Goats	226873	34 Ton	250-400 ml/day
Pigs Crossbred/ Indigenous		---	---
Rabbits			
Poultry			
Hens		 Lakh eggs	 eggs/ bird/yr
Turkey and others			
Category	Area	Production	Productivity
Fish	 (ha)	q/ month	 q/ha.

Details of Operational area / Villages (2023)

Sl. No.	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Raun	Raun	Mangarh	Pearl millet, Sorghum, sesame, Blackgram, Mustard, Wheat, Chickpea, Livestock, Vegetables and fodder crops.	* Low yield due to weed infestation and disease pest attack in crops * Low yield due to poor quality seed and inadequate fertilizer * Low milk yield due to Improper management & poor feeding of animals. * Low milk production due to endo & ecto parasite infestation. * High Buffalo calf mortality due to warm infestation. Liver fluke of goats * Low Yield of Vegetables, Spices & Fruits * Non availability of quality seed and Planting material	* Crop Diversification * Quality Seed/Planting material availability * Natural Resource Management (Soil health and rain water harvesting) * INM, IPM, IWM, IDM in major crops * Feeding management in Live stock * Disease management in livestock * Breed improvement of livestock * Parasite control of livestock.
2	Mehgaon	Mehgaon	Gigarakhi			
3	Ater	Ater	Angadpura			
4	Ater	Ater	Jalpuri			
5	Gohad	Gohad	Chhimka			
6	Lahar	Lahar	Chiroli			
7	Lahar	Lahar	Jaganpura			
8	Lahar	Lahar	Girwasa			

Priority / Thrust areas

S. No.	Particulars
1.	I. Promotion of Millets crops-Jwar, Bajra II. Promotion of bio fortified varieties of different cereals, oilseed, pulse crop
2.	I. Promotion of indigenous cattle II. Promotion of Kadaknath rearing in backyard system III. Breed improvement of desi/local buffalo and goats
	I. Promotion in vegetables and fruit crops II. Introduction of exotic vegetables

TECHNICAL PROGRAMMES
A. Details of targeted mandatory activities by KVK

OFT		FLD and CFLD	
1		2	
Number of OFTs	Number of Farmers	Number of FLDs	Number of Farmers
21	200	19	385

Training		Extension Activities	
3		4	
Number of Courses	Number of Participants	Number of activities	Number of participants
74	1850	325	3712

Seed Production (Qtl.)	Planting material (Nos.)
550	15000

B. Abstract of interventions to be undertaken

S. No.	Thrust area	Crop/Enterprise	Identified Problem	Interventions					
				Title of OFT if any	Title of FLD if any	Title of Training if any	Title of training for extension personnel if any	Extension activities	Supply of seeds, planting materials etc.
1	INM	Pearl Millet	Access use of Nitrogen in urea granule form	Assessment of application of Nano urea on pearl millet	-	-	-	-	Nano Urea
2	INM	Pearl Millet	Low yield due to imbalance use fertilizer	Assessment of zinc sulphate on pearl millet	-	-	-	-	Zinc Sulphate
3	Varietal	Mustard	Low yield due to old variety	Assessment of HYV of mustard (Rukmani) DRMR 1165-40	-	-	-	-	Seed
4	Varietal	Wheat	Low yield due to use of old variety Lok-1/GW 322	Assessment of improved varieties of wheat DBW 303	-	-	-	-	Seed
5	NF	Pearl Millet	There is heavy use of chemical fertilizer & pesticides which needs to reduce in order to increase the net profit of crops	Assessing effective extension strategy for transfer technology under natural farming in pearl millet	-	-	-	-	Interview Schedule
6	Social Media	Paddy	Unawareness, Lack of timely dissemination, lack of proper solution of problem, lack of communication.	Study on ICT Tools, Social media (Whatsapp) in dissemination of agricultural message on neck blast disease of paddy.	-	-	-	-	-
7	NF	Wheat	There is heavy use of chemical fertilizer & pesticides which needs to reduce in order to increase the net profit of crops	Assessing effective extension strategy for transfer technology under natural farming in Wheat	-	-	-	-	Interview Schedule
8	HOV	Okra	Low economic return due to lack of improved variety	Assessment of early improved variety and hybrid of Okra	-	-	-	-	Seed
9	IPM	Bottle Guard	Low economic return due to low yield	Assessment of integrated pest management of fruit fly in bottle guard	-	-	-	-	-
10	HOV	Tomato	Low economic return due to lack of improved variety	Assessment of Improved Variety of Tomato	-	-	-	-	Seed
11	HOV	Cabbage	Low economic return due to lack of improved variety	Assessment of improved variety of cabbage	-	-	-	-	Seed
12	VR	Sorghum	Low yield due to SPV 1709 Old Variety of Sorghum	Assessment of High yielding variety of Sorghum RJV-1862.	-	-	-	-	Seed
13	VR	Sorghum	Low yield due to old Swati variety of Sorghum	Assessment of High yielding variety of Sorghum RJV-2357.	-	-	-	-	Seed
14	VR	Paddy	Low yield due to lack of irrigation water during grain forming stage	Assessment of High Yielding variety of Pusa Basmati 1509	-	-	-	-	Seed

15	CRP	Mustard	Low yield due to old variety of Wheat.	Assessment of Mustard variety RH 749.	-	-	-	-	Seed
16	VR	Wheat	Low yield due to old variety of Wheat.	Assessment of Wheat variety PUSA Tejas (HI-8759)	-	-	-	-	Seed
17	SFM	Paddy	Low fertilizer use efficiency of DAP	Assessment of Nano DAP in Paddy Crop	-	-	-	-	Nano DAP
18	SFM	Paddy	Low Yield and Khaira disease of zinc deficiency	Assessment of Zinc Fertilizer in Paddy Crop	-	-	-	-	Zinc sulphate
19	SFM	Wheat	Low fertilizer use efficiency of Urea	Assessment of Nano Urea in wheat crop	-	-	-	-	Nano Urea
20	SFM	Wheat	Low fertilizer use efficiency of DAP	Assessment of Nano DAP in wheat crop	-	-	-	-	Nano DAP
21	CRP	Wheat	Excess ploughing and more expenses	Assessment of wheat crop zero tillage method of sowing	-	-	-	-	Machinery
22	LPM	Buffalo calf	-	-	Demonstration of scheduled deworming for control of calf mortality	-	-	-	Dewormer
23	LPM	Goat	-	-	Demonstration of regular deworming of goats for the control of liver fluke	-	-	-	Dewormer
24	Weed Manag ement	Sesame	-	-	Demonstration of Chemical weed management in Sesame crop	-	-	-	Quizelofop ethayl
25	Weed Manag ement	Pearl Millet	-	-	Demonstration of Chemical weed management in Pearl millet crop	-	-	-	2,4-D
26	VR	Wheat	-	-	Demonstration of improved variety of wheat crop	-	-	-	Seed
27	VR	Mustard	-	-	Demonstration of improved variety of mustard crop	-	-	-	Seed
28	Impact Study	Greengram	-	-	Random sampling of farmers 50 nos. from all purposively selected blocks where CFLD was conducted	-	-	-	Interview schedule
29	Impact Study	Sesame	-	-	Random sampling of farmers 50 nos. from all purposively selected blocks where CFLD was conducted	-	-	-	Interview schedule
30	Impact Study	Mustard	-	-	Random sampling of farmers 50 nos. from all purposively selected blocks where CFLD was conducted	-	-	-	Interview schedule
31	ICM	Marigold	-	-	Demonstration of	-	-	-	Gibberellic

					Gibberellic Acid (GA3) foliar spray on growth and flowering of marigold				Acid (GA3)
32	IWM	Okra	-	-	Demonstration on Weed management in Okra	-	-	-	Herbicide
33	IWM	Onion	-	-	Demonstration on Weed management in Kharif Onion	-	-	-	Herbicide
34	ICM	Chilli	-	-	Demonstration of Plant Growth Regulator (PGRs) on chilli	-	-	-	PGRs
35	Nutriti on Sensiti ve Agricu lture	Pearl Millet	-	-	Demonstration of pearl millet bio-fortified (HHB-229) variety under nutrition sensitive agriculture	-	-	-	Seed
36	VR	Mustard	-	-	Demonstration of Mustard RH 725 variety	-	-	-	Seed
37	VR	Mustard	-	-	Demonstration of Mustard NRC 05-02 variety	-	-	-	Seed
38	SFM	Pearl Millet	-	-	Demonstration of RDF in Pearl millet	-	-	-	DAP
39	SFM	Mustard	-	-	Demonstration of Sulphur in Mustard crop	-	-	-	Sulphur fertilizer
40	SFM	Wheat	-	-	Demonstration of zinc in wheat crop	-	-	-	Zinc Fertilizer

Technologies to be assessed

A.1 Abstract on the number of technologies to be assessed in respect of crops

Thematic areas	Cereals	Oilseeds	Pulses	Commercial Crops	Vegetables	Fruits	Flower	Plantation crops	Tuber Crops	TOTAL
INM	02	-	-	-	-	-	-	-	-	02
VR	05	01	-	-	-	-	-	-	-	06
NF	02	-	-	-	-	-	-	-	-	02
HOV	-	-	-	-	03	-	-	-	-	03
IPM	-	-	-	-	01	-	-	-	-	01
CRP	01	01	-	-	-	-	-	-	-	02
SFM	03	-	-	-	-	-	-	-	-	03
Social Media	01	-	-	-	-	-	-	-	-	01
TOTAL	14	02	-	-	04	-	-	-	-	20

Abstract on the number of technologies to be assessed in respect of livestock/enterprises

Thematic areas	Cattle	Poultry	Sheep	Goat	Piggery	Rabbitary	Fisheries	TOTAL
-	-	-	-	-	-	-	-	-

Details of On Farm Trial (OFT)

OFT-1

Crop / Enterprise	Pearl millet
Title of on farm trial	Assessment of application of Nano urea on pearl millet
Problem diagnosed	Access use of Nitrogen in urea granule form

Farmers' Practices	T1- Use of 100 kg/ha urea as top dressing	
Details of technologies selected for assessment	T ₁	T1- Use of 100 kg/ha urea as top dressing
	T ₂	T2-Spray of nano urea at 30 DAS+Use of 100 kg/ha urea as top dressing
	T ₃	T3-Spray of nano urea at 30 and 50 DAS+Use of 100 kg/ha urea as top dressing
Source of technology	RVSKVV, Gwalior	
Plot size	-	
No. of farmers	10	
Total cost	6000/-	
Critical input	Nano urea	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Tiller/hil, cob length (cm), grain yield (q/ha)	

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of application of Nano urea on pearl millet
Year/Season:	Kharif 2024
Farming situation:	Irrigated
Problem diagnosis:	Access use of Nitrogen in urea granule form
Thematic area:	Balance fertilizer application, liquid fertilizer application under INM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Use of 100 kg/ha urea as top dressing
T2 –Recommended Practice-	T2-Spray of nano urea at 30 DAS+Use of 100 kg/ha urea as top dressing
T3- Recommended Practice-	T3-Spray of nano urea at 30 and 50 DAS+Use of 100 kg/ha urea as top dressing
Date of sowing:	-
Date of harvesting:	-
Source of technology:	RVSKVV, Gwalior
Characteristics of technology:	
Name of Crop/Enterprises:	Pearl Millet
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Details of On Farm Trial (OFT)

OFT-2

Crop / Enterprise	Pearl Millet	
Title of on farm trial	Assessment of zinc sulphate on pearl millet	
Problem diagnosed	Low yield due to imbalance use fertilizer	
Farmers' Practices	No use of zinc sulphate	
Details of technologies selected for	T ₁	T1 – No use of zinc sulphate

assessment	T ₂	T2 – Application of zinc sulphate @ 15kg/ha
	T ₃	T3 – Application of zinc sulphate @ 25kg/ha
Source of technology	Agriculture University, Bikaner (R.J.)	
Plot size	-	
No. of farmers	10	
Total cost	7000/-	
Critical input	Zinc sulphate	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation		

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of zinc sulphate on pearl millet
Year/Season:	Kharif 2024
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to imbalance use fertilizer
Thematic area:	Balance fertilizer application, Soil applications under INM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1 – No use of zinc sulphate
T2 –Recommended Practice-	T2 – Application of zinc sulphate @ 15kg/ha
T3- Recommended Practice-	T3 – Application of zinc sulphate @ 25kg/ha
Date of sowing:	-
Date of harvesting:	-
Source of technology:	Agriculture University, Bikaner (R.J.)
Characteristics of technology:	
Name of Crop/Enterprises:	Pearl Millet
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Details of On Farm Trial (OFT)**OFT-3**

Crop / Enterprise	Mustard	
Title of on farm trial	Assessment of HYV of mustard (Rukmani) DRMR 1165-40	
Problem diagnosed	Low yield due to old variety	
Farmers' Practices	Use of old varieties (Pusa bold and Rohini)	
Details of technologies selected for assessment	T1	T1- Use of old varieties (Pusa bold and Rohini)
	T2	T2- Rukmani DRMR 1165-40
	T3	-
Source of technology	DRMR, Sawyer, Bharatpur (Rajasthan)	
Plot size		
No. of farmers	10	
Total cost	4000/-	
Critical input	Variety	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation		

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of HYV of mustard (Rukmani) DRMR 1165-40
Year/Season:	Rabi 2024
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to old variety
Thematic area:	Varietal Improvement (HYV)
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Use of old varieties (Pusa bold and Rohini)
T2 –Recommended Practice-	T2- Rukmani DRMR 1165-40
T3- Recommended Practice-	-
Date of sowing:	-
Date of harvesting:	-
Source of technology:	DRMR, Sawyer, Bharatpur (Rajasthan)
Characteristics of technology:	
Name of Crop/Enterprises:	Mustard
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Details of On Farm Trial (OFT)**OFT-4**

Crop / Enterprise	Wheat
Title of on farm trial	Assessment of improved varieties of wheat DBW 303
Problem diagnosed	Low yield due to use of old variety Lok-1/GW 322

Farmers' Practices	Use of old variety Lok-1/GW 322	
Details of technologies selected for assessment	T ₁	T1- Use of old variety Lok-1/GW 322
	T ₂	T2- DBW 303
	T ₃	-
Source of technology	DWR, Karnal (HR)	
Plot size		
No. of farmers	10	
Total cost	18000/-	
Critical input	Variety	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation		

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of improved varieties of wheat DBW 303
Year/Season:	Rabi 2024
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to use of old variety Lok-1/GW 322
Thematic area:	Low yield due to use of old variety Lok-1/GW 322
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Use of old variety Lok-1/GW 322
T2 –Recommended Practice-	T2- DBW 303
T3- Recommended Practice-	-
Date of sowing:	-
Date of harvesting:	-
Source of technology:	DWR, Karnal (HR)
Characteristics of technology:	
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Details of On Farm Trial (OFT)

OFT-5

Crop / Enterprise	Pearl millet	
Title of on farm trial	Assessing effective extension strategy for transfer technology under natural farming in pearl millet	
Problem diagnosed	There is heavy use of chemical fertilizer & pesticides which needs to reduce in order to increase the net profit of crops	
Farmers' Practices	Informal method of technology diffusion life through neighbors, input dealers etc.	
Details of technologies selected for assessment	T ₁	T1- Informal method of technology diffusion life through neighbors, input dealers etc.
	T ₂	T2- Technology transfer through trainings and field visits

	T ₃	T3- Technology transfer through FLDs
Source of technology	Div. of Agri. At Ext., ICAR and BCKV, West Bengal 2020	
Plot size		
No. of farmers	20	
Total cost	5000/-	
Critical input	Interview Schedule	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Perception, knowledge, extent of utilization, extent of dissemination, timeliness, visibility of the content Feedback	

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agriculture Extension
Title of on-farm trial:	Assessing effective extension strategy for transfer technology under natural farming in pearl millet
Year/Season:	Kharif 2024
Farming situation:	Rainfed & Irrigated
Problem diagnosis:	There is heavy use of chemical fertilizer & pesticides which needs to reduce in order to increase the net profit of crops
Thematic area:	Natural farming
No of trials:	03
No. of farmers involved	20
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Informal method of technology diffusion life through neighbors, input dealers etc.
T2 –Recommended Practice-	T2- Technology transfer through trainings and field visits
T3- Recommended Practice-	T3- Technology transfer through FLDs
Date of sowing:	-
Date of harvesting:	-
Source of technology:	Div. of Agri. At Ext., ICAR and BCKV, West Bengal 2020
Characteristics of technology:	
Name of Crop/Enterprises:	Pearl Millet
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Details of On Farm Trial (OFT)

OFT-6

Crop / Enterprise	Paddy	
Title of on farm trial	Study on ICT Tools, Social media (Whatsapp) in dissemination of agricultural message on neck blast disease of paddy	
Problem diagnosed	Unawareness, Lack of timely dissemination, lack of proper solution of problem, lack of communication	
Farmers' Practices	Neighbors, farmer friends and input dealers	
Details of technologies selected for assessment	T ₁	T1- Neighbors, farmer friends and input dealers
	T ₂	T2- WhatsApp : To share agriculture techniques through message, photos and videos. To receive farmers problem through message Videos, Photos etc.

Source of technology	ZPD Zone VII, 2015	
Plot size		
No. of farmers	50	
Total cost	5000/-	
Critical input	-	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Perception, knowledge, extent of utilization, extent of dissemination, timeliness, visibility of the content Feedback	

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agriculture Extension
Title of on-farm trial:	Study on ICT Tools, Social media (Whatsapp) in dissemination of agricultural message on neck blast disease of paddy
Year/Season:	Kharif 2024
Farming situation:	All Situation
Problem diagnosis:	Unawareness, Lack of timely dissemination, lack of proper solution of problem, lack of communication
Thematic area:	Social Media
No of trials:	03
No. of farmers involved	50
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Neighbors, farmer friends and input dealers
T2 –Recommended Practice-	T2- WhatsApp : To share agriculture techniques through message, photos and videos. To receive farmers problem through message Videos, Photos etc.
T3- Recommended Practice-	-
Date of sowing:	-
Date of harvesting:	-
Source of technology:	ZPD Zone VII, 2015
Characteristics of technology:	
Name of Crop/Enterprises:	Paddy
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Details of On Farm Trial (OFT)

OFT-7

Crop / Enterprise	Wheat	
Title of on farm trial	Assessing effective extension strategy for transfer technology under natural farming in Wheat	
Problem diagnosed	There is heavy use of chemical fertilizer & pesticides which needs to reduce in order to increase the net profit of crops	
Farmers' Practices	Informal method of technology diffusion life through neighbors, input dealers etc.	
Details of technologies selected for assessment	T ₁	Informal method of technology diffusion life through neighbors, input dealers etc.
	T ₂	Technology transfer through trainings and field visits

	T ₃	Technology transfer through FLDs
Source of technology	Div. of Agri. and Ext., ICAR and BCKV, West Bengal 2020	
Plot size		
No. of farmers	20	
Total cost	2000/-	
Critical input	Interview Schedule	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Gain in knowledge, retention of knowledge, change in attitude, skill and adoption of technology	

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agriculture Extension
Title of on-farm trial:	Assessing effective extension strategy for transfer technology under natural farming in Wheat
Year/Season:	Rabi 2024
Farming situation:	Rainfed & Irrigated
Problem diagnosis:	There is heavy use of chemical fertilizer & pesticides which needs to reduce in order to increase the net profit of crops
Thematic area:	Natural farming
No of trials:	03
No. of farmers involved	20
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Informal method of technology diffusion life through neighbors, input dealers etc.
T2 –Recommended Practice-	Technology transfer through trainings and field visits
T3- Recommended Practice-	Technology transfer through FLDs
Date of sowing:	-
Date of harvesting:	-
Source of technology:	Div. of Agri. and Ext., ICAR and BCKV, West Bengal 2020
Characteristics of technology:	
Name of Crop/Enterprises:	Wheat

Details of On Farm Trial (OFT)

OFT-8

Crop / Enterprise	Okra	
Title of on farm trial	Assessment of early improved variety and hybrid of Okra	
Problem diagnosed	Low economic return due to lack of improved variety	
Farmers' Practices	Using local variety	
Details of technologies selected for assessment	T ₁	T1- Farmers Practice
	T ₂	T2- VRO 22
	T ₃	T3- Navya (Hybrid)
Source of technology	IIVR, Varanasi, 2018	
Plot size		

No. of farmers	05
Total cost	11000/-
Critical input	Hybrid Seed (Navya)
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Yield, Sex Ratio

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Horticulture
Title of on-farm trial:	Assessment of early improved variety and hybrid of Okra
Year/Season:	Kharif 2024
Farming situation:	Irrigated
Problem diagnosis:	Low economic return due to lack of improved variety
Thematic area:	HOV
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Farmers Practice
T2 –Recommended Practice-	T2- VRO 22
T3- Recommended Practice-	T3- Navya (Hybrid)
Date of sowing:	-
Date of harvesting:	-
Source of technology:	IIVR, Varanasi, 2018
Characteristics of technology:	
Name of Crop/Enterprises:	Okra
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-

Details of On Farm Trial (OFT)

OFT-9

Crop / Enterprise	Bottle Guard
Title of on farm trial	Assessment of integrated pest management of fruit fly in bottle guard
Problem diagnosed	Low economic return due to low yield
Farmers' Practices	Use of chemical insecticide
Details of technologies selected for assessment	T ₁ Farmers Practice
	T ₂ IPM Practice (Maize plantation as border crop + mulching around the plant + Spraying NSKE @ 5% + Cytraniliprole 10.26 % OD a.i 90 g
	T ₃ -
Source of technology	IIVR, 2009 and 2011 respectively
Plot size	
No. of farmers	05
Total cost	5000/-
Critical input	NSKE @ 5% + Cytraniliprole 10.26 % OD a.i 90 g

Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Fruit Yield, No. of fruits/plant

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Horticulture
Title of on-farm trial:	Assessment of integrated pest management of fruit fly in bottle guard
Year/Season:	Kharif 2024
Farming situation:	Irrigated
Problem diagnosis:	Low economic return due to low yield
Thematic area:	IPM
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Farmers Practice
T2 –Recommended Practice-	IPM Practice (Maize plantation as border crop + mulching around the plant + Spraying NSKE @ 5% + Cytraniliprole 10.26 % OD a.i 90 g
T3- Recommended Practice-	-
Date of sowing:	-
Date of harvesting:	-
Source of technology:	IIVR, 2009 and 2011 respectively
Characteristics of technology:	
Name of Crop/Enterprises:	Bottle Guard

Details of On Farm Trial (OFT)

OFT-10

Crop / Enterprise	Tomato
Title of on farm trial	Assessment of Improved Variety of Tomato
Problem diagnosed	Low economic return due to lack of improved variety
Farmers' Practices	Using local variety
Details of technologies selected for assessment	T ₁ T1- Farmers Practice
	T ₂ T2- S-22 (OP)
	T ₃ T3- Grand Marshal (F1)
Source of technology	NSC New Delhi-2009 & 2010 respectively
Plot size	
No. of farmers	05
Total cost	7500/-
Critical input	Hybrid Seed (Grand Marshal), OP S-22
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Yield, Fruit/Plant

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Horticulture
Title of on-farm trial:	Assessment of Improved Variety of Tomato
Year/Season:	Rabi 2024
Farming situation:	Irrigated
Problem diagnosis:	Low economic return due to lack of improved variety
Thematic area:	HOV
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Farmers Practice
T2 –Recommended Practice-	T2- S-22 (OP)
T3- Recommended Practice-	T3- Grand Marshal (F1)

OFT-12

Crop / Enterprise	Sorghum	
Title of on farm trial	Assessment of High yielding variety of Sorghum RJV-1862.	
Problem diagnosed	Low yield due to SPV 1709 Old Variety of Sorghum	
Farmers' Practices	SPV 1709 Old Variety	
Details of technologies selected for assessment	T ₁	T1- Use SPV 1709 Sorghum old variety
	T ₂	T2- Use of High yielding variety of Sorghum RJV-1862. Seed rate @ 12.5kg/ha.
	T ₃	-
Source of technology	RVSKVV Gwalior	
Plot size	0.40 ha	
No. of farmers	05	
Total cost	7000/-	
Critical input	Seed	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic (iv) Social – Employment generation	Yield, B:C Ratio	

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/	Plant Breeding & Genetics

Fisheries etc)	
Title of on-farm trial:	Assessment of High yielding variety of Sorghum RJV-1862.
Year/Season:	Kharif 2024
Farming situation:	Rainfed, Loamy to sandy loam
Problem diagnosis:	Low yield due to SPV 1709 Old Variety of Sorghum
Thematic area:	VR
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Use SPV 1709 Sorghum old variety
T2 –Recommended Practice-	T2- Use of High yielding variety of Sorghum RJV-1862. Seed rate @ 12.5kg/ha.

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
1	Buffalo calf	LPM	Demonstration of scheduled deworming	Dewormer	2024 (Kharif and	80 Farmers/	180 (Calves)	Mortality (%), Body weight and BCR

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
			for control of calf mortality		Rabi)	Farm Women		
2	Goats	LPM	Demonstration of regular deworming of goats for the control of liver fluke	Dewormer	2024 (Whole year)	60 Farmers/ Farm Women	250 (Goats)	Mortality (%), Body weight and BCR
3	Sesame	Weed management	Demonstration of Chemical weed management in Sesame crop	Quizelofopet hayl	Kharif 2024	2.0 ha	05	Yield q/ha
4	Pearl millet	Weed management	Demonstration of Chemical weed management in Pearl millet crop	2,4-D	Kharif 2024	2.0 ha	05	Yield q/ha
5	Wheat	Varietal	Demonstration of improved variety of wheat crop	HYV	Rabi 2024-25	2.0 ha	05	Yield q/ha
6	Mustard	Varietal	Demonstration of improved variety of mustard crop	HYV	Rabi 2024-25	2.0 ha	05	Yield q/ha
7	Green gram	Impact Study	Random sampling of farmers 50 nos. from all purposively selected blocks where CFLD was conducted	Interview schedule	Kharif 2024	-	50	Technology gap will be measured as potential yield. Demonstration yield, Extension gap will be measured as demonstration yield. Farmers yield. Extension index (%) will be measured as (technology Gap/Extension gap)x100
8	Sesame	Impact Study	Random sampling of farmers 50 nos. from all purposively selected blocks where CFLD was conducted	Interview schedule	Kharif 2024	-	50	Technology gap will be measured as potential yield. Demonstration yield, Extension gap will be measured as demonstration yield. Farmers yield. Extension index (%) will be measured as (technology Gap/Extension gap)x100
9	Mustard	Impact Study	Random sampling of farmers 50 nos. from all purposively selected blocks where CFLD was conducted	Interview schedule	Rabi 2024	-	50	Technology gap will be measured as potential yield. Demonstration yield, Extension gap will be measured as demonstration yield. Farmers yield. Extension index (%) will be measured as (technology Gap/Extension gap)x100
10	Marigold	ICM	Demonstration of Gibberellic Acid (GA3) foliar spray on growth and flowering of marigold	Gibberellic Acid (GA3)	Rabi 2024-25	1.0	05	Yield q/ha, B:C Ratio
11	Okra	IWM	Demonstration on Weed management in Okra	Herbicide (Pendimethalin)	Kharif 2024	1.0	05	Yield q/ha, No. of weeds/sqm, B:C Ratio

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
12	Onion	IWM	Demonstration on Weed management in Kharif Onion	Herbicide (Oxyflurofen 23.5% EC)	Kharif 2024	1.0	05	Yield q/ha, No. of weeds/sqm, B:C Ratio
13	Chili	ICM	Demonstration of Plant Growth Regulator (PGRs) on chilli	PGRs (NAA and GA3)	Rabi 2024-25	1.0	05	Yield q/ha, B:C Ratio
14	Pearl Millet	Nutrition Sensitive Agriculture	Demonstration of pearl millet bio-fortified (HHB-229) variety under nutrition sensitive agriculture	Seed	Kharif 2024	2.0	05	Panicle/plant, yield (q/ha), net return (Rs/ha), B:C ratio
15	Mustard	VR	Demonstration of Mustard RH 725 variety	Seed	Rabi 2024	2.0	10	Panicle/plant, yield (q/ha), net return (Rs/ha), B:C ratio
16	Mustard	VR	Demonstration of Mustard NRC 05-02 variety	Seed	Rabi 2024	2.0	10	Panicle/plant, yield (q/ha), Net return (Rs/ha), B:C ratio
17	Pearl Millet	SFM	Demonstration of RDF in Pearl millet	DAP	Kharif 2024	2.0	10	Yield, B:C Ratio, net return (Rs/ha) & Feedback of farmer
18	Mustard	SFM	Demonstration of Sulphur fertilizer in Mustard crop	Sulphur fertilizer	Rabi 2024-25	2.0	10	Yield, B:C Ratio, net return (Rs/ha) & Feedback of farmer
19	Wheat	SFM	Demonstration of zinc fertilizer in wheat crop	Zinc Fertilizer	Rabi 2024-25	2.0	10	Yield, B:C Ratio, net return (Rs/ha) & Feedback of farmer

Extension and Training activities under FLDs

S. No.	Activity	No. of activities	Month	Number of participants
1	Field days	-	-	-
2	Farmers Training	-	-	-
3	Media coverage	-	-	-
4	Training for extension functionaries	-	-	-

Details of FLD on Enterprises

Farm Implements

Name of the implement	crop	Season and year	No. of farmers	Area (ha)	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
							Demon.	Local check
-	-	-	-	-	-	-	-	-
-	-	-	-	-	-	-	-	-

*Field efficiency, labour saving etc.

Livestock Enterprises

Enterprise	Breed	No. of farmers	No. of animals, poultry birds etc.	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
						Demo.	Local check
Buffalo calf	-	80 Farmers/Farm Women	180 (Calves)	Dewormer	Mortality (%), Body weight and BCR	-	-
Goats	-	60 Farmers/Farm Women	250 (Goats)	Dewormer	Mortality (%), Body weight, conception and BCR	-	-

*Milk production, meat production, egg production, reduction in disease incidence etc.

Other Enterprises

Enterprise	Variety/ breed/Species /others	No. of farmers	No. of Units/ area	Critical inputs	Performance parameters/ indicators	Data on parameter in relation to technology demonstrated	
						Demo.	Local check
-	-	-	-	-	-	-	-

Cluster Demonstration of Oilseed and Pulses under NFSM (2024-25)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified
1	Green gram	CRP	High yielding variety (Sikha/PDM 139)	Seed	Summer 2024	10	25	Pods/Plants, Yield (q/ha), B:C Ratio
2	Lentil	CRP	Demonstration Improved variety of Lentil (L-4717)	Seed, Fungicide, Rhizobium culture	Rabi 2024-25	10	25	No. of pods/plant, Yield (q/ha), B:C Ration
3	Sesame	CRP	Demonstration Improved variety of sesame (GT-06)	Seed, Fertilizer	Kharif 2024	10	25	Yield, B:C Ratio
4	Mustard	CRP	Demonstration of Mustard variety Rukmani (DRMR1165-40)	Seed, Fertilizer	Rabi 2024-25	100	250	Yield, B:C Ratios

Extension and Training activities under CFLDs Oilseed and Pulses

S. No.	Activity	No. of activities	Month	Number of participants
1	Field days	04	Jan-Dec 2024	200
2	Farmers Training	04		200
3	Media coverage	02		12
4	Training for extension functionaries	00		00

Training (Including the sponsored and FLD training programmes):

A) ON Campus

Thematic Area	No. of Courses	Duration (Days)	No. of Participants						
			Others			SC/ST			Grand Total
			Male	Female	Total	Male	Female	Total	
(A) Farmers & Farm Women									
I Crop Production (Dr RPS and Dr NSB)									
Weed Management	01	01	-	-	-	-	-	-	25
Resource Conservation Technologies	01	01	-	-	-	-	-	-	25
Integrated Farming	01	01	-	-	-	-	-	-	25
Seed production (Dr NSB)	06	06	-	-	-	-	-	-	150
Integrated Crop Management	05	05	-	-	-	-	-	-	125
Total	14	14	-	-	-	-	-	-	350
II Horticulture									
a) Vegetable & fruit Crops									
Off-season vegetables	01	01	-	-	-	-	-	-	25
Protective cultivation (Green Houses, Shade Net etc.)	01	01	-	-	-	-	-	-	25
Total	02	02	-	-	-	-	-	-	50

iii) Sponsored Training Programmes

[illegible]

Extension Activities (including activities of FLD programmes)

[illegible]

Target for Production and supply of Technological products

SEED MATERIALS

Category	Crop	Variety	Area (ha)	Quantity (qtl.)
CEREALS	Paddy	PUSA Basmati 1509	10	240
OILSEEDS	Mustard	Rukmani (DRMR1165-40)	08	160
CEREALS	Wheat	DBW 303	03	150

PLANTING MATERIALS

Sl. No.	Crop	Variety	Quantity (Nos.)
VEGETABLES	Tomato	Hybrid	5000
VEGETABLES	Brinjal	Hybrid	5000
SPICES	Chilli	Hybrid	5000

Bio-products

Bio products				
Sl. No.	Product Name	Species	Quantity	
			No	(kg)
BIOAGENTS				
1	Vermicompost	-	-	3000
2	Earthworms	-	--	50

LIVESTOCK

Sl. No.	Type	Breed	Quantity	
			Nos	ltr.
Cow	Heifer	Sahiwal/Gir	01	-
	Milk		-	900
Goat	Kids	Jamunapari	10	-
		Barbari	10	-
Poultry	Egg	Kadakhnath	1500	-

Literature to be Developed/Published

KVK News Letter

Date of start	Periodicity	Number of copies to be published
Jan-Dec 2023	06 Months	1000

Details of Electronic Media to be Produced

S. No.	Type of media (CD / VCD / DVD / Audio-Cassette)	Title of the programme	Number
1	DVD	KVK Technology/Natural Farming	02

Success stories/Case studies identified for development as a case: 04 (no.)

Indicate the specific training need analysis tools/methodology followed for(Viz PRA, AES, line dept, ex trainees, interface,)

S. No.	Training	Need analysis tools/methodology followed
1	Identification of courses for farmers/farm women	PRA & RRA Technic used
2	Rural Youth	PRA & RRA Technic used
3	In-service personnel	PRA & RRA Technic used
4	methodology for identifying OFTs/FLDs	PRA & RRA Technic used
5	Matrix ranking	-

Field activities

Name of villages identified for adoption with block name:

S.No.	Name of Village	Name of Block	Distance of village from KVK (Km)
1	Mangarh	Raun	32 KM
2	Gigarakhi	Mehgaon	67 KM
3	Angadpura	Ater	68 KM
4	Jalpuri	Ater	70 KM
5	Chhimka	Gohad	80 KM
6	Chiroli	Lahar	05 KM
7	Jaganpura	Lahar	08 KM
8	Girwasa	Lahar	18 KM

1. No. of farm families selected per village : 50

2. No. of survey/PRA to be conducted: 03

3.11. Activities of Soil and Water Testing Laboratory

Year of establishment: NA

List of equipments purchased: Nil

Sl. No.	Name of the Equipment	Qty.	Condition
1	-	-	-

Details of samples analyzed so far:

Details	No. of Samples	No. of Farmers (SHC)	No. of Villages	Amount realized
Soil Samples	-	-	-	-
Water Samples	-	-	-	-
Total	-	-	-	-

LINKAGES

Functional linkage with different organizations

Name of organization	Nature of linkage
Farmer Welfare & Agriculture Development Department	Training, Farmers meeting/Goshti, Awareness programme, Technical Support, Soil testing, Farmer Interface
ATMA	
Horticulture Department	
Animal Husbandry Department	
Fishries Department	
Agriculture Engineering Department

Action plan for Flagship programmes implemented at KVK

(NICRA, ARYA, Natural farming, CBBO, Seed Hub, Agri Drone etc)

Name of Flagship programmes : NICRA

Month	Activity details	Targeted Beneficiaries/Area/Coverage	
Jan-Dec 2024	NRM Intervention	30	12 ha
	Crop Intervention	90	34 ha
	Livestock and Fisheries Intervention	125	200 Goats 20 Buffalos/cow 150 Buffalo calves
	Institutional	30	Seed and fodder camp
	Capacity Building Programme	421	21 Training Programme
	Extension Activity	720	Mela/Exhibition/Gosthi/Exposer visit/Field Day/Special day/Millet crop awareness programme, IYoM etc.
	Publication	06	Literature develop, Technical Folder, Bulletin & Reports

Name of Flagship programmes : Natural Farming

S. No.	Activity details	Targeted Beneficiaries	Targeted Activity
1	Awareness programme	300	6
2	Demonstration	10	10
3	Trainings	100	2
4	Sangosthi	150	2
5	Field Day	400	8
6	Kisan Mela	300	1
7	Develop literature	3000	3
8	Jeewamrit	Mass	3000 (Ltr)
9	Beejamrit	Mass	2000 (Ltr)
10	Ghan Jeewamrit	Mass	4000 (Ltr)
11	Neemastra	Mass	1500 (Ltr)
12	Bramashtra	Mass	1500 (Ltr)
13	Agnyastra	Mass	1000 (Ltr)

Planning for Crop Cafeteria

Total Area of Crop cafeteria: 1000 Sq m

Crop	Season	Variety	Particulars /details	Area (Sq m)
Wheat	Rabi	MP 3288, MP3382, RVW 4106, Black wheat, Farmer entry (Shakti vardhak, 8288, Doli), DBW 303, DBW 187, DBW 322	-	32 sqm/Plot
Mustard	Rabi	NRCYS-05-0, RH749, RH 725, Rukmani, Radhika, Brajraj, RVM-2	-	32 sqm/Plot
Sorghum	Kharif	Farmers (Desi variety)	-	32 sqm/Plot
Sesame	Kharif	TKG 308, TKG 55, GT-06	-	32 sqm/Plot

Details of Demonstration Unit at KVK:

Demonstration Unit	Particulars /details	Area (Sq m)	Output /Production
Goatry	18 Male & Female goats are reared with 16 kids	About 30 sqm area is covered and about 40 sqm area is open for walking	10-12 goats ready to sale in 2024.
Poultry	90 Males and Females are available at unit	About 35 sqm is constructed area about 180 sqm area is open for walking/moving	05-06 eggs are produced everyday in backyard mostly natural rearing is applied
Dairy	One heifers & One Cow are rearing at centre	No particular area is constructed preparation and efforts are continue to manage the shed	900 Litre Milk production will be produced in 2024.

Annual Action Plan 2024

KVK: Mandsaur

Year of sanction: 2004

1.5. (A). Details of SAC meeting to be conducted in the year

Sl. No.	Tentative Date
1	June-2024
2	September-2025

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

Agro-Ecological Situation	Characteristics		
AES-I	Block Covered		Medium black to deep black soil, Rainfall..... mm/annually, Guava intercrop with wheat/garlic Plan land, it covers block Malhargarh, Mandsaur, some part of Sitamau
	Geographical Area		52.75%
	Major Farming systems		Crop production + Horticulture + animal husbandry
	Major crops		Kharif - Soybean, Maize Rabi - Wheat, Chickpea, Mustard, Fenugreek & Garlic. Intercrop- Guava + Soybean, Guava + Garlic/Linseed/garlic
AES-II	Block Covered		Undulating land, highest rainfall among the blocks, orange intercrop coriander and linseed, increasing day by day irrigated land due to implementation of Indo-Israel high pressurized irrigation project. It covers block Garoth, Bhanpura, some part of Sitamau (Suwasra)
	Geographical Area		47.25%
	Major Farming systems		Crop production + Horticulture + animal husbandry
	Major crops		Kharif - Soybean, Maize Rabi – Coriander, Wheat, Chickpea, Lentil, Mustard and Linseed Intercrop- Orange + Soybean, Orange + Coriander/Linseed

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1.	Malwa Plateau	1. Semi-arid. 2. Rainfall (600-1000mm). 3. Water deficit (800-1200 mm). 4. Water holding capacity is low.
S. No	Agro - ecological situation	Characteristics
2.	Semi-arid	1. Length of crop growing season period (90-150 days) depends upon soil depth. 2. Soil depth is medium to deep 3. Intercropping and double cropping is possible. 4. Soil erosion is a problem due to sloppy lands

SWOT Analysis of each Agro-Ecological Situations of district

AES-1 (Soybean-Wheat/Garlic (Block- Malhargarh, Mandsaur, some part of Sitamau)

Strength	Weakness	Opportunities	Threats
Fertile, medium go deep black soil	Shortage of irrigation water during month of March to May	Organic and natural farming to be done in the region due to having high fertile land and abundance of dairy animals. Good quality of Guava may be grown	Stagnation of water during rainy season, frost, unavailability of market for organic and naturally grown produce.

AES-2 (Soybean-Coriander/Mustard (Block- Garoth, Bhanpura, some part of Sitamau (Suwasra)

Strength	Weakness	Opportunities	Threats
Climatic conditions are suitable for growing of orange and coriander	Undulating and shallow	The grading and processing industries in coriander may be established, as well as	Frost in coriander crop during December-January may greatly

crops, day by day increasing irrigated land due to implementation of Indo-Israel high pressurized irrigation project, it receives highest rainfall among all the blocks	soil, it is 120-150 km away from district headquarter	grading and packing units may be developed for orange and they may be marketed to Delhi to Mumbai due to the region is well connected with Delhi-Mumbai 8 lines super express way.	affect the crop as well as alternate or no bearing of orange orchard may affect the sustainable production of the fruits.

Land Use Pattern

Particulars	Area “000 ha”
Total Geographical area	551806
Forest	40600
Waste Land	44240
Other than cultivated area	79080
Cultivable waste and alkaline land	16040
Pastures	-
Bushes	-
Current Fallow	-
Other Fallow	2800
Agricultural Land	356900
Area Sown	556040
Kharif	332040
Rabi	220770
Zaid	3230
Cropping Intensity	145.43

Irrigated Area with Different Sources:

S. No.	Description	Area (ha)
1	Canal	43828
2	Well	9500
3	Tube well	183912
4	Ponds	1592
5	Others	6638

Soil types

S. No.	Soil type	Characteristics	Area “000 ha”
1	Deep black Soil		342206
2	Medium black Soil		135000
3	Shallow black Soil		74600
4			

Note: Figure. In parenthesis denotes the percentage of total area.

Area, Production and Productivity of major crops cultivated in the district (2017-18)

S. No	Crop	Area (ha)	Production (Qt.)	Productivity (Q /ha)
1.	Chickpea	65-100	11-79	79-05
2.	Mustard	38-200	6-92	50-58
3.	Lentil	9-500	1-72	6-03
4.	Linseed	7-500	1-35	5-24
5.	Onion	4-20	0-76	84-00
6.	Tomato	1-00	0-18	25-00

Weather data (Jan, 2023- Dec., 2023)

Month /Year	Rainfall (m.m.)	Temperature (° C)	
		Maximum	Minimum
Jan, 2023	34.7	20.77	6.93
Feb, 2023	0	33.97	15.17

Details of Operational area / Villages (2022)

Sl. No.	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Mandsaur	Malhargrah	Chillod pipliya	Soybean, Chickpea, Blackgram, Wheat	Use of low yielding varieties, heavy incidence of insect pest and disease, Use of imbalance fertilizers, mono culture, un awareness about vermicompost production and bio waste decomposer	Crop production, IPM, IDM, INM and promotion of vermicompost production
2	Mandsaur	Malhargrah	Nagar pipliya	Soybean, Onion, Isabgol Chickpea, Blackgram, Wheat	Use of low yielding varieties, heavy incidence of insect pest and disease, Use of imbalance fertilizers, mono culture, un awareness about bio waste decomposer	Crop production, IPM, IDM, INM and promotion of vermicompost production and inter cropping
3	Mandsaur	Mandsaur	Ranayara	Linseed	Low yield of linseed due to using of old varieties	Crop Improvement
4	Mandsaur	Malhargarh	Sindpant	Soybean, Onion, Mustard, Isabgol Chickpea, Blackgram, Wheat	Use of low yielding varieties, heavy incidence of insect pest and disease, Use of imbalance fertilizers, mono culture, un awareness about bio waste decomposer	Crop production, IPM, IDM, INM and promotion of vermicompost production and inter cropping
5	Mandsaur	Mandsaur	Lalakheda	Chickpea	Low yield of chickpea due to using of old varieties	Crop Improvement
	Mandsaur	Sitamau	Kotda Bahadur	Soybean, Onion, Mustard, Isabgol Chickpea, Blackgram, Wheat	Use of low yielding varieties, un judicious use of pesticides, heavy incidence of insect pest and disease, Use of imbalance fertilizers, mono culture, un awareness about bio waste decomposer	Crop production, IPM, IDM, INM, organic farming and inter cropping
	Mandsaur	Sitamau	Pipliya Karadiya	Soybean, linseed Onion, Mustard, Isabgol Chickpea, Blackgram, Wheat	Use of low yielding varieties, heavy incidence of insect pest and disease, Use of imbalance fertilizers, mono culture, un awareness about bio	Crop production, IPM, IDM, INM and promotion of vermicompost production and inter

					waste decomposer	cropping
	Mandsaur	Mandsaur	Karankhedi	Soybean, linseed Onion, Mustard, Isabgol Chickpea, Blackgram, Wheat	Use of low yielding varieties, heavy incidence of insect pest and disease, Use of imbalance fertilizers, mono culture, un awareness about bio waste decomposer	Crop production, IPM, IDM, INM and promotion of vermicompost production and inter cropping
	Mandsaur	Mandsaur	Eilchi	Soybean, linseed Onion, Mustard, Isabgol Chickpea, Blackgram, Wheat	Use of low yielding varieties, heavy incidence of insect pest and disease, Use of imbalance fertilizers, mono culture, un awareness about bio waste decomposer	Crop production, IPM, IDM, INM and promotion of vermicompost production and inter cropping

Priority / Thrust areas

S. No.	Particulars
1.	Integrated crop management
2.	Crop management practices
3.	Insect pest management
4.	Implement and farm machinery
5.	Horticulture – Spice Medicinal & vegetables
6.	Women in agriculture
7.	Value addition and processing
8.	Income Generation
9.	Drudgery Reduction
10.	Natural resource management
11.	Rural information system
12.	Marketing and finance
13.	Fuel and fodder scarcity

TECHNICAL PROGRAMME

A. Details of targeted mandatory activities by KVK

OFT		FLD and CFLD	
1		2	
Number of OFTs	Number of Farmers	Number of FLDs	Number of Farmers
10	10	9 (FLD)+ 4 (CFLD)=13	317

Training		Extension Activities	
3		4	
Number of Courses	Number of Participants	Number of activities	Number of participants
51	1015	90	1728

Seed Production (Qtl.)	Planting material (Nos.)
272	-

B. Abstract of interventions to be undertaken

S. No.	Thrust area	Crop/ Enterprise	Identified Problem	Interventions					
				Title of OFT if any	Title of FLD if any	Title of Training if any	Title of training for extension personnel if any	Extension activities	Supply of seeds, planting materials etc.
1	Varietal replacement	Soybean	Low yield due to Use of old varieties	Assessment of soybean production technology for higher productivity in soybean - chickpea cropping system	-	Improved production technology and IPM	Package of practices for Soybean crop	Field visit Kisan gosthi	Seed, Bio fertilizer
2	Varietal replacement	Soybean	Low yield due to Use of old varieties	Assessment of Natural materials for management of defoliators' in Soybean	-	IPM in soybean	IPM in Kharif crop	Field visit Kisan gosthi	SINPV, HaNPV, Garlic and Green Chilli
3	IPM	Tomato	Losses about 70-80 % due to heavy infestation of tomato pin worm in tomato crop. The area is affected 200 ha out of 220 ha.	Assessment of IPM module for management of Tomato Pin Worm (Tuta absoluta) in tomato crop	-	IPM in Tomato	-	Field visit Kisan gosthi	Pheromone trap & Bio pesticides
4	Crop Production	Wheat	Low yield due to old var. Lok-1	Assessment of wheat production technology for higher productivity in soybean - wheat cropping system	-	Production technology of wheat cropping system	-	Field visit	Seed & Culture
5	IPM	Chickpea	Low yield due to incidence of gram pod borer in chickpea	Assessment of materials for management of gram pod borer in chickpea.	-	IPM in chickpea	-	Field visit Kisan gosthi	HaNPV and Garlic and Green Chilli
6	IPM	Onion	Losses about 17-18 % due	Assessment of IPM module for	-	IPM in Onion	-	Field visit Kisan gosthi	Blue sticky trap & Pesticide

			to heavy infestation of thrips in onion crop. The area is affected 900 ha out of 1296 ha.	management of thrips in rabi onion crop					
7	IPM	Soybean	Heavy incidence of girdle beetle in soybean	-	Demonstration of Thiacloprid 21.7 % SC @750 ml/ ha at 25 DAS for management of girdle beetle in soybean	Chemical pest management in soybean	-	Field day, Field visit	Pesticides
8	IPM	Maize	25 to 30% yield losses in Maize due to heavy incidence of Fall army	-	Demonstration of IPM module in Maize against Fall army worm	IPM in Maize	-	Field day, Field visit	Pesticide, pheromone trap
9	Crop Production	Fenugreek	Low yield due to Use of old varieties	-	Demonstration of Ajmer Fenugreek-5 under soybean-fenugreek cropping system	Production technology of Fenugreek	-	Field day, Field visit	Seed
10	Crop Production	Fenugreek	Low yield due to Use of old varieties	-	Demonstration of ACr2 variety of Coriander under Soybean-Coriander cropping system	Production technology of Coriander	-	Field day, Field visit	Seed
11	IDM	Coriander	Heavy infection of stem gall disease in Coriander	-	Demonstration of Propiconazole 25 % E.C. @ 1000 ml/ha. for management of stem gall in Coriander	IDM in coriander	-	Field day, Field visit	Fungicide
12	Nutritional Food Security	Nutritional Kitchen Garden	-	-	Demonstration of Nutritional Kitchen Garden for nutritional security of farm women	Establishment of Nutritional Kitchen Garden in Backyard	-	Field day, Field visit, Kisan goshi	Seasonal vegetable seed, Saplings, fruits plants, vermicompost

13	Value addition	Lime Pickle and Paste	Low income of farm women due to no proper value addition in Lime	Assessment of income generation of farm women through preparation of good quality Lime Pickle and Paste	-	Preparation of Garlic pickle and pest	-	-	Spices, Juggery, Sugar, Pet jar and class II Preservative (SB) @ 100 PPM
14	Nutritional security	Millet (Bajra)	Lack of awareness of nutrition	Assessment of Khichadi made by Millet (Bajra) for Nutritional security in children and farm women	-	-	-	-	Seed of Bajra
15	Income generation	Opium/poppy seeds	Low income of farm women due to no proper grading and packaging of opium seed	Assessment of income generation of farm women through grading and small packing of opium poppy seeds (Khas-khas Dana)	-	Grading and packaging of opium seed	-	Field visit, Kisan goshi	Packaging material and weighing balance
16	Women in Agriculture	Marigold flower	Low income of farm women due to no use of improved Variety of Marigold	Assessment of Marigold varieties for income generation of farmwomen	-	Cultivation technology of flower	-	Field visit, Kisan goshi	Seed, Fungicide, insecticide
17	Income generation	Nursery management	low income of farm women involved in traditional method for Nursery raising	-	Demonstration of improved nursery management for income generation of farm women.	Improved nursery management technique	-	Field visit, Kisan goshi	Hybrid Vegetable Seed, Portrays,, Fungicides, and insecticides and HDPE
18	Value addition	Drumstick leaf powder	-	-	Demonstration of Dehydration drumstick leaf after blanching and make leaf powder as supplement of nutrients	-	-	Field day, Field visit, Kisan goshi	Drumstick leaf
19	Nutritional Food	Wheat (Bio fortified variety HI	-	-	Demonstration of Use of Bio fortified	Preparation of good quality	-	Field day, Field visit, Kisan	Seed, Daliya (Porridge) making

	Security	8663) for daliya (Porridge) making			variety HI 8663 (poshan) of wheat in diet	porridge from poshan wheat		gosthi	machine, packaging material

Technologies to be assessed

Details of On Farm Trial (OFT)

OFT-1

Crop / Enterprise	Soybean	
Title of on farm trial	Assessment of soybean production technology for higher productivity in soybean - chickpea cropping system	
Problem diagnosed	Low yield due to old var. JS 9560	
Farmers' Practices	JS 95-60	
Details of technologies selected for assessment	T ₁	Improved variety RVSM-35+ Seed treatment with Penflufen 13.28% + Trifloxystrobin 13.28 % FS @1g/kg seed + Rhizobium @10ml/kg + PSB 10ml/kg + NPKS 20:60:20:20 or on the basis of Soil testing + Imazethapyr 10% SL @1000 ml/ha + Chlorantraniliprole 18.5 % SC @ 150ml/ha
	T ₂	Improved variety Raj Soya-24+ Seed treatment with Penflufen 13.28% + Trifloxystrobin 13.28 % FS @1g/kg seed + Rhizobium @10ml/kg + PSB 10ml/kg + NPKS 20:60:20:20 or on the basis of Soil testing + Imazethapyr 10% SL @1000 ml/ha + Chlorantraniliprole 18.5 % SC @ 150ml/ha
Source of technology	RVSKVV, Gwalior, 2021	
Plot size	0.2 ha. Each	
No. of farmers	10	
Total cost	21000	
Critical input	Seed	
Performance indicators:	(i) Technical- yield (q/ ha) (ii) Economic- BC ratio (iii) Social – Employment generation- 52 Man days	

OFT-2

Crop / Enterprise	Soybean	
Title of on farm trial	Assessment of Natural materials for management of defoliators' in Soybean	
Problem diagnosed	Losses about 15-18 % due to heavy infestation of defoliators in soybean crop. The area is affected 2.0 lakh ha out of 2.7 lakh.	
Farmers' Practices	Use of Quinalphos 25 % EC @ 1200 ml/ha	
Details of technologies selected for assessment	T ₁	Eraction of bird perch @50/ha+pheromone trap @12/ha+Use of SINPV & HaNPV @ 250 LE/ha+Neemastra @5% (At incidence of insect pests)
	T ₂	Eraction of bird perche @50/ha+pheromone trap @12/ha+12/ha+Use of SINPV & HaNPV @ 250 LE/ha+Use of 3% Agniastra (Preventive spray at 30 DAS and than 15 days interval)
Source of technology	NCOF, Ghaziabad 2016	

Plot size	0.2 ha. Each
No. of farmers	10
Total cost	6500
Critical input	SLNPV, HaNPV, Garlic and Green Chilli
Performance indicators:	(i) Technical- yield (q/ ha) (ii) Economic- BC ratio (iv) Social – Employment generation- 52 Man days

OFT-3

Crop / Enterprise	Tomato	
Title of on farm trial	Assessment of IPM module for management of Tomato Pin Worm (<i>Tuta absoluta</i>) in tomato crop	
Problem diagnosed	Losses about 70-80 % due to heavy infestation of tomato pin worm in tomato crop. The area is affected 200 ha out of 220 ha.	
Farmers' Practices	Spray Chlorantraniliprole 18.5% SC @150ml/ha	
Details of technologies selected for assessment	T ₁	Installation of <i>Tuta</i> pheromone trap @ 40/ha + collection and destruction of infested leaf and fruits + 1st spray of Azadirachtin 5% EC @ 2ml/lit at 30 DAT +2nd spray of <i>Beauveria bassiana</i> 1.15% WP @ 3gm/lit at 45 DAT + Spinosad 45 % SC @ 0.25 ml/lit at 60 DAT.
	T ₂	Installation of <i>Tuta</i> pheromone trap @ 40/ha + collection and destruction of infested leaf and fruits + 1st spray of Profenophos 50% EC @ 2ml/lit at 30 DAT +2nd spray of Clorrantraniliprol 18.5% SC @ 0.15 ml/lit at 45 DAT + 3 rd spray of lambda cyhalothrin 5 % EC @ 0.6 ml/lit at 60 DAT.
Source of technology	Journal of Biological Control 33(3), 2019	
Plot size	0.2 ha. Each	
No. of farmers	10	
Total cost	15960	
Critical input	Pheromone trap & Bio pesticides	
Performance indicators:	(i) Technical- yield (q/ ha) (ii) Economic- BC ratio (v) Social – Employment generation- 52 Man days	

OFT-4

Crop / Enterprise	Marigold	
Title of on farm trial	Assessment of Marigold varieties for income generation of farmwomen	
Problem diagnosed	Low income of farm women due to no use of improved variety of Marigold	
Farmers' Practices	Use traditional Variety of Marigold	
Details of technologies selected for assessment	T ₁	Pusa Narangi Marigold
	T ₂	Pusa Basanti Marigold
Source of technology	ICAR, 2016	
Plot size	0.2 ha. Each	
No. of farmers	10	
Total cost	12000	
Critical input	Seed, Fungicide, insecticide	
Performance indicators:	(i) Technical- yield (q/ ha) (ii) Economic- BC ratio (vi) Social – Employment generation- 52 Man days	

OFT-5

Crop / Enterprise	Marigold	
Title of on farm trial	Assessment of Khichadi made by Millet (Bajra) for Nutritional security in children and farm women	
Problem diagnosed	Lack of awareness of nutrition	
Farmers' Practices	Wheat GW 147	
Details of technologies selected for assessment	T ₁	Gram Dal + GW 147
	T ₂	Gram Dal + Desi Bajra
Source of technology	ICAR, 2016	
Plot size	0.2 ha. Each	
No. of farmers	10	
Total cost	6000	
Critical input	Seed of Bajra	

Performance indicators:	(i) Technical- yield (q/ ha) (ii) Economic- BC ratio (vii) Social – Employment generation- 52 Man days

OFT-6

Crop / Enterprise	Garlic Pickle and Pest	
Title of on farm trial	Assessment of income generation of farm women through preparation of good quality Lime Pickle and Paste	
Problem diagnosed	Low income of farm women due to no proper value addition in Lime	
Farmers' Practices	Poor quality of lime Pickle and Paste no use of class II preservative (SB)	
Details of technologies selectedfor assessment	T ₁	Preparation of good Lime Pickle and Paste with use of pickle spices, Juggery and class II Preservative (SB) @ 100 PPM
	T ₂	Preparation of good quality Lime Pickle and Paste with addition of pickle spices, Sugar and class II Preservative (SB) @ 100 PPM
Source of technology	ICAR, 2016	
Plot size	-	
No. of farmers	10	
Total cost	12,000	
Critical input	Spices, Juggery, Sugar, Pet jar and class II Preservative (SB) @ 100 PPM	
Performance indicators:	(i) Technical- Production kg/unit, Average cost of input (Rs/unit) (ii) Economic- Net return, BC ratio (viii) Social – Income generation activity throughout the year	

OFT-7

Crop / Enterprise	Onion	
Title of on farm trial	Assessment of IPM module for management of thrips in rabi onion crop	
Problem diagnosed	Losses about 17-18 % due to heavy infestation of thrips in onion crop. The area is affected 900 ha out of 1296 ha.	
Farmers' Practices	Spray lambda cyhalothrin 5% EC @300ml/ha	
Details of technologies selectedfor assessment	T ₁	Blue sticky trap @25ha+ Verticillium lecanii 3% AS @ 2.5 kg/ha at 30DAT+ Spray of Tolfenpyrad 15% EC@ 1000ml/ha at 45 DAT (then need based application)
	T ₂	Blue sticky trap @25ha + Verticillium lecanii 3% AS @ 2.5 kg/ha at 30DAT+Fipronil 80% WG @ 75 g/ha at 45 DAT (then need based application)
Source of technology	CIB & RC, 2023	
Plot size	-	
No. of farmers	10	
Total cost	10040	
Critical input	Blue sticky trap & Pesticide	
Performance indicators:	(i) Technical- Production kg/unit, Average cost of input (Rs/unit) (ii) Economic- Net return, BC ratio (ix) Social – Income generation activity throughout the year	

OFT-8

Crop / Enterprise	Chickpea	
Title of on farm trial	Assessment of materials for management of gram pod borer in chickpea.	
Problem diagnosed	Losses about 15-18 % due to heavy infestation of gram pod borer in chickpea crop. The area is affected 0.25 lakh ha out of 0.32 lakh ha	
Farmers' Practices	Use of quinalphos 25% EC @ 1500 ml/ha	
Details of technologies selectedfor assessment	T ₁	Eraction of bird perch @50/ha+installation of pheromone trap@12/ha+Use of HaNPV @ 250 LE/ha (At incidence of insect pest)
	T ₂	Eraction of bird perche @50/ha+installation of pheromone trap@12/ha+Use of 3% Agniastra (Preventive spray at 30 DAS and than Need based application at 15 days interval)
Source of technology	NCOF, Ghaziabad 2016	
Plot size	0.2 ha. Each	
No. of farmers	10	
Total cost	5,900	
Critical input	HaNPV and Garlic and Green Chilli	
Performance indicators:	(i) Technical- yield (q/ ha) (ii) Economic- BC ratio (x) Social – Employment generation- 52 Man days	

OFT-9

Crop / Enterprise	Opium poppy seeds (Khas-khas Dana)	
Title of on farm trial	Assessment of income generation of farm women through grading and small packing of opium poppy seeds (Khas-khas Dana)	
Problem diagnosed	Low income of farm women due to no proper grading and packaging of opium seed	
Farmers' Practices	Sale out of opium seed without grading and packaging	
Details of technologies selected for assessment	T ₁	Sale out of opium seed after grading
	T ₂	Grading and packaging in good quality small size
Source of technology	-	
Plot size	-	
No. of farmers	10	
Total cost	5000	
Critical input	Packaging material and weighing balance	
Performance indicators:	(i) Technical- yield (per unit), quality and taste (ii) Economic- Net return, BC ratio (xi) Social – Income generation activity throughout the year	

OFT-10

Crop / Enterprise	Marigold	
Title of on farm trial	Assessment of Marigold varieties for income generation of farmwomen	
□ Problem diagnosed	Low income of farm women due to no use of improved Variety of Marigold	
Farmers' Practices	Use traditional Variety of Marigold	
Details of technologies selected for assessment	T ₁	Pusa Narangi Marigold
	T ₂	Pusa Basanti Marigold
Source of technology	ICAR, 2016	
Plot size	-	
No. of farmers	10	
Total cost	10000	
Critical input	Seed, Fungicide, insecticide	
Performance indicators:	(i) Technical- yield (q/ ha) (ii) Economic- Net return, BC ratio (xii) Social – Employment generation- 50 Man days

Detailed Information about OFT:

1.

Name of Discipline	Agronomy
Title of on-farm trial:	Assessment of soybean production technology for higher productivity in soybean - chickpea cropping system
Year/Season:	2024/Kharif
Farming situation:	Rainfed
Problem diagnosis:	Low yield due to old var. JS 9560
Thematic area:	Crop Production
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	JS 95-60
T2 –Recommended Practice-	Improved variety RVSM-2011-35 + Seed treatment with Penflufen 13.28% + Trifloxystrobin 13.28 % FS @1g/kg seed + Rhizobium @10ml/kg + PSB 10ml/kg + NPKS 20:60:20:20 or on the basis of Soil testing + Imazethapyr 10% SL @1000 ml/ha + Chlorantraniliprole 18.5 % SC @ 150ml/ha
T3- Recommended Practice-	Improved variety JS 20-98 + Seed treatment with Penflufen 13.28% + Trifloxystrobin 13.28 % FS @1g/kg seed + Rhizobium @10ml/kg + PSB 10ml/kg + NPKS 20:60:20:20 or on the basis of Soi testing + Imazethapyr 10% SL @1000 ml/ha + Chlorantraniliprole 18.5 % SC @ 150ml/ha
Date of sowing:	-
Date of harvesting:	-
Source of technology:	RVSKVV, Gwalior
Characteristics of technology:	-
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

2.

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of Natural materials for management of defoliators' in Soybean
Year/Season:	2024/Kharif
Farming situation:	Rainfed
Problem diagnosis:	Losses about 15-18 % due to heavy infestation of defoliators in soybean crop. The area is affected 2.0 lakh ha out of 2.7 lakh.
Thematic area:	IPM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of Quinalphos 25 % EC @ 1200 ml/ha
T2 –Recommended Practice-	Eraption of bird perch @50/ha+pheromone trap @12/ha+Use of SINPV & HaNPV @ 250 LE/ha+Neemastra @5% (At incidence of insect pests)
T3- Recommended Practice-	Eraption of bird perche @50/ha+pheromone trap @12/ha+Use of 3% Agniastra (Preventive spray at 30 DAS and than Need based application at 15 days interval)

Date of sowing:	-
Date of harvesting:	-
Source of technology:	NCOF, Ghaziabad 2016
Characteristics of technology:	Economic & Ecofriendly due to material available locally
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

3.

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of IPM module for management of Tomato Pin Worm (<i>Tuta absoluta</i>) in tomato crop
Year/Season:	2024/Kharif
Farming situation:	Rainfed
Problem diagnosis:	Losses about 70-80 % due to heavy infestation of tomato pin worm in tomato crop. The area is affected 200 ha out of 220 ha.
Thematic area:	IPM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Spray Chlorantraniliprole 18.5% SC @150ml/ha
T2 –Recommended Practice-	Installation of <i>Tuta</i> pheromone trap @ 40/ha + collection and destruction of infested leaf and fruits + 1st spray of Azadirachtin 5% EC @ 2ml/lit at 30 DAT +2nd spray of <i>Beauveria bassiana</i> 1.15% WP @ 3gm/lit at 45 DAT + Spinosad 45 % SC @ 0.25 ml/lit at 60 DAT.
T3- Recommended Practice-	Installation of <i>Tuta</i> pheromone trap @ 40/ha + collection and destruction of infested leaf and fruits + 1st spray of Profenophos 50% EC @ 2ml/lit at 30 DAT +2nd spray of Clorartaniliprol 18.5% SC @ 0.15 ml/lit at 45 DAT + 3 rd spray of lambda cyhalothrin 5 % EC @ 0.6 ml/lit at 60 DAT.
Date of sowing:	-
Date of harvesting:	-
Source of technology:	Journal of Biological Control 33(3), 2019
Characteristics of technology:	Economic & Ecofriendly due to material available locally
Name of Crop/Enterprises:	Tomato
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

4.

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of wheat production technology for higher productivity in soybean - wheat cropping system
Year/Season:	2024-25/Rabi
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to old var. Lok-1
Thematic area:	Crop Production
No of trials:	10
No. of farmers involved	10

Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Lok-1
T2 –Recommended Practice-	Improved variety HI 1634 Pusa Ahilya
T3- Recommended Practice-	Improved variety HI 1650 Pusa Ojaswi
Date of sowing:	-
Date of harvesting:	-
Source of technology:	ICAR-IARI, Regional station, Indore
Characteristics of technology:	Economic & Ecofriendly due to material available locally
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

5.

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of materials for management of gram pod borer in chickpea.
Year/Season:	2024-25/Rabi
Farming situation:	Irrigated
Problem diagnosis:	Losses about 15-18 % due to heavy infestation of gram pod borer in chickpea crop. The area is affected 0.4 lakh ha out of 0.48 lakh ha.
Thematic area:	IPM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of quinalphos 25% EC @ 1500 ml/ha
T2 –Recommended Practice-	Eraction of bird perch @50/ha+installation of pheromone trap@12/ha+Use of HaNPV @ 250 LE/ha (At incidence of insect pest)
T3- Recommended Practice-	Eraction of bird perche @50/ha+installation of pheromone trap@12/haUse of 3% Agniastra (Preventive spray at 30 DAS and than Need based application at 15 days interval)

6.

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of IPM module for management of thrips in rabi onion crop
Year/Season:	2024-25/Rabi
Farming situation:	Irrigated
Problem diagnosis:	Losses about 17-18 % due to heavy infestation of thrips in onion crop. The area is affected 900 ha out of 1296 ha.
Thematic area:	IPM
No of trials:	10

No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Spray lambda cyhalothrin 5% EC @300ml/ha
T2 –Recommended Practice-	Blue sticky trap @25ha+ Verticillium lecanii 3% AS @ 2.5 kg/ha at 30DAT+ Spray of Tolfenpyrad 15% EC@ 1000ml/ha at 45 DAT (then need based application)
T3- Recommended Practice-	Blue sticky trap @25ha + Verticillium lecanii 3% AS @ 2.5 kg/ha at 30DAT+Fipronil 80% WG @ 75 g/ha at 45 DAT (then need based application)
Date of sowing:	-
Date of harvesting:	-
Source of technology:	CIB & RC, 2023
Characteristics of technology:	Economic & Ecofriendly due to material available locally
Name of Crop/Enterprises:	Onion
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-

Information about Home Science OFT:

1.

Title of on-farm trial:	Assessment of income generation of farm women through preparation of good quality Lime Pickle and Paste
Year/Season:	2024/Kharif
Problem diagnosis:	Low income of farm women due to no proper value addition in Lime
Thematic area: (Focus area in DFI and nutri smart initiatives)	Value addition
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Poor quality of lime Pickle and Paste no use of class II preservative (SB)
T2 –Recommended Practice-	Preparation of good quality Lime Pickle and Paste with addition of pickle spices, Sugar and class II Preservative (SB) @ 100 PPM
Source of technology:	ICAR, 2016
Characteristics of technology:	-
Name of Crop/Enterprises:	Lime Pickle and Pest
Farming situation:	-
Date of sowing:	-
Date of harvesting:	-
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

2.

Title of on-farm trial:	Assessment of Khichadi made by Millet (Bajra) for Nutritional security in children and farm women
Year/Season:	2024/Kharif
Problem diagnosis:	Lack of awareness of nutrition
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional security
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Wheat GW 147
T2 –Recommended Practice-	Gram Dal + Desi Bajra
Source of technology:	ICAR, 2016
Characteristics of technology:	-
Name of Crop/Enterprises:	Millet (Bajra)
Farming situation:	-
Date of sowing:	-
Date of harvesting:	-

3.

Title of on-farm trial:	Assessment of income generation of farm women through grading and small packing of opium poppy seeds (Khas-khas Dana)
Year/Season:	2024-25/ <i>Rabi</i>
Problem diagnosis:	Low income of farm women due to no proper grading and packaging of opium seed
Thematic area: (Focus area in DFI and nutri smart initiatives)	Income generation
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Sale out of opium seed without grading and packaging
T2 –Recommended Practice-	Grading and packaging in good quality small size
Source of technology:	-
Characteristics of technology:	Good quality in milky color and good taste
Name of Crop/Enterprises:	Opium poppy seed
Farming situation:	-
Date of sowing:	-
Date of harvesting:	-
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

4.

Title of on-farm trial:	Assessment of Marigold varieties for income generation of farmwomen
Year/Season:	2024-25/ <i>Rabi</i>
Problem diagnosis:	Low income of farm women due to no use of improved Variety of Marigold
Thematic area: (Focus area in DFI and nutri smart initiatives)	Income generation
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment:	
T1 – Farmers Practice-	Use traditional Variety of Marigold
T2 –Recommended Practice-	Pusa Narangi Marigold and Pusa Basanti Marigold
Source of technology:	
Characteristics of technology:	High yielding good quality flower ecofriendly & High return value
Name of Crop/Enterprises:	Marigold
Farming situation:	Irrigated
Date of sowing:	-
Date of harvesting:	-

	RVG-202	18-20.0 q/ha., 105 days, Suitable for late sowing condition, YR- 2012	3X4
	RVG-203	19-20.0 q/ha., 100 days, Moderate resistant to wilt & dry root rot, YR- 2012	3X4
	RVG-204	19-20.0 q/ha., 112-115 days, Timely sowing, Tolerant to wilt and able to machine harvesting, YR- 2021	3X4
	RVG-205	17-18.0 q/ha., Timely sowing irrigated condition, Green seeded, Tolerant to wilt	3X4
	RVGK-101	15-18.0 q/ha., 109 days, Timely sowing irrigated condition, whitish bold seeded, 40.6 g/100 seed	3X4
Coriander (3)	ACr-1	10-12.0 q/ha., Late maturity, Resistant to stem gall, irrigated condition, Essential oil 0.4%	3X4
	ACr-2	13.0 q/ha., Late maturity, Highly resistant to stem gall, Essential oil 0.54% (linalool 71.7%), irrigated condition	3X4
	RCr - 436	11-12.0 q/ha., Early maturity 90-100 days, Bold seeded, Susceptible to stem gall and wilt, irrigated condition	3X4
Fenugreek (5)	AFg -1	Bold seeds, 137 days maturity, Seed yield 20-22 q/ha, Suitable all over the country under irrigation.	3X4
	AFg -2	Small seeds possessing high medicinal value, Dual-purpose, 138 maturity, Seed yield 15-18 q/ha, irrigated condition.	3X4
	AFg -3	Moderately resistant to powdery mildew and root rot diseases, Seed contains higher diosgenin (1.79 %), amino acid content 0.97 %, Seed yield 15-18 q/ha	3X4
	AFg -4	Moderately resistant to powdery mildew and root rot, Average yield 19.25 q/ha., Seed contains amino acid 0.94 % and 1.74 % diosgenin, Seeds are rich in crude fibre 21.7 %.	3X4
	AFg -5	Average seed yield is 17.21 q/ha, medium maturing, suitable for green leaf production under shade net condition in summer	3X4
Kasuri methi	Ajmer Kasuri methi	Green leaf Yield 70-80.0 q/ha, Late maturity 150-160 days, Sickle shape pod, 4-5 cutting	3X4
Celery	Ajmer Celery-1	Suitable for semi-arid conditions, Resistant to stem gall, Essential oil content of 2.4% from seeds, Seed yield 8-10q/ha.	3X4
Dill (2)	ADL-1	Suitable for export, contain about 3.5% essential oil. 142 days maturity, Yield 14.7 q/ha, irrigated conditions.	3X4
	ADL-2	135 days maturity, Seeds are bold, Seed yield 14.6q.ha, irrigated and 5.8 q/ha under rainfed conditions, seed contain about 3.2 % essential oil, Suitable for irrigated and rainfed conditions.	3X4
Fennel (2)	AF-1	Late maturity, Tolerance to Ramularia and Alternaria blight, Volatile oil content 1.6%, Seed yield 20-22q/ha., irrigated condition.	3X4
	AF-2	Seed yield 17.9 q/ha., Moderately resistant to Ramularia blight diseases, seed contains 1.9% essential oil, Essential oil contains 57.5% Anethol + Estragol, irrigated condition	3X4
Linseed (5)	JLS-66	16-18.0 q/ha., 114-120 days, moderately resistant to powdery mildew and bud fly, moderately susceptible to Alternaria blight, YR-2018	3X4
	JLS 73	14-16.0 q/ha., oil content 40%, moderately resistant to powdery mildew, rust, Alternaria blight and bud fly, YR-2011	3X4
	JLS 79	17-19.0 q/ha., oil content 38.38%, moderately resistant to powdery mildew, rust and Alternaria blight, YR-2016	3X4
	JLS-95	12-14.0 q/ha. Rainfed condition and 16-18.0 q/ha irrigated condition, oil content 40%, white flower, moderately resistant to powdery mildew, rust,	3X4

Nigella (2)			Alternaria blight and bud fly, YR-2018	
		Pratap Alsi-2	19.57 q/ha., irrigated condition, oil content 41.81%, Early maturity, moderately resistant to powdery mildew, Alternaria blight and wilt YR-2015	3X4
		Kiran	-	3X4
		AN-1	Resistant to root rot, Suitable for cultivation under semi-arid region under irrigation, 135 days seed maturity, Seed contain about 0.7% essential oil, Seed yield 8-12 q/ha.	3X4
		AN-20	Average yield 10.25 q/ha, Seed contain about 0.7% essential oil	3X4

LED 65 Inch	2022	100000.00	Working
Projector	2022	80000.00	Working

1.5.(A). Details of SAC meeting to be conducted in the year

Sl. No.	Tentative Date
1	June 2024
2	October 2024

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES	The climate of the zone is characterized as semi arid with extremely hot summer during May-June. Rainfall is 701 mm mostly concentrated in the months of July and August. Normally, onset of SW- monsoon takes place in first week of July withdrawal in first fortnight of September. Nearly 90% rainfall is received from south-west monsoon during July-September and there is some winter rainfall. The rainfall is erratic in distribution. The temperature varies from a minimum of 00C in winter to a maximum and minimum temperatures in summer are 390C and 210C and in winter 26.30C and 8.20C, respectively. Mean summer temperature is 30.10 C and mean winter 17.20C. Dust storms are common in May and June

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	Gird Agro-climatic Zone	Medium and alluvial soil, annual rain fall 650 to 750 mm, Maximum temperature 45-48 ⁰ C and Minimum temperature 2-4 ⁰ C

SWOT Analysis of each Agro-Ecological Situations of district AES

Strength	Weakness	Opportunities	Threats
☐ Deep soil varies from 30 cm to >120cm and soil Ph range from 7.52 to 8.5. District has basically agricultural oriented economy	☐ 1.9 Lakh hectare is under medium to deep ravines	☐ Crop diversifications can be adopted along with livestock	☐ Soil erosion due to medium and deep ravines to become a serious problem

Add AES if needed

Land Use Pattern

Particulars	Area “000 ha”
Total Geographical area	501.686
Forest	43.608
Waste Land	41.029
Other than cultivated area	16.26
Cultivable waste and alkaline land	89.26
Pastures	18.98
Bushes	-
Current Fallow	67.35
Other Fallow	-
Agricultural Land	272.188
Area Sown	493.876
Kharif	222.95
Rabi	269.02
Zaid	1.89
Cropping Intensity	182%

Irrigated Area with Different Sources:

S. No.	Description	Area (ha)
1	Canal	109300
2	Well	31600
3	Tube well	126897
4	Ponds	-
5	Others	1200

Soil types

S. No.	Soil type	Characteristics	Area “000 ha”
1	Alluvial	Semi loam, deep, sandy	501.68

Note: Figure. In parenthesis denotes the percentage of total area.

Area, Production and Productivity of major crops cultivated in the district

S. No	Crop	Area (ha)	Production (Qt.)	Productivity (Q /ha)
Rabi Crop				
1	Wheat	99000	392.06	2.09
2	Barley	2018	6.61	0.07
3	Chickpea	10700	15.28	1.54
4	Pea	600	0.81	1.87
5	Lentil	2700	0.24	0.49
6	Mustard	170000	355.39	1.19
Kharif Crop				
1	Paddy	4000	13.46	60.55

2	Sorghum	1000	1.76	17.31
3	Pearl millet	171000	611.61	25.06
4	Pigeon pea	10000	5.61	12.17
5	Green Gram	2000	1.3	11.07
6	Black Gram	4500	3.95	13.35
7	Cluster bean	12000	10.75	17.14
8	Sesame	14000	6.35	6.68

Weather data (Jan, 2023- Dec., 2023)

Month /Year	Rainfall (m.m.)	Temperature (° C)	
		Maximum	Minimum
Jan, 2023	21.5	23.0	2.8
Feb, 2023	0.00	33.5	8.0
Mar, 2023	3.5	34.0	15.0
Apr, 2023	6.0	42.0	17.0
May, 2023	18.5	44.0	21.0
Jun, 2023	137	42.0	24.0
July, 2023	187.8	37.0	26.0
Aug., 2023	143.5	36.0	24.0
Sept., 2023	307.2	37.0	23.0
Oct. 2023	0.5	35.0	16.5
Nov. 2023	28	33.5	12.0
Dec. 2023	17	25.0	7.0

Production and productivity of livestock, Poultry, Fisheries etc. in the district

Details of Operational area / Villages (2023)

Sl. No.	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Morena	Morena	Karua, Piparseva	Pearl millet, Wheat and mustard	Low productivity	- To increase cropping intensity and crops on sustainable basis - To increase adoption of Integrated Nutrient Management(INM), Integrated Pest Management(IPM), post-harvest techniques in crops, fruits and vegetables - To promote orchard and cultivation of vegetables/spices/medicinal crops to improve socio-economic conditions of rural peoples - To control soil and water erosion through water harvesting ,conservation and appropriate measures for efficient soil moisture utilization - To develop seed villages and distribution of improved variety seed of major agricultural crops (Mustard, Wheat, Sesame, green gram, Black gram etc.) - Production and utilization of different organic manures and biofertilizers under Integrated Nutrient management(INM) - To create awareness of enhancing productivity of milch animals through genetic improvement, balance
2	Ambah	Ambah	Sirmor ka pura	Pearl millet, Wheat and mustard	Low productivity	
3	Porsa	Porsa	Barbai, Singpura	Pearl millet, Wheat and mustard	Low productivity	
4	Joura	Joura	Baroli	Pearl millet, Wheat and mustard	Low productivity	
5	Kailarash	Kailarash	Bastoli	Pearl millet, Wheat and mustard	Low productivity	

						feeding , management and health care • Empowering women and rural youth through income generating activities like value addition , Dairying, poultry farming, seed production, nursery raising, vermicomposting and beekeeping
6	Sabalgarh	Sabalgarh	-	-	-	-
7	Pahadgarh	Pahadgarh	-	-	-	-

Priority / Thrust areas

S. No.	Particulars
1.	To increase cropping intensity and crops on sustainable basis
2.	To increase adoption of Integrated Nutrient Management(INM), Integrated Pest Management(IPM),post-harvest techniques in crops, fruits and vegetables
3.	To promote orchard and cultivation of vegetables/spices/medicinal crops to improve socio-economic conditions of rural peoples
4.	To control soil and water erosion through water harvesting ,conservation and appropriate measures for efficient soil moisture utilization
5.	To develop seed villages and distribution of improved variety seed of major agricultural crops (Mustard, Wheat, Sesame, green gram, Black gram etc.)
6.	Production and utilization of different organic manures and biofertilizers under Integrated Nutrient management(INM)
7.	To create awareness of enhancing productivity of milch animals through genetic improvement, balance feeding , management and health care
8.	Empowering women and rural youth through income generating activities like value addition , Dairying, poultry farming, seed production, nursery raising, vermicomposting and beekeeping

TECHNICAL PROGRAMME

A. Details of targeted mandatory activities by KVK

OFT		FLD and CFLD	
1		2	
Number of OFTs	Number of Farmers	Number of FLDs	Number of Farmers
23	230	17	170

Training		Extension Activities	
3		4	
Number of Courses	Number of Participants	Number of activities	Number of participants
107	2675	309	60020

Seed Production (Qtl.)	Planting material (Nos.)
2.0 (Vegetable seed)	10000

B. Abstract of interventions to be undertaken

S. No.	Thrust area	Crop/ Enterprise	Identified Problem	Interventions					
				Title of OFT if any	Title of FLD if any	Title of Training if any	Title of training for extension personnel if any	Extension on activities	Supply of seeds, planting materials etc.
1	INM	Pearl millet	Access use of Nitrogen in urea granule form	Assessment of application of nano urea on pearl millet	-	Importance of liquid nano fertilizer in millet	-	Print media	-
2	INM	Pearl millet	Low yield due to imbalance use fertilizer	Assessment of zinc sulphate on pearl millet	-	Integrated nutrient management in pearl millet	-	Print media	-
3	HOV	Bottle guard	Low yield due to more number of staminate flowers (Sex ratio)	Assessment of PGRs in Bottle guard crop for increasing pistillate flowers	-	-	Importance of PGRs in cucurbits	Radio Talk	-
4	HOF	Guava	Low yield and substandard quality of fruits	Assessment of crop regulation practice in guava fruit crop	-	-	Crop regulation technology in Guava fruit crop	Radio Talk	-

5	IPM	Pigeon pea	Losses about 18-28% due to pod fly and pod borer	Assessment of IPM technology for management of pod fly and pod borer in pigeon pea	-	IPM in pigeon pea	-	Print media	-
6	LPM	Buffalo	Prevalence of subclinical mastitis in buffaloes	Assessment of vitamin E and selenium for management of subclinical mastitis in graded murrah buffaloes	-	-	Feeding management in buffalo	Print media	-
6	LPM	Buffalo	Low milk fat and yield due to negative energy balance	Assessment of feeding of bypass fat for its effect on milk production in high lactating graded murrah buffaloes	-	-	-	Print media	-
7	CP	Mustard	Low yield due to use of old variety	Assessment of improved varieties of mustard	-	Production technology of mustard	-	Print media	-
8	CP	Wheat	Low yield due to use of old variety Lok-1/GW 322	Assessment of improved varieties of wheat	-	-	Production technology of Rabi crops	Print media	-
9	HOV	Pea	Low yield due to use of old variety (Arkel)	Assessment of high yield varieties of garden pea	-	Production technology of garden pea	-	Print media	-
10	HOF	Marigold	Minimum self life of intact flower	Assessment of zinc and iron nutrients for longevity of intact flower in marigold crop	-	Production technology of marigold	-	Print media	-
11	IDM	Mustard	Losses about 15-25% due to heavy incidence of Sclerotinia stem rot and Alternaria blight	Assessment of IDM technology for management of sclerotinia stem rot alternaria blight in Mustard	-	-	Disease management in mustard	Print media	-
12	IPM	Berseem	Losses about 20-25% due to heavy	Assessment of Agniastra for management of	-	-	-	Print media	-

			infestation of Helicoverpa armigera	Helicoverpa armigera in Berseem					
13	LPM	Buffalo	Low milk yield due to indigestibility of feed due to lack of probiotic	Assessment of yeast culture for its effect on fiber digestion and milk production in dairy buffaloes	-	-	Feeding management in buffalo	Print media	-
14	LPM	Buffalo	Low milk yield due to deficiency of calcium and minerals	Assessment of Calcium (liquid) supplements for its effect on milk production in graded murrah buffaloes	Demonstration of mineral and vitamin mixture feeding for its effect on milk production and reproduction in dairy buffaloes	-	Feeding management in buffalo	Print media	-
15	CBD	-	Poor knowledge about SHC recommendation	Assessment of knowledge & adoption of soil health card based fertilizer application	-	-	-	Print media	-
16	Income generation	-	Low income due to farm gate selling of birds	Assessment of Income of self-Help Group of poultry farmers	-	Formation of SHG	-	Print media	-
17	Nutritional security	pearl millet	Nutritional insecurity among farm families	Assessment of bio fortified varieties of pearl millet for nutritional security of farm families	-	Balance diet for pregnant ladies	-	Print media	-
18	Nutritional security	-	Nutritional insecurity among preschool children	Assessment of nutritive porridge for nutritional security of preschool children	-	-	Nutritional security for preschool children	Print media	-
19	Value addition	Mushroom	Low shelf life, post harvest losses (18-20%), less income,	Assessment of post harvest management of oyster mushroom and its substrate	-	Income generation through mushroom production	-	Print media	-

			Contamination and the disposal problem from mushroom substrate						
20	Weed management	Black gram	Low yield due to weed infestation	-	Demonstration of Chemical weed management in black gram crop	-	Weed management in kharif crops	Field day	-
21	Weed management	Pearl millet	Low yield due to weed infestation	-	Demonstration of chemical weed management in pearl millet	Weed management in pearl millet	-	Field day	-
22	Nutrient management	Onion	Low yield due to no use of balance fertilizers	-	Demonstration on nutrient management in kharif onion under onion-cole cropping system	-	Production technology of kharif vegetable	Radio talk and field day	-
23	DM	Vegetables Seedlings	High mortality due to soil born disease	-	Demonstration on nursery bed treatment for soil born disease management	-	-	Print media	-
24	IPM	Paddy	Low yield of due to heavy insect infestation	-	Demonstration of IPM technology for management of stem borer and leaf folder in paddy	IPM in paddy	-	Field day	-
25	LPM	Buffalo	High mortality due to worm infestation	-	Demonstration of deworming for management of buffalo calf mortality	-	Deworming in calf	Field day	-
26	ICT	Multi disciplinary massage	-	-	Demonstration of dissemination of agriculture information through KMA	-	-	Print media	-
27	ICT	Dairy animal	-	-	Demonstration of adoption of	-	-	Print media	-

					mineral mixture feeding for dairy animals				
28	Varietal	Wheat	Low yield due to old variety	-	Demonstration of improved variety of wheat crop	-	Production technology of Rabi crops	Field day	-
29	Varietal	Mustard	Low yield due to old variety	-	Demonstration of improved variety of mustard crop	-	Production technology of Rabi crops	Field day	-
30	Nutrient management	Egg plants	Low yield due to imbalance use of fertilizer	-	Demonstration on foliar application of nutrients on egg plants	-	Production technology of Rabi vegetable	Field day	-
31	Nursery raising management	Vegetable	High mortality of seedlings	-	Demonstration on Hi tech Nursery raising in Vegetables	Importance of Hi tech Horticulture	-	Print media	-
32	IDM	Potato	Low yield due to no use of disease management	-	Demonstration of IDM technology for management of tuber born disease (Black scurf and common scab) in potato	IDM in potato crop	-	Field day	-
33	IPM	Mustard	Low yield due to Aphid infestation	-	Demonstration of IPM technology for management of Aphid in mustard	IPM in mustard	-	Field day	-
34	LPM	Buffalo	Low yield due to ecto endo parasites	-	Demonstration of ivermectin for control of ecto and endo parasites in dairy buffalo	ecto and endo parasites in buffalo	-	Radio talk and print media	-
35	LPM	Buffalo	Low yield due to ecto parasites	-	Demonstration of deltamethrin for management of ecto parasites in dairy buffalo	Ecto parasites in buffalo	-	Radio talk	-

36	WOE	-	-	-	Demonstration of nutritional garden for women and their family member	Importance of nutritional garden	-	Print media	-
37	WOE	Ring cutter	High drudgery due to no use of vegetable plucking equipment	-	Demonstration of drudgery reduction of farm women in vegetable plucking using ring cutter	-	-	Print media	-
38	WOE	Drumstick	-	-	Demonstration of Moringa leaves powder/ Capsules for adolescent girls	-	-	Print media	-
39	WOE	Mushroom	-	-	Demonstration of Mushroom powder supplementation for nutritional security of preschool children	-	-	Print media	-

Technologies to be assessed

A.1 Abstract on the number of technologies to be assessed in respect of crops

Kharif OFT

Details of On Farm Trial (OFT)

OFT-1

Crop/Enterprise	Pearl millet
Title of on-farm trial	Assessment of Nano urea as source of nitrogen in pearl millet crop
Problem diagnosed	Extra use of nitrogen and high cost of nitrogen
Farming situation	Irrigated
Production system and thematic area	Balance fertilizer application, liquid fertilizer application under INM
Farmers' practices	Use of urea granules
Details of technologies selected for assessment/refinement Treatments	T1: Use of urea granules T2 : Nano urea as foliar application T3 : No urea use
Source of technology	ZARS Morena 2022
No. of farmers	10
Area of each trial (acre)	1.0
No of trial	10
No. of animals (if animals are part of OFT)	-
Critical input	Nano urea
Performance indicators Observation to be recorded	Tiller/hil, cob length (cm), yield (kg/ha)
Cost of input (Rs.)	400/-
Total cost (Rs.)	4000/-

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of Nano urea as source of nitrogen in pearl millet crop
Year/Season:	2024/Kharif
Farming situation:	Irrigated
Problem diagnosis:	Extra use of nitrogen and high cost of nitrogen
Thematic area:	Balance fertilizer application, liquid fertilizer application under INM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of urea granules
T2 –Recommended Practice-	Nano urea as foliar application
T3- Recommended Practice-	No urea use

Date of sowing:	-
Date of harvesting:	-
Source of technology:	RVSKVV, Gwalior
Characteristics of technology:	
Name of Crop/Enterprises:	Pearl millet
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-2

Crop/Enterprise	Paddy
Title of on-farm trial	Assessment of Nano DAP as source of Phosphorus in paddy crop
Problem diagnosed	Extra use of nitrogen and high cost of Phosphorus
Farming situation	Irrigated
Production system and thematic area	Balance fertilizer application, Soil applications under INM
Farmers' practices	Use of DAP granules
Details of technologies selected for assessment/refinement Treatments	T1: No DAP Use T2 : Nano DAP Spray after planting T3 : Use of DAP granules
Source of technology	ZARS Morena 2022
No. of farmers	10
Area of each trial (acre)	1.0
No of trial	10
No. of animals (if animals are part of OFT)	-
Critical input	Nano urea
Performance indicators Observation to be recorded	Tiller/plant, length of ear head (cm), yield (kg/ha)
Cost of input (Rs.)	400/-
Total cost (Rs.)	4000/-

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of Nano DAP as source of Phosphorus in paddy crop
Year/Season:	2024/Kharif
Farming situation:	Irrigated
Problem diagnosis:	Extra use of nitrogen and high cost of Phosphorus

Thematic area:	Balance fertilizer application, Soil applications under INM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	No DAP Use
T2 –Recommended Practice-	Nano DAP Spray after planting
T3- Recommended Practice-	Use of DAP granules
Date of sowing:	-
Date of harvesting:	-
Source of technology:	-
Characteristics of technology:	
Name of Crop/Enterprises:	Paddy
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-3

Crop / Enterprise	Bottle guard	
Title of on farm trial	Assessment of PGRs in Bottle guard crop for increasing pistillate flowers	
Problem diagnosed	Low yield due to more number of staminate flowers (Sex ratio)	
Farmers' Practices	No use of PGRs	
Details of technologies selectedfor assessment	T ₁	Farmer Practice
	T ₂	Foliar application of 2-chloroethyl phosphonic acid @ 200ppm during 2 and 4 true leaf stage
Source of technology	RVSKVV, Gwalior	
Plot size	0.2ha	
No. of farmers	10	
Total cost	Rs.2500/-	
Critical input	PGRs	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	Sex ratio, Yield (q/ha)	

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Horticulture
Title of on-farm trial:	Assessment of PGRs in Bottle guard crop for increasing pistillate flowers

Year/Season:	2024/Kharif
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to more number of staminate flowers (Sex ratio)
Thematic area:	Use of PGRs,HOV
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Farmer Practice
T2 –Recommended Practice-	Foliar application of 2-chloroethyl phosphonic acid @ 200ppm during 2 and 4 true leaf stage
T3- Recommended Practice-	Foliar application of sodium para-nitrophenolate @ 5000ppm, 25-30 DAS
Date of sowing:	-
Date of harvesting:	-
Source of technology:	RVSKVV, Gwalior
Characteristics of technology:	
Name of Crop/Enterprises:	Bottle guard
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-4

Crop / Enterprise	Guava	
Title of on farm trial	Assessment of crop regulation practice in guava fruit crop	
Problem diagnosed	Low yield and substandard quality of fruits	
Farmers' Practices	No use of crop regulation practices	
Details of technologies selectedfor assessment	T ₁	Farmer Practice
	T ₂	Foliar application of urea @ 10% in month of April.
Source of technology	RVSKVV, Gwalior	
Plot size	0.2ha	
No. of farmers	10	
Total cost	Rs.1250/-	
Critical input	Chemical fertilizer urea	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No of fruits/branch, TSS (^o Brix), Yield (q/tree)	

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Horticulture
Title of on-farm trial:	Assessment of crop regulation practice in guava fruit crop
Year/Season:	2024/Kharif
Farming situation:	Irrigated
Problem diagnosis:	Low yield and substandard quality of fruits
Thematic area:	Use of urea, HOF
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Farmer Practice
T2 –Recommended Practice-	Foliar application of urea @ 10% in month of April.
T3- Recommended Practice-	Foliar application of urea solution @ 15% in month of April.
Date of sowing:	-
Date of harvesting:	-
Source of technology:	RVSKVV, Gwalior
Characteristics of technology:	
Name of Crop/Enterprises:	Guava
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-5

Crop / Enterprise	Pigeon pea
Title of on farm trial	Assessment of IPM technology for management of pod fly and pod borer in pigeon pea
Problem diagnosed	Losses about 18-28% due to pod fly and pod borer
Farmers' Practices	Use of Chloropyriphos 20 EC @ 1500ml/ha
Details of technologies selectedfor assessment	T ₁ Spray of NPV@350LE/ha and 1/2 Dose of monocrotophos
	T ₂ Spray of NSKE 5% followed by 0.04% monocrotophos at One week interval
Source of technology	ICAR-IIPR, Kanpur
Plot size	0.2ha
No. of farmers	10
Total cost	Rs. 5000/-
Critical input	

Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	% infestation, % pod damage and Yield (q/ha)

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Plant Protection
Title of on-farm trial:	Assessment of IPM technology for management of pod fly and pod borer in pigeon pea
Year/Season:	2024/Kharif
Farming situation:	Irrigated
Problem diagnosis:	Losses about 18-28% due to pod fly and pod borer
Thematic area:	Wheat-Pigeon pea cropping system, IPM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Spray of NPV@350LE/ha and 1/2 Dose of monocrotophos
T2 –Recommended Practice-	Spray of NSKE 5% followed by 0.04% monocrotophos at One week interval
T3- Recommended Practice-	Spray of Dimethoate 0.036 followed by NPV@350 LE/ha and 1/2 Dose of monocrotophos
Date of sowing:	-
Date of harvesting:	-
Source of technology:	ICAR-IIPR, Kanpur
Characteristics of technology:	
Name of Crop/Enterprises:	Pigeon pea
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT -6

Crop/Enterprise	Peal millet
Title of on farm trial	Assessment of Azadirectin 0.15% EC w/w Neem seed kernel based on Grass hopper in Peal millet
Problem diagnosed	Low yield 26% in pearl millet due to heavy infestation og grass hopper. Affected Area about 50,000 ha
Farmers' Practices	Non adoption of control major

Details of technologies selected for assessment	T ₁	Farmers Practice
	T ₂	Azadiractin 0.15% EC w/w Neem seed kernel based @ 3ml/lit.
	T ₃	Acephate 75% SP@ 1 kg/g a.i.
Source of technology	Directorate of Plant Protection & Quarantine 2022	
Plotsize	0.4 ha	
No. of trials	10	
Total input cost	4000	
Critical input	Azadiractin 0.15% EC w/w Neem seed kernel based @ 6lit.	
Performance indicators: (i) Technical- yield loss % (ii) Economic - B:C Ratio (iii) Social –	Percent incidence of grass hopper Yield (q/ha) Education & Awareness	

OFT -7

1	Enterprise	Dairy Buffalo
2	Title of on-farm trial	Assessment of vitamin E and selenium for management of subclinical mastitis in graded murrah buffaloes
3	Problem diagnosed	Prevalence of subclinical mastitis in buffaloes
4	Farming situation	Mixed farming
5	Production system and thematic area	Disease Management
6	Farmers' practices	No use of drugs for prevention
7	Details of technologies selected for assessment/refinement Treatments	T1: No use of drugs for prevention T2: Vitamin E and selenium powder @5-10 g/day/buffalo for two months
8	Source of technology	NDRI, Karnal
9	No. of animals	10
10	No. of farmers	10
11	Critical input	Vitamin E and Selenium Powder
12	Cost of input	Rs. 9000/-
13	Total cost	Rs. 12500/-
14	Performance indicators Observation to be recorded Daily Milk yield (L) Estrous cycle regularity Economics : B: C ratio Social: Farmers reaction & Feedback	Milk yield, disease incidence, Net return, BCR

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Animal Science

Title of on-farm trial:	Assessment of vitamin E and selenium for management of subclinical mastitis in graded murrah buffaloes
Year/Season:	2024/Kharif
Farming situation:	Mixed farming
Problem diagnosis:	Prevalence of subclinical mastitis in buffaloes
Thematic area:	Disease Management
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	No use of drugs for prevention
T2 –Recommended Practice-	Vitamin E and selenium powder @5-10 g/day/buffalo for two months
T3- Recommended Practice-	-

OFT -8

1	Enterprise	Dairy Buffalo
2	Title of on-farm trial	Assessment of feeding of bypass fat for its effect on milk production in high lactating graded murrah buffaloes
3	Problem diagnosed	Low milk fat and yield due to negative energy balance
4	Farming situation	Mixed farming
5	Production system and thematic area	Feeding Management
6	Farmers' practices	No use of bypass fat feeding
7	Details of technologies selected for assessment/refinement Treatments	T1: No Use of supplements T2: Bypass fat @ 100g/day/buffalo for two months
8	Source of technology	NDRI, Karnal
9	No. of animals	10
10	No. of farmers	10
11	Critical input	Bypass fat

12	Cost of input	Rs. 7400/-
13	Total cost	Rs.12000/-
14	Performance indicators Observation to be recorded Daily Milk yield (L) Estrous cycle regularity Economics : B: C ratio Social: Farmers reaction & Feedback	Milk yield, fat %, Net return, BCR

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Animal Science
Title of on-farm trial:	Assessment of feeding of bypass fat for its effect on milk production in high lactating graded murrah buffaloes
Year/Season:	2024/Kharif
Farming situation:	Mixed farming
Problem diagnosis:	Low milk fat and yield due to negative energy balance
Thematic area:	Feeding Management
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	No Use of supplements
T2 –Recommended Practice-	Bypass fat @ 100g/day/buffalo for two months
T3- Recommended Practice-	-
Date of sowing:	-
Date of harvesting:	-
Source of technology:	NDRI, Karnal
Characteristics of technology:	
Name of Crop/Enterprises:	Dairy Buffalo
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Rabi OFT

OFT-9

Crop / Enterprise	Mustard	
Title of on farm trial	Assessment of high yielding variety of mustard crop	
Problem diagnosed	Low yield of mustard due to old varieties i.g. Pusa bold or other private companies	
Farmers' Practices	Use of old variety and his own seed	
Details of technologies selected for assessment	T ₁	Pusa bold
	T ₂	DRMR 1165-40
	T ₃	Radhika
Source of technology	DRMR, Bharatpur (R.J.)	
Plot size	0.2ha	
No. of farmers	10	
Total cost	Rs. 2500/-	
Critical input	Variety	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No of branch/ plant, pod length (cm), yield (kg/ha)	

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of high yielding variety of mustard crop
Year/Season:	2024-25/Rabi
Farming situation:	Irrigated
Problem diagnosis:	Low yield of mustard due to old varieties i.g. Pusa bold or other private companies
Thematic area:	Improved variety, Varietal assessment
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Pusa bold
T2 –Recommended Practice-	DRMR 1165-40
T3- Recommended Practice-	Radhika
Date of sowing:	-
Date of harvesting:	-
Source of technology:	DRMR, Bharatpur (R.J.)

Characteristics of technology:	
Name of Crop/Enterprises:	Mustard

OFT-10

Crop / Enterprise	Wheat
Title of on farm trial	Assessment of high yielding variety of wheat
Problem diagnosed	Low yield of wheat due to old variety i.g. Lok-1
Farmers' Practices	Use of old and his own seed
Details of technologies selected for assessment	T ₁ Lok-1
	T ₂ HI-8830/HI-1655
	T ₃ HI-1544
Source of technology	DWR, Karnal (HR)
Plot size	1.0 acre
No. of farmers	10
Total cost	Rs.15000/-
Critical input	Variety
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No of tiller/ plant, yield (kg/ha)

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of improved varieties of wheat
Year/Season:	2024-25/Rabi
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to use of old variety Lok-1/GW 322
Thematic area:	Improved variety
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Farmer Practice
T2 –Recommended Practice-	Pusa Tejas

T3- Recommended Practice-	DBW 303
Date of sowing:	-
Date of harvesting:	-
Source of technology:	DWR, Karnal (HR)
Characteristics of technology:	
Name of Crop/Enterprises:	Wheat

OFT-11

Crop / Enterprise	Pea
Title of on farm trial	Assessment of high yield varieties of garden pea
Problem diagnosed	Low yield due to use of old variety (Arkel)
Farmers' Practices	No use of Arkel variety
Details of technologies selected for assessment	T ₁ Farmer Practice T ₂ Kashi Nandani
Source of technology	IIVR
Plot size	0.2ha
No. of farmers	10
Total cost	Rs12500/-
Critical input	Variety
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No of tiller/ plant, yield (kg/ha)

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Horticulture
Title of on-farm trial:	Assessment of high yield varieties of garden pea
Year/Season:	2024-25/Rabi
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to use of old variety (Arkel)
Thematic area:	Use of improved varieties, HOV
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment

Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Farmer Practice
T2 –Recommended Practice-	Kashi Nandani
T3- Recommended Practice-	GS-10
Date of sowing:	-
Date of harvesting:	-
Source of technology:	IIVR
Characteristics of technology:	
Name of Crop/Enterprises:	Pea

OFT-12

Crop/Enterprise	Marigold
Title of on-farm trial	Assessment of high yielding varieties of marigold crop
Problem diagnosed	No crop diversification
Farming situation	Irrigated
Production system and thematic area	Use of high yielding variety of marigold, HOF
Farmers' practices	No cultivation of marigold
Details of technologies selected for assessment/refinement Treatments	T1 : Pusa Basanti T2: Pusa Deep
Source of technology	IARI, New Delhi, 2016
No. of farmers	10
Area of each trial (Acre)	0.5
No of trial	10
No. of animals (if animals are part of OFT)	-
Critical input	Seed
Performance indicators Observation to be recorded	Duration, No. of flower/plant , Yield (q/ha)
Cost of input (Rs.)	1000/-
Total cost (Rs.)	10000/-

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Horticulture
Title of on-farm trial:	Assessment of high yielding varieties of marigold crop
Year/Season:	2024-25/Rabi

Farming situation:	Irrigated
Problem diagnosis:	Minimum self life of intact flower
Thematic area:	Use of micronutrients for enhancing self life of intact flower, HOF
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Farmer Practice
T2 –Recommended Practice-	0.5% ZnSO ₄ as a foliar spray at 10 DAT
T3- Recommended Practice-	0.5% ZnSO ₄ +0.5% FeSO ₄ as a foliar spray at 10 DAT
Date of sowing:	-
Date of harvesting:	-
Source of technology:	IARI
Characteristics of technology:	
Name of Crop/Enterprises:	Marigold
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-13

Crop / Enterprise	Mustard
Title of on farm trial	Assessment of IPM technology for management of sclerotinia stem rot alternaria blight in Mustard
Problem diagnosed	Losses about 15-25% due to heavy incidence of Sclerotinia stem rot and Alternaria blight
Farmers' Practices	Seed treatment with carbendazim @ 2g/kg seed
Details of technologies selectedfor assessment	T ₁ Seed treatment with Trichoderma harzianum @ 5g/kg seed
	T ₂ Foliar spray of Allium sativum bulb extract (1% W/V)
Source of technology	ICAR-DRMR, Bharatpur
Plot size	0.2ha
No. of farmers	10
Total cost	Rs. 5000/-
Critical input	Trichoderma harzianum, Allium sativum bulb (Garlic bulb) extract and Pseudomonas fluorescence
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	% disease incidence, Yield (q/ha)

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Plant Protection
Title of on-farm trial:	Assessment of IPM technology for management of sclerotinia stem rot alternaria blight in Mustard
Year/Season:	2024-25
Farming situation:	Irrigated
Problem diagnosis:	Losses about 15-25% due to heavy incidence of Sclerotinia stem rot and Alternaria blight
Thematic area:	Pearl millet-Mustard cropping system, IPM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Seed treatment with Trichoderma harzianum @ 5g/kg seed
T2 –Recommended Practice-	Foliar spray of Allium sativum bulb extract (1% W/V)
T3- Recommended Practice-	Seed treatment with Trichoderma harzianum @5g/kg seed followed by foliar
Date of sowing:	-
Date of harvesting:	-
Source of technology:	ICAR-DRMR, Bharatpur
Characteristics of technology:	
Name of Crop/Enterprises:	Mustard

OFT-14

Crop / Enterprise	Berseem
Title of on farm trial	Assessment of Agniastra for management of Helicoverpa armigera in Berseem
Problem diagnosed	Losses about 20-25% due to heavy infestation of Helicoverpa armigera
Farmers' Practices	Use of Chloropyriphos 20 EC @ 1500ml/ha
Details of technologies selectedfor assessment	T ₁ Use of HaNPV@250LE/ha (At incidence of pest)
	T ₂ Foliar spray of Agniastra 3% (Preventive spray 10 Days after harvesting of mustard crop and than need based application at 15 Days interval)
Source of technology	NCOF, Gaziabad
Plot size	

No. of farmers	10
Total cost	Rs. 5000/-
Critical input	HaNPV, Garlic, green chilli and spinosad 45 SC
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	% infestation, Number of larva/M ² and Yield (q/ha)

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Plant Protection
Title of on-farm trial:	Assessment of Agniastra for management of Helicoverpa armigera in Berseem
Year/Season:	2024-25/Rabi
Farming situation:	Irrigated
Problem diagnosis:	Losses about 20-25% due to heavy infestation of Helicoverpa armigera
Thematic area:	Mustard-Berseem relay cropping system, IPM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of HaNPV@250LE/ha (At incidence of pest)
T2 –Recommended Practice-	Foliar spray of Agniastra 3% (Preventive spray 10 Days after harvesting of mustard crop and than need based application at 15 Days interval)
T3- Recommended Practice-	Foliar spray of spinosad 45 SC@167 ml/ha
Date of sowing:	-
Date of harvesting:	-
Source of technology:	NCOF, Gaziabad
Characteristics of technology:	
Name of Crop/Enterprises:	Berseem

OFT -15

Crop/Enterprise	Mustard
Title of on farm trial	Assessment of neemashtra for control of aphid in Mustard
Problem diagnosed	High infestation of aphid in flowering and milk filling satge
Farmers' Practices	Non adoption of control measure
Details of technologies selected for assessment	T ₁ Farmer practice
	T ₂ Application of neemashtra at 10 days interval.
	T ₃ Application neemashtra at 15 days interval.
Source of technology	Gurukul 2022 (karnal) haryana
Plot size	0.4 ha
No. of trails	10
Total Input cost	4000
Critical input	20 l/ha Concentrate (neemashtra)
Performance indicators: (i) Technical- yield loss % (ii) Economics – B:C Ratio (iii) Social –	Percent incidence of aphid Yield (q/ha) Education & Awareness

OFT -16

1	Enterprise	Dairy Buffalo
2	Title of on-farm trial	Assessment of yeast culture for its effect on fiber digestion and milk production in dairy buffaloes
3	Problem diagnosed	Low milk yield due to indigestibility of feed due to lack of probiotic
4	Farming situation	Mixed farming
5	Production system and thematic area	Feeding Management
6	Farmers' practices	No use of Probiotics
7	Details of technologies selected for assessment/refinement Treatments	T1: No use of drugs T2: Probiotics @ 20g/day/animal
8	Source of technology	IVRI, Izzatnagar
9	No. of animals	10
10	No. of farmers	10
11	Critical input	Yeast culture
12	Cost of input	Rs. 3000/-
13	Total cost	Rs.10000/-
14	Performance indicators Observation to be recorded Daily Milk yield (L) Estrous cycle regularity Economics : B: C ratio Social: Farmers reaction & Feedback	Milk yield, Net return, BCR

Detailed Information about OFT:

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Animal Science
Title of on-farm trial:	Assessment of yeast culture for its effect on fiber digestion and milk production in dairy buffaloes

OFT-18**

Title	Assessment of knowledge & adoption of soil health card based fertilizer application
Season & Year	Kharif & Rabi 2024-25
Problem identified	Poor knowledge about SHC recommendation
Thematic Area	CBD
Farming situation	Irrigated
Name of Technology Intervention under study	T1: To find out the awareness, knowledge and adoption of farmers onward soil health card practices T2: To study the attitude of farmers towards soil health card practices. T3: To study the Constraints perceived by the farmers in adoption of soil health card recommendation
Farmers Practice	Farmers are not using fertilizers as per SHC Recommendation
No. of replication (Farmers)	10

Results / findings

Performance indicators/ parameters	Unit/ details

OFT-19

Title	Assessment of Income of self-Helf Group of poultry farmers
Season & Year	Kharif & Rabi 2024-25
Problem identified	Low income due to farm gate selling of birds
Thematic Area	Income generation
Farming situation	Mixed farming
Name of Technology Intervention under study	T1 : Low income source of SHG T2 : Income generation of SHG through marketing channel
Farmers Practice	Rearing of Desi birds
No. of replication (Farmers)	20

Results / findings

Performance indicators/ parameters	Unit/ details

Information about Home Science OFT:**OFT-20**

Title of on-farm trial:	Assessment of biofortified varieties of pearlmillet for nutritional security of farm families
Year/Season:	2024/Kharif
Problem diagnosis:	Nutritional insecurity among farm families
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional security
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Hybrid pearlmillet
T2 –Recommended Practice-	T2:Biofortified Pearlmillet variety AHB-1200 T3: Biofortified Pearlmillet variety AHB-1269
Source of technology:	ICRISAT, Pearlmillet 2017
Characteristics of technology:	Rich in iron (73.0 ppm) in comparison to 45.0-50.0 ppm in popular varieties/hybrids , Grain yield: 32.0 q/ha , Dry fodder yield: 70.0 q/ha, Maturity: 78 days
Name of Crop/Enterprises:	Pearlmillet
Farming situation:	Semi-irrigated
Date of sowing:	
Date of harvesting:	
Recommendations for Farmers	
Recommendations for Deptt. Personnel

OFT-21

Title of on-farm trial:	Assessment of nutritive porridge for nutritional security of preschool children
Year/Season:	2024/Kharif
Problem diagnosis:	Nutritional insecurity among preschool children
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional security
No of trials:	10
No. of farmers/farm women involved	10 preschool children
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Existing dietary pattern with no or wheat porridge
T2 –Recommended Practice-	T2: Durum wheat porridge T3: Multigrain porridge
Source of technology:	IARI Indore
Characteristics of technology:	Low price nutritious foods, rich in calories, protein and adequate amount of trace elements like iron, calcium, vitamins
Name of Crop/Enterprises:	Nutritive Porridge
Farming situation:	Semi-irrigated
Date of sowing:	
Date of harvesting:	
Recommendations for Farmers	
Recommendations for Deptt. Personnel

OFT-22

Title of on-farm trial:	Assessment of biofortified varieties of wheat for nutritional security of farm families
Year/Season:	2024-25/ Rabi
Problem diagnosis:	Nutritional insecurity
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional security
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment

Details of technology selected for assessment:	
T1 – Farmers Practice-	Lok-1
T2 –Recommended Practice-	T2: Biofortified Wheat variety Pusa Tejas T3: Biofortified Wheat variety WB -02
Source of technology:	IARI Indore and ICAR- IIWBR, Karnal, Haryana
Characteristics of technology:	- High protein content (~12.0 %), good levels of yellow pigment (~5.7 ppm), and essential micronutrients like iron (42.1 ppm) and zinc (42.8 ppm); with very high overall acceptability (7.5), Yield: 58 q/ha - Rich in zinc (42.0 ppm) & iron (40.0 ppm) in comparison to 32.0 ppm zinc & 28.0-32.0 ppm iron in popular varieties, Grain yield: 51.6 q/ha, Maturity: 142 days, Yield: 54 q/ha
Name of Crop/Enterprises:	Biofortified varieties of wheat
Farming situation:	Semi-irrigated
Date of sowing:	
Date of harvesting:	
Recommendations for Farmers	
Recommendations for Deptt. Personnel

OFT-23

Title of on-farm trial:	Assessment of post harvest management of oyster mushroom and its substrate
Year/Season:	2024-25/ Rabi
Problem diagnosis:	Low shelf life, post harvest losses (18-20%), less income, Contamination and the disposal problem from mushroom substrate
Thematic area: (Focus area in DFI and nutri smart initiatives)	Value addition
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	No post harvest management of oyster mushroom and its substrate
T2 –Recommended Practice-	T2: Production and Value addition of mushroom T3: Production, value addition of mushroom and conversion of spent mushroom substrate into vermi -compost

Source of technology:	NRCM Solan, GBPUA&T Pantnagar
Characteristics of technology:	Value addition of mushroom, Spent mushroom substrates is a nutrient rich organic by product of mushroom and suitable for vermicomposting, income through mushroom and vermi compost production, healthy environment
Name of Crop/Enterprises:	Mushroom
Farming situation:	Irrigated
Date of sowing:	
Date of harvesting:	
Recommendations for Farmers	
Recommendations for Deptt. Personnel

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
1	Black gram	Weed management	Demonstration of Chemical weed management in black gram crop	Herbicide	Kharif 2024	5.0	10	Yield kg/ha
2	Pearl millet	Weed management	Demonstration of Chemical weed management in Pearl millet crop	Herbicide	Kharif 2024	5.0	10	Yield kg/ha
3	Onion	Nutrient management	Demonstration on nutrient management in Kharif onion under onion-cole cropping system	Potassium and sulphur based fertilizer	Kharif 2024	2.0	10	Bulb diameter (cm), Yield (q/ha)
4	Vegetables Seedlings	DM	Demonstration on nursery bed treatment for soil born disease management	Fungicide	Kharif 2024	0.1	10	Disease incidence (%), survival (%)
5	Paddy	IPM	Demonstration of IPM technology for management of stem borer and leaf folder in paddy	Chloantranilipr ole 0.4G	Kharif 2024	2.0	10	% infestation and yield (q/ha)
6	Dairy Buffalo	LPM	Demonstration of mineral and vitamin mixture feeding for its effect on milk production and reproduction in dairy buffaloes	Mineral and Vitamin mixture	Kharif 2024	10 animal	10	Milk yield, net return, BCR
7	Dairy Buffalo	LPM	Demonstration of deworming for management of buffalo calf	Liquid albendazol	Kharif 2024	10 animal	10	Mortality, net return, BCR

			mortality					
8	Multi disciplinary Massage	ICT	Demonstration of dissemination of agriculture information through KMA	-	Kharif & Rabi 2024-25	18432 farmers		No of farmers
9	Dairy animal	ICT	Demonstration of adoption of mineral mixture feeding for dairy animals	Mineral mixture	Kharif & Rabi 2024-25	10	10	% adoption, Feedback, Farmers reaction
10	Wheat	Varietal	Demonstration of improved variety of wheat crop	Seed	Rabi 2024-25	5.0	10	Yield kg/ha
11	Mustard	Varietal	Demonstration of improved variety of mustard crop	Seed	Rabi 2024-25	5.0	10	Yield kg/ha
12	Egg plants	Nutrient management	Demonstration on foliar application of nutrients on egg plants	Chemical nutrient	Rabi 2024-25	2.0	10	No. of fruit/ plant, Yield (q/ha)
13	Vegetables	Nursery raising	Demonstration on Hi tech Nursery raising in Vegetables	Soilless media in pro tray	Rabi 2024-25	-	10	Survival Percentage of raised seedling
14	Potato	IPM	Demonstration of IPM technology for management of tuber born diseases (Black scurf and common scab) in potato	Boric acid	Rabi 2024-25	2.0	10	% Disease incidence and yield (q/ha)
15	Mustard	IPM	Demonstration of IPM technology for management of Aphid in mustard	NSKE 5%	Rabi 2024-25	2.0	10	Aphid infestation and yield (q/ha)
16	Dairy Buffalo	LPM	Demonstration of ivermectin for control of ecto and endo parasites in dairy buffalo	Ivermectin bolus	Rabi 2024-25	10 animal	10	Milk yeild , net return, BCR
17	Dairy Buffalo	LPM	Demonstration of deltamethrin for management of ecto parasites in dairy buffalo	Deltamethrin 12.5% @ 1 ml/lit. of water for animal bathing	Rabi 2024-25	10 animal	10	Milk yeild , net return, BCR

Extension and Training activities under FLDs

S. No.	Activity	No. of activities	Month	Number of participants
1	Field days	12	September and February	650
2	Farmers Training	10	June, July, Sept and Oct.	250
3	Media coverage	20	June, July, Sept and Oct.	Mass
4	Training for extension functionaries	02	June and Sept.	60

Details of FLD on Enterprises

Farm Implements

Name of the implement	crop	Season and year	No. of farmers	Area (ha)	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
							Demon.	Local check
-	-	-	-	-	-	-	-	-

*Field efficiency, labour saving etc.

Livestock Enterprises

Enterprise	Breed	No. of farmers	No. of animals, poultry birds etc.	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
						Demo.	Local check
LPM	Demonstration of ivermectin for control of ecto and endo parasites in dairy buffalo	10	10 animal	Ivermectin bolus	Milk yeild , net return, BCR	-	-
LPM	Demonstration of deltamethrin for management of ecto parasites in dairy buffalo	10	10 animal	Deltamethrin 12.5% @ 1 ml/lit. of water for animal bathing	Milk yeild , net return, BCR	-	-
LPM	Demonstration of mineral and vitamin mixture feeding for its effect on milk production and reproduction in dairy buffaloes	10	10 animal	Mineral and Vitamin mixture	Milk yield, net return, BCR	-	-
LPM	Demonstration of deworming for management of buffalo calf mortality	10	10 animal	Liquid albendazol	Mortality, net return, BCR	-	-

*Milk production, meat production, egg production, reduction in disease incidence etc.

Other Enterprises

Enterprise	Variety/ breed/Species /others	No. of farmers	No. of Units/ area	Critical inputs	Performance parameters/ indicators	Data on parameter in relation to technology demonstrated	
						Demo.	Local check
Demonstration of nutritional garden for women and their family member	Seeds and seedlings of nutritive vegetable and fruits	12 Farm women	12	Seeds and seedlings of nutritive vegetable and fruits	Anthropometric measurements Farm women's reaction, B: C ratio	Yield (kg/unit area), Per capita Consumption (gm/ day), Nutrient intake/unit	Yield (kg/unit area), Per capita Consumption (gm/ day), Nutrient intake/unit
Demonstration of drudgery reduction of farm women in vegetable plucking using ring cutter	Ring cutter	10 Farm women	10	Ring cutter	Percent reduction in drudgery, Percent increase in efficiency, Farm women's reaction, B: C ratio	Output (kg/hr), Estimated Energy Expenditure (kj/min), WHR (beat/min)	Output (kg/hr), Estimated Energy Expenditure (kj/min), WHR (beat/min)
Demonstration of Moringa leaves powder/ Capsules for adolescent girls	Moringa leaves powder Capsules	10 Adolescent girls	10	Moringa leaves powder Capsules	Anthropometric measurement, Adolescent girls 's reaction, B: C ratio	Per capita Consumption (gm/ day), Nutrient intake/unit, Haemoglobin level	Per capita Consumption (gm/ day), Nutrient intake/unit, Haemoglobin level
Demonstration of Mushroom powder supplementation for nutritional security of preschool children	Mushroom powder	10 preschool children	10	Mushroom powder	Anthropometric measurements, Farm women's reaction, B: C ratio	Per capita Consumption (gm/ day), Nutrient intake/unit	Per capita Consumption (gm/ day), Nutrient intake/unit

LINKAGES

Functional linkage with different organizations

Name of organization	Nature of linkage
DRMR,Bharatpur,IARI New delhi ,CIAE and IISS,Bhopal	Technological Products, implements, Seed and Technical backstopping

Details of linkage with ATMA / NFSM

a) Is ATMA implemented in your district Yes

Name of Programme	Nature of linkage
Training and Action plan	Technical

Give details of programmers implemented under National Horticultural Mission

Name of Programme	Nature of linkage
Vegetable and spice extension	Technical guidance

Action plan for Flagship programmes implemented at KVK

(NICRA, ARYA, Natural farming, CBBO, Seed Hub, Agri Drone etc)

Name of Flagship programmes

Month	Activity details	Targeted Beneficiaries/Area/Coverage
Natural Farming		
January-March 2024	Trainings, awareness programme and sangoshti	08
April-June 2024	Trainings, awareness programme and sangoshti	08
July-Sept. 2024	FLD,Trainings, awareness programme and sangoshti	12
Oct.-Dec. 2024	FLD,Trainings, awareness programme and sangoshti	12
CBBO		
January-March 2024	Trainings, exposure visit and Kisan Mela	03
April-June 2024	Trainings, exposure visit	02

July-Sept. 2024	Trainings, exposure visit	02
Oct.-Dec. 2024	Trainings, exposure visit	02
Seed Hub		
Kharif 2024	Seed Production pigeon pea Variety Pusa-16	40 ha Production-200 q
Summer 2024	Green Gram	20 ha Production-110 q
ARYA		
1. Enterprise Name: Mushroom Production		
Sept. to Feb	Training of Mushroom production, marketing and value addition	03
Dec.	Workshop	01
Feb.	Exposure visit	01
2. Enterprise Name: Beekeeping		
Sept. to Feb	Training of Beekeeping and honey marketing	03
Dec.	Workshop	01
Feb.	Exposure visit	01
3. Enterprise Name: Poultry Farming		
July to Dec.	Training of Poultry farming	03
Jan.	Workshop	01
Feb.	Exposure visit	01

Planning for Crop Cafeteria

Total Area of Crop cafeteria: 1800 Sq m

Crop	Season	Variety	Particulars /details	Area (Sq m)
Green Gram	Kharif	TJM-3, Virat, Samrat, Shikha, TJM 99-37, IPM 02-14, PDM-11, PDM-54, PDM-139, IPM 99-125	To be identified performance of varieties for high yielding, abiotic and biotic stress tolerant	1800
Black Gram		Indra Urd-1, PU-30, PU-35, PU-40, PU-31, Pratap Urd-1, Shekhar	To be identified performance of varieties for high yielding, abiotic and biotic stress tolerant	
Pearl millet		JBV-3, JBV-4, Sankar	To be identified performance of varieties for high yielding, abiotic and biotic stress tolerant	
Mustard	Rabi	Pitambara, RH-406, RH-725, RH-749, Varuna, NRCDR-2, RVM-1, RVM-2, RVM-3, Chinese Cabbag, NRCHB-101, NRCBS- 05-02, NC-1, JM-1, JM-2, JM-3, Rohini VSH 105, VSH 401, Pusa Bold	To be identified performance of varieties for high yielding, abiotic and biotic stress tolerant	1800
Wheat		HI1531, HI 1544, HI 8627, HI 8713, HI 8737, HI 8759, HI 8777, HD 2932, HD 2967, MP 1203, WH 1105	To be identified performance of varieties for high yielding, abiotic and biotic stress tolerant	

Details of Demonstration Unit at KVK

Demonstration Unit	Particulars /details	Area (Sq m)	Output /Production
Vermi comopost unit	Vermi compost	200	1000q
Honey Processing unit	Honey	60	20q
Beekeeping Unit	20 box (Apis mellifera)	60	5q
Poultry Unit	Kadakhnath Adult birds+chicks	60	100 (No.)
Gaotry unit	Barbari breed (9+1)	100	15 (No.)
Dairy Unit	Gir breed	200	4000 (liter)
Mushroom Unit	Oyster mushroom (Fresh)	60	100 (kg)

KVK Neemuch

1.1 Name of the Programme Coordinator with phone & mobile No

1.2 Staff Position on (31th Dec.2022)

[illegible]

1.3 Total land with KVK (in ha) :

TV	2009	12000	Working
Video camera	2009	22000	Working
Computer & ptheriphasals	2009	150000	Working

1.5.(A). Details of SAC meeting to be conducted in the year

Sl. No.	Tentative Date
1	09.05.2023
2	03.10.2023

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 5.2	Hot, moist, semi arid, ecological, sub region (5.2)

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	5.2	Madhya Pradesh plateau, western Malwa Plateau, Eastern Gujrat palins, Vindyan and satpura range and Narmada valley hot moist semiarid ESR with medium and deep clayey black soil (shallow black soils as inclusion) medium to high AWC and LGP 120-150 days

**SWOT Analysis of each Agro-Ecological Situations of district
AES-1 (name)**

Strength	Weakness	Opportunities	Threats
AGRICULTURE			
1. District neemuch has the potential to grow a variety of agricultural crops. 2. Assured demand for various agricultural and horticultural crops in the neighboring districts.	1. Neemuch block falls in dark area Manasa and Jawad block falls in grey area as there is erratic rainfall and there is depletion in ground water tables. 2. Non availability of Quality seeds and planting material in the district. 3. Lack of awareness of improved agricultural practices and technical skill amongst farmers; 4. Inadequate and erratic power supply in the district pose problem in irrigation. 5. There is stagnation of yield in most of the crops. 6. Lack of human resources and government machinery for extension, training and capacity building of farmers. 7. Lack of infrastructure for storage, marketing and processing of crops; 8. Low seed replacement rate, leading to low productivity; 9. Non-availability of credit to farmers from formal credit system / banks	1. Adoption of modern irrigation system like sprinkler/drip 2. Promotion of mixed farming, Crop diversification to check low productivity. 3. Great potential for increasing productivity of major crops through incorporating technical training, better agricultural practices, HYV, nutrient management and increasing area under irrigation; 4. Soil reclamation and conservation techniques to check degradation of soil. 5. Scope for investment in agricultural marketing infrastructure and storage facilities;	1. Depleting ground water level and reducing water availability for irrigation purpose; 2. There is always possibility of crop failure as the district has scanty and erratic rainfall. 3. During the glut seasons there is reduction in the price of the produce. So farmers are in financial loss condition.
HORTICUTURE			
1. The district agro climatic condition are suitable for growing horticultural and medicinal crops such as guava, orange, amla, pomegranate, ashwagandha, isabgol, lemon grass, opium etc. 2. Availability of technical human resources at Agricultural and horticultural departments. 3. District is also one of the largest producers of opium in the world	1. There is lack of availability of quality seedlings in the district for both horticultural and medicinal plants. The district do not have nursery for medicinal plant 2. Lack of proper quality lab and marketing facilities for medicinal crops 3. Lack of information and accessibility of various government support/subsidy schemes 4. There is lack of proper electricity facilities in the district. 5. Lack of awareness amongst farmers about improved agricultural practices, technical skill and economics of horticultural and medicinal plants and resistance to change the cropping pattern. 6. Lack of infrastructure for storage, marketing and processing of crops. There is no separate regulated markets for fresh fruits and vegetable in the District; 7. Non-availability of credit to farmers from Banks for installation of drip irrigation and other modern facilities	1. Huge potential for crop diversification by bringing area under horticultural crops. 2. Drip irrigation can be used for promoting horticultural crops in dry areas. 3. Increasing demand for fruits and vegetables in domestic markets;	1. Unpredictable weather conditions of the district. 2. Fluctuating market prices and glut in the market during the season.

	for Horticultural crops. 8. Lack of institutional support mechanism such as cooperatives / associations to support farmers in bringing technology, market information and market access.		

AH/Dairy/fisheries

1. Existence of milk marketing network through milk cooperatives. 2. Assured demand of AH products in urban centers like Delhi 3. Suitable climatic condition for cattle & goat rearing and poultry farming. 4. Artificial insemination infrastructure present in the district	1. The population in Neemuch district is vegetarian so the programmes for poultry development for layer and broiler even though taken up are on a limited scale 2. Dairy is underdeveloped in the district due to the absence of modern and scientific methods of animal husbandry and due to lack of proper training of the farmers in dairy activities. 3. Dominance of non-descript over the crossbred cattle population, impacting productivity and profitability of dairy and poultry sector. 4. Poor veterinary services and infrastructure in the district. Existing veterinary hospitals & dispensaries are in poor condition; 5. Non availability of Green Fodder is the major constraint for livestock development sector in the district. 6. Lack of organized markets and processing facilities for meat. 7. Poor connectivity of villages; 8. Lack of entrepreneurial approach to develop dairy and poultry in commercial manner.	1. Dairy has immense potential of being taken as a major economic activity in the district. 2. Improvement of breeds and livestock breeding programmes should be taken up on a massive scale. 3. Wide scope for increasing milk and meat production in the district through breed improvement and adequate extension services; 4. Increasing demand from urban customer for milk, milk products and meat; Animal Husbandry and Poultry has huge potential for employment creation in the rural areas;	1. Declining livestock population in the district; 2. Low investment capacity of farmers for taking-up dairy and poultry activities at commercial scale;

Fisheries

1. District has large number of ponds and huge area under water bodies; 2. Annual and seasonal rivers in the district provides good scope for fisheries; 3. Existing cooperative societies of fishermen in the district;	1. Lack of organized fish market in the district; 2. Non availability of Govt land for hatcheries and fish farms 3. Lack of technical staff and funds in the fisheries department 4. Lack of support infrastructure for extension, training, post-harvest management and marketing of fish in the district; 5. Lack of awareness and technical skill amongst fishermen;	1. Wide demand-supply gap of fish in the district 2. Untapped water-resources for Inland fishery activities; 3. Balanced feeding in ponds 4. Capacity building of farmers and field functionary. 5. Encouraging fish farmers for fish seed production to meet the requirement. 6. Education and training to farmers and human resource development technical staff of fisheries department.	1. Uneven and erratic rainfall, which may some time lead to natural disaster such as drought. 2. Fluctuating market prices and glut in the market during the season.

Land Use Pattern

Particulars	Area "000 ha"
Total Geographical area	393.5
Forest	94.4
Waste Land	46.45

Particulars	Area “000 ha”
Other than cultivated area	37.19

Details of Operational area / Villages (2022)

Sl. No.	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Neemuch	Neemuch	Hanumantiya Panwar Umaheda	Soybean, Maize, wheat, Mustard, chick pea, Corander	• Low productivity of crops. • Injudicious uses of chemical fertilizers • heavy infestation of weeds • Heavy infestation of insects, pests and diseases • High cost of cultivation • Lack of Awareness	• Injudicious uses of chemical fertilizers • Problem of termite attack on various crops • Low yield of Soybean due to heavy infestation of weeds • Low Productivity of Gram, Mustard, Nigella, Ajwain, Fenugreek and other medicinal and aeromatic crops due to Local variety • High cost of cultivation due to heavy use of fertilizer and chemical pesticides • Lack of Awareness about nutritious food • Poor intake of moringa in their regular diets • to inculcate knowledge on moringa & regular intake in their diets

Priority / Thrust areas

S. No.	Particulars
1.	Injudicious uses of chemical fertilizers
2.	Problem of termite attack on various crops
3	Low yield of Soybean due to heavy infestation of weeds
4	Low Productivity of Gram, Mustard, Nigella, Ajwain, Fenugreek and other medicinal and aeromatic crops due to Local variety
5	Heavy infestation of insects, pests and diseases in Soybean, Gram, Mustard, Coriander, fruits and vegetable crops

	etc
6	High cost of cultivation due to heavy use of fertilizer and chemical pesticides
7	- Lack of Awareness about nutritious food - Poor intake of moringa in their regular diets - to inculcate knowledge on moringa & regular intake in their diets
8	Lack of awareness regarding healthy food
9	Unemployment

Number of OFTs	Number of Farmers	Number of FLDs	Number of Farmers
17	153	13	232

Training		Extension Activities	
3		4	
Number of Courses	Number of Participants	Number of activities	Number of participants
76	1900	111	4000

Seed Production (Qtl.)	Planting material (Nos.)
200.0	140000

B. Abstract of interventions to be undertaken

S. No.	Thrust area	Crop/ Enterprise	Identified Problem	Interventions					
				Title of OFT if any	Title of FLD if any	Title of Training if any	Title of training for extension personnel if any	Extension activities	Supply of seeds, planting materials etc.
1	Injudicious uses of chemical fertilizers	Soybean, Maize, Chick pea, Nigell, Coriander, Ajwain	1. Low yield of Soybean about 30-40 % losses due to heavy infestation of weed (Area 120000 ha, Area affected 80%) 2. Injudicious uses of chemical fertilizers 3. Heavy Infestation of Pod borer in chick pea	1. Assessment of Agnistr for management of pod borer in Chick pea 2. Assessment of Neem seed extract to control Pod borer in Chick pea 3. Assessment of nutrient management in Wheat through Natural farming		• Importance of Soil Testing & right techniques of soil sample collection • Importance and implementation of Natural Farming • Importance of Bio fertilizers application in rabi Pulses • INM in Mustard • INM in Maize • INM in Irrigated & semi Irrigated Wheat • INM in Garlic • Importance of Natural Farming		• Kisan goshthi • Scientist visit to fiesl • Advisory field day • literature developm ent • awareness programm e etc	• Seed • Weedici des • Pesticid es • Organic input •
2	Problem of termite attack on various crops	Soybean, Maize, Chick pea, Nigell, Coriander, Ajwain	4. Problem of termite attack in Chick pea	4. Assessment of Cow Urine (Gaumutra) as Seed treatment for termite control of Chick pea		• Termite & White Grub Control Measures		• Kisan goshthi • Scientist visit to fiesl • Advisory field day • literature developm ent • awareness programme etc	
3	Low yield of Soybean due to	Soybean, Maize, Chick pea,	Low yield of Soybean about 30-40 % losses due to heavy infestation of weed (Area	5. Assessment of pre – emergence weedicide for weed management	• Demonstrati on of herbicide	• Weed Management in Soybean	• Adva nce techn	• Kisan goshthi • Scientist	

S. No.	Thrust area	Crop/ Enterprise	Identified Problem	Interventions					
				Title of OFT if any	Title of FLD if any	Title of Training if any	Title of training for extension personnel if any	Extension activities	Supply of seeds, planting materials etc.
	heavy infestation of weeds	Nigell, Coriander, Ajwain	120000 ha, Area affected 80%)	in Soybean	Diclosulum 84 WDG for Weed management in Soybean • Demonstration of Quizalofop Ethyl 5% EC for weed management in Garlic		iques of growing Kharif Crops • Advance techniques of growing Rabi Crops	visit to fiesl • Advisory • field day • literature development awareness programme etc	
4	Low Productivity of Gram, Mustard, Nigella, Ajwain, Fenugreek and other medicinal and aeromatic crops due to Local variety	Soybean, Maize, Chick pea, Nigell, Coriander, Ajwain	Low Productivity of Chick pea, Nigell, Coriander, Ajwain due to Local variety	6. Assessment of varietal evaluation of Nigella , Soybean - Nigella cropping pattern 7. Assessment of varietal evaluation of Ajwain, Soybean - Ajwain cropping pattern 8. Assessment of varietal evaluation of Coriander, 9. Assessment of varietal evaluation of Chick pea	• Demonstration of improved variety of Fenugreek AF-5 • Demonstration of High yielding Soybean Variety Raj Soya-18	1. Improved cultivation techniques of Zaid vegetables 2. Improved cultivation of Zaid Urid & Moong 3. Nursery raising of Kharif vegetables 4. Improved cultivation practices of Soybean & Maize 5. Propagation techniques in fruit plants 6. Improved cultivation techniques of tomato & chilli 7. Improved cultivation techniques of seed spices 8. Nursery raising of Rabi vegetables	• Advance techniques in Mandarin Orchard •	• Kisan gosothi • Scientist visit to fiesl • Advisory • field day • literature development awareness programme etc	

S. No.	Thrust area	Crop/ Enterprise	Identified Problem	Interventions					
				Title of OFT if any	Title of FLD if any	Title of Training if any	Title of training for extension personnel if any	Extension activities	Supply of seeds, planting materials etc.
						9. Fodder production in Rabi 10. Doubling the Farm Income through IFS 11. Improved cultivation techniques of Isabgol 12. Improved cultivation practices of Soybean & Maize 13. Improved cultivation techniques of Opium 14. Management in Guava orchard			
5	Heavy infestation of insects, pests and diseases in Soybean, Gram, Mustard, Coriander, fruits and vegetable crops etc	Chick pea, Nigell, Coriander, Ajwain	1. Low yield of Soybean about 30-40 % losses due to heavy infestation of girdle beetle 2. Low yield of coriander seed due to heavy infection of Powdery Mildew	10. Assessment of fungicide for management of Powdery Mildew in Coriander 11. Assessment of insecticide management of girdle beetle in Soybean	- Demonstration of Chlorantriliprole 18.5% SC against girdle beetle and semilooper of Soybean - Demonstration of Thiamethoxam 25% WG for aphids in Mustard Crop - Demonstration of Emamectin benzoate 5% SG	- Insect pests Management in Opium - Safe grain storage - Pests Management in Spices Crops - IPM in Rabi crops - Pest Management in Rabi Vegetables - Pests Management in Gram - Insect Pests Management in Mustard - Rodent control in various crops - Insect pests management in Tomato & Chilli - Pests management in Kharif vegetables	- Insect Pest management in Kharif Crops - Insect Pest management in Rabi Crops - Advance technique of Garlic Cultivation	- Kisan goshti - Scientist visit to fiesl - Advisory field day - literature development awareness programme etc	

S. No.	Thrust area	Crop/ Enterprise	Identified Problem	Interventions					
				Title of OFT if any	Title of FLD if any	Title of Training if any	Title of training for extension personnel if any	Extension activities	Supply of seeds, planting materials etc.
					against pod borer in Chick pea	- Pest management in Soybean - Insects pests management in Cucurbits			
6	High cost of cultivation due to heavy use of fertilizer and chemical pesticides	Soybean, Maize, Chick pea, Nigell, Coriander, Ajwain	- Heavy use of chemical fertilizers & pesticides which needs to reduced in order to increase the net profit of crops - Diarrhoea is common in goats	- Assessing effective extension strategy for transfer of technology under natural farming in Chick pea crop - Assessing effective extension strategy for transfer of technology under natural farming in soybean crop - Assessment of treatment of diarrhoea by juice of Gurhal (Hibiscus rosasinensis) flower in goats	1. Demonstration of Jivamrit in Mustard crop	- Propagation techniques in fruit plants - Pit digging for plantation of mandarin and guava fruit plants - Importance of Bio fertilizers application in Kharif Pulses - Preparation of Bordeaux mixture & its method of application - Management of Mandarin Orchard - Water Management in Wheat - Control of Girdle Beetle in Soybean - Micro Irrigation system in mandarin and guava Orchard		- Kisan goshthi - Scientist visit to fiesl - Advisory field day - literature development awareness programme etc	
7	Lack of Awareness about nutritious food Poor intake of moringa		- Lack of Awareness about nutritious food - Lack of awareness regarding healthy food	- Assessment of moringa leaf powder fortified in wheat flour for the improvement of nutritional status of farm women - Assessment of Amylase	• Demonstration of Nutritional Kitchen garden at backyard	- Value addition of seasonal fruits - Preservation of fruits & Vegetables - Importance of Soybean in Daily Diet - Nutrition and health		- Kisan goshthi - Scientist visit to fiesl - Advisory field day	

S. No.	Thrust area	Crop/ Enterprise	Identified Problem	Interventions

Details of On Farm Trial (OFT)

OFT-1

Crop / Enterprise	Soybean	
Title of on farm trial	Assessment of pre – emergence weedicide Sulfentrazone + Clomazone 50% EC for weed management in Soybean	
Problem diagnosed	Low yield of Soybean about 30-40 % losses due to heavy infestation of weed (Area 120000 ha, Area affected 80%)	
Farmers' Practices	Local Practice (Imazethapyr 1000 ml/ha)	
Details of technologies selected for assessment	T ₂	Use of pre-emergence weedicide Pendimethalin 38.7% CS @ 1750 ml/ ha
	T ₃	Use of pre – emergence weedicide Sulfentrazone + Clomazone 50% EC @ 1250 ml / ha
Source of technology	DSR, Indore (2020)	
Plot size	3500 Sq m	
No. of farmers	07	
Total cost	2500/-	
Critical input	Weedicides	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of weeds / sq m, Yield q/ha, B:C Ratio	

OFT-2

Crop / Enterprise	Wheat	
Title of on farm trial	Assessment of nutrient management in wheat through natural farming	
Problem diagnosed	Injudicious uses of chemical fertilizers (Area 40000 ha, Area affected 80%)	
Farmers' Practices	T1 - Local Practice (Use of Chemicals)	
Details of technologies selected for assessment	T ₂	Use of Beejamrut + Jeevamrut (3 times)
	T ₃	Use of Beejamrut + Jeevamrut (3 times) + Ghanjeevamrut
Source of technology	Gurukul, Kurukshetra (2020)	

Plot size	3500 sq m
No. of farmers	07
Total cost	1000/-
Critical input	Beejamrut, Jivamrut, Ghanjeevamrut
Performance indicators: (iv) Technical- yield (q/ ha) (v) Economic (vi) Social – Employment generation	No of effective tillers, Yield q/ha, B:C ratio

OFT-3

Crop / Enterprise	Chick pea
Title of on farm trial	Assessment of varietal evaluation of Chick pea,
Problem diagnosed	Low Productivity of Chick pea due to Local variety (Area 40000 ha. & affected area 60%)
Farmers' Practices	T1 -Use of Old Variety of Chick pea
Details of technologies selectedfor assessment	T2 - Use of Improved Variety of Chick pea RVG - 202 T3 - Use of Improved Variety of Chick pea RVG - 204
Source of technology	RVSKVV , Gwalior 2021
Plot size	3500 sq m
No. of farmers	07
Total cost	5000/-
Critical input	Improved Seed
Performance indicators: (vii) Technical- yield (q/ ha) (viii) Economic (ix) Social – Employment generation	No of Pods per plant, Yield, B:C Ratio

OFT-4

Crop / Enterprise	Chick pea
Title of on farm trial	Assessment of Cow Urine (Gaumutra) as Seed treatment for termite control of Chick pea
Problem diagnosed	Problem of termite attack in Chick pea (Area 40000 ha, Area affected 25%)
Farmers' Practices	T1 – Farmer Practice (NO Seed treatment)
Details of technologies selectedfor assessment	T2 - The seed is treated with Gaumutra, which is collected in a big utensil. The treated seed is dried under shade, and then the sowing has to be done. It is being followed form last three generations
Source of technology	IITKA Doc -2 (inventory of indigenous technical knowledge in Agriculture Pg No 127 Code no 21
Plot size	5200 sq m
No. of farmers	13
Total cost	500/-
Critical input	, Gaumutra
Performance indicators: (x) Technical- yield (q/ ha) (xi) Economic (xii) Social – Employment generation	No. of affected Plants/ sq m , Yield q/ha

OFT-5

Crop / Enterprise	Nigella
Title of on farm trial	Assessment of varietal evaluation of Nigella , Soybean - Nigella cropping pattern.
Problem diagnosed	Low Productivity of Nigella due to old variety (Area 4000 ha. & affected area 100%)
Farmers' Practices	T1 -Use of Local Variety of Nigella
Details of technologies selectedfor assessment	T2 - Use of Improved Variety of Nigella AN-1 T3 - Use of Improved Variety of Nigella AN-20
Source of technology	NRCSS , Ajmer 2014

Plot size	3500 sq m
No. of farmers	07
Total cost	2000/-
Critical input	Improved Seed
Performance indicators: (xiii) Technical- yield (q/ ha) (xiv) Economic (xv) Social – Employment generation	Yield (kg./ha), B:C Ratio

OFT-6

Crop / Enterprise	Ajwain
Title of on farm trial	Assessment of varietal evaluation of Ajwain, Soybean - Ajwain cropping pattern.
Problem diagnosed	Low Productivity of Ajwain due to Local variety (Area 3000 ha. & affected area 90%)
Farmers' Practices	T1 - Use of Local Variety of Ajwain
Details of technologies selected for assessment	T2 - Use of Improved Variety of Ajwain AA-1
	T3 - Use of Improved Variety of Ajwain AA-2
Source of technology	NRCSS , Ajmer 2015
Plot size	3500 sq m
No. of farmers	07
Total cost	2000/-
Critical input	Improved seed
Performance indicators: (xvi) Technical- yield (q/ ha) (xvii) Economic (xviii) Social – Employment generation	Yield (kg./ha), B:C Ratio

OFT-7

Crop / Enterprise	Coriander
Title of on farm trial	Assessment of varietal evaluation of Coriander,
Problem diagnosed	Low Productivity of Coriander due to Local variety (Area 15000 ha. & affected area 70%)
Farmers' Practices	T1 – Use of Local variety of coriander
Details of technologies selected for assessment	T2 - Use of Improved Variety of Coriander ACr-1
	T3 - Use of Improved Variety of Coriander ACr-2
Source of technology	NRCSS , Ajmer 2018
Plot size	3500 sq m
No. of farmers	07
Total cost	2000/-
Critical input	Improved seed
Performance indicators: (xix) Technical- yield (q/ ha) (xx) Economic (xxi) Social – Employment generation	Yield (kg./ha), B:C Ratio

OFT-8

Crop / Enterprise	Soybean
Title of on farm trial	Assessment of Thiacloprid 21.7 % SC for management of girdle beetle in Soybean
Problem diagnosed	Low yield of Soybean about 30-40 % losses due to heavy infestation of girdle beetle (Area 120000 ha, Area affected 80%)
Farmers' Practices	T1: Profenophos 50% EC @ 1.5 lit /ha at 30 days after sowing
Details of technologies selected for assessment	T2: Chlorantraniliprole 18.5 % SC @ 150 ml/ha at 35 DAS
	T3: Thiacloprid 21.7 % SC @ 750ml/ha at 35 DAS
Source of technology	CIB 2016
Plot size	3500 sq m

No. of farmers	07
Total cost	2000/-
Critical input	Insecticides
Performance indicators: (xxii) Technical- yield (q/ ha) (xxiii) Economic (xxiv) Social – Employment generation	% infested plants, Yield, BC ratio

OFT-9

Crop / Enterprise	Coriander
Title of on farm trial	Assessment of Propiconazole 25 % E.C. for management of Powdery Mildew in Coriander
Problem diagnosed	Low yield of coriander seed due to heavy infection of Powdery Mildew (Area 15000 ha. & affected area 80%)
Farmers' Practices	T1 - Sulphur 80 % WP @ 2 kg/ha at 45 DAS
Details of technologies selected for assessment	T2 - Tebuconazole 25.9 EC@ 750 ml /ha at 30 & 45 DAS T3 - Propiconazole 25 % E.C. @ 750 ml /ha at 30 & 45 DAS
Source of technology	Journal of Spice and Aromatic Crops Vol. 26(1) : 59-62 (2017)
Plot size	3500 sq m
No. of farmers	07
Total cost	2000/-
Critical input	Fungicides
Performance indicators: (xxv) Technical- yield (q/ ha) (xxvi) Economic (xxvii) Social – Employment generation	No of Plant affected/ sq m, Yield, BC ratio

OFT-10

Crop / Enterprise	Chick pea
Title of on farm trial	Assessment of Agnistra for management of pod borer in Chick pea
Problem diagnosed	Losses about 15-20 % due to heavy infestation of pod borer in chick pea crop, (Area 40000 ha, Area affected 80%)
Farmers' Practices	T1 - Use of Profenofos 50% EC @ 1250ml/ha
Details of technologies selected for assessment	T2 - Use of HaNPV @ 250 LE/ha (at incidence of insect pest) T3 - Use of 3% Agnistra at incidence of pod borer (need based application)
Source of technology	NCOF, Gaziabad
Plot size	3500 sq m
No. of farmers	07
Total cost	1000/-
Critical input	HaNPV & Agnistra
Performance indicators: (xxviii) Technical- yield (q/ ha) (xxix) Economic (xxx) Social – Employment generation	No. of pods affected, Yield , BC ratio

OFT-11

Crop / Enterprise	Chick pea
Title of on farm trial	Assessment of Neem seed extract to control Pod borer in chick pea
Problem diagnosed	Heavy Infestation of Pod borer in chick pea (Area 40000 ha, Area affected 80%)
Farmers' Practices	T1 – Local Practice (chemical control)
Details of technologies selected for assessment	T2 - Dried 5 kg neem seeds are powdered and 10 liter water is added and kept overnight. The extract is filtered and 90 litres of water is added to get 5% neem seed extract. About 200 g washing powder is added with the extract for sticking and spreading of the extract on the leaves.
Source of technology	IITKA Doc -2 (inventory of indigenous technical knowledge in Agriculture Pg No 128, Code no

	1815
Plot size	3500 sq m
No. of farmers	13
Total cost	1000/-
Critical input	Neem Seed extract
Performance indicators: (xxxi) Technical- yield (q/ ha) (xxxii) Economic (xxxiii) Social – Employment generation	No. of damaged pods / plant, Yield , BC ratio

Information about Extension OFT 1 :

Title	Assessing effective extension strategy for transfer of technology under natural farming in soybean crop
Season & Year	Kharif
Problem identified	Heavy use of chemical fertilizers & pesticides which needs to reduced in order to increase the net profit of crops
Thematic Area	Natural Farming
Farming situation	Rainfed
Name of Technology Intervention under study	T2-Technology transfer through trainings and field visits. T3-Technology transfer through FLDs
Farmers Practice	T1-Informal method of technology diffusion like through neighbors, input dealers etc.
No. of replication (Farmers)	20

Results / findings

Performance indicators/ parameters	Unit/ details
Gain in knowledge, retention of knowledge, change in attitude, skill and adoption of technology	

Information about Extension OFT 2 :

Title	Assessing effective extension strategy for transfer of technology under natural farming in Chick pea crop
Season & Year	Rabi
Problem identified	There is a heavy use of chemical fertilizers & pesticides which needs to reduced in order to increase the net profit of crops
Thematic Area	Natural Farming
Farming situation	Irrigated
Name of Technology Intervention under study	T2-Technology transfer through trainings and field visits T3-Technology transfer through FLDs
Farmers Practice	T1-Informal method of technology diffusion like through neighbors, input dealers etc
No. of replication (Farmers)	20

Results / findings

Performance indicators/ parameters	Unit/ details
Gain in knowledge, retention of knowledge, change in attitude, skill and adoption of technology	

Information about Extension OFT 3 :

Title	Assessment of treatment of diarrhoea by juice of Gurhal (<i>Hibiscus rosasinensis</i>) flower in goats
Season & Year	Round the year
Problem identified	Diarrhoea is common in goats
Thematic Area	ITK (Animal Science)
Farming situation	Rainfed
Name of Technology Intervention under study	T2 - Juice of gurhal flowers (2-3 flowers) is orally administered twice a day for 3 days.
Farmers Practice	T1 - Local Practice
No. of replication (Farmers)	05

Results / findings

Performance indicators/ parameters	Unit/ details
Frequency and duration in diarrhoea reduction	-

Information about Home Science OFT 1:

Title of on-farm trial:	Assessment of moringa leaf powder fortified in wheat flour for the improvement of nutritional status of farm women
Year/Season:	Kharif 2024
Problem diagnosis:	Lack of Awareness about nutritious food
Thematic area: (Focus area in DFI and nutri smart initiatives)	Value addition
No of trials:	03
No. of farmers/farm women involved	07
Type of	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Only wheat flour
T2 –Recommended Practice-	T2- wheat+ soy flour (9:1) T3 - wheat+ soy flour (9:1) + moringa leaf powder
Source of technology:	P. Kumari & Md. Mustafa, The Pharma Innovation J. 2022; SP-11(11): 247-250 (2022)
Characteristics of technology:	Wheat flour and soy flour was mixed in the ratio of 9:1 fortified with 5 gm moringa leaf powder in daily routine diet till 180 days, so that the protein and micronutrients are available from all the different sources of food item consumed during the whole day. Thus 315 gm Wheat + 35gm. Soybean + 05 gm Moringa Powder were provided per day per person till 180 days as per ICMR-NIN recommended grains for a person per day.
Name of Crop/Enterprises:	fortified wheat flour with moringa leaf powder
Farming situation:	Rainfed
Date of sowing:	-
Date of harvesting:	-
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Information about Home Science OFT 2:

Title of on-farm trial:	Assessment of Amylase Rich Food (ARF's) in porridge among weaning infants (0-5 Years)
Year/Season:	Kharif 2024

Problem diagnosis:	Lack of awareness regarding healthy food
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional Security
No of trials:	03
No. of farmers/farm women involved	07
Type of	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Consumption of porridge prepared from local wheat var.
T2 –Recommended Practice-	T2 - Consumption of porridge prepared from durum wheat var. T3 - Consumption of porridge prepared from durum wheat variety + inclusion of ARF powder prepared from mung
Source of technology:	TNAU (2016)
Characteristics of technology:	ARF is germinated cereal flour, extremely rich in the enzyme alpha-amylase. The alpha-amylase cleaves the long carbohydrate chains in the cereal flour into shorter dextrins. Just half a flat teaspoon of any ARF can reduce even a very high total solid concentration of 45g, made up of 25g flour, 15g sweetener & 5g oil cooked in 100ml of water to a soupy consistency. This remarkable property makes it possible to offer the weaning child a low viscosity yet high energy dense preparation.
Name of Crop/Enterprises:	durum wheat + ARF powder prepared from mung
Farming situation:	Rainfed
Date of sowing:	-
Date of harvesting:	-
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Information about Home Science OFT 3:

Title of on-farm trial:	Assessment on Consumption of Biofortified Pearl Millet Crop Variety RHB - 234
Year/Season:	Kharif 2024
Problem diagnosis:	Lack of awareness regarding healthy food
Thematic area: (Focus area in DFI and nutri smart initiatives)	Value addition
No of trials:	03
No. of farmers/farm women involved	07
Type of	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Non- Consumption of Pearl Millet
T2 –Recommended Practice-	T2 - Consumption of Pearl Millet Crop T3 - Consumption of Biofortified Pearl Millet Crop Variety RHB - 234
Source of technology:	ICAR (2017)
Characteristics of technology:	Rich in iron (84.0 ppm) and zinc (46.0 ppm)in comparison to 45.0-50.0 ppm iron and 30.0-35.0 ppm zinc in popular varieties/hybrids • Grain yield: 31.7 q/ha • Dry fodder yield: 70.0 q/ha • Maturity: 81 days
Name of Crop/Enterprises:	Pearl Millet
Farming situation:	Rainfed
Date of sowing:	July 2023
Date of harvesting:	-
Recommendations for Farmers	-

Recommendations for Deptt. Personnel	-
Feedback	-

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
1	Soybean	Weed management	Demonstration of herbicide Diclosulum 84 WDG for Weed management in Soybean	weedicide	kharif 2024	5.0	12	weeds per Square meter (number) ,Yield (kg./ha), BC ratio
2	Soybean	Varietal	Demonstration of High yielding Variety Raj Soya-18 of Soybean	Improved Seed	kharif 2024	5.0	12	no. of pods/plant, yield (kg./ha), BC ratio
3	Mustard	Natural Farming	Demonstration of Jivamrut in mustard crop	Jivamrut	Rabi 2023	5.0	12	No. of siliqua / plant, Yield (kg./ha), BC Ratio
4	Onion	Weed management	Demonstration of herbicide Propaquizafop 5%+ Oxyflurofen 12% EC for Weed management in kharif Onion	Weedicide	kharif 2024	5.0	12	Weeds per Sq. meter (number), Yield (kg./ha), BC ratio
5	Fenugreek	Varietal	Demonstration of improved variety of Fenugreek AF-5	seed	Rabi 2024	5.0	12	No. of pods per plant, Yield (kg/ha), BC ratio
6	Garlic	Weed management	Demonstration of Quizalofop Ethyl 5% EC for weed management in Garlic	weedicide	Rabi 2024	5.0	12	Weeds per Sq. meter (number), yield (Kg/ha), BC ratio
7	Soybean	IPM	Demonstration of Chlorantraniliprole 18.5% SC against girdle beetle and semilooper of Soybean	insecticide	kharif 2024	5.0	12	no. of plant affected, yield (kg./ha), BC Ratio
8	Mustard	IPM	Demonstration of Thiamethoxam 25% WG for aphids in Mustard Crop	Insecticide	Rabi 2024	5.0	12	No. of aphids per 10 cm twig, Yield (kg/ha), BC Ratio
9	Chick pea	IPM	Demonstration of Emamectin benzoate 5% SG against pod borer in Chick pea	Insecticide	Rabi 2024	5.0	12	No. of pods per plant, Yield (kg/ha)
10	Kitchen garden	Nutrition Security	Demonstration of Nutritional Kitchen garden at backyard	Seed kit (12 varieties)	Round year 2024	5.0	12	Vegetables availability – no of days /yr

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
								Vegetable yield / harvest /day Amount saved from the garden General health condition & Nutrition knowledge of women before & after FLD Per capita consumption and availability of nutrients
11	Wheat	Value Addition	Demonstration on Consumption of Biofortified Wheat Crop Variety (Pusa Tejas)	Bio-fortified Wheat Crop (Pusa Tejas)	Rabi 2024	5.0	12	Per capita consumption (gm/day), availability of zinc and iron content

Extension and Training activities under FLDs

Exhibition	

Action plan for Flagship programmes implemented at KVK

(NICRA, ARYA, Natural farming, CBBO, Seed Hub, Agri Drone etc)

Name of Flagship programmes - Swachhta Action Plan(SAP) 2023-24

Month	Activity details	Targeted Beneficiaries/Area/Coverage
Jan – Dec 2024	- Digitization of office records/ e-office, - Basic maintenance - Sanitation and SWM - Cleaning and beautification of surrounding areas - No. of adopted villages (For Microbial based Agricultural Waste Management using Vermicomposting) - No of activities under Vermicomposting/Composting of biodegradable waste management & other activities on	600-700

	generate of wealth for waste - Used water for agriculture/ horticulture application - Swachhta Awareness at local level - Swachhta Workshops - Swachhta Pledge - Display and Banner - Foster healthy competition - Involvement of print and electronic media - Involving and with the help of the farmers, farm women and village youth in their adopted villages (no of adopted villages)	

Project ARYA (Attracting and Retaining Youth in Agriculture) 2023

Month	Activity details	Targeted Beneficiaries
June 2024	One week certified Training on Value Addition in Seed Spices	50
July 2024	One week certified Training on Protected cultivation Tomato and Chilli	50
August 2024	One week certified Training on Goatry	50
Sept – Dec.2024	Farmer Scientist Interaction, kisan goshthi and Feedback	150

Farmers Outreach Programme on Natural Farming 2023

Month	Activity details	Targeted Beneficiaries	Targeted Area / Coverage
Jan – Dec.2024	Workshop organized	30	-
	Training Programmes organized	120	-

Cluster Frontline Demonstration (CFLD) 2023

Month	Activity details	Targeted Beneficiaries	Targeted Area / Coverage
Kharif 2024	Training Programmes and Field Day on CFLD (Oilseed) - soybean	50	20 ha
Rabi 2024	Training Programmes and Field Day on CFLD (Oilseed) - mustard	50	20 ha
	Training Programmes and Field Day on CFLD (Pulse) - Gram	50	20 ha

Planning for Crop Cafeteria 2024

Total Area of Crop cafeteria: 4000 Sq m

Season	Crop	Variety	Variety	Variety	Particulars /details	Area (Sq m)
Kharif	Soybean	Raj Soya -18	NRC- 86	JS-2029	-	10 sq m for each variety
		JS- 9560	JS-2034	RVS - 2001-4	-	

		Raj Soya-24	JS-2098	JS -2069	-

Planning for Crop Cafeteria 2023 - Spice Crops/Medicinal Crops

Season	Crop	Variety	Variety	Particulars /details	Area (Sq m)
Spice	Garlic	G - 50	G - 282	G- 323	10 sq m for each variety
	Fenugreek	AFG2	AFG 3	AFG 5	
	Coriander	Acr1	Acr2	AGCr1	
	Fennal	AF1	AF2	AF3	
	Nigella	AN1	AN20	G 44	
	Ajwain	AA1	AA2	AA93	
Medicinal	Ashwagandha	JA 20	JA 134	Simpushti	
	Vajradanti				
	Kalmegh				
	Aelovera				

	Tulsi				
Fodder crop	Napier	IGFRI 10	CO - 01		
	Lucerne	Anand 1			
	Barseem	Pusa Gaint			
	Juwar	MP Chari			
	Cactus	thronless			

Details of Demonstration Unit at KVK

Demonstration Unit	Particulars /details	Area (Sq m)	Output /Production
Vermicompost Unit	RKVY other	25.0 10 poly bed	300.0 qtl
Dairy	03 cow 03 calf	200.0	900 ltr milk
Poultry	IFS (kadaknath & Pratapdhan)	150.0	100 chicks 100 chicks
Goatry	MKTY (Sirohi)	200.0	15
Azola Unit	-	10.0	40.0 kg
Polyhouse	RKVY	500	300.0 kg tomato 50000 Seedling
Shednet House	RKVY	500	300.0 kg tomato 50000 Seedling
Minimal Processing Unit	-	100	5 qt Spices processing
Rainwater Harvesting Structure	-	5000	irrigation done in 3.0 ha area
Mrida Parikshak	02 Nos	-	150 sample per year

Annual Action Plan 2024

KVK: Rajgarh

Year of sanction 2024-25

7	Threshing floor	-	-	-	-	-	-	-
8	Farm godown	-	-	-	-	-	-	-

B) Vehicles

Type of vehicle	Year of purchase	Cost (Rs.)	Total kms. Run	Present status
Tractor	2004	2.78	24832 hrs	Working (Proposed to be write-off)
Motor Cycle	2015	0.50	7320	Working
Bolero(Jeep)	2023	9.00	11000	Working
Other (Pl. specify)	-	-	-	-

C) Equipment & AV aids

Name of the equipment	Year of purchase	Cost (Rs.) Lakh	Present status
LCD projector	2006	1.0	Working
PA System	1998	0.5	Working
Overhead projector	1995	1.0	Not-working
Smart TV (Thomson)	2020	0.35	Working

1.5.(A). Details of SAC meeting to be conducted in the year

Sl. No.	Tentative Date
1	June 2024
2	November 2024

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 1	Soil type is red skeletal, graveled mix, light black soil & medium black soil deficient in organic matter with tremendous erosion capacity. Blocks covered area vise Rajgarh 60%,30% and 5% respectively, Khilchipur 70%,30% and 0% respectively and Biaora 20%,70% and 10% respectively
2	AES – 2	Soil type is light black soil in block Zerapur, Rajgarh and biaora comprise 70 %.
3	AES – 3	Heavy to medium black soil are found in Narsinghpur and Sarangpur blocks of the district

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	Average rainfall	1100 mm
2	Temperature	Maximum 43 C ⁰
3		Minimum 4 C ⁰
4	Soil Type	Medium Black Soil type
5	Total Population	1254085 (2011)
		Male – 649106
		Female – 604979
		Total – 1254085

Production and productivity of livestock, Poultry, Fisheries etc. in the district

Category	Population	Production	Productivity
Cattle			
<i>Crossbred/ Indigenous</i>	182773	Milk = 1,62,000 lt/day	
Buffalo	199075	 MT.	 kg
Sheep			
<i>Crossbred/ Indigenous</i>	17767	 MT wool	 kg
Goats	165121	 MT	 kg
Pigs <i>Crossbred/ Indigenous</i>	13806	---	---
Rabbits	37		
Poultry			
Hens	1,51,611	Eggs=6.8 Lakhs	4.46 eggs/ bird/yr
Turkey and others			
Category	Area	Production	Productivity
Fish	50398	Q/ month	 Q/ ha.

Details of Operational area / Villages (2023)

Sl. No.	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Rajgarh	Rajgarh Narsingharh Jeerapur Khilchipur Sarangpur Biaora	Chatukheda Balchidi Jalampura Guradiya Unchkheda	Soybean, Maize, Sorghum, wheat, gram, lentil, coriander, garlic, onion, Animal Husbandry	Indigenous Seed, Imbalance fertilization un-judicious use of insecticide, unemployment, lack of knowledge of drudgery reduction implements & tools	Introduction of new varieties Balance use of fertilizer Employment generation Introduction of crossbred animals

Priority / Thrust areas

S. No.	Particulars
1.	Early maturing & stress tolerant varieties of major crops
2.	Technologies of crop cultivation & protection during dry spell condition in kharif
3	Production & utilization of farm waste for organic manuring to improve soil health
4	Crop diversification
5	Entrepreneurship development among the rural youth
6	Drudgery reduction in warm women
7	Breed improvement in livestock
8	Feasible soil and water conservation techniques & NRM

Detailed Information about OFT: 1

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Horticulture
Title of on-farm trial:	Assessment of Integrated pest management of Tomato
Year/Season:	Kharif 2024
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to insect
Thematic area:	HOV
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Use of insecticide
T2 –Recommended Practice-	T2- Two spray neem extract (1500 ppm) + feromane trap (5 No./ha.) + Yellow strip board (20 No./ha.)
T3- Recommended Practice-	T3- Spray of thiomithaxam 18.5 EC + Fungicide Chlorotheloniil 2 gm/ltr. + Sulphur 2 gm/ltr Of water
Date of sowing:	-
Date of harvesting:	-
Source of technology:	IARI 2018
Characteristics of technology:	-
Name of Crop/Enterprises:	Tomato
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 2

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Horticulture
Title of on-farm trial:	Assessment of Plastic Mulching in Chilli
Year/Season:	Kharif 2024
Farming situation:	Irrigated
Problem diagnosis:	Heavy weed infestation and more water consumption due to flood irrigation
Thematic area:	HOS
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Planting on raised bed only
T2 –Recommended Practice-	T2- Planting on raised bed with drip irrigation
T3- Recommended Practice-	T3- Planting on raised bed with drip irrigation + Plastic

	Mulching

Detailed Information about OFT: 6

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Natural Farming
Title of on-farm trial:	Assessment of Natural farming in Onion
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to poor soil health
Thematic area:	Organic Farming
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- NPK- 100:50:0 Kg/ha
T2 –Recommended Practice-	T2- Organic 100% - 10t vermicompost + Consortium 2 l/ha
T3- Recommended Practice-	T-3 Seed Treatment with beejaamrit, Application of Ghan Jeewamrit@250Kg/ha in two equal Split on the day of transplanting and at 20 DAS thoroughly mixed to soil through intercultural, After inter culture and soil drenching of Jiwaamrit (100%) - 4 times @ 500 l/ha. At every 20 Days interval
Date of sowing:	-
Date of harvesting:	-
Source of technology:	NCONF Ghaziabad 2019
Characteristics of technology:	
Name of Crop/Enterprises:	Onion
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 7

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Horticulture
Title of on-farm trial:	Assessment of Improved variety of Coriander Var. RCr436
Year/Season:	Coriander (Rabi 2024-25)
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to local variety & stem gall disease resistant
Thematic area:	IV
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Local
T2 –Recommended Practice-	T2- Ajmer Dhaniya 2 + Seed Treatment (Tricoderma @ 5gm/kg

	seed + PSB & Azetobactor
T3- Recommended Practice-	T3- RCr 436 + Seed Treatment (Tricoderma @ 5gm/kg seed + PSB & Azetobactor
Date of sowing:	-
Date of harvesting:	-
Source of technology:	ICAR - NRC of seed spices, Ajmer 2012
Characteristics of technology:	
Name of Crop/Enterprises:	Coriander
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 8

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Horticulture
Title of on-farm trial:	Assessment of Natural Farming for Purple Blotch in Garlic
Year/Season:	Garlic (Rabi 2024-25)
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to high infestation of purple blotch
Thematic area:	IDM
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1 : use of insecticide
T2 –Recommended Practice-	T2- Use of neem khali 250 kg/ha.+ spray of trichoderma 5 ml/ltr + Yellow strip board (20 No./ha.)
T3- Recommended Practice-	T3 : - Seed Treatment with beejaamrit, Application of Ghan Jeewamrit@250Kg/ha in two equal Split on the day of transplanting and at 20 DAS thoroughly mixed to soil through intercultural, After inter culture and soil drenching of Jiwaamrit (100%) - 4 times @ 500 l/ha.+ Panchpatti Kada 250 ltr./ha and Bramrastra@25ltr/ha At every 20 Days interval
Date of sowing:	-
Date of harvesting:	-
Source of technology:	NCONF Ghaziabad 2019
Characteristics of technology:	
Name of Crop/Enterprises:	Garlic
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 9

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/	Plant Breeding

Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	
Title of on-farm trial:	Assessment of improved variety of Mustard Var. Griraj
Year/Season:	Mustard (Rabi 2024-25)
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to lac of improved variety
Thematic area:	IV
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Jawahar mustard – 2
T2 –Recommended Practice-	T2- RH 725
T3- Recommended Practice-	T3- Giriraj
Date of sowing:	-
Date of harvesting:	-
Source of technology:	IARI Pusa 2014
Characteristics of technology:	
Name of Crop/Enterprises:	Mustard
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 10

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Plant Breeding
Title of on-farm trial:	Assessment of improve variety of Wheat Var. HI 1605
Year/Season:	Wheat (Rabi 2024-25)
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to lac of high yielding variety & technology.
Thematic area:	IV
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1-Farmer practices (Lok -1)
T2 –Recommended Practice-	T2-Purna (HI 1544)
T3- Recommended Practice-	T3-Pusa Ujjala (HI 1605)
Date of sowing:	-
Date of harvesting:	-
Source of technology:	IARI, 2010
Characteristics of technology:	
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-

Feedback	-

Detailed Information about OFT: 11

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agroforestry
Title of on-farm trial:	Assessment of Kalonji improved var. Kalajira in replacement of wheat under crop diversification
Year/Season:	Kalonji (Rabi 2024-25)
Farming situation:	Irrigated
Problem diagnosis:	Low net return from rabi crops wheat
Thematic area:	Crop diversification
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T-1 Wheat
T2 –Recommended Practice-	T2- Kalonji (Ajad Kalongi)
T3- Recommended Practice-	
Date of sowing:	-
Date of harvesting:	-
Source of technology:	JNKVV 2015
Characteristics of technology:	
Name of Crop/Enterprises:	Kalongi
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 12

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Plant Protection
Title of on-farm trial:	Assessment of insecticides for root aphid management in wheat
Year/Season:	Wheat (Rabi 2024-25)
Farming situation:	Irrigated
Problem diagnosis:	Mortality due to infestation of root aphid in wheat
Thematic area:	Insect pest management
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Chlorpyrphos 20% @ 2000 ml /ha at 18 DAS
T2 –Recommended Practice-	T2- Foliar spray of imidacloprid 17.8 @ 150 ml/ha at 25 DAS
T3- Recommended Practice-	T3- Foliar spray of thiomethoxam @ 375 g/ha at 25 DAS
Date of sowing:	-

Date of harvesting:	-
Source of technology:	NRCW 2016
Characteristics of technology:	
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-

No. of replication (Farmers)	

Results / findings

Performance indicators/ parameters	Unit/ details

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers / demonstration	Parameters identified for performance evaluation
1	Soybean	SFM	Nano DAP Seed treatment 2ml/ kg seed + Foliar spray 4ml/ ltr of water at 35 DAS	Nano DAP	Kharif 2024	2.0	10	Demonstration - Pods/Plants, Yield (q/ha), Net income (Rs.), Farmer Reaction & Farmer feed back
2	Mandarin	ICM	* First spray GA3 10 PPM + Urea 1 % at the Time of flowering * Secound Spray 2,4-D 15 PPM + Carbandazim 1000 PPM + urea 1 % are month after fruit set when the fruit size reaches pea size 8-10 mm * Third spray GA3 10 PPM + KN03 1% two month after fruit set fruit size 18-20 mm	GA3, Urea, 24D, Carbandazim	Kharif 2024	2.0	10	Demonstration - No of fruits/plant, yield qt/ha and BC ratio
3	Turmeric	IV	Demonstration on improved variety-ROMA of Turmeric With Seed treatment (Trico derma @ 5gm/kg Rhizome seed)	Rhizome seed, Trico derma	Kharif 2024	2.0	10	Demonstration - Economics, yield qt/ha, and BC Ratio
4	Soybean	IV	IV- RVS 24 + Seed treatment with Carbendazim + R & F with N.P.K.S. 20:50:20:20 on STV based kg./ha + Imazathypar @500 ml. At 20 DAS	NPK	Kharif 2024	2.0	10	Demonstration - Pods/Plants, Yield (q/ha), Net income (Rs.), Farmer Reaction & Farmer feed back

5	Black Gram	IV	IV- RBU 38 seed + Seed treatment with Carbendazim + R & F with N.P.K.S. 20:50:20:20 on STV based kg./ha + Imazathypar @500 ml. At 20 DAS+ Chlroentra niliprol @ 100 ml / ha.	NPK	Kharif 2024	2.0	10	Demonstration - Pods/Plants, Yield (q/ha), Net income (Rs.), Farmer Reaction & Farmer feed back
6	Wheat	INM	Nano DAP Seed treatment 2ml/ kg seed + Foliar spray of Nano Urea 4ml/ ltr of water at 35 DAS	Nano Urea & DAP	Rabi 2024-25	2.0	10	Demonstration - Nodules /plant, Pods/Plants, Yield (q/ha), Net income (Rs.), Farmer Reaction & Farmer feed back
7	Coriander	IV	Ajmer dhaniya – 1 + Seed treatment (Tricoderma 5 gm/kg seed) + Sulphur @ 20 kg/ha.	IV Tricoderma viridi, Sulphur	Rabi- 2024-25	2.0	10	Demonstration - No. Branches/plants, Umbels/Plants, Yield (q/ha), Net income (Rs.), Farmer Reaction & Farmer feed back
8	Guava	IV	1-Remove and destroy dead and severely affected branches of the guava tree 2- Swab Coal tar + Kerosene @ 1:2 or Chloropyriphos 2ml/lit of water on the basal portion of the trunk + Bordopest twice in a year (1st oct-nov and 2nd feb-mar) up to 3 feet height	Swab Coal tar , Kerosene, Chloropyriphos and Bordopest lime and coupper sulphate	Summer 2024	2.0	10	Demonstration - No of fruits/plant, yield qt/ha and BC ratio
9	Wheat	IV	Yield- 60 q/ha NPKZn-120:60:40:5	NPKzn	Rabi 2024-25	2.0	10	Demonstration - Tillers/Plants, Yield (q/ha), Net income (Rs.), Farmer Reaction & Farmer feed back
10	Gram	IV	Yield- 20 q/ha, Seed Treatment RDF (20:60:20 NPK kg/ha)	NPK	Rabi 2024-25	2.0	10	Demonstration - No. of Pods/Plants, Yield (q/ha), Net income (Rs.), Farmer Reaction & Farmer feed back
11	Chandrasur	IV	Chandrasur	Mandsor Chandrasur-1	Rabi 2024-25	2.0	10	Demonstration - Yield (q/ha), Net income (Rs.), Farmer Reaction & Farmer feed back
12	Wheat	Weed management	T2-Sulphosulfuron 75% + Matsulfuron Methyl 5% WG @ 30+2g a.i /ha at 30 DAS	sulfosulphuron + Metsulphuron methyl	Rabi 2024-25	2.0	10	Demonstration - Yield q/ha., No. of tiller/plant , B.C. ratio, No.of weeds/sqmt.

1	May 2023
2	Oct 2023

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 1(Malwa Plateau)	Soybean-Wheat/Chickpea/Garlic/Onion/potato, Agriculture + Poultry /Dairy /Goatry

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	AES – 1 (Malwa Plateau)	Block shajapur, moman barodia, shujalpur and kalapipal comes under Malwa plateau. The soils of this region are heavy to medium black soils.

SWOT Analysis of each Agro-Ecological Situations of district

AES-1 (name)

Strength	Weakness	Opportunities	Threats
• Good soil type good infrastructure facilities and transport	• Lack of irrigation and crop diversification	• Possibility of export of good produce	• Uncertainty of erratic rainfall and climatic condition

Land Use Land Use Pattern

Particulars	Area “000 ha”
Total Geographical area	338887 ha
Forest	0
Waste Land	-

Other than cultivated area	-
Cultivable waste and alkaline land	15890 ha
Pastures	-
Bushes	-
Current Fallow	-
Other Fallow	-
Agricultural Land	276640 ha
Area Sown	260750 ha
Kharif	260750 ha
Rabi	163786 ha
Zaid	-
Cropping Intensity	159

Irrigated Area with Different Sources:

S. No.	Description	Area (ha)
1	Canal	32946
2	Well	83041
3	Tube well	27309
4	Ponds	14567
5	Others	5923

Soil types

S. No.	Soil type	Characteristics	Area “000 ha”
1	Black cotton Soil	These soils are dark grey to black in color, composed of clay and are plastic & sticky in nature. These soils are fertile in nature and derived from decomposition of trappean rocks having thickness of 15 cm to 2m . These soils cover major part of the district	
2	Lateritic soil	These soils consist of sandy loam to clayey loam and brick red to red in colour. These soils are derived from weathered ferruginous basalt	
3	Alluvium soil	The alluvium is of mixed origin & comprises of silt & clay and admixtures of these in varying properties. The occurrence of alluvium is confined to the bank of stream and rivers and usually 3 to 4m un thickness.	

Note: Figure. In parenthesis denotes the percentage of total area.

Area, Production and Productivity of major crops cultivated in the district

S. No	Crop	Area (ha)	Production (Qt.)	Productivity (Q /ha)
1	Soybean	276000	35600000	12.90
2	Sorghum	2100	3780000	18.00
3	Pigeon pea	1200	144000	12.00
4	Green Gram	400	24000	9.30
5	Maize	4900	980000	20.00
6	Black Gram	2200	167000	9.50
7	Mustard	1880	244000	13.00
8	Chick pea	110000	13640000	12.40
9	Wheat	115000	55500000	42.00

Weather data (Jan, 2022- Dec., 2022)

Details of Operational area / Villages (2022)

Sl. No.	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Shajapur	Shajapur	Gopipur	Soybean, Chickpea wheat and vegetable	• Injudicious use of fertilizer, Pesticide and herbicide and use of old variety in soybean • Injudicious use of fertilizer, Pesticide in vegetables & spices • Improper management of crop residue, injudicious use of fertilizer & insecticides in cereals • Poor farm mechanization • Lack of knowledge about millet crops • Inadequate soil and water conservation structures	• Application of Balanced Nutrient through INM is needed owing to imbalance fertilizer doses • Encouragement of organic farming • Crop diversification in Command area • Promoting horticultural crops value addition technology in chilli, tomato etc. in the district. • Promotion of agri-enterprises viz., vegetable cultivation, mushroom cultivation, dairy, goatery, fisheries and value addition • To Develop profitable farming system models based on the resources available with farm families. • To improve the skill of the farming communities • To upgrade the knowledge of district level extension functionaries. • Employment generation by women drudgery reduction. • Soil & water conservation
2	Shajapur	Shajapur	Sunera	Soybean, Chickpea wheat and vegetable		
3	Moman barodia	Moman barodia	Khoria ama	Soybean, Chickpea wheat and vegetable		
4	Kalapipal	Kalapipal	Khargone kala	Soybean, Chickpea wheat and vegetable		
5	Shualpur	Shualpur	Jamner	Soybean, Chickpea wheat and vegetable		
6	Moman barodia	Moman barodia	Bedagnagar	Soybean, Chickpea wheat and vegetable		

Priority / Thrust areas

S. No.	Particulars
1.	Application of Balanced Nutrient through INM is needed owing to imbalance fertilizer doses
2.	Encouragement of organic farming
3.	Crop diversification in Command area
4.	Promoting horticultural crops value addition technology in chilli, tomato etc. in the district.
5.	Promotion of agri-enterprises viz., vegetable cultivation, mushroom cultivation, dairy, goatery, fisheries and value addition
6.	To Develop profitable farming system models based on the resources available with farm families.
7.	To improve the skill of the farming communities

8.	To upgrade the knowledge of district level extension functionaries.
9.	Employment generation by women drudgery reduction.
10	Soil & water conservation

Details of On Farm Trial (OFT)

OFT-1

Crop / Enterprise	Soybean
Title of on farm trial	Assessment of newly released varieties for higher production in Soybean

Problem diagnosed	Low yield due to old variety (JS 9560) & infestation of diseases	
Farmers' Practices	Old variety JS 9560	
Details of technologies selected for assessment	T ₂	RVS-24
	T ₃	JS 20-116
Source of technology	JNKVV	
Plot size	2000 m ²	
No. of farmers	12	
Total cost	22900	
Critical input	Improved Seed	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation		

Detailed Information about OFT: 1

1. Name of Discipline	Agronomy
Title of on-farm trial:	Assessment of newly released varieties for higher production in Soybean
Year/Season:	2024-25/ Kharif
Farming situation:	Rain fed
Problem diagnosis:	Low yield due to old variety (JS 9560) & infestation of diseases
Thematic area:	Varietal Evaluation
No of trials:	12
No. of farmers involved	12
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 –Farmers Practice-	JS 9560
T2 –Recommended Practice-	RVS-24
T3 - Recommended Practice-	JS 20-116
Date of sowing:	Last week of June
Date of harvesting:	Last week of September
Source of technology:	JNKVV
Characteristics of technology:	JS RVS-24- Medium duration Improved & High Yielding, YMV Resistant, Climate resilience JS 20-116-Medium duration Improved & High Yielding, YMV Resistant, Climate resilience
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT - 02

Crop / Enterprise	Soybean	
Title of on farm trial	Assessment of Natural Farming in Soybean	
Problem diagnosed	High Cost of Cultivation, atmospheric pollution, human health issue in current conventional agriculture system	
Farmers' Practices	Farmers are using chemicals and fertilizers	
Details of technologies selected for assessment	T ₁	Farmers are using chemicals and fertilizers
	T ₂	Beejamrit @ 50 g/kg seed, Ghanjeevamrit at sowing @ 500 kg/ha, Jeevamrit

	@ 750 l/ha at sowing, 15, 30, 45 DAS (S & FA), Dash Patti Kadha and Bramhaastra @ 25 l/ha at 20 and 40 DAS, Mulching with plant waste material @ 10 t/ha at 20 DAS
Source of technology	आचार्य देवव्रत (2019): कम लागत प्राकृतिक कृषि, पेज – 1-166 NCONF, Ghaziabad, 2022
Plot size	2000 m ²
No. of farmers	12
Total cost	23600/-
Critical input	Jaggary, Pulse Flour, Drum
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	

3.Name of Discipline	Agronomy
Title of on-farm trial:	Assessment of Natural Farming in Soybean
Year/Season:	2024-25/ Kharif
Farming situation:	Rain fed
Problem diagnosis:	High Cost of Cultivation, atmospheric pollution, human health issue in current conventional agriculture system
Thematic area:	Natural Farming
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1-Famers are using chemicals and fertilizers
T2 –Recommended Practice-	T2- - Beejamrit @ 50 g/kg seed, Ghanjeevamrit at sowing @ 500 kg/ha, Jeevamrit @ 750 l/ha at sowing, 15, 30, 45 DAS (S & FA), Neemashtra, Dash Patti Kadha and Bramhaastra @ 25 l/ha at 20 and 40 DAS, Mulching with plant waste material @ 10 t/ha at 20 DAS
T3- Recommended Practice-	
Date of sowing:	Last week of June
Date of harvesting:	Last week of September
Source of technology:	आचार्य देवव्रत (2019): कम लागत प्राकृतिक कृषि, पेज – 1-166 NCONF, Ghaziabad, 2022
Characteristics of technology:	use of Beejamrit, Ghanjeevamrit , Jeevamrit for nutrient management and , use of Neemashtra, Dash Patti Kadha and Bramhaastra for insect control
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel

OFT-04

Crop / Enterprise	Watermelon	
Title of on farm trial	Assessment of plastic mulch with water and nutrient management in Watermelon crop	
Problem diagnosed	Heavy weed infestation and more water consumption due to flood irrigation and low productivity	
Farmers' Practices	Planting on raised bed only	
Details of technologies selectedfor assessment	T ₁	Planting on raised bed with drip irrigation with residues mulch
	T ₂	Planting on raised bed with mulching (25 micron, silver-black plastic sheet) & fertigation
Source of technology	IIHR, 2011	
Plot size	2000 m ²	
No. of farmers	12	
Total cost	Rs 30,000 for plastic mulch sheet	
Critical input	One roll of plastic mulch sheet (25 micron)	

Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	

4.Name of Discipline	Agri Engineering
Title of on-farm trial:	Assessment of plastic mulch with water and nutrient management in Watermelon crop
Year/Season:	2024-25/ Jayad
Farming situation:	Irrigated
Problem diagnosis:	Heavy weed infestation and more water consumption due to flood irrigation and low productivity
Thematic area:	HOF
No of trials:	12
No. of farmers involved	12
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Planting on raised bed only
T2 –Recommended Practice-	Planting on raised bed with drip irrigation with residues mulch
T3- Recommended Practice-	Planting on raised bed with mulching (25 micron, silver-black plastic sheet) & fertigation
Date of sowing:	1 st week of March
Date of harvesting:	last week of april
Source of technology:	IIHR, 2011
Characteristics of technology:	Planting on raised bed with mulching (25 micron, silver-black plastic sheet) & fertigation for water saving and fertilizer saving with better production of muskmelon with better quality produce
Name of Crop/Enterprises:	Watermelon
Recommendations for Farmers	
Recommendations for Deptt. Personnel

OFT-3

Crop / Enterprise	soybean
Title of on farm trial	Assessment of different sowing methods in soybean
Problem diagnosed	Low yield of soybean due to poor moisture stress or water stagnation during heavy down pour
Farmers' Practices	Ridge & Furrow
Details of technologies selectedfor assessment	BBF FIRB -The tractor operated raised bed planter had been used in sowing of crop in which two raised bed can be made on which planting is also carried out simultaneous. Machine can sow two rows of crop on each bed. These furrows are useful to drain out excessive rainwater during heavy storms and for storing rainwater in furrows for enriching soil moisture through percolation in case of deficit rainfall and the soil moisture thus stored sustain the crop during dry spells. Raised bed planting encourages in-situ moisture conservation with saving of irrigation water and nodulation due to better aeration
Source of technology	DOSR and CIAE (2011)
Plot size	
No. of farmers	10
Total cost	Rs 24000
Critical input	Sowing with BBF and FIRB

Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	

2. Name of Discipline	Agri Engineering
Title of on-farm trial:	Assessment of different sowing methods in soybean
Year/Season:	2024-25/ Kharif
Farming situation:	Irrigated
Problem diagnosis:	Low yield of soybean due to poor moisture stress or water stagnation during heavy down pour
Thematic area:	AEG
No of trials:	12
No. of farmers involved	12
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Ridge & Furrow
T2 –Recommended Practice-	BBF
T3- Recommended Practice-	FIRB
Date of sowing:	Last week of June
Date of harvesting:	Last week of September
Source of technology:	DOSR and CIAE (2011)
Characteristics of technology:	The tractor operated raised bed planter had been used in sowing of crop in which two raised bed can be made on which planting is also carried out simultaneous. Machine can sow two rows of crop on each bed. These furrows are useful to drain out excessive rainwater during heavy storms and for storing rainwater in furrows for enriching soil moisture through percolation in case of deficit rainfall and the soil moisture thus stored sustain the crop during dry spells. Crop / Enterprise	wheat
Title of on farm trial	Assessment of reaper cum binder for harvesting
Problem diagnosed	High labour cost during harvesting of wheat
Farmers' Practices	Manual Harvesting
Details of technologies selectedfor assessment	T ₁ Manual Harvesting
	T ₂ Use of reaper cum binder
Source of technology	CIAE, Bhopal
Plot size	
No. of farmers	12
Total cost	14000.00
Critical input	Use machine on higher basis
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	

12.Name of Discipline	Agril Engineering
Title of on-farm trial:	Assessment of reaper cum binder for harvesting
Year/Season:	2024-25/ Rabi
Farming situation:	Irrigated
Problem diagnosis:	High labour cost during harvesting of wheat
Thematic area:	Farm mechanization
No of trials:	12
No. of farmers involved	12
Type of OFT (Assessment/ Refinement):	
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Manual Harvesting
T2 –Recommended Practice-	Use of reaper cum binder
T3- Recommended Practice-	
Date of sowing:	2 nd week of November
Date of harvesting:	2 nd week of March
Source of technology:	CIAE, Bhopal
Characteristics of technology:	Saving of time with reduce cost of harvesting for wheat crop
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	
Recommendations for Deptt. Personnel

Information about Home Science OFT:

1.Title of on-farm trial:	Assessment of Bio waste recycling by using Portable Vermi compost unit.
Year/Season:	2024-25
Problem diagnosis:	Low income of farm women , Use of partially decomposed FYM with low nutrient content and increasing in crops pest infestation
Thematic area: (Focus area in DFI and nutri smart initiatives)	Income generation/Organic Farming
No of trials:	10

No. of farmers/farm women involved	10
Type of OFT (Assessment/Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Use of partially decomposed FYM in summer season.
T2 –Recommended Practice-	Bio waste recycling through Portable Vermi compost unit.
Source of technology:	IISS, GBPUAT and JNKVV
Characteristics of technology:	Use of freshly prepared vermi compost prior to sowing of crop or during intercultural operation .
Name of Crop/Enterprises:	Portable Vermi compost unit.
Farming situation:	Use of partially decomposed FYM in summer season.
Date of sowing:	-
Date of harvesting:	-
Parameter	Use of Bio waste (Kg/unit), Vermi compost production (Kg/unit),income/unit organic matter content in soil and B:C
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

2.Title of on-farm trial:	Assessment of Bio fortified -durum Wheat variety Pusa Tejas (HI-8759) Porridge for nutritional security of farm women & their children
Year/Season:	2024-25/ Rabi
Problem diagnosis:	Lack of awareness regarding nutritious food in daily diet
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional security
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Non-consumption of porridge
T2 –Recommended Practice-	Porridge of Bio fortified Durum Wheat variety Pusa Tejas (HI-8759) high protein , Zink and Iron contain
Source of technology:	IARI Wheat Research Centre, Indore
Characteristics of technology:	Bio fortified Durum Wheat variety Pusa Tejas (HI-8759) high protein , Zink and Iron contain
Name of Crop/Enterprises:	Wheat
Farming situation:	Non-consumption of (porridge),use of old variety.
Date of sowing:	20 November
Date of harvesting:	March
Recommendations for Farmers	Bio fortified Durum Wheat variety Pusa Tejas (HI-8759) high protein , Zink and Iron contain
Recommendations for Deptt. Personnel	Bio fortified Durum Wheat variety Pusa Tejas (HI-8759) high protein , Zink and Iron contain
Feedback	-

3.Title of on-farm trial:	Assessment of Nutritional status of adolescent girls by nutritional

	intervention through drum stick
Year/Season:	2024-25
Problem diagnosis:	1)Low iron content in diet 2) Use of traditional diet 3) Lack of knowledge about nutritional foods 4) Poor socio-economic condition
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional Security
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	No use of drumstick.
T2 Recommended Practice-	Addition of drumstick leaf powder in chapati.
T3	Addition of drumstick pods in curry.
Source of technology:	MS University Baroda (Gujarat) - 2010
Characteristics of technology:	Nutritional Security through drumstick increase HB level and BMI
Name of Crop/Enterprises:	Drum Stick
Farming situation:	No use of drumstick.
Date of sowing:	-
Date of harvesting:	-
Recommendations for Farmers	Nutritional Security through drumstick increase HB level and BMI
Recommendations for Deptt. Personnel	Nutritional Security through drumstick increase HB level and BMI
Feedback	-

4.Title of on-farm trial:	Assessment of Oyster Mushroom cultivation for Income Generation
Year/Season:	2024-25
Problem diagnosis:	Poor economic status of the household due to seasonal unemployment.
Thematic area: (Focus area in DFI and nutri smart initiatives)	Income Generation
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	No Mushroom cultivation..
T2 –Recommended Practice-	Fresh oyster Mushroom cultivation.
T3-	Dry oyster mushroom powder
Source of technology:	JNKVV ,2000.
Characteristics of technology:	oyster mushroom cultivation for income generation and source of high protein, minerals, fiber etc
Name of Crop/Enterprises:	Oyster Mushroom
Farming situation:	No Mushroom cultivation
Date of sowing:	September
Date of harvesting:	November
Recommendations for Farmers	oyster mushroom cultivation for income generation and source of high

	protein, minerals, fiber etc
Recommendations for Deptt. Personnel	oyster mushroom cultivation for income generation and source of high protein, minerals, fiber etc

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 1 Sheopur	Paddy/Soybean/Green Gram/Black Gram/Sesame- Mustard/Chickpea/Wheat
2	AES – 2 Karhal	Bajara/ Sesame/Jwar/Maize/Soybean/Pigeon pea-Mustard/chickpea/wheat
3	AES – 3 Vijaypur	Bajara/Jwar/Maize/Sesame/Soybean/Pigeon pea-Mustard/chickpea/wheat

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	Gird Zone	Elevation: 150 to 300 msl Geographical situations: Latitude- 25 ⁰ 15'-25 ⁰ 45'N Longitude -76 ⁰ 22'-77 ⁰ 22'E Average Rainfall: 944mm Temperature : Max. 48 ⁰ c & min. 2 ⁰ c Physiographic: Plan, Rivers (Chambal & Parvati)

SWOT Analysis of each Agro-Ecological Situations of district

AES-1 (Sheopur) Soybean/Paddy/ Sesame/Green gram/black gram-mustard/chickpea/wheat

Strength	Weakness	Opportunities	Threats
- Good soil, flat land - Suitable for intercropping and crop rotation - Irrigated channel system	- Permanent use of pesticide and weedicide - No drought tolerant variety - Surface water easily contaminated During heavy rainfall - Flood irrigation in command area	- Use of new high yielding variety and heat tolerant variety with Economically Viable - Switch from monoculture to rotation - Use of border strip method drip irrigation and sprinkler irrigation	More or new pest Unstable production associated with natural disasters (ex. Decrease soil health and more environment pollution)

AES-2 (Karhal) Soybean/Jwar/Maize/ Bajara/Pigeon pea- mustard/chickpea/wheat/guava/jackfruit/Ber

Strength	Weakness	Opportunities	Threats
- Good drainage, fertile soil suitable for horticultural & species and medicinal crops - Fertile soils , natural water resources	- Heavy gravelly and rocky soils, dry soil leaching during rains - Common pesticide - Forest degradation due to overharvesting, overgrazing	- Crop diversification with horticultural crops - High yielding variety of field crop and horticulture crop with economically viable - Stall feeding of animal	Natural disasters (drought, hot dry winds, stoms, floods) affect showering, fruiting, wood breakage cause soil erosion

AES-3 (Vijaypur) Soybean/Jwar/Maize/ Bajara/Pigeon pea- mustard/chickpea/wheat/guava/jackfruit/Ber

Strength	Weakness	Opportunities	Threats
- Good drainage, fertile soil suitable for field crop and course millets - natural water resources - High biodiversity - Generally ecosystem in balance	Forest degradation due to overharvesting, overgrazing and mining activities	- Course & cereal crops and Protecting ecosystem balance for local resilience - Stall feeding of animal - Strictly follow law & order by administration	Natural disasters (drought, hot dry winds, stoms, floods) affect showering, fruiting, wood breakage cause soil erosion

Add AES if needed- NA

Land Use Pattern

Particulars	Area “000 ha”
Total Geographical area	666.60
Forest	292.8
Waste Land	39.30
Other than cultivated area	157.50
Cultivable waste and alkaline land	39.90
Pastures	37.2
Bushes	-
Current Fallow	8.30
Other Fallow	5.6
Agricultural Land	178.27
Net cultivated Area	170.20
Kharif	134.40
Rabi	157.40
Zaid	0.01849
Cropping Intensity	176%

Irrigated Area with Different Sources:

S. No.	Description	Area (ha)
1	Canal	60.50
2	Well	9.60
3	Tube well	35.80
4	Ponds	6.10
5	Others	-

Soil types

S. No.	Soil type	Characteristics	Area “000 ha”
1	Deep soils	Deep soil having dept 30-60 cm, sand 55.86%, silt 39.60% clay 0.33% with higher carbon in this soil deep rooted crop are grown e.g. pigeonpea, fruit crops & vegetables etc.	149.20
2	Medium deep soils	Soil depth is 25 to35cm. Crops with medium deep roots are grown in this type of soil e.g. chickpea,mustard, wheat etc. sand 39.9%, silt 32.9% clay 27.8%	84.40
3	Shallow soils	Soil depth less than 20 cm. Only shallow rooted crops are grown in such soil, e.g. paddy, wheat, barley etc. sand 40.5%, silt 32.5% clay 27.0% with higher carbon	425.40

Note: Figure. In parenthesis denotes the percentage of total area.

Area, Production and Productivity of major crops cultivated in the district

S. No	Crop	Area (ha)	Production (Qt.)	Productivity (Q /ha)
1	Wheat	77.55	348.97	4500
2	Paddy	45.00	193.50	4300
3	Bajara	21.12	432.96	2050
4	Chick pea	27.43	603.46	2200
5	Soybean	25.80	283.80	1100
6	Mustard	57.35	103.23	1800

Weather data (Jan, 2023- Dec., 2023)

Month /Year	Rainfall (m.m.)	Temperature (° C)	
		Maximum	Minimum
Jan, 2023	23.00	22.00	03.40
Feb, 2023	00.00	25.40	8.00
Mar, 2023	00.00	28.00	12.00
Apr, 2023	00.00	35.00	21.00
May, 2023	18.50	36.00	23.00
Jun, 2023	128.0	48.50	31.00
July, 2023	362.0	40.30	23.00
Aug., 2023	325.0	31.25	23.40
Sept., 2023	203.40	38.36	25.00
Oct. 2023	126.90	32.34	17.40

Nov. 2023	00.00	29.00	14.40
Dec. 2023	00.00	20.00	05.40

Production and productivity of livestock, Poultry, Fisheries etc. in the district

Category	Population	Production	Productivity
Cattle			
<i>Crossbred/ Indigenous</i>	264110	153.80 MT.	 kg
Buffalo	198624	165.80 MT.	 kg
Sheep			
<i>Crossbred/ Indigenous</i>	8591	12.06 MT wool	 kg
Goats	203150	0.69 MT	 kg
Pigs <i>Crossbred/ Indigenous</i>	2849	---	---
Rabbits	223

Fish	1680.83 (ha)	264 Mt/Q.	2365. Q/ ha.

Details of Operational area / Villages (2023)

Sl. No.	Tehsil	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
1	Baroda	Sheopur	Lalitpura, Indrapura, Ratodan	Soybean, Paddy, Black Gram, Mustard, Chickpea, wheat	Girdle beetle in Soybean, neck blast disease in rice, yellow mosaic virus in Black gram , dry root rot in chickpea	ICM, IPM, IDM, INM, HOV
2	Sheopur	Sheopur	Ichhapura, Bardha bujurg, Soikalan	Soybean, Paddy, Black Gram, Mustard, Chickpea, wheat	Girdle beetle in Soybean, neck blast disease in rice, yellow mosaic virus in Black gram , dry root rot in chickpea	ICM, IPM, IDM, INM, HOV
3	Karhal	Karhal	Parond,Dubadi, Kurkuta	Soybean, Bajara, Maize, Pigeon pea, mustard, chickpea, wheat	Girdle beetle in Soybean, neck blast disease in rice, yellow mosaic virus in Black gram , dry root rot in chickpea, Painted bug in mustard, fall army worm in Bajara	ICM, IPM, IDM, INM, HOV
4	Vijyapur	Vijaypur	Sevla, Majara	Soybean, Bajara, Maize, Pigeon pea, mustard, chickpea, wheat	Girdle beetle in Soybean, neck blast disease in rice, yellow mosaic virus in Black gram , dry root rot in chickpea, Painted bug in mustard, fall army worm in Bajara	ICM, IPM, IDM, INM, HOV

Priority / Thrust areas

S. No.	Particulars
1.	To increase the crop yield by seed replacement, IWM, IPM, INM & use of improved implements

2.	To create awareness about horticulture
3.	To increase milk productivity by A.I., balance feeding & Green fodder production.

TECHNICAL PROGRAMME

A. Details of targeted mandatory activities by KVK

OFT		FLD and CFLD	
1		2	
Number of OFTs	Number of Farmers	Number of FLDs	Number of Farmers
21	260	15	307

Training		Extension Activities	
3		4	
Number of Courses	Number of Participants	Number of activities	Number of participants
86	2140	115	5750

Seed Production (Qtl.)	Planting material (Nos.)
320	53500

B. Abstract of interventions to be undertaken

S. N o.	Thru st area	Crop/ Enterpri se	Identified Problem	Interventions					
				Title of OFT if any	Title e of FLD if any	Title of Training if any	Title of training for extension personnel if any	Extension on activities	Supply of seeds, planting materials etc.

Details of On Farm Trial (OFT)

OFT-1

Crop / Enterprise	Green Gram	
Title of on farm trial	Assessment of Improved variety of Green gram	
Problem diagnosed	Low yield non availability of synchronous variety, non availability of YMV resistant	
Farmers' Practices	Sowing of old variety	
Details of technologies selectedfor assessment	T ₁	Improved variety IPM 205-7
	T ₂	Improved variety IPM 410-3
Source of technology	IIPR, 2016	
Plot size		
No. of farmers	08	
Total cost	7500/-	
Critical input	Improved variety seed	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of pods/ plant , No. of seed / plant , test weight (g), yield q/ha., net return, B:C	

OFT-2

Crop / Enterprise	Soybean	
Title of on farm trial	Assessment of weedicide in Soybean	
Problem diagnosed	Low productivity due to weed infestation	
Farmers' Practices	Use of Imezathyper	
Details of technologies selectedfor assessment	T2	Sulfentrazone 39.6 SC @ 360g ai/ha PE
	T3	Diclosulam 84 WDG@ 22g ai/ha PE
Source of technology	IISR, Indore 2016	
Plot size		
No. of farmers	08	
Total cost	13000/-	
Critical input	Weedicide	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of weed/ m ² , yield q/ha, Net return, B:C	

OFT-3

Crop / Enterprise	Rice	
Title of on farm trial	Assessment of Improved variety of Rice	
Problem diagnosed	Low yield due to old variety	
Farmers' Practices	Use of Old variety PS- 4	
Details of technologies selectedfor assessment	T2	Improved variety Pusa Basmati-1692
	T3	Improved variety Pusa Basmati-7
Source of technology	RVSKVV, 2020	
Plot size		
No. of farmers	08	
Total cost	7700/-	
Critical input	Improved variety seed	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of tillers /hills, No. of ear head/hills , No. of grains/ear head, test weight (g), yield q/ha., net return, B:C	

OFT-4

Crop / Enterprise	Sesame	
Title of on farm trial	Assessment of Improved variety of sesame	
Problem diagnosed	Low yield due to old variety	
Farmers' Practices	Irrigated	
Details of technologies selectedfor assessment	T2	Improved variety Jawahar Til- 12
	T3	Improved variety Jawahar Til- 14
Source of technology	RVSKVV, 2020	

Plot size	
No. of farmers	08
Total cost	4200/-
Critical input	Improved Seed
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of tiller /plant, No. of pods/plant, yield q/ha, B:C ratio

OFT- 5

Crop / Enterprise	Rice	
Title of on farm trial	Assessment of fungicide against neck blast in Rice	
Problem diagnosed	Low yield due to neck blast disease	
Farmers' Practices	Spraying of any fungicide	
Details of technologies selectedfor assessment	T2	Spraying of Isoprotholane 500ml/ha at 10% panicle initiation stage
	T3	Spraying of Pyraclostrobin 500ml/ha at 10% panicle initiation stage
Source of technology	RVSKVV, 2016	
Plot size		
No. of farmers	08	
Total cost	7300/-	
Critical input	Disease management	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of infected plant sqm, No. of infected panicle/plant, yield q/ha., net return, B:C	

OFT-6

Crop / Enterprise	Soybean	
Title of on farm trial	Assessment of insecticide for management of girdle beetle in soybean	
Problem diagnosed	Low yield of Soybean about 30-40 % losses due to heavy infestation of girdle beetle	
Farmers' Practices	Spraying of any insecticide	
Details of technologies selectedfor assessment	T2	Spraying of chlortriniliprole 9.3% + Lemdacylothrins 4.6% @ 200ml/ha
	T3	Emamectin Benzoate 1.9% EC 425ml/ha
Source of technology	DSR, 2016	
Plot size		
No. of farmers	08	
Total cost	8000/-	
Critical input	Insecticide	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	% infested plants,, Yield (q/ha) & Net Income, BC ratio	

OFT-7

Crop / Enterprise	Wheat	
Title of on farm trial	Assessment of nano urea on growth and yield attributes of wheat	
Problem diagnosed	Low yield (10%) of rice due to low Nitrogen use efficiency.	
Farmers' Practices	unbalance use fertilizers	
Details of technologies selectedfor assessment	T2	100% through Urea (120 kg N) +60 kg P Through SSP and40 Kg K Through MOP
	T3	60kg P, 40kg K+ 50% through Urea as basal dose + Three foliar spray of Nano urea @ 2.0 ml/liter water at 25, 45 & 65 DAS
Source of technology	IFFCO, 2017	
Plot size		
No. of farmers	08	
Total cost	3050/-	
Critical input	Nano urea 500ml	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	Grains/Panicle, 1000 test weight (g) yield (q/ha), net return (Rs/ha), B:C ratio	

OFT-8

Crop / Enterprise	Wheat	
Title of on farm trial	Assessment of improved variety of wheat	
Problem diagnosed	Low yield due to lac of high yielding variety & technology.	
Farmers' Practices	Use of old variety	
Details of technologies selectedfor assessment	T2	IV, Pusa Ujala (HI 1605)
	T3	IV, RAJ 4238
Source of technology	IARI, 2017	
Plot size		
No. of farmers	08	
Total cost	13000/-	
Critical input	Iv, Seed	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of tillers/plant, No. of grains/ ear, test weight (g), Yield q/ha, Net return, B:C	

OFT-09

Crop / Enterprise	Chickpea	
Title of on farm trial	Assessment of weedicide in chickpea	
Problem diagnosed	low yield due to heavy weed infestation	
Farmers' Practices	No use of weedicide	
Details of technologies selectedfor assessment	T2	PE of pendimethyline 30 EC @ 1 kg ai/ha
	T3	Topramezone 33.6 SC @ 25.2 g ai/ha @ 20
Source of technology	IGKV, 2021	
Plot size		
No. of farmers	08	
Total cost	7500/-	
Critical input	Spraying of Weedicide	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of weed/ sqm., dry weight of weeds/sqm (g), WCE(%), yield q/ha, Net return , B:C	

OFT-10

Crop / Enterprise	Chickpea	
Title of on farm trial	Assessment of Improved variety of Chickpea	
Problem diagnosed	Low productivity due to sowing of old variety	
Farmers' Practices	Use of old variety JAKI-9218	
Details of technologies selectedfor assessment	T2	Improved variety RVG 203
	T3	Improved variety RVG 204
Source of technology	RVSKVV, 2012	
Plot size		
No. of farmers	08	
Total cost	20200/-	
Critical input	IV, SEED	
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of pods/ plant, test weight (g), Net return, B:C ratio, Farmers reaction	

OFT-11

Crop / Enterprise	Coriander	
Title of on farm trial	Assessment of disease resistant variety of Coriander	
Problem diagnosed	low yield due to stem gall disease in coriander	
Farmers' Practices	Use of disease susceptible variety CS-6	
Details of technologies selectedfor assessment	T2	Disease resistant variety ACR-1
	T3	Disease resistant variety ACR-2
Source of technology	NRCSS, Ajmer 2014	

Plot size	
No. of farmers	08
Total cost	19500/-
Critical input	Disease resistant variety Seed
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No of infected plant/sqm, yield (q/ha), Net return, B:C

OFT-12

Crop / Enterprise	Garlic
Title of on farm trial	Assessment of fungicide against purple blotch in garlic
Problem diagnosed	Low yield of garlic due purple blotch
Farmers' Practices	Spraying of fungicide mancozeb
Details of technologies selectedfor assessment	T2 Azoxystrobin 18.2% + Difenocolozole 11.4%@ 1000ml/ha T3 Azoxystrobin 11% + Tebuconazole 18.3 SC @ 750ml/ha
Source of technology	CIB, 2022
Plot size	
No. of farmers	08
Total cost	6500/-
Critical input	Fungicide
Performance indicators: (i) Technical- yield (q/ ha) (ii) Economic (iii) Social – Employment generation	No. of disease leaf / plant , yield/ha, B:C

OFT-13

Crop/Enterprise	Social Media
Title of on-farm trial	Study on ICT Tools Mobile messaging, Social Media (WhatsApp) in dissemination of agricultural message on neck blast disease of Paddy
Problem diagnosed	Delayed and lack of audio & visual based technical information dissemination on neck blast
Production system and thematic area	ICT
Farmers' practices	-
Details of technologies selected for assessment/refinement Treatments	Object- 1. To share agricultural techniques through message audio, video, photos etc. 2. To receive farmers problem through message audio, video, photo etc. 3. To collect farmers feed back of neck blast disease on Paddy
Source of technology	ZPD, Zone- IX, 2015
No. of farmers	100
No of trial	100
Critical input	Mobile massaging
Performance indicators Observation to be recorded	Perception, Knowledge, Extent of Utilization, Extent of Dissemination, Timeliness, Visibility of the content Applicability , Reliability and Creditability Feedback
Cost of input	2000/-
Total cost	2500/-

OFT – 14

Crop/Enterprise	Goat
Title of on-farm trial	Assessment of treatment of diarrhoea by juice of Gurhal(Hibiscus rosasinensis) flower in goats
Problem diagnosed	Diarrhoea is common in goats

Farming situation	-
Production system and thematic area	-
Farmers' practices	Local practices
Details of technologies selected for assessment/refinement Treatments	T2- Juice of gurhal flower 2-3 flower is orally administered twice a day for 3 days
Source of technology	ITK A, Traditional knowledge in agriculture , pg 30, Code no. 1585
No. of farmers	08
No of trial	02
Critical input	Juice of Gurhal flower
Performance indicators	Frequency and duration in diarrhoea reduction
Cost of input	-
Total cost	-

PROPOSED OFTs ON NATURAL FARMING

OFT – 15

Crop/Enterprise	Paddy
Title of on-farm trial	Assessing effective extension strategy for transfer tech. under natural farming in paddy crop
Problem diagnosed	Heavy use of chemical fertilizers & pesticides which needs to be reduced in order to increase the net profit of crops
Farming situation	Irrigated
Production system and thematic area	Natural farming
Farmers' practices	T1- Informal method of tech. diffusion through neighbors, input dealers etc.
Details of technologies selected for assessment/refinement Treatments	T2: Technology transfer through training and field visit T3: Technology transfer through FLDS.
Source of technology	Div. Of Agri. Ext. , ICAR and BCKV, West Bengal , 2020
No. of farmers	08
No of trial	05
Critical input	Interview schedules
Performance indicators	Gain in knowledge, retention of knowledge , adoption of technology
Cost of input	-
Total cost	-

OFT – 16

Crop/Enterprise	Wheat
Title of on-farm trial	Assessing effective extension strategy for transfer tech. under natural farming in wheat crop
Problem diagnosed	Heavy use of chemical fertilizers & pesticides which needs to be reduced in order to increase the net profit of crops
Farming situation	Irrigated
Production system and thematic area	Natural farming
Farmers' practices	T1- Informal method of tech. diffusion through neighbors, input dealers etc.
Details of technologies selected for assessment/refinement Treatments	T2: Technology transfer through training and field visit T3: Technology transfer through FLDS.
Source of technology	Div. Of Agri. Ext. , ICAR and BCKV, West Bengal , 2020
No. of farmers	08
No of trial	08
Critical input	Interview schedules
Performance indicators	Gain in knowledge, retention of knowledge , adoption of technology
Cost of input	-
Total cost	-

OFT – 17

Crop/Enterprise	Beejamrit & Jeevamrit
Title of on-farm trial	Assessment of Beejamrit and Jivamrit for nutrient management in soybean
Problem diagnosed	Cost of cultivation increase due to injudicious use of chemical fertilizer
Farming situation	Rainfed
Production system and thematic area	Natural Farming
Farmers' practices	T1- Use of chemical fertilizer
Details of technologies selected for assessment/refinement Treatments	T2- use of Beejamrit for seed treatment @ 10 ml/kg seed T3- seed treatment with beejamrit @ 10 ml/ kg seed + Spraying of jeevamrit @ 500 ltr / ha (Three spray at 20-25, 45-50 & 65-70 DAS)
Source of technology	NCOF, Gaziabad
No. of farmers	08
No of trial	08
Critical input	Beejamrit & Jeevamrit
Performance indicators	No. of micro organize , soil status , yield q/ha and B:C ratio
Cost of input	500/-
Total cost	500/-

OFT – 18

Crop/Enterprise	Paddy
Title of on-farm trial	Assessment of kunab jal in Paddy crop
Problem diagnosed	Cost of cultivation increase due to injudicious use of chemical fertilizer
Farming situation	Irrigated
Production system and thematic area	Natural Farming
Farmers' practices	T1- Use of chemical fertilizer
Details of technologies selected for assessment/refinement Treatments	T2- Use of kunab jal @ 500 lter / ha with irrigation water at 15 , 30 and 45 DAS
Source of technology	DES, RVSKVV, 2023
No. of farmers	08
No of trial	08
Critical input	Kunab Jal
Performance indicators	No. of micro organize , soil status , yield q/ha and B:C ratio
Cost of input	2000/-
Total cost	2000/-

OFT – 19

Crop/Enterprise	Wheat
Title of on-farm trial	Assessment of yield difference between Natural farming (Beejamrit -Jivamrit) and recommended dose of chemical fertilizer in wheat
Problem diagnosed	Yield losses about 14-18% due to low nutrition management in wheat crop
Farming situation	Irrigated
Production system and thematic area	Natural farming
Farmers' practices	Imbalance use of fertilizer
Details of technologies selected for assessment/refinement Treatments	T1- Imbalance use of chemical fertilizer T2- Apply RDF NPK 120:60:40 kg/ha T3-seed treatment with beejamrit @ 10 ml/kg seed + 500 ltr of jivamrit through irrigation water at 21, 45 and 65 DAS
Source of technology	NCOF, Gaziabad
No. of farmers	08
No of trial	08

Critical input	Beejamrit & Jeevamrit
Performance indicators	No. of micro organize , soil status , yield q/ha and B:C ratio
Cost of input	30000/-
Total cost	26200/-

OFT – 20

Crop/Enterprise	Chickpea
Title of on-farm trial	Assessment of Beejamrit and Jivamrit for health management
Problem diagnosed	Yield losses about 18-20% due to low nutrition in chickpea
Farming situation	Irrigation
Production system and thematic area	Natural farming
Farmers' practices	Imbalance use of fertilizer
Details of technologies selected for assessment/refinement Treatments	T1- Imbalance use of fertilizer T2- Apply RDF NPK 20:60:20 kg/ha T3-seed treatment with beejamrit + drench with 500 ltr of jivamrit through irrigation water and 1st spray at 21 DAS & than four spray at 15 days interval
Source of technology	NCOF, Gaziabad
No. of farmers	08
No of trial	08
Critical input	Beejamrit & Jeevamrit
Performance indicators	No. of pods/ plant , yield q/ha and B:C ratio
Cost of input	27000/-
Total cost	28700/-

OFT – 21

Crop/Enterprise	Chickpea
Title of on-farm trial	Assessment of Agniastra for management of gram pod borer
Problem diagnosed	Losses about 15-18% due to heavy infestation of gram pod borer
Farming situation	Irrigated
Production system and thematic area	Natural farming
Farmers' practices	Use of profenophos 1.0 ltr /ha
Details of technologies selected for assessment/refinement Treatments	T1- use of porfenophos 50% EC @ 1000 ml/ ha T2- use of HaNPV @ 350 LE/ ha T3-use of 3% agniastra (Preventive spray at 30 DAS and than need based application at 15 Days interval)
Source of technology	NCOF, Gaziabad
No. of farmers	08
No of trial	08
Critical input	Agniastra
Performance indicators	No. of infested pods/ plant, larvae/m2 and yield q/ha
Cost of input	23000/-
Total cost	23600/-

Detailed Information about OFT: 01 (AGRONOMY)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	AGRONOMY
Title of on-farm trial:	Assessment of Improved variety of Green Gram
Year/Season:	Kharif 2024
Farming situation:	Irrigated
Problem diagnosis:	Low yield, non availability of synchronous variety , non availability of YMV resistant
Thematic area:	VE
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Local (TJM
T2 –Recommended Practice-	Virat (IPM 205-7
T3- Recommended Practice-	Sikha (IPM 410-3
Date of sowing:	July 2024
Date of harvesting:	Sept. 2024
Source of technology:	IIPR, 2016
Characteristics of technology:	High yield variety and resistant to YMV
Name of Crop/Enterprises:	Green Gram
Recommendations for Farmers	HYV
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 02 (AGRONOMY)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	AGRONOMY
Title of on-farm trial:	Assessment of weedicide in Soybean
Year/Season:	Kharif 2023
Farming situation:	Irrigated
Problem diagnosis:	Low productivity due to weed infestation
Thematic area:	IWM
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	farmers Practice (Imezathyper)
T2 –Recommended Practice-	Sulfentrazone 39.6 SC @ 360g ai/ha PE
T3- Recommended Practice-	Diclosulam 84 WDG@ 22g ai/ha PE
Date of sowing:	July 2024
Date of harvesting:	Oct. 2024
Source of technology:	IISR, Indore 2016

Characteristics of technology:	
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	Weed management
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 03(AGRONOMY)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	AGRONOMY
Title of on-farm trial:	Assessment of Improved variety of Rice
Year/Season:	Kharif 2023
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to old variety
Thematic area:	VE
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Improved variety Pusa Basmati- 4
T2 –Recommended Practice-	Improved variety Pusa Basmati- 1692
T3- Recommended Practice-	Farmers Practice (Pusa Sugandha- 7
Date of sowing:	July 2024
Date of harvesting:	Nov. 2024
Source of technology:	RVSKVV, 2020
Characteristics of technology:	High yielding variety
Name of Crop/Enterprises:	Rice
Recommendations for Farmers	HYV
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 04 (AGRONOMY)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	AGRONOMY
Title of on-farm trial:	Assessment of Improved variety of sesame
Year/Season:	Kharif 2024
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to old variety
Thematic area:	VE
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1-Farmers Practice (JT- 7)
T2 –Recommended Practice-	T2- Improved variety Jawahar Til- 12

T3- Recommended Practice-	T3- Improved variety Jawahar Til- 14
Date of sowing:	July 2024
Date of harvesting:	Sept. 2024
Source of technology:	RVSKVV, 2020
Characteristics of technology:	High yielding variety
Name of Crop/Enterprises:	Sesame
Recommendations for Farmers	HYV
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 06 (PLANT PROTECTION)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	PLANT PROTECTION
Title of on-farm trial:	Assessment of fungicide against neck blast in Rice
Year/Season:	Kharif 2024
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to neck blast disease
Thematic area:	IPM
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Spraying of any fungicide
T2 –Recommended Practice-	Spraying of Pyraclostrobin 500ml/ha at 10% panicle initiation stage
T3- Recommended Practice-	Spraying of Isoprotholane 500ml/ha at 10% panicle initiation stage
Date of sowing:	July, 2024
Date of harvesting:	Nov. 2024
Source of technology:	RVSKVV, 2020
Characteristics of technology:	Control of neck blast disease
Name of Crop/Enterprises:	Rice
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 05 (AGRI. ENGINEERING)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	AGRI. ENGINEERING
Title of on-farm trial:	Assessment of sowing method in Rice
Year/Season:	Kharif 2023
Farming situation:	Irrigated
Problem diagnosis:	High cost of cultivation, more water consumption and more manpower req.
Thematic area:	ICM
No of trials:	08

No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Transplanting
T2 –Recommended Practice-	DSR- Broadcasting
T3- Recommended Practice-	DSR- Line sowing
Date of sowing:	July 2024
Date of harvesting:	Nov. 2024
Source of technology:	RVSKVV, 2020
Characteristics of technology:	High yielding variety
Name of Crop/Enterprises:	Rice
Recommendations for Farmers	HYV
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 06 (PLANT PROTECTION)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	PLANT PROTECTION
Title of on-farm trial:	Assessment of insecticide for management of girdle beetle in soybean
Year/Season:	Kharif 2024
Farming situation:	Irrigated
Problem diagnosis:	Low yield of Soybean about 30-40 % losses due to heavy infestation of girdle beetle
Thematic area:	IPM
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Profenophos @ 1.5 lit /ha at 35 days after sowing
T2 –Recommended Practice-	Spraying of chlortriniliprole 9.3% + Lemdacylthrin 4.6% @ 200ml/ha
T3- Recommended Practice-	Emamectin Benzoate 1.9% EC 425ml/ha
Date of sowing:	July 2024
Date of harvesting:	Oct. 2024
Source of technology:	DSR, 2016
Characteristics of technology:	
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Detailed Information about OFT: 07(AGRONOMY)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	AGRONOMY

Title of on-farm trial:	Assessment of nano urea on growth and yield attributes of wheat
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Low yield (10%) of rice due to low Nitrogen use efficiency.
Thematic area:	INM
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- unbalance use fertilizers
T2 –Recommended Practice-	T100% through Urea (120 kg N) +60 kg P Through SSP and40 Kg K Through MOP2
T3- Recommended Practice-	T3- 60kg P, 40kg K+ 50% through Urea as basal dose + Three foliar spray of Nano urea @ 2.0 ml/liter water at 25, 45 & 65 DAS
Date of sowing:	Nov. 2024
Date of harvesting:	April 2025
Source of technology:	IFFCO, 2016
Characteristics of technology:	Nutrient management
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 08(AGRONOMY)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	AGRONOMY
Title of on-farm trial:	Assessment of improved variety of wheat
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to lac of high yielding variety & technology.
Thematic area:	VE
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Farmer practices (Raj 4037)
T2 –Recommended Practice-	IV, Pusa Ujala (HI 1605)
T3- Recommended Practice-	IV, RAJ 4238
Date of sowing:	Nov. 2024
Date of harvesting:	April 2025
Source of technology:	IARI, 2017
Characteristics of technology:	HYV
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 09(AGRONOMY)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	AGRONOMY
Title of on-farm trial:	Assessment of weedicide in chickpea
Year/Season:	Rabi 2023-24
Farming situation:	Irrigated
Problem diagnosis:	low yield due to heavy weed infestation
Thematic area:	IWM
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Farmer Practice (No use of weedicide)
T2 –Recommended Practice-	PE of pendimethyline 30 EC @ 1 kg ai/ha
T3- Recommended Practice-	Topramezone 33.6 SC @ 25.2 g ai/ha @ 20-25 DAS
Date of sowing:	Nov. 2024
Date of harvesting:	March 2025
Source of technology:	IGKVV,2021
Characteristics of technology:	Weed management
Name of Crop/Enterprises:	Chickpea
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 10(AGRONOMY)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	AGRONOMY
Title of on-farm trial:	Assessment of Improved variety of Chickpea
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Low productivity due to sowing of old variety
Thematic area:	VE
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Farmers Practice (JAKI- 9218)
T2 –Recommended Practice-	Improved variety RVG 203
T3- Recommended Practice-	Improved variety RVG 204
Date of sowing:	Nov. 2024
Date of harvesting:	March 2025
Source of technology:	RVSKVV, 2012
Characteristics of technology:	HYM

Name of Crop/Enterprises:	Chickpea
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 11(PLANT PROTECTION)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	PLANT PROTECTION
Title of on-farm trial:	Assessment of disease resistant variety of Coriander
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	low yield due to stem gall disease in coriander
Thematic area:	IDM
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Susceptible variety CS- 6
T2 –Recommended Practice-	Disease resistant variety ACR-1
T3- Recommended Practice-	Disease resistant variety ACR-2
Date of sowing:	Nov. 2024
Date of harvesting:	April 2025
Source of technology:	NRCSS, AJMER, 2014
Characteristics of technology:	Disease resistant variety
Name of Crop/Enterprises:	Coriander
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 12 (PLANT PROTECTION)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	PLANT PROTECTION
Title of on-farm trial:	Assessment of fungicide against purple blotch in garlic
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Low yield of garlic due purple blotch
Thematic area:	IDM
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Spraying of mancozeb 1kg/ha
T2 –Recommended Practice-	Azoxystrobin 18.2% + Difenocolozole 11.4%@ 1000ml/ha

T3- Recommended Practice-	Azoxystrobin 11% + Tebuconazole 18.3 SC @ 750ml/ha
Date of sowing:	Nov. 2024
Date of harvesting:	April 2025
Source of technology:	CIB, 2022
Characteristics of technology:	Control of purple blotch
Name of Crop/Enterprises:	Garlic
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Information about Extension OFT: 13 (Agri. Ext.)

Title	Study on ICT Tools Mobile messaging, Social Media (WhatsApp) in dissemination of agricultural message on neck blast disease of Paddy
Season & Year	Round year
Problem identified	Delayed and lack of audio & visual based technical information dissemination on neck blast
Thematic Area	ICT
Farming situation	Irrigagted
Name of Technology Intervention under study	Object- To share agricultural techniques through message audio, video, photos etc. To receive farmers problem through message audio, video, photo etc. To collect farmers feed back of neck blast disease on Paddy
Farmers Practice	-
No. of replication (Farmers)	100

Results / findings

Performance indicators/ parameters	Unit/ details
Perception, Knowledge, Extent of Utilization, Extent of Dissemination, Timeliness, Visibility of the content Applicability , Reliability and Creditability Feedback	

Detailed Information about OFT: 14 (Agri. Ext.)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agri. Ext.
Title of on-farm trial:	Assessment of treatment of diarrhoea by juice of Gurhal(<i>Hibiscus rosasinensis</i>) flower in goats
Year/Season:	Rabi 2024-25
Farming situation:	-
Problem diagnosis:	Diarrhoea is common in goats
Thematic area:	ITK
No of trials:	02
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	

T1 – Farmers Practice-	T1- Local practices
T2 –Recommended Practice-	T2- Juice of gurhal flower 2-3 flower is orally administered twice a day for 3 days
T3- Recommended Practice-	-
Date of sowing:	-
Date of harvesting:	-
Source of technology:	ITK A, Traditional knowledge in agriculture , pg 30, Code no. 1585
Characteristics of technology:	-
Name of Crop/Enterprises:	-
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-

NATURAL FARMING OFTs

Detailed Information about OFT: 15 (AGRI. EXT.)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	AGRI. EXT.
Title of on-farm trial:	Assessing effective extension strategy for transfer tech. under natural farming in paddy crop
Year/Season:	Kharif 2024
Farming situation:	Irrigated
Problem diagnosis:	Heavy use of chemical fertilizers & pesticides which needs to be reduced in order to increase the net profit of crops
Thematic area:	Natural farming
No of trials:	05
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Informal method of tech. diffusion through neighbors, input dealers etc.
T2 –Recommended Practice-	T2: Technology transfer through training and field visit
T3- Recommended Practice-	T3: Technology transfer through FLDS.
Date of sowing:	July 2024
Date of harvesting:	Nov. 2024
Source of technology:	Div. Of Agri. Ext. , ICAR and BCKV, West Bengal , 2020
Characteristics of technology:	-
Name of Crop/Enterprises:	-
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 16 (AGRI. EXT.)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	AGRICULTURE ENGL.
Title of on-farm trial:	Assessing effective extension strategy for transfer tech. under natural farming in wheat crop
Year/Season:	Rabi 2024
Farming situation:	Irrigated
Problem diagnosis:	Heavy use of chemical fertilizers & pesticides which needs to be reduced in order to increase the net profit of crops
Thematic area:	Natural farming
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Informal method of tech. diffusion through neighbors, input dealers etc.
T2 –Recommended Practice-	T2: Technology transfer through training and field visit
T3- Recommended Practice-	T3: Technology transfer through FLDS.
Date of sowing:	Nov. 2024
Date of harvesting:	April 2025
Source of technology:	Div. Of Agri. Ext. , ICAR and BCKV, West Bengal , 2020
Characteristics of technology:	-
Name of Crop/Enterprises:	-
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 17 (PLANT PROTECTION)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	PLANT PROTECTION
Title of on-farm trial:	Assessment of Beejamrit and Jivamrit for nutrient management in soybean
Year/Season:	Kharif 2024
Farming situation:	Irrigated
Problem diagnosis:	Cost of cultivation increase due to injudicious use of chemical fertilizer
Thematic area:	NF
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Use of chemical fertilizer
T2 –Recommended Practice-	T2- use of Beejamrit for seed treatment @ 10 ml/kg seed
T3- Recommended Practice-	T3- seed treatment with beejamrit @ 10 ml/ kg seed + Spraying of

	jeevamrit @ 500 ltr / ha (Three spray at 20-25, 45-50 & 65-70 DAS)
Date of sowing:	July 2024
Date of harvesting:	Oct. 2024
Source of technology:	CIB, 2022
Characteristics of technology:	chemical fertilizer
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 18 (AGRI. EXT.)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	AGRICULTURE ENGL.
Title of on-farm trial:	Assessment of kunab jal in Paddy crop
Year/Season:	Kharif 2024
Farming situation:	Irrigated
Problem diagnosis:	Cost of cultivation increase due to injudicious use of chemical fertilizer
Thematic area:	Natural farming
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Use of chemical fertilizer
T2 –Recommended Practice-	T2- Use of kunab jal @ 500 lter / ha with irrigation water at 15 , 30 and 45 DAS
T3- Recommended Practice-	-
Date of sowing:	July 2024
Date of harvesting:	Nov. 2024
Source of technology:	DES, RVSKVV, 2023
Characteristics of technology:	-
Name of Crop/Enterprises:	Paddy
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 19(AGRONOMY)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	AGRONOMY
Title of on-farm trial:	Assessment of yield difference between Natural farming (Beejamrit -Jivamrit) and recommended dose of chemical fertilizer in wheat
Year/Season:	Rabi 2024-25

Farming situation:	Irrigated
Problem diagnosis:	Yield losses about 14-18% due to low nutrition management in wheat crop
Thematic area:	Natural farming
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Imbalance use of chemical fertilizer
T2 –Recommended Practice-	T2- Apply RDF NPK 120:60:40 kg/ha
T3- Recommended Practice-	T3-seed treatment with beejamrit @ 10 ml/kg seed + 500 ltr of jivamrit through irrigation water at 21, 45 and 65 DAS
Date of sowing:	Nov. 2024
Date of harvesting:	April 2025
Source of technology:	NCOF, Gaziabad
Characteristics of technology:	-
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Detailed Information about OFT: 20(AGRONOMY)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	AGRONOMY
Title of on-farm trial:	Assessment of Beejamrit and Jivamrit for health management in chickpea
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Yield losses about 18-20% due to low nutrition in chickpea
Thematic area:	Natural farming
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- Imbalance use of fertilizer
T2 –Recommended Practice-	T2- Apply RDF NPK 20:60:20 kg/ha
T3- Recommended Practice-	T3-seed treatment with beejamrit + drench with 500 ltr of jivamrit through irrigation water and 1st spray at 21 DAS & than four spray at 15 days interval
Date of sowing:	Oct. 2024
Date of harvesting:	March 2025
Source of technology:	NCOF, Gaziabad
Characteristics of technology:	-
Name of Crop/Enterprises:	chickpea
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-

Feedback	-

Detailed Information about OFT: 21 (PLANT PROTECTION)

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	PLANT PROTECTION
Title of on-farm trial:	Assessment of Agniastra for management of gram pod borer in chickpea
Year/Season:	Rabi 2024-25
Farming situation:	Irrigated
Problem diagnosis:	Losses about 15-18% due to heavy infestation of gram pod borer
Thematic area:	NF
No of trials:	08
No. of farmers involved	08
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1- use of porfenophos 50% EC @ 1000 ml/ ha
T2 –Recommended Practice-	T2- use of HaNPV @ 350 LE/ ha
T3- Recommended Practice-	T3-use of 3% agniastra (Preventive spray at 30 DAS and than need based application at 15 Days interval)
Date of sowing:	Oct. 2024
Date of harvesting:	March 2024
Source of technology:	NCOF, Gaziabad
Characteristics of technology:	-
Name of Crop/Enterprises:	Chickpea
Recommendations for Farmers	-
Recommendations for Deptt. Personnel	-
Feedback	-

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demo.	Parameters identified for performance evaluation
1	Black Gram	VE	Demonstration of Improved variety Sekhar – 2	Improved variety	Kharif 2024	4.00	10	No. of pods/ plant, yield q./ha, net return, B:C
2	Soybean	VE	Demonstration on Improved variety JS 20-69	Improved variety	Kharif 2024	4.00	10	No. of pods/ plant , No. of seed / plant , test weight (g), yield q/ha., net return, B:C
3	Soybean	IPM	Demonstration on Spraying of Thiacloprid 21.7% @ 750 ml/ha at 45 DAS	Insecticide	Kharif 2024	4.00	10	No. of infested plant/sqm, yield q./ha, net return, B:C
4	Rice	IPM	Demonstration on Spraying of	Insecticide	Kharif 2024	4.00	10	No of hoppers / hills, yield (q/ha),

			dinotefuran@ 250g/ha					Net return, B:C
5	Mustard	IPM	Growing of mustard crop (false) 10 days before main crop +Seed treatment with Imidacloprid 48% 5ml/kg seeds	Insecticide	Rabi 2024-25	4.00	10	No of infested plant/sqm, yield q/ha, net return, B:C
6	Wheat	VE	Demonstration on Improved Variety Pusa Tejas (HI-8759)	Improved variety	Rabi 2024-25	4.00	10	No. of tillers/sqm, test weight, yield (q/ha) net return, B:C
7	Vermicompost	Income generation	Use of Eisenia fetidia spp. Of earth worm @ 2 kg for 3 q dry bio weight Ready within 90 days Recovery % 60-70 % Moisture content 30-35 %	Vermicompost	Round year	2.00	10	Production / unit area, Yield (q/ha), net return, B:C
8	Mal nutrition		Grow of nutrition kitchen garden in round the year of Nutrition kitchen garden	Minikit seed vegetable	Round year	1.2	30	Production / unit area, availability of nutrition vegetable

NATURAL FARMING

9	Paddy	Natural farming	Demonstration on NF (Beejamrit , Ghanjeevamrit, and Jivamrit)for nutrient management in Paddy	Jeevamrit	Kharif 2024	4.00	10	No. of micro organize , soil status , yield q/ha and B:C ratio
10	Wheat	Natural farming	Demonstration on NF (Beejamrit , Ghanjeevamrit, and Jivamrit)for nutrient management in wheat	Beejamrit , Ghanjeevamrit, and Jivamrit	Rabi 2024-25	4.40	12	No. of micro organize , soil status , yield q/ha and B:C ratio
11	Soybean	Natural farming	Spraying of Agniastra @ 3% solution at 30 DAS and than need based application	Agniastra	Kharif 2024	4.00	10	No. of pods/plant, Yield q/ha and B:C Ratio

Extension and Training activities under FLDs

S. No.	Activity	No. of activities	Month	Number of participants
1	Field days	08	Sept. , Oct. Feb., march, June	400
2	Farmers Training	78	All month	1950
3	Media coverage	06	Sept. , Oct. Feb., march, June	Mass
4	Training for extension functionaries	08		240

Details of FLD on Enterprises

Farm Implements

Name of the implement	crop	Season and year	No. of farmers	Area (ha)	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
							Demon.	Local check
-	-	-	-	-	-	-	-	-
-	-	-	-	-	-	-	-	-

*Field efficiency, labour saving etc.

Livestock Enterprises

Enterprise	Breed	No. of farmers	No. of animals, poultry birds etc.	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
						Demo.	Local check

*Milk production, meat production, egg production, reduction in disease incidence etc.

Other Enterprises

Enterprise	Variety/ breed/Species /others	No. of farmers	No. of Units/ area	Critical inputs	Performance parameters/ indicators	Data on parameter in relation to technology demonstrated	
						Demo.	Local check

Cluster Demonstration of Oilseed and Pulses under NFSM (2023-24)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified
1	Green gram	ICM	IV Virat (IPM405-7), seed + Seed treatment with Vitavax power 3g/kg seed + profenophos @ 1 l / ha.	Seed , Insecticide	Summer 2024	10.00	25	No. of pods /plant, test weight (g), yield q./ha. net return, B:C
2	Soybean	ICM	IV RVSM2011-35, seed + Seed treatment with Vitavax power 3g/kg seed + Chlroentraniliprol @ 100 ml / ha.	Seed, insecticide	Kharif 2024	20.00	50	No. of pods /plant, test weight (g), yield q./ha. net return, B:C
3	Chickpea	ICM	IV- RVG-202, seed + Seed treatment with thiram @ 3g/kg seed + Emamectin Benzoate @ 350g/ha	Seed, Insecticide	Rabi 2024-25	20.00	50	No. of pods/plant, test weight (g), yield (q/ha), net return, B:C
4	Mustard	ICM	Improved variety Girraj (IJ31) -2kg + Seed treatment (Imidacloprid 48% @ 5ml/kg seed) + Soil application of sulphar 20kg/ha + foliar spray of nutrient+ spraying of imidacloprid 17.8 SL@ 250 ml/ha	Seed , Fertilizer, Insecticide	Rabi 2024-25	20.00	50	No. of siliqua/plat , test weight , yield (q/ha), Net return, B:C

Extension and Training activities under CFLDs Oilseed and Pulses

S. No.	Activity	No. of activities	Month	Number of participants
1	Field days	08	Sept., Oct. Feb. , March	400
2	Farmers Training	78	All months	1950
3	Media coverage	04	Quarter wise	Mass
4	Training for extension functionaries	08	Quarter wise	250

Action plan for Flagship programmes implemented at KVK

(NICRA, ARYA, Natural farming, CBBO, Seed Hub, Agri Drone etc)

Name of Flagship programmes

Month	Activity details	Targeted Beneficiaries/Area/Coverage
April	Natural farming Training , Awareness programme	200
May	Natural farming Training , Awareness programme	120
June	Natural farming Training , Awareness programme , ARYA- RY Training Programme (Kadaknath Rearing)	125
July	Natural farming Training , Awareness programme	150
August	Natural farming Training , Awareness programme	150
Sept.	Natural farming Training , Awareness programme ARYA- RY Training Programme (Bee Keeping)	125
October	Natural farming Training , Awareness programme	250
Nove.	Natural farming Training , Awareness programme ARYA- RY Training Programme (Goat Rearing)	125
Dec.	Natural farming Training , Awareness programme	120
January	Natural farming Training , Awareness programme ARYA- RY Training Programme (Kadaknath Rearing)	125
February	Natural farming Training , Awareness programme	220
March	Natural farming Training , Awareness programme	180

Planning for Crop Cafeteria

Total Area of Crop cafeteria: 750 Sq m

Crop	Season	Variety	Particulars /details	Area (Sq m)
Soybean	Kharif 2024	RVSM 2011-35 ,JS 93-05, JS 20-29, JS 20-34, RVS 2001-4, JS-2069, NRC-86, RVS2002-4, RVS 18, RVS 2007-06	10 variety	200 Sqm
Green Gram		PKVAKM-4, Virat , Shikha, TM-37, JM-721, TM-50, MI-2491-01, TJM-3, Moong Ganga-8	07 variety	140 Sqm
Black Gram		PU-35, JU-86, TNAU-20, IU-486, RBU-38, RBU-466, indra uer01	10 variety	200 Sqm
Pearl millet		JBV-2, JBV-3, JBV-4, HHV-67, GHB-744	05 variety	100 Sqm

Sorghum	Rabi 2024-25	JJ938, JJ 1041, IMS-9A, IMS-9B, Indore-12	05 variety	100 Sqm
Maize		JM-08, JM-12, JM-216,PEMH-1,PEMH-2	05 variety	100 Sqm
Wheat -		GW-366,Pusa mangal,C-306 ,HD-2932,HI-8498 , HD 4676, HI 1531, HI 1500, Lok -1, HI 8691, HI 1454, HI 1544,	12 variety	144 Sqm
Gram-		JG-16, JG-412, JG-11, RVG 201,RVG 202,RVG 203,RVG 204	08 variety	96 Sqm
Mustard-		NRCHB-101, Girraj IJ 31, Jaikishan, Swarn joyoti,, Pusa sarso-24,Pusa sarso-25,	06 variety	72 Sqm
Linseed		Pratap Alsi-1, Pratap Alsi-2	02 variety	24 Sqm
Coriander		ACR-1, ACR-2, RKD 18, RCR-434	04 variety	48 Sqm
Fenugreek		RMT-35, RTM-305	04 variety	48 Sqm

Details of Demonstration Unit at KVK

Demonstration Unit	Particulars /details	Area (Sq m)	Output /Production
Vermicompost	Vermi four pit	35 Sqm	500 Qtl.
Diary unit	Gir Breed Cow-03 Calf-05	650 Sqm	1825 Ltr
Goatary unit	Jamunapari breed -28	260 Sqm	Breed
Poultry unit	Kadakanath breed -200	220 Sqm	Egg, Cock & Chiks
Nursery unit	Seedling & Sapling	2000 Sqm	50000
Fisheries unit	Rohu, Katla, Silvar, Golden carp, Grass carf	2700 Sqm	5 Qtl.
Azola unit	Azola	25 Sqm	500 Qtl.
Nutritional kitchen garden unit	Kharif and Rabi vegetables	20 Sqm	-
Bee keeping unit	Apis melifera	10 Sqm	Honey 100kg
Organic product unit	Jeevamrit, Beejamrit	20 Sqm	10000 ltr

Annual Action Plan 2024

KVK: Shivpuri

Year of sanction: 2005

Other (Pl. specify)				

C) Equipment & AV aids

Name of the equipment	Year of purchase	Cost (Rs.)	Present status
Projector	2020	47557.75	Good
Generator	2016	423493.00	Good

1.5.(A). Details of SAC meeting to be conducted in the year

Sl. No.	Tentative Date
1	May
2	October

2. DETAILS OF DISTRICT

Major farming systems / enterprises (based on the Agro-ecological situation analysis made by the KVK) Add AES if needed

S. No.	Farming system/enterprise	Description
1	AES – 1	Soybean- wheat / Dairy / Goatry Groundnut- wheat / Dairy / Goatry Soybean- chick pea / Dairy / Goatry Pearl millet- wheat / Dairy / Goatry Tomato- wheat / Dairy / Goatry Soybean- Mustard / Dairy / Goatry

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	AES – 1 Gird- Bundelkhand Zone	Medium black soil, red and yellow soil with slight undulation

SWOT Analysis of each Agro-Ecological Situations of district

AES-1 (name)

Strength	Weakness	Opportunities	Threats
☐ Agroclimat suitable for many crops (field crops as	☐ Soil getting poor in organic carbon.	☐ Food processing unit for vegetable and fruit crops to enhance the income and	☐ Underground water level getting down day

well as Horticulture crops) • Major area belongs to medium black soil suitable for wheat, soybean, chickpea • Red- yellow soil covering about 30-40 % area suitable for groundnut and pearl millet • A considerable area is covered under horticultural crops like tomato, capsicum, pumpkin, guava etc. • Improved Desi cow breed “Gir” is found in some part in the district.	• Underground water level getting down day by day. • Stray animals create problem in cultivated fields. • Farmers are ignorant and illiterate in majority. • Un awareness about nutrition of dairy animals. • More use of agro-chemicals for crop protection that may worsen the human health	employment. • Opportunity to soil improvement through use of organic inputs and other measures. • Opportunity to introduce new improved crop varieties more resilient to climate change. • Opportunity to extension of new agro-technologies and to reduce technology gap. • Use of organic inputs for crop protection and natural farming. • Opportunity by adoption of new farm related enterprises.	by day • Soil organic carbon depletion. • Migration of rural youths towards urban area. • Mass movement of farmers towards more remunerative crops that may lead to decrease in crop diversity Low crop production may happen due to non-use of agro-chemicals.

5						

Priority / Thrust areas

S. No.	Particulars
1.	Crop diversification, ICM, Climate resilient technology
2.	Farm mechanization, VR, INM, IWM
3	Soil and water conservation, Hi tech horticulture, NRM, VR, INM, IPM
4	Breed up-gradation of Dairy animals
5	Health and housing Management of dairy animals
6	Suitable use of available natural resources (Land and Water)

TECHNICAL PROGRAMME
A. Details of targeted mandatory activities by KVK

OFT		FLD and CFLD	
1		2	
Number of OFTs	Number of Farmers	Number of FLDs	Number of Farmers
19	101	17	436

Training		Extension Activities	
3		4	
Number of Courses	Number of Participants	Number of activities	Number of participants
66	1650	15	5500

Seed Production (Qtl.)	Planting material (Nos.)
300	100000

B. Abstract of interventions to be undertaken

S. No.	Thrust area	Crop/ Enterprise	Identified Problem	Interventions					
				Title of OFT if any	Title of FLD if any	Title of Training if any	Title of training for extension personnel if any	Extension activities	Supply of seeds, planting materials etc.
1	NF	Groundnut	Maximization of production cost, health issue of soil and environment	Assessment of Groundnut production under Natural Farming					
2	Crop Diversification	Nigella	Low yield due to indiscriminate variety	Assessment of suitable variety of Nigella (Kalonji)					
3	NF	Vegetable pea	Higher production cost, Deteriorating soil health and environment	Assessment of Vegetable pea production under Natural Farming					
4	NF	Wheat	Maximization of production cost, degraded health of soil and environment	Assessment of Wheat Production under Natural farming					
5	NF	Tomato	Hazardous for human and soil health	Assessment of Natural farming for pest management in Tomato.					
6	IPM	Groundnut	Indiscriminate use of pesticide	Assessment of IPM in Groundnut					
7	NF	Onion	Hazardous for human and soil health	Assessment of Natural farming for pest management in Onion					
8	IPM	Mustard	Indiscriminate use of pesticide	Assessment of IPM Module in Mustard					
9	VE	Soybean	Low yield due to use of old varieties	Assessment of medium duration soybean varieties under					

				Soybean-Wheat cropping system					
10	VE	Black gram	Low Yield due to use of old variety T-9	Assessment MYMV resistant variety of Black gram under Black gram-Mustard cropping system					
11	VE	Wheat	Low Yield due to use of old variety	Assessment bio-fortified varieties of wheat under Rice/Groundnut -Wheat cropping system					
12	VE	Mustard	Low Yield due to use of old variety of Mustard	Assessment of Improved high yielding variety of mustard					
13	AEG	Groundnut	Consumption of large amount seed and low yield due to moisture stress and water stagnation	Assessment of raised bed planting method for groundnut					
14	AEG	Onion	Irrigation water scarcity	Assessment of irrigation through Rain pipe in Onion under					
15	AEG	Potato	Low yield due to old practice	Assessment of Potato Planter					
16	FIS	Fish	Low yield and economic benefits from Carp culture.	Assessment of growth performance and economic benefits of pangasius sp. in fish culture system.					
17	LPM	Fish & poultry	Low profit due to adoption of single enterprise.	Assessment of profitability of different enterprises under pond based integrated farming system					

18	AGF	Turmeric	No use of land within plantation	Assessment of Turmeric based agroforestry					
19	AGF	Moringa	No use of bund	Assessment of High Yielding variety of Moringa on bunds					

Technologies to be assessed

Details of On Farm Trial (OFT)

OFT-1

Crop / Enterprise	Fish	
Title of on farm trial	Assessment of growth performance and economic benefits of pangasius sp. in pond culture system.	
Problem diagnosed	Low yield and economic benefits from Carp culture.	
Farmers' Practices	T1	Culture of Carp sp. in fish culture ponds @10000 fingerlings/ha
Details of technologies selected for assessment	T2	Culture of Pangasius sp. in fish culture ponds @20000 fingerlings/ha
Source of technology	TNAU 2015	
Plot size	0.2 ha	
No. of farmers	03	
Total cost	-	
Critical input	36000	
Performance indicators: (i) Growth and Yield attributes (ii) Technical- yield (q/ ha) (iii) Economic- Net income (Rs/ha) (iv) Social – Employment generation		

OFT-2

Crop / Enterprise	Fish
Title of on farm trial	Assessment of profitability of different enterprises under pond based integrated farming system.
Problem diagnosed	Low profit due to adoption of single enterprise.

Farmers' Practices	T1	Improper or No use of available resources
Details of technologies selected for assessment	T2	Adoption of Poultry cum fish Integrated farming system (250 birds/ha fish pond)
	T ₂	-
Source of technology	CIFA, Bhubaneswar	
Plot size	0.4 ha	
No. of farmers	05	
Total cost	30000	
Critical input	20000	
Performance indicators: (v) Technical- yield (q/ ha) (vi) Economic- Net income (Rs/ha) (vii) Social – Employment generation

Detailed Information about OFT:

OFT 3

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of Groundnut production under Natural Farming
Year/Season:	Kharif 2023
Farming situation:	Irrigated and Sandy loam soils
Problem diagnosis:	Maximization of production cost, health issue of soil and environment

Thematic area:	IWM
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of DAP @100 kg/ha
T2 –Recommended Practice-	RDF (NPKS 25:50:30:25)
T3- Recommended Practice-	Use of Natural farming Components as per Schedule i.e, Ghanjivamrit, Bijamrit, Jivamrit and plant protection as per NF
Date of sowing:	
Date of harvesting:	
Source of technology:	Gurukul Kurukshetra, Haryana
Characteristics of technology:	
Name of Crop/Enterprises:	Groundnut
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-4

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of suitable variety of Nigella (Kalonji)
Year/Season:	Kharif 2024
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to indiscriminate variety
Thematic area:	Crop Diversification
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of indiscriminate cultivars
T2 –Recommended Practice-	Use of AN 1
T3- Recommended Practice-	Use of AN 20
Date of sowing:	
Date of harvesting:	
Source of technology:	ICAR-IISSR, Ajmer
Characteristics of technology:	
Name of Crop/Enterprises:	Nigella
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-5

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of Vegetable Pea production under Natural Farming
Year/Season:	Rabi 2023- 24
Farming situation:	Irrigated
Problem diagnosis:	Higher production cost, Deteriorating soil health and environment
Thematic area:	NF
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of 100 kg of DAP in basal dose and top dressing of 60 kg Urea
T2 –Recommended Practice-	T2: RDF (NPKS 20:40:20:0)
T3- Recommended Practice-	T2: Use of Natural farming Components as per Schedule i.e. Bijamrit, Ghanjivamrit, Jivamrit, mulching and Plant Protection as per Natural Farming
Date of sowing:	
Date of harvesting:	
Source of technology:	Natural Farming
Characteristics of technology:	
Name of Crop/Enterprises:	Vegetable Pea
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-06

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agronomy
Title of on-farm trial:	Assessment of Wheat Production under Natural farming
Year/Season:	Rabi 2023- 24
Farming situation:	Irrigated
Problem diagnosis:	Maximization of production cost, degraded health of soil and environment
Thematic area:	NF
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Use of 125 kg of DAP and 75 kg/ha urea

T2 –Recommended Practice-	RDF (NPK 120:60:40)
T3- Recommended Practice-	Use of Natural farming Components as per Schedule i.e. Bijamrit, Ghanjivamrit, Jivamrit, and Plant Protection as per natural Farming
Date of sowing:	
Date of harvesting:	
Source of technology:	Gurukul Kurukshetra, Haryana
Characteristics of technology:	
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT 07

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Plant Protection
Title of on-farm trial:	Assessment of IPM in Groundnut
Year/Season:	Kharif - 24
Farming situation:	Rainfed
Problem diagnosis:	Indiscriminate use of pesticide
Thematic area:	IPM
No of trials:	5
No. of farmers involved	5
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1: Seed treatment with Thirum
T2- Recommended Practice-	T2: Seed treatment with Combination of Carbendazim+Mencozeb mixture @3 g/kg seed
T3-	T3: Soil incorporate of Trichoderma viride @ 2.5 kg/ha and Seed treatment with Trichoderma viride @ 5g/kg seed + Spray of Tebuconazole @ 0.1%
Date of sowing:	June/July
Date of harvesting:	Oct/Nov
Source of technology:	ICAR/NCIPM
Characteristics of technology:	IPM
Name of Crop/Enterprises:	Groundnut
Recommendations for Farmers	Under testing
Recommendations for Deptt. Personnel	
Feedback	

OFT 08

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/	Plant Protection

Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	
Title of on-farm trial:	Assessment of Natural farming for pest management in Tomato
Year/Season:	Kharif - 2024
Farming situation:	Irrigated
Problem diagnosis:	Hazardous for human and soil health
Thematic area:	Natural farming
No of trials:	5
No. of farmers involved	5
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1:Indiscriminate use of pesticide
T2- Recommended Practice-	T2: Use of Agniashtra (Cow urin, neem leaves, garlic, green chilly and Tobacco leaves and Neemashttra at the rate of 15liter/ha
T3-	T3: 100% Organic (Jeewamart + Agniashtra and Neemashttra) at the rate of 500 liter/ha/month+15liter/ha/month respectively
Date of sowing:	July 24
Date of harvesting:	October to February
Source of technology:	Padamshri Subhash Palekar
Characteristics of technology:	Natural farming
Name of Crop/Enterprises:	Tomato
Recommendations for Farmers	Under testing
Recommendations for Deptt. Personnel	
Feedback	

OFT 09

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Plant Protection
Title of on-farm trial:	Assessment of Natural farming for pest management in Onion
Year/Season:	Rabi - 2024
Farming situation:	Irrigated
Problem diagnosis:	Hazardous for human and soil health
Thematic area:	Organic farming
No of trials:	5
No. of farmers involved	5
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1:Indiscriminate use of pesticide
T2- Recommended Practice-	T2: Use of Agniashtra (Cow urin, neem leaves, garlic, green chilly and Tobacco leaves and Neemashttra at the rate of

	15liter/ha
T3-	T3: 100% Organic (Jeewamart + Agniashttra and Neemashttra) at the rate of 500liter/ha/month+15liter/ha/month respectively
Date of sowing:	Dec/Jan
Date of harvesting:	May
Source of technology:	Padamshri Subhash Palekar
Characteristics of technology:	Natural farming
Name of Crop/Enterprises:	Onion
Recommendations for Farmers	Under testing
Recommendations for Deptt. Personnel	
Feedback	

OFT 10

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Plant Protection
Title of on-farm trial:	Assessment of IPM Module in Mustard
Year/Season:	Rabi 23-24
Farming situation:	Irrigated
Problem diagnosis:	Indiscriminate use of pesticide
Thematic area:	IPM
No of trials:	5
No. of farmers involved	5
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	T1: Seed treatment with Thirum
T2- Recommended Practice-	T2: Seed treatment with Combination of Carbendazim+Mencozeb mixture @3 g/kg seed
T3-	T3: Soil incorporate of Trichoderma viride @ 2.5 kg/ha and Seed treatment with Trichoderma viride @ 5g/kg seed+Need based spray of Azadirachtin @ 4.0 ml/L and Mixture of Metalaxyl + Mencozeb @2.5g/L
Date of sowing:	Oct 24
Date of harvesting:	March-24
Source of technology:	ICAR/RVSKVV
Characteristics of technology:	IPM
Name of Crop/Enterprises:	Mustard
Recommendations for Farmers	T-3
Recommendations for Deptt. Personnel	T-3
Feedback	T1: Seed treatment with Thirum

OFT 11

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Plant Breeding
Title of on-farm trial:	Assessment of medium duration soybean varieties under Soybean-Wheat cropping system
Year/Season:	Kharif 2023
Farming situation:	Irrigated, clay loam, Cropping pattern paddy-Wheat
Problem diagnosis:	Low yield due to use of old varieties
Thematic area:	VE
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	JS 9305
T2- Recommended Practice-	JS 20-69 (maturity 93 days, Yield 2500 kg/ha, Multiple disease resistance)
Date of sowing:	
Date of harvesting:	
Source of technology:	JNKVV & RVSKVV 2014
Characteristics of technology:	
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT 12

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Plant Breeding
Title of on-farm trial:	Assessment MYMV resistant variety of Black gram under Black gram-Mustard cropping system
Year/Season:	Kharif 2023
Farming situation:	Semi-irrigated
Problem diagnosis:	Low Yield due to use of old variety T-9
Thematic area:	VE
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Local Variety (T-9)
T2- Recommended Practice-	Indira Urd-1 (maturity 75days, Yield 1250 kg/ha, suitable for Kharif

	and Summer both)
Date of sowing:	
Date of harvesting:	
Source of technology:	
Characteristics of technology:	RRS and IGAU 2016
Name of Crop/Enterprises:	
Recommendations for Farmers	Black Gram
Recommendations for Deptt. Personnel	
Feedback	

OFT 13

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Plant Breeding
Title of on-farm trial:	Assessment bio-fortified varieties of wheat under Rice/Groundnut-Wheat cropping system
Year/Season:	Rabi 2023-24
Farming situation:	Irrigated
Problem diagnosis:	Low Yield due to use of old variety
Thematic area:	VE
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	MP-4010/Lok 1
T2- Recommended Practice-	MP -3382 (maturity119 days, Yield 5975 kg/ha, bold seed and Biofortified)
Date of sowing:	
Date of harvesting:	
Source of technology:	
Characteristics of technology:	JNKVV-2016 and IARI 2016
Name of Crop/Enterprises:	
Recommendations for Farmers	Wheat
Recommendations for Deptt. Personnel	
Feedback	

OFT 14

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Plant Breeding
Title of on-farm trial:	Assessment of Improved high yielding variety of mustard

Year/Season:	Rabi 2023-24
Farming situation:	Semi-Irrigated
Problem diagnosis:	Low Yield due to use of old variety of Mustard
Thematic area:	VE
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Local (Kranti/Varuna/Pusa Bold)
T2- Recommended Practice-	RH-725 (maturity130 days, Yield 2400 kg/ha, Oil % 39.00)
Date of sowing:	
Date of harvesting:	
Source of technology:	
Characteristics of technology:	DRMR, Bharatpur 2021
Name of Crop/Enterprises:	
Recommendations for Farmers	Mustard
Recommendations for Deptt. Personnel	
Feedback	

OFT 15

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agriculture Engineering
Title of on-farm trial:	Assessment of raised bed planting method for groundnut
Year/Season:	Kharif 2023
Farming situation:	Rainfed
Problem diagnosis:	Consumption of large amount seed and low yield due to moisture stress and water stagnation
Thematic area:	AEG
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Closer line sowing (22cm)
T2 –Recommended Practice-	Line sowing (30 cm)
T3- Recommended Practice-	Raised bed planting system (rows 30 cm apart)
Date of sowing:	
Date of harvesting:	
Source of technology:	ICAR-CIAE, Bhopal
Characteristics of technology:	
Name of Crop/Enterprises:	Groundnut
Recommendations for Farmers	

Recommendations for Deptt. Personnel	
Feedback	

OFT 16

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agriculture Engineering
Title of on-farm trial:	Assessment of irrigation through Rain pipe in Onion
Year/Season:	Rabi 2023-24
Farming situation:	Irrigated
Problem diagnosis:	Irrigation water scarcity
Thematic area:	AEG
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Flood Irrigation
T2 –Recommended Practice-	Rain pipe system
T3- Recommended Practice-	-
Date of sowing:	
Date of harvesting:	
Source of technology:	ACRI Tamil Nādu
Characteristics of technology:	
Name of Crop/Enterprises:	Onion
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT 17

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agriculture Engineering
Title of on-farm trial:	Assessment of Potato Planter
Year/Season:	Rabi 2023-24
Farming situation:	Irrigated
Problem diagnosis:	Low yield due to old practice
Thematic area:	AEG
No of trials:	10
No. of farmers involved	10
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	

T1 – Farmers Practice-	Line sowing 30 cm
T2 –Recommended Practice-	Potato Planter 45 cm
T3- Recommended Practice-	-
Date of sowing:	
Date of harvesting:	
Source of technology:	ICAR-CIAE, Bhopal
Characteristics of technology:	
Name of Crop/Enterprises:	Potato
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT 18

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agroforestry
Title of on-farm trial:	Assessment of Turmeric based agroforestry
Year/Season:	Kharif 2023
Farming situation:	Irrigated
Problem diagnosis:	No use of land within plantation
Thematic area:	AGF
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Only Plantation (Guava)
T2 –Recommended Practice-	Plantation (Guava) with Turmeric
T3- Recommended Practice-	-
Date of sowing:	
Date of harvesting:	
Source of technology:	TNAU 2014
Characteristics of technology:	
Name of Crop/Enterprises:	Turmeric
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT 19

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agroforestry
Title of on-farm trial:	Assessment of High Yielding variety of Moringa on bunds

Year/Season:	Kharif 2023
Farming situation:	Irrigated
Problem diagnosis:	No use of bund
Thematic area:	AGF
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Sole crop
T2 –Recommended Practice-	Moringa on bunds + Crop in Fields
T3- Recommended Practice-	-
Date of sowing:	
Date of harvesting:	
Source of technology:	TNAU 2011
Characteristics of technology:	
Name of Crop/Enterprises:	Moringa
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Name of Discipline (like Agronomy/Horticulture/ Soil Science/ Plant Protection/Plant Breeding/ Agroforestry/Agri Engineering/Animal Science/ Fisheries etc)	Agroforestry
Title of on-farm trial:	Assessment of High Yielding variety of Moringa on bunds
Year/Season:	Kharif 2023
Farming situation:	Irrigated
Problem diagnosis:	No use of bund
Thematic area:	AGF
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Sole crop
T2 –Recommended Practice-	Moringa on bunds + Crop in Fields

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/demonstration	Parameters identified for performance evaluation
1	Fish	FIS	Demonstration of Composite fish farming (IMCs Fingerlings @10000 /ha) in pond farming system.	Fish Seed	Rabi 2024-25	1.00	5	Growth rate (%)
2	Dairy Animals	LPM	Demonstration on Supplementation of mineral mixture @30g/animal/day in feed of dairy animals	Mineral Mixture	Rabi 2024-25	-	10	Demonstration : Milk yield (l/laction)
3	Soybean	AEG	Demonstration of Raised bed planting of soybean	Equipment on Hire base	Rabi 2024-24	2.0	5	Demonstration : Rain Water Use Efficiency
4	Wheat	AEG	Demonstration of reaper cum binder in wheat crop harvesting.	Equipment on Hire base	Rabi 2024-25	2.0	5	Demonstration : Field capacity (ha/hr), Man-hrs saving, Time saving
5	Wheat	VE	Demonstration of improved bio fortified variety of wheat HI-8759	Seed	Rabi 2024-25	2.0	5	Demonstration : Tillers/plant, Grain yield (g/1000)
6	Pearl Millet	Millet	Demonstration of pearl millet bio-fortified variety HHB-299 under nutrition sensitive agriculture	Seed	Kharif 2024	2.0	5	Demonstration : Cob weight (g)
7	Chick Pea	IPM	Demonstration of IPM Module (Soil incorporation with Trichoderma viride @ 2.5 kg/ha and Seed treatment with Trichoderma viride @ 5g/kg seed+ Spray of Azadirachtin @ 4.0 ml/lit + need based spray of Profenophos + Cypermethrin @ 1.0 ml/lit.) in Chickpea	Trichoderma viride, Azadirachtin, Profenophos + Cypermethrin	Rabi 2024-25	2.0	5	Demonstration : Cob weight (g)

8	Soybean	IPM	Assessment of IPM Module (Soil incorporation with Trichoderma viride @ 2.5 kg/ha and Seed treatment with Trichoderma viride @ 5g/kg seed+ Spray of Azadirachtin @ 4.0 ml/lit +need based spray of Profenophos + Cypermethrin @ 1.0 ml/lit) in Soybean	Trichoderma viride, Azadirachtin, Profenophos + Cypermethrin	Kharif 2024	2.0	5	Demonstration : Cob weight (g)
9	Onion	Natural Farming	Demonstration of Onion Production Technology under Natural farming Situation	Seedling + Ghanjeevmrit + Jeevamrit + Agniastra/Neemastra	Rabi 2024-25	2.4	12	Demonstration : Soil parameters Before sowing and after harvesting
10	Tomato	Crop Diversification	Demonstration of Inter-cropping of Tomato : Marigold (16: 1) and 2 rows maize planting in boundary of field in Diversification and Profitable Model	Seed/Seedlings	Kharif 2024	2.0	5	Demonstration : Cost reduce, Income increase and pest control
11	N-B Hybrid	Fodder and Forage	Demonstration of Napier Bajra hybrid variety TSH under round the year green fodder production model	Rooted slips	Whole year	2.0	5	Demonstration : Days of green fodder availability
12	Maize	ICM	Demonstration of improved Variety JMJ-218 + Balance plant Nutrition {80:40:20 N,P,K (kg/ha)	Seed	Kharif 2024	2.0	10	Demonstration : Cob weight (g)

Details of FLD on Enterprises

Farm Implements

Name of the implement	crop	Season and year	No. of farmers	Area (ha)	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
							Demon.	Local check
Reaper cum binder	Wheat	Rabi 2023-24	05	2.0	Equipment on Hire	Field capacity (ha/hr), Man-hrs saving,		

					base	Time saving		
Raised Bed Planter	Soybean	Kharif 2023	05	2.0	Equipment on Hire base	Rain Water Use Efficiency, Yield and Yield attributes		

**Field efficiency, labour saving etc.*

Livestock Enterprises

Enterprise	Breed	No. of farmers	No. of animals, poultry birds etc.	Critical inputs	Performance parameters / indicators	* Data on parameter in relation to technology demonstrated	
						Demo.	Local check
Dairy	Based on Availability	10	10	Mineral Mixture	Milk yield (l/laction)		

**Milk production, meat production, egg production, reduction in disease incidence etc.*

Other Enterprises

Enterprise	Variety/ breed/Species /others	No. of farmers	No. of Units/ area	Critical inputs	Performance parameters/ indicators	Data on parameter in relation to technology demonstrated	
						Demo.	Local check
Fishery	IMCs	03	03	Fish Seed	Fish Yield (kg/ha), Growth rate (%)		

Cluster Demonstration of Oilseed and Pulses under NFSM (2024-25)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified
1	Soybean	ICM	Demonstration of production of Improved Variety of Soybean under CFLD	Seed + Trichoderma + Insecticide	Kharif 2024	10.00	25	Pods/plant, Grain yield (g/1000)
2	Groundnut	ICM	Demonstration of production technology of Improved Variety of Groundnut var. Nithya haritha under Cluster demonstration	Seed+ Trichoderma	Kharif 2024	20.00	50	Pods/plant, Grain yield (g/1000)
3	Pigeon pea	ICM	Demonstration of production technology of Improved variety of Pigeon pea under CFLD	Seed + Trichoderma	Kharif 2024	50.00	125	Pods/plant, Grain yield (g/1000)
4	Mustard	ICM	Demonstration of production technology of Improved Variety of	Seed + Trichoderma	Rabi 2024-25	50.00	125	Pods/plant, Grain yield (g/1000)

			Mustard (<i>RH-725</i>) under CFLD					
5	Lentil	ICM	Demonstration of production of Improved Variety of Lentil (IPL-316) under CFLD	Seed + Trichoderma + Insecticide	Rabi 2024-25	50.00	125	Pods/plant, Grain yield (g/1000)

Extension and Training activities under CFLDs Oilseed and Pulses

S. No.	Activity	No. of activities	Month	Number of participants
1	Field days	10	September, February	500
2	Farmers Training	15	July, August, November. December, January	225
3	Media coverage	15	July, August, November. December, January	Mass
4	Training for extension functionaries	02	July, December	50

Planning for Crop Cafeteria

Total Area of Crop cafeteria: 2000 Sq m

Crop	Season	Variety	Particulars /details	Area (Sq m)
Millets	Kharif	Millets crop	Rich source of nutrients	2000
Soybean	Kharif	8-10	Short and Medium duration	
Groundnut	Kharif	8-10	Bunch/Semi spread and spread types	
Black gram	Kharif	5-6	Improved and YMY resistant	
Green Gram	Kharif	5-6	Improved and YMY resistant	
Sesame	Kharif	8-10	Improved varieties	
Tomato	Kharif	5-6	Long keeping/Processing varieties	
Fodder/ Forage	Kharif	4-5	Improved and rich source of nutrients	

Mustard	Rabi	5-6	Improved var. high oil and short duration	2000
Lentil	Rabi	5-6	Wilt disease resistant	
Chickpea	Rabi	8-10	Wilt and root diseases resistant	
Wheat	Rabi	8-10	Short and Medium duration	
Coriander	Rabi	3-4	Short and Medium duration	
Thyme	Rabi	3-4	Demonstration In rabi 2023-24	
Fodder/ Forage	Rabi	4-5	Improved and rich source of nutrients	

Details of Demonstration Unit at KVK

Demonstration Unit	Particulars /details	Area (Sq m)	Output /Production
Rain water harvesting Pond	Harvested rainwater for irrigation of field crops	15000	90000 m ³ Irrigation water
Dairy	Gir Breed 02 Adults	300	Natural Farming
Goatry	Bundelkhandi Breed	250	04 kids
Poultry	Desi breed/ Kadaknath	100	1500 kg meat
Fish Culture pond	IMCs	4000	-
Vermi Compost Production	Vermi Compost	500	300 q
Round the Year Green Fodder Production Unit	Napier-Bajra Hybrid (IGFRI 6 and TSH)	1000	50000 Slips
Guava Orchard	Gwalior-27	2000	250 Plants
Polyhouse	Vegetable seedlings	560	50000
Shed Net House	Vegetable seedlings	980	50000
Natural Farming Unit	Ghanjiwamrit, BeejamritJ, Jeevamrit and all plant protection products	35	Jeevamrit 1000 Lit. Beejamrit 100 Lit

6		

Description of Agro-climatic Zone & major agro-ecological situations (based on soil and topography)

S. No.	Agro-climatic Zone	Characteristics
1	AES – 1 Heavy Black Soil	
2	AES – 2 Medium Black Soil	Low infiltration, swell and shrinkage
3	AES – 3 Light Black Soil	
4	AES – 4	
5	AES – 5	
6	AES – 6	

SWOT Analysis of each Agro-Ecological Situations of district AES-1 (name)

Strength	Weakness	Opportunities	Threats
•			

AES-2 (Central Highland)

Strength	Weakness	Opportunities	Threats
- High water holding capacity - Suitable for all type of field, horticulture, medicinal and aromatic crops. - Appreciably high nutrient status except nitrogen, Zn and S. - Fairly moderate weather and climatic condition with mean air temperature of 26.9°C and 28.2°C soil temperature. - Suitable for double cropping. - Hub for quality seed production of cereals, oilseeds and pulses.	Hard Pan due to low infiltration and application of heavy machinery	Increase the orchard area and horticultural enterprises	Low availability of irrigation water due to uncertain rain, poor water recharge and lack of water bodies for on-farm harvesting of rain water

AES-3 (name)

Strength	Weakness	Opportunities	Threats
•	•	•	•

AES-4 (name)

Strength	Weakness	Opportunities	Threats
•	•	•	•

Add AES if needed

Land Use Pattern

Particulars	Area “000 ha”
Total Geographical area	609.874
Forest	3.149
Waste Land	5.700
Other than cultivated area	59.458

Detailed Information about OFT:

OFT-1

Name of Discipline	Plant Breeding
Title of on-farm trial:	Assessment of soybean variety RVSM 2011-35 for high yield
Year/Season:	2024 Kharif
Farming situation:	Rainfed
Problem diagnosis:	Low yield of soybean
Thematic area:	Varietal Evaluation
No of trials:	05

No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	JS 95-60(FP)
T2 –Recommended Practice-	RVSM 2011-35(RP)
T3- Recommended Practice-	RS 24 (RP)
Date of sowing:	
Date of harvesting:	
Source of technology:	RVSKVV, Gwalior 2020
Characteristics of technology:	
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-2

Name of Discipline	Plant Breeding
Title of on-farm trial:	Assessment of mungbean variety MH-421 for high yield
Year/Season:	2024 Kharif
Farming situation:	Rainfed
Problem diagnosis:	Low yield of mungbean
Thematic area:	Varietal Evaluation
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Pusa Vishal(FP)
T2 –Recommended Practice-	MH-421(RP)
T3- Recommended Practice-	
Date of sowing:	
Date of harvesting:	
Source of technology:	CCSHAU, Hisar(2014)
Characteristics of technology:	
Name of Crop/Enterprises:	Mungbean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-3

Name of Discipline	Plant Breeding
Title of on-farm trial:	Assessment of wheat variety GW-513 for high yield
Year/Season:	2024 Rabi
Farming situation:	Irrigated
Problem diagnosis:	Low yield
Thematic area:	Varietal Evaluation
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	HI 1544(FP)
T2 –Recommended Practice-	GW-513(RP)
T3- Recommended Practice-	
Date of sowing:	
Date of harvesting:	
Source of technology:	Sardarkrushinagar Dantiwada Agricultural University
Characteristics of technology:	
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-4

Name of Discipline	Agronomy
Title of on-farm trial:	Assessment of wheat productivity under high fertility conditions
Year/Season:	2023-24 Rabi
Farming situation:	Irrigated
Problem diagnosis:	Low nutrient use efficiency
Thematic area:	NRM
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	N:P:K 120:60:40 +FYM once in three years
T2 –Recommended Practice-	150% RFD +15 t/ha FYM + 2 sprays of Chlormequat chloride (0.2%)+tebuconazole (0.1%) at First Node and Flag Leaf stages.
T3- Recommended Practice-	150% RFD
Date of sowing:	
Date of harvesting:	

Source of technology:	IIWBR 2021
Characteristics of technology:	
Name of Crop/Enterprises:	Wheat
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-5

Name of Discipline)	Agronomy
Title of on-farm trial:	Assessment of Soybean –Maize inter-cropping system for sustainable production under climate change
Year/Season:	2024 Kharif
Farming situation:	Rainfed
Problem diagnosis:	Monocropping, Un-sustainable yields
Thematic area:	NRM
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Sole Soybean
T2 –Recommended Practice-	Soybean: Maize in 4:2. Use of pre-emergence herbicide Metribuzin + One Hand Weeding
T3- Recommended Practice-	
Date of sowing:	
Date of harvesting:	
Source of technology:	ICAR-DSR Indore
Characteristics of technology:	
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-6

Name of Discipline	Agronomy
Title of on-farm trial:	Assessment of Propaquizafop + Oxyflourfen for controlling mixed weed flora in transplanted Onion
Year/Season:	2023-24 Rabi
Farming situation:	Irrigated
Problem diagnosis:	Yield loss due to heavy weed infestation and high cost of manual weeding
Thematic area:	Integrated weed Management

No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Oxyflourfen as POE 100g ai/ha
T2 –Recommended Practice-	Propaquizafop 5% + Oxyflourfen 12 %. (43.75+105 g) /ha 25 DAS
T3- Recommended Practice-	
Date of sowing:	
Date of harvesting:	
Source of technology:	DWR 2022
Characteristics of technology:	
Name of Crop/Enterprises:	Onion
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-7

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of Neemastra and brahmastra for the control of sucking pest in soybean
Year/Season:	2024 Kharif
Farming situation:	Rainfed
Problem diagnosis:	Low yield due to sucking pest
Thematic area:	IPM /Natural farming
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Cholopyriphos application
T2 –Recommended Practice-	Use of Neemastra (200 lit water ,2kg cow dung ,10 lit cow urine ,10 kg neem leaves)
T3- Recommended Practice-	Brahmastra (20 litre cow urine, 2 kg neem leaves, 2 kg karanj leaves, 2kg custard apple leaves and 2 kg datura leaves)
Date of sowing:	
Date of harvesting:	
Source of technology:	ITK-ICAR
Characteristics of technology:	
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-8

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of IPM Practice for the control of white grub in soybean
Year/Season:	2024 Kharif
Farming situation:	Rainfed
Problem diagnosis:	Low yield due to white grub infestation
Thematic area:	IPM
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Propenophos
T2 –Recommended Practice-	Seed treatment with Imidachloprid 48 FS @1.25 ml/Kg Seed
T3- Recommended Practice-	Chloropyriphos 2.5%G @ 16 kg /ha b/w the rows at 25-30 DAS
Date of sowing:	
Date of harvesting:	
Source of technology:	IISR Indore
Characteristics of technology:	
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-9

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of IPM Module for the gram pod borer management in Gram
Year/Season:	2024 Kharif
Farming situation:	Rainfed
Problem diagnosis:	Low yield due to helicoverpa (gram pod borer) infestation
Thematic area:	IPM
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Cholopyriphos application
T2 –Recommended Practice-	Use of Novaluram 5.25% + Indoxacarb 4.50 SC + followed by Bt 1.5 kg /ha at seed formation stage.

T3- Recommended Practice-	Use of Broflanilide @85 ml / ha + followed by NPV 250 LE/ha at seed filling stage
Date of sowing:	
Date of harvesting:	
Source of technology:	IIPR Kanpur
Characteristics of technology:	
Name of Crop/Enterprises:	Chickpea
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

OFT-10

Name of Discipline	Plant Protection
Title of on-farm trial:	Assessment of IPM Module for the root aphid management in irrigated wheat
Year/Season:	2024 Kharif
Farming situation:	Rainfed
Problem diagnosis:	Low yield due to aphid infestation
Thematic area:	IPM
No of trials:	05
No. of farmers involved	05
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment/ refinement:	
T1 – Farmers Practice-	Cholopyriphos application
T2 –Recommended Practice-	Seed treatment with Imidachloprid 48 FS Thiomethoxam 25 WG@100gm/acre before first irrigation
T3- Recommended Practice-	Cholopyriphos application
Date of sowing:	
Date of harvesting:	
Source of technology:	IARI –Indore
Characteristics of technology:	
Name of Crop/Enterprises:	Soybean
Recommendations for Farmers	
Recommendations for Deptt. Personnel	
Feedback	

Information about Extension OFT: OFT-11

Title	Knowledge level and adoption behaviour of farmers towards organic farming
Season & Year	
Problem identified	Poor knowledge & adoption regarding organic farming
Thematic Area	Awareness
Farming situation	
Name of Technology Intervention under study	Farmers adopting to organic farming Practices
Farmers Practice	Farmers not adopting organic farming practices
No. of replication (Farmers)	90

Results / findings

Performance indicators/ parameters	Unit/ details
Knowledge level & Adoption Behavior of respondent. Constraints faced by the respondents	

Information about Extension OFT: OFT-12

Title	Awareness of Pradhan Mantri Krishi Sinchayee Yojana among Farmers.
Season & Year	
Problem identified	Poor awareness regarding importance of Pradhan Mantri Krishi Sinchayee Yojana
Thematic Area	Awareness
Farming situation	
Name of Technology Intervention under study	Farmers are adopting Pradhan Mantri Krishi Sinchayee yojana
Farmers Practice	Farmers are not aware Pradhan Mantri Krishi Sinchayee Yojan
No. of replication (Farmers)	90

Results / findings

Performance indicators/ parameters	Unit/ details
General scenario of the scheme. Awareness of the scheme. Opinion of the farmers	

Information about Home Science OFT: OFT-13

Title of on-farm trial:	Assessment of Bajra khichadi for Nutritional security among children and women.
Year/Season:	2024
Problem diagnosis:	Lack of awareness about bajra khichadi for nutritional security.
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional security.

No of trials:	05
No. of farmers/farm women involved	05
Type of OFT (Assessment/Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	HI -1659
T2 –Recommended Practice-	Hybrid Bajra
Source of technology:	
Characteristics of technology:	ICAR-CAZRI, Jodhpur & IIMR, Hyderabad
Name of Crop/Enterprises:	
Farming situation:	
Date of sowing:	
Date of harvesting:	
Recommendations for Farmers	
Recommendations for Dept. Personnel	
Feedback	

OFT-14

Title of on-farm trial:	Assessment of Aonla Fruit Seed remover for reducing drudgery of farm women.
Year/Season:	2024 Kharif
Problem diagnosis:	Drudgery while removing seed of Aonla
Thematic area: (Focus area in DFI and nutri smart initiatives)	Drudgery Reduction
No of trials:	05
No. of farmers/farm women involved	05
Type of OFT (Assessment/Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Manual seed removing by Knife.
T2 –Recommended Practice-	Improved Aonla Fruit Seed Remover
Source of technology:	TNAU, Coimbatore (Tamilnadu)
Characteristics of technology:	
Name of Crop/Enterprises:	
Farming situation:	Irrigated
Date of sowing:	
Date of harvesting:	
Recommendations for Farmers	
Recommendations for Dept. Personnel	
Feedback	

OFT-15

Title of on-farm trial:	Assessment of sorghum varieties SPH- 1820 and CSH- 30 for crop diversification
Year/Season:	2023 Rabi
Problem diagnosis:	Less production of miner millet
Thematic area: (Focus area in DFI and	Income generation

nutri smart initiatives)	
No of trials:	10
No. of farmers/farm women involved	10
Type of OFT (Assessment/Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Soybean
T2 –Recommended Practice-	Sorghum Variety SPH- 1820
T-3	Sorghum Variety CSH- 30
Source of technology:	Indian Institute of Millet Research (IIMR)
Characteristics of technology:	
Name of Crop/Enterprises:	
Farming situation:	Irrigated
Date of sowing:	
Date of harvesting:	
Recommendations for Farmers	
Recommendations for Dept. Personnel	
Feedback	

OFT-16

Title of on-farm trial:	Assessment of supplementation of drumstick leave powder to combat iron deficiency Anemia among adolescence girl
Year/Season:	2023 Rabi
Problem diagnosis:	A diet lacking in certain vitamins & minerals A diet consistently low in Iron, Folate
Thematic area: (Focus area in DFI and nutri smart initiatives)	Nutritional security
No of trials:	15
No. of farmers/farm women involved	15
Type of OFT (Assessment/Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Daily diet Without Supplementation
T2 –Recommended Practice-	Supplementation of Drumstick Powder
T-3	Supplementation of flower powder
Source of technology:	Bharathi L & Sindhu S., 2015, International Journal of current research .
Characteristics of technology:	
Name of Crop/Enterprises:	
Farming situation:	
Date of sowing:	
Date of harvesting:	

Recommendations for Farmers	
Recommendations for Dept. Personnel	
Feedback	

OFT-17

Title of on-farm trial:	Assessment of Value added products of Aonla for income generation of farm women
Year/Season:	2023 Rabi
Problem diagnosis:	Less use of linseed in daily life
Thematic area: (Focus area in DFI and nutri smart initiatives)	Value addition / income generation
No of trials:	15
No. of farmers/farm women involved	15
Type of OFT (Assessment/ Refinement):	Assessment
Details of technology selected for assessment:	
T1 – Farmers Practice-	Aonla Candy
T2 –Recommended Practice-	Aonla + Beet root mukhas
T-3	Aonla + Fennel seed mukhas
Source of technology:	
Characteristics of technology:	
Name of Crop/Enterprises:	
Farming situation:	
Date of sowing:	
Date of harvesting:	
Recommendations for Farmers	
Recommendations for Dept. Personnel

Frontline Demonstrations

Details of FLDs to be organized (Based on soil test analysis)

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
1.	Soybean	Varietal Evaluation	Soybean variety Raj Soya-24	Seed@75kg/ha	Kharif -2024	5	12	No. of pods, Days to Maturity, 100 Seed wt., Yield, B:C

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
2.	Chickpea	Varietal Evaluation	Chickpea variety RVG-204	Seed@75kg/ha	Rabi 2024-25	5	12	No. of pods, Days to Maturity, 100 seed wt., Yield, B:C
3.	Soybean	Integrated weed management	Sulfentrazone-ethyl @ 360 g a.i. g/ha (PE)	Herbicide Sulfentrazone ethyle	Kharif 2024	5	12	WCE, Weed count of sedges, yield B:C
4.	Demonstration of Bio-waste decomposer for quality organic product to enhance soil health	Crop Production - Natural Resource Management	Use of Bio waste decomposer 25 gm consortium sufficient to decompose farm waste in 30 days. Mass Multiplication :Mix 2 kg of jaggery in 200 litter of water in a container .	Bio waste decomposer 25 gm	Kharif - Rabi 2024. Round the year	10	25	Organic manure produced, Saving of Fertilizer, Organic carbon of soil, B:C
5.	Wheat	Integrated Weed Management	Haloxifen methyl Ester + Florasulam 40.85% WG @ 12.76 g ai/ha	Haloxifen methyl Ester + Florasulam 40.85% WG @ 12.76 g ai/ha	Rabi 2024	5	12	Local Check/ Farmer Practice: WCE, Yield and B:C
6.	Soybean	In situ moisture conservation in soybean	FIRBS Planting	Machine on custom hiring basis	Kharif 2024	4	10	Local Check/ Farmer Practice: Plant population, Number of nodules, pods per plants, seed index, yield and B:C
7.	Crop+ Enterprise	Integrated Farming System	Integrated Farming System(IFS) Module : Crop + Horticulture + Animal Husbandry	Bio- fertilizers as per need	Kharif - Rabi 2024. Round the year	5	12	Crop/ Animal produce/ Fish yield, SEY, System productivity, B:C in conventional farming
8.	Onion	IDM	Demonstration on fungicide for the management of purple blotch in onion	Pyraclostrobin 6.7 + Boscalid 26.7% SC 1 gram /litre of water	Rabi 2024-25	2	5	--do--

Sl. No.	Crop	Thematic area	Technology for demonstration	Critical inputs	Season and year	Area (ha)	No. of farmers/ demonstration	Parameters identified for performance evaluation
9.	Garlic	IPM	Demonstration on integrated pest management in garlic	Lambda cyhalothrin 5 % SC 100 ml /ha + Yellow sticky traps	Rabi 2024 -25	2	5	Local Check/ Farmer Practice
10.	Soybean	IPM	Demonstration of IPM module for the Stem fly management in soybean	Seed treatment with Thiomethoxam 30 %FS @10ml/kg seed and spray of Chlorantraniliprol e18.5% SC @ 150ml/ha	Kharif 2024	2	5	
11.	Maize	IPM	Demonstration of IPM practice for Fall armyworm control in Maize	Spinetoram 11.7% SC @ 0.5 ml/litre of water and Thiamethoxam 12.6% + lambda cyhalothrin 9.5% @ 0.25 ml/l of water	kharif -2024	2	5	Infected plant /m2, Number of caterpillar /infected plant randomly selected 5 plant, Yield, B:C
12.	Vegetables	Malnutrition	Nutritional Kitchen garden for minimizing malnutrition problem.	Hy. Varieties of vegetables.	Kharif -2024 and Rabi -2024	100 sq.m	12	Local Check/ Farmer Practice:
13.	Crop	Malnutrition	Wheat HI 1634 (Bio fortified)	Wheat HI 1634-Seed	Rabi-2024	0.2	10	Local Check/ Farmer Practice: HI-1544
14.	Amaranth seed	Nutritional Security	Wheat +Amaranth seed (8:2)	Amaranth seed	Rabi 2023	01 ha	10	Local Check/ Farmer Practice: Wheat
15.	Wheat	Income generation & nutritional Security of farm women & their family	Demonstration on wheat Variety HI - 8777	wheat Variety HI – 8777 Seed	2023 Rabi	01 ha	5	Local Check/ Farmer Practice: Wheat variety Lok-1
16.	Green leafy Vegetable	Nutritional security of Farmers family	Demonstration on Green leafy Roof nutritional Garden	Green leafy Seed	Around the year	200 sq m	10	Local Check/ Farmer Practice: Green leafy vegetable

Extension and Training activities under FLDs
